American Association for Cancer Research (AACR) Annual Meeting Presentations

Author: Nathan R Fons
Session Type: Poster Session
Location: Section 32
Session Time: Monday, April 18, 2016, 1:00 pm - 5:00 pm
Publishing Title: Development of a novel gene targeting and clone screening platform to engineer common pediatric glioma mutations into model cell lines

Author: Johannes M Ludwig
Session Type: Poster Session
Location: Section 15
Session Time: Monday, April 18, 2016, 1:00 pm - 5:00 pm
Publishing Title: SW43-DOX - a potential new targeted drug for the treatment of liver malignancies - An in vitro evaluation of receptor affinity and tumor internalization

Author: Joann B. Sweasy
Session Type: Poster Session
Location: Section 5
Session Time: Tuesday, April 19, 2016, 1:00 pm - 5:00 pm
Publishing Title: A Neil1 DNA glycosylase germline variant induces genomic instability and cellular transformation

Author: Goran Micevic
Session Type: Poster Session
Location: Section 4
Session Time: Tuesday, April 19, 2016, 8:00 am - 12:00 noon
Publishing Title: Global DNA hypomethylation is an important feature of melanoma
Author: JaSeok Peter Koo  
Session Type: Poster Session  
Location: Section 26  
Session Time: Monday, April 18, 2016, 1:00 pm - 5:00 pm  
Publishing Title: *Anti-cancer efficacy of the combination with immunomodulatory antibodies and MEK inhibitor for Kras mutation and p53 knockout driven lung cancer*

Author: Nathaniel D Robinson  
Session Type: Poster Session  
Location: Section 35  
Session Time: Tuesday, April 19, 2016, 1:00 pm - 5:00 pm  
Publishing Title: *Development and validation of a novel IDH1-mutant astrocyte cell line as a model for high-grade gliomas*

Author: Tracy M. Layne  
Session Type: Poster Session  
Location: Section 36  
Session Time: Monday, April 18, 2016, 8:00 am - 12:00 noon  
Publishing Title: *Prostate cancer risk factor profiles in black and white men in the NIH-AARP Diet and Health Study*

Author: Daniel I Jacobs  
Session Type: Poster Session  
Location: Section 2  
Session Time: Monday, April 18, 2016, 8:00 am - 12:00 noon  
Publishing Title: *A translational investigation of piRNAs in glioblastoma multiforme*

Author: Cristiana Pineda  
Session Type: Minisymposium  
Session Time: Tuesday, April 19, 2016, 3:00 pm - 5:00 pm  
Presentation Number: 4385  
Publishing Title: *Live-imaging the interface between homeostasis and cancer initiation*
Author: Alexander O. Vortmeyer
Session Type: Poster Session
Location: Section 28
Session Time: Monday, April 18, 2016, 1:00 pm - 5:00 pm
Publishing Title: Kidneys of VHL patients reveal the origin of renal clear cell carcinoma

Author: Ranjit Bindra
Session Type: Poster Session
Location: Section 19
Session Time: Monday, April 18, 2016, 1:00 pm - 5:00 pm
Publishing Title: A high-throughput, high-content assay for the discovery of new inhibitors of DNA double-strand break repair

Author: Audrey L Turchick
Session Type: Poster Session
Location: Section 3
Session Time: Tuesday, April 19, 2016, 8:00 am - 12:00 noon
Publishing Title: Targeting DNA repair deficient cancers with the cell-penetrating autoantibody 3E10

Author: Jamie T Goodner-Bingham
Session Type: Poster Session
Location: Section 1
Session Time: Monday, April 18, 2016, 8:00 am - 12:00 noon
Publishing Title: Exploring the role of the ovarian stromal extracellular matrix in early tumor development

Author: Gulden Menderes
Session Type: Poster Session
Location: Section 5
Session Time: Sunday, April 17, 2016, 1:00 pm - 5:00 pm
Publishing Title: Mutational landscape of uterine and ovarian carcinosarcomas reveals new recurrently-mutated histone core genes as drivers of epithelial-mesenchymal transition
Author: Irvin Modlin  
Session Type: Poster Session  
Location: Section 21  
Session Time: Tuesday, April 19, 2016, 8:00 am - 12:00 noon  
Publishing Title: Translational clinical utility of a circulating neuroendocrine tumor transcript measurement

Author: Ayesha B. Alvero  
Session Type: Poster Session  
Location: Section 33  
Session Time: Tuesday, April 19, 2016, 1:00 pm - 5:00 pm  
Publishing Title: Targeting tumor-associated neovasculature for delivery of optical enhancers detects ovarian cancer micrometastasis

Author: Yuhong Lu  
Session Type: Poster Session  
Location: Section 32  
Session Time: Sunday, April 17, 2016, 1:00 pm - 5:00 pm  
Publishing Title: Hypoxia-induced EGFR tyrosine kinase inhibitor resistance is associated with epithelial-mesenchymal transition in NSCLC

Author: Anisha Gupta  
Session Type: Poster Session  
Location: Section 6  
Session Time: Monday, April 18, 2016, 8:00 am - 12:00 noon  
Publishing Title: Chemically modified gamma PNAs targeting oncomiR-210 as a potential anticancer therapy

Author: Faye A. Rogers  
Session Type: Poster Session  
Location: Section 18  
Session Time: Wednesday, April 20, 2016, 8:00 am - 12:00 noon  
Publishing Title: Gene-targeted apoptosis as a novel therapeutic strategy for HER2-positive breast cancer
