October 6, 2017

**Announcements**

**CCSG Submitted!**

Yale Cancer Center's Cancer Center Support Grant was officially submitted to the National Cancer Institute's Office of the Cancer Centers for review on September 25. I am incredibly proud of the hard work of our entire leadership team and our research program leaders; countless hours were dedicated to ensure our grant submission accurately reflects the outstanding science and clinical care at Yale Cancer Center and Smilow Cancer Hospital. I would especially like to thank Bob Garofalo and his team, Christine Holmberg, Christina Bates, Susan Silva, and Ashley McCaherty, and Adam Roshka and Michele Dingus in our business office for their extra attention and work on the grant. We now look ahead to preparations for our site visit with weekly reviews of our presentations and full mock visits scheduled. The site visit has been confirmed with the NCI for Thursday, January 25, 2018.

**Lieping Chen Receives Alpert Prize**

I am proud to announce that Lieping Chen, PhD, Co-Director of our Cancer Immunology Program and the United Technologies Corporation Professor in Cancer Research and Professor of Immunobiology, Dermatology, and Medicine, has been presented with the 2017 Warren Alpert Foundation Prize for transformative discoveries in the field of cancer immunology. Lieping is one of five scientists to receive the award this year. Collectively, their work has led to the development of effective immune therapies for several types of cancer. The honorees were recognized
at a day-long symposium yesterday at Harvard Medical School. They will share a $500,000 prize.

Annual Conclave Award Nominations
Yale Cancer Center is pleased to announce our call for nominations for our annual awards in the areas of excellence in research and clinical care. Each award will be announced at the Yale Cancer Center Conclave in January. The nomination deadline for YCC awards is Friday, October 27.

Yale Cancer Center Research Prizes: Research Prizes will be awarded in support of excellence in the areas of

Mystery of breast cancer risk gene solved, 20 years after its discovery

Backed by Yale Cancer Center research, FDA approves new immunotherapy drug for stomach cancer

Read More >>

Five things everyone should know about breast cancer

Read More >>
basic science, clinical research, translational research, and cancer prevention and control. Awards will be chosen in each area to recognize a paper that is considered to have had the greatest impact on the field this year. The applicant must be a current member of the Cancer Center and science in the publication must be cancer-focused. Please submit a PDF of your best publication (publication date from October 2016 to October 2017). To be eligible you must be either the first or last author of the publication. Email your publication to Anna Raso.

Yale Cancer Center Award for Clinical Excellence:
This award will be given to the physician who best exemplifies excellence in clinical care including super clinical skills, use of a patient- and family-centered approach to care, and inclusion of a multi-disciplinary care model. Nominee must be a current member of Yale Cancer Center. Please nominate yourself or a peer and send a brief nomination letter (one-page maximum) to Anna Raso.

Yale Cancer Center Lifetime Achievement Award:
Yale Cancer Center recognizes the achievements of one of our senior members through our annual Lifetime Achievement award. Please send nomination suggestions for the award to Anna Raso.

Ruth McCorkle Oncology Advanced Practice Provider Award: This annual award from Yale Cancer Center/Smilow Cancer Hospital recognizes the contributions of our Nurse Practitioner and Physician Assistant colleagues who contribute so much to oncology patient care. Please consider nominating yourself or a colleague for this award. Nominations are due for the Ruth McCorkle Award to Cathy Lyons by December 1. Nomination Form >>

Employee Profile: Sherri Storms

Yale Cancer Center and Smilow Cancer Hospital's Dr. Daniel Petrylak recently presented findings from the RANGE trial, reporting that the combination of docetaxel and ramucirumab may be an effective therapy for metastatic urothelial cancer. This treatment led to a doubling in the time it took for a patient's tumor to progress, and the side effects were well tolerated.
As a Nurse Coordinator in the Breast Center at Smilow Cancer Hospital, Sherri Storms, MSN, RN, RN-BC, CBCN, meets with patients who are newly diagnosed with breast cancer and helps them to navigate and manage their care. Working closely with the various disciplines, Sherri ensures that patients are comfortable with their team, and fully understand the treatments they will receive. Although she has been in this role for just under seven years, she has over 30 years of experience in nursing and critical care and management experience.

"I started my career in oncology, and plan to finish in oncology. Working with this patient population and their families is so rewarding," said Sherri. "We follow patients throughout their care and make sure they are following up on appointments. I am still in touch with one of the first breast cancer patients I ever worked with; it's an amazing field to be able to say that."

Sherri also co-facilitates one of the Breast Cancer Support Groups available at Smilow. They recently launched a monthly patient education series where guest speakers are invited to talk on a specific area of interest for patients. This month features a discussion on genetic counseling on October 10th. Sherri commented, "I believe we have a world class team of doctors, nurses and staff here at the Breast Center, who all work together to put the needs of the patient first."

Camille Servodidio, Program Manager, Women's Oncology Services, commented, "Sherri is a consummate nursing professional and is dually certified in breast care (CBCN) and oncology nursing (OCN). She is compassionate and has the ability to be fully present as she actively listens and coordinates a personal plan of care for our breast cancer patients."

In honor of Breast Cancer Awareness Month, meet Marjorie, a breast and cervical cancer survivor who was treated at the Breast Center at Smilow.

"My mission is to be an inspiration to my family, my members, and the whole universe," Marjorie said. "Even though we don't win, we don't have to lose. That means you must not give up. We shall not be defeated. We have to keep fighting. That is the story of my life as a two-time cancer survivor."

Jeffrey Townsend, of the Yale School of Public Health and Yale Cancer Center, was recently appointed to the endowed Elihu Professorship in Biostatistics.

"Townsend's appointment was a coup for public health," said Paul Cleary, former dean and the Anna M.R. Lauder Professor of Public Health.
#OOTBTHANKS

#OOTB: Michele Messina

YCC #OUTOFTHEBLUETHANKS recently recognized senior administrative assistant Michele Messina for her tremendous contribution over the last few years to the coordination of the Physician Scientist Fast Track program. Organizing the interviews for nearly 30 candidates, Michele exemplified the hard work and dedication necessary to keep the program running smoothly. Combining that with her humor and energy, Michele made this program enjoyable to all involved. Thank you, Michele!

In celebration of World Cancer Research Day, we are highlighting some of the amazing science occurring at Yale Cancer Center! These researchers are dedicating their careers towards fighting cancer, and new discoveries are being made every day in these labs and many others. #WorldCancerResearchDay

Clockwise from top left: Dr. Donald Engleman, who is studying how to use cancer's metabolism as a weapon against itself; Dr. Sarah Mougalian, who is developing a text message system for checking in on patients; Dr. Lajos Pusztai, who is spearheading two new clinical trials for triple-negative breast cancer; and Dr. Kathryn Ferguson, who is attempting to understand the workings of EGFR, a protein implicated in many different cancer types.

September is Blood Cancer Awareness Month. Blood cancer comes in multiple forms, including leukemia, lymphoma, and myeloma, and it affects almost 1.3 million
#OOTB: Laurene Goode-Gade
YCC #OUTOFTHEBLUETHANKS recently recognized senior administrative assistant Laurene Goode-Gade after she took time out of her day to graciously assist her colleagues with Workday issues. Laurene's peers expressed how her help, not only saved them from countless hours of frustration, but also improved their daily work productivity. Thank you, Laurene!

Yale Cancer Center's #OUTOFTHEBLUETHANKS program is a staff recognition initiative to show appreciation to employees who have exemplified an above-and-beyond effort or an outstanding contribution to the team. All nominations should be submitted to the Director's Office c/o Anna Raso.
