NOTE language:en-us

NOTE Confidence: 0.756528791538462

00:00:00.000 --> 00:00:01.308 Today I'm Dana Dunn.

NOTE Confidence: 0.756528791538462

00:00:01.308 --> 00:00:03.270 I Co direct the series with

NOTE Confidence: 0.756528791538462

00:00:03.340 --> 00:00:04.840 Doctor Andreas Martin,

NOTE Confidence: 0.756528791538462

00:00:04.840 --> 00:00:06.555 who we're going to hear from today.

NOTE Confidence: 0.756528791538462

00:00:06.560 --> 00:00:09.476 He's a professor in the Department

NOTE Confidence: 0.756528791538462

00:00:09.480 --> 00:00:11.538 of Child Psychiatry and an associate

NOTE Confidence: 0.756528791538462

00:00:11.538 --> 00:00:13.960 in the Teaching and Learning Center.

NOTE Confidence: 0.756528791538462

00:00:13.960 --> 00:00:16.970 He's been running a series on teaching

NOTE Confidence: 0.756528791538462

00:00:16.970 --> 00:00:19.515 in the classroom setting as well

NOTE Confidence: 0.756528791538462

00:00:19.515 --> 00:00:22.884 as these last three sessions aimed

NOTE Confidence: 0.756528791538462

00:00:22.884 --> 00:00:27.394 on scholarly work for everyone.

NOTE Confidence: 0.756528791538462

00:00:27.400 --> 00:00:29.520 And he's uniquely not uniquely,

NOTE Confidence: 0.756528791538462

00:00:29.520 --> 00:00:32.873 but certainly well suited to deliver

NOTE Confidence: 0.756528791538462

00:00:32.873 --> 00:00:35.846 this content as he was Editor in
NOTE Confidence: 0.756528791538462

00:00:35.846 --> 00:00:38.667 Chief for the Journal of Child and
NOTE Confidence: 0.756528791538462

00:00:38.667 --> 00:00:41.640 Adolescent Psychiatry for almost 10 years.
NOTE Confidence: 0.756528791538462

00:00:41.640 --> 00:00:42.960 And is really.
NOTE Confidence: 0.756528791538462

00:00:42.960 --> 00:00:45.264 It's not just his kind of one off
NOTE Confidence: 0.756528791538462

00:00:45.264 --> 00:00:47.974 opinion on abstract writing and poster
NOTE Confidence: 0.756528791538462

00:00:47.974 --> 00:00:50.038 preparation and manuscript writing,
NOTE Confidence: 0.756528791538462

00:00:50.040 --> 00:00:52.680 but he's really done the work
NOTE Confidence: 0.756528791538462

00:00:52.680 --> 00:00:55.108 and reviewed and and seen what
NOTE Confidence: 0.756528791538462

00:00:55.108 --> 00:00:56.476 works and what doesn't work and
NOTE Confidence: 0.756528791538462

00:00:56.476 --> 00:00:57.720 what editors are looking for.
NOTE Confidence: 0.756528791538462

00:00:57.720 --> 00:01:00.240 So we're really excited to have
NOTE Confidence: 0.756528791538462

00:01:00.240 --> 00:01:02.720 him today and we'll I'll monitor
NOTE Confidence: 0.756528791538462

00:01:02.720 --> 00:01:04.360 the chat for questions.
NOTE Confidence: 0.756528791538462

00:01:04.360 --> 00:01:07.249 But also if you want to ask something just
NOTE Confidence: 0.756528791538462

00:01:07.249 --> 00:01:09.608 like raise your hand or interrupt if I don't,

NOTE Confidence: 0.756528791538462
00:01:09.608 --> 00:01:10.518 if I don't see you.
NOTE Confidence: 0.756528791538462
00:01:10.520 --> 00:01:12.120 Andrea,
NOTE Confidence: 0.756528791538462
00:01:12.120 --> 00:01:13.350 is there anything else you want
NOTE Confidence: 0.756528791538462
00:01:13.350 --> 00:01:14.839 to add in a introductory way
NOTE Confidence: 0.756528791538462
00:01:14.839 --> 00:01:16.079 before we get started?
NOTE Confidence: 0.954655150909091
00:01:16.880 --> 00:01:18.758 Just to say that although all
NOTE Confidence: 0.954655150909091
00:01:18.758 --> 00:01:20.360 my computer controls look good,
NOTE Confidence: 0.954655150909091
00:01:20.360 --> 00:01:21.280 I don't have the video,
NOTE Confidence: 0.954655150909091
00:01:21.280 --> 00:01:23.040 so I can't see you.
NOTE Confidence: 0.954655150909091
00:01:23.040 --> 00:01:25.234 So any one of you, which I'd
NOTE Confidence: 0.954655150909091
00:01:25.234 --> 00:01:26.473 love to see you but I can't.
NOTE Confidence: 0.95729486
00:01:26.480 --> 00:01:27.640 They all look really good.
NOTE Confidence: 0.95729486
00:01:27.640 --> 00:01:28.408 Everybody, I don't know,
NOTE Confidence: 0.95729486
00:01:28.408 --> 00:01:29.560 I saw them briefly.
NOTE Confidence: 0.95729486
00:01:29.560 --> 00:01:31.320 So the point is that, Dana,
NOTE Confidence: 0.813724405714286

00:01:31.320 --> 00:01:33.434 you will be my eyes as to
NOTE Confidence: 0.813724405714286

00:01:33.440 --> 00:01:35.080 students and at any point.
NOTE Confidence: 0.813724405714286

00:01:35.080 --> 00:01:37.500 But my hope is that we'll have some
NOTE Confidence: 0.813724405714286

00:01:37.500 --> 00:01:38.880 time at the end for discussion.
NOTE Confidence: 0.87826616

00:01:42.760 --> 00:01:47.520 OK, good. Good to go. Good to go. OK.
NOTE Confidence: 0.950980125

00:01:47.520 --> 00:01:50.880 Hello everyone and thank you for for joining.
NOTE Confidence: 0.950980125

00:01:50.880 --> 00:01:52.616 This is a topic that I'm very
NOTE Confidence: 0.950980125

00:01:52.616 --> 00:01:53.956 passionate about, having struggled
NOTE Confidence: 0.950980125

00:01:53.956 --> 00:01:56.464 with many rejections and lots of
NOTE Confidence: 0.950980125

00:01:56.464 --> 00:01:58.738 heartache in publishing and eventually
NOTE Confidence: 0.950980125

00:01:58.738 --> 00:02:01.480 seeing the great joy of publishing,
NOTE Confidence: 0.950980125

00:02:01.480 --> 00:02:03.826 so hopefully I can share some
NOTE Confidence: 0.950980125

00:02:03.826 --> 00:02:06.680 of it that can help you. And
NOTE Confidence: 0.814096665

00:02:09.640 --> 00:02:11.120 no disclosures.
NOTE Confidence: 0.814096665

00:02:11.120 --> 00:02:14.360 I'm not paid by any entity,
NOTE Confidence: 0.814096665

00:02:14.360 --> 00:02:15.680 publishing or otherwise.

NOTE Confidence: 0.814096665

00:02:15.680 --> 00:02:17.996 And if you text that number,

NOTE Confidence: 0.814096665

00:02:18.000 --> 00:02:19.480 you can get your CME.

NOTE Confidence: 0.814096665

00:02:19.480 --> 00:02:21.420 I think that Linda's also

NOTE Confidence: 0.814096665

00:02:21.420 --> 00:02:23.800 gonna post it to the chat.

NOTE Confidence: 0.932651212857143

00:02:26.080 --> 00:02:28.236 So let's start with our learning objectives.

NOTE Confidence: 0.932651212857143

00:02:28.240 --> 00:02:31.208 What's the the hope that we like

NOTE Confidence: 0.932651212857143

00:02:31.208 --> 00:02:33.040 what we'll accomplish today?

NOTE Confidence: 0.932651212857143

00:02:33.040 --> 00:02:34.684 First, I wanna give you a

NOTE Confidence: 0.932651212857143

00:02:34.684 --> 00:02:36.200 sense of how editors think.

NOTE Confidence: 0.932651212857143

00:02:36.200 --> 00:02:39.350 What works and what doesn't work in

NOTE Confidence: 0.932651212857143

00:02:39.350 --> 00:02:41.763 a scholarly submission such that you

NOTE Confidence: 0.932651212857143

00:02:41.763 --> 00:02:43.744 can apply that knowledge in your own

NOTE Confidence: 0.932651212857143

00:02:43.744 --> 00:02:46.117 and be more likely to be successful.

NOTE Confidence: 0.90441868

00:02:48.200 --> 00:02:50.840 Second, embracing a growth mindset,

NOTE Confidence: 0.90441868

00:02:50.840 --> 00:02:52.120 which is what brings us

NOTE Confidence: 0.90441868

00:02:52.120 --> 00:02:53.400 all into this Yes series.
NOTE Confidence: 0.90441868

00:02:53.400 --> 00:02:56.552 Anyway, to appreciate the
NOTE Confidence: 0.90441868

00:02:56.552 --> 00:02:58.916 importance of rejection.
NOTE Confidence: 0.90441868

00:02:58.920 --> 00:03:00.255 Rejection is painful,
NOTE Confidence: 0.90441868

00:03:00.255 --> 00:03:03.370 but it is unnecessary step in the
NOTE Confidence: 0.90441868

00:03:03.452 --> 00:03:05.877 publication world and in life.
NOTE Confidence: 0.90441868

00:03:05.880 --> 00:03:08.564 So I we think that publication
NOTE Confidence: 0.90441868

00:03:08.564 --> 00:03:10.552 is a microcosm of life in that
NOTE Confidence: 0.90441868

00:03:10.552 --> 00:03:12.565 in that way you will experience
NOTE Confidence: 0.90441868

00:03:12.565 --> 00:03:13.953 rejection no matter what.
NOTE Confidence: 0.827786333076923

00:03:16.080 --> 00:03:18.649 I'm gonna illustrate key points in organizing
NOTE Confidence: 0.827786333076923

00:03:18.649 --> 00:03:21.118 and writing a paper for submission.
NOTE Confidence: 0.827786333076923

00:03:21.120 --> 00:03:23.478 And finally I'm gonna give you
NOTE Confidence: 0.827786333076923

00:03:23.478 --> 00:03:25.640 some familiarity with a couple,
NOTE Confidence: 0.827786333076923

00:03:25.640 --> 00:03:28.220 four or five useful software
NOTE Confidence: 0.827786333076923

00:03:28.220 --> 00:03:30.800 applications that are quite handy,

NOTE Confidence: 0.827786333076923
00:03:30.800 --> 00:03:33.175 if not life saving when
NOTE Confidence: 0.827786333076923
00:03:33.175 --> 00:03:35.075 writing a scholarly paper.
NOTE Confidence: 0.827786333076923
00:03:35.080 --> 00:03:37.000 So those are the learning objectives.
NOTE Confidence: 0.827786333076923
00:03:37.000 --> 00:03:38.920 My outline is pretty straightforward.
NOTE Confidence: 0.827786333076923
00:03:38.920 --> 00:03:41.320 We're going to start with writing.
NOTE Confidence: 0.827786333076923
00:03:41.320 --> 00:03:44.840 So preparing A manuscript,
NOTE Confidence: 0.827786333076923
00:03:44.840 --> 00:03:47.960 second, submitting your work,
NOTE Confidence: 0.827786333076923
00:03:47.960 --> 00:03:50.832 dear editor, and finally the Charles
NOTE Confidence: 0.827786333076923
00:03:50.832 --> 00:03:52.472 and tribulations of a paper.
NOTE Confidence: 0.827786333076923
00:03:52.480 --> 00:03:55.679 What happens in the process of revision,
NOTE Confidence: 0.827786333076923
00:03:55.680 --> 00:03:57.012 rejection and beyond,
NOTE Confidence: 0.827786333076923
00:03:57.012 --> 00:04:00.120 and seeing this as just part of
NOTE Confidence: 0.827786333076923
00:04:00.213 --> 00:04:02.480 the life cycle of a publication.
NOTE Confidence: 0.933863689
00:04:04.560 --> 00:04:06.240 So that's a menu.
NOTE Confidence: 0.933863689
00:04:06.240 --> 00:04:09.293 So let's get started one writing a
NOTE Confidence: 0.933863689

00:04:09.293 --> 00:04:11.958 manuscript, preparing it for submission.

NOTE Confidence: 0.933863689

00:04:11.960 --> 00:04:14.744 And what I'll do here is talk about

NOTE Confidence: 0.933863689

00:04:14.744 --> 00:04:16.528 the mechanics, but also something that

NOTE Confidence: 0.933863689

00:04:16.528 --> 00:04:18.160 probably we don't talk enough about,

NOTE Confidence: 0.933863689

00:04:18.160 --> 00:04:19.960 which is the mentalnix.

NOTE Confidence: 0.933863689

00:04:19.960 --> 00:04:22.424 I invented that word and I'm a psychiatrist.

NOTE Confidence: 0.933863689

00:04:22.424 --> 00:04:23.680 I'd like to think about these things.

NOTE Confidence: 0.933863689

00:04:23.680 --> 00:04:25.880 Forgive me of getting started,

NOTE Confidence: 0.933863689

00:04:25.880 --> 00:04:28.680 but I actually think that the mental

NOTE Confidence: 0.933863689

00:04:28.680 --> 00:04:31.858 element of writing is critical in ways

NOTE Confidence: 0.933863689

00:04:31.858 --> 00:04:35.119 that it's critical for elite athletes.

NOTE Confidence: 0.933863689

00:04:35.120 --> 00:04:36.680 If your brain is not in the game,

NOTE Confidence: 0.933863689

00:04:36.680 --> 00:04:39.720 it doesn't matter how good your technique is.

NOTE Confidence: 0.933863689

00:04:39.720 --> 00:04:43.113 So what do I mean by these mental mix?

NOTE Confidence: 0.933863689

00:04:43.120 --> 00:04:44.340 So this is the photograph

NOTE Confidence: 0.933863689

00:04:44.340 --> 00:04:46.102 that we took of you. Yes, you.

NOTE Confidence: 0.933863689

00:04:46.102 --> 00:04:47.999 And we caught you the other day.

NOTE Confidence: 0.933863689

00:04:48.000 --> 00:04:50.550 And this is what you look like when your

NOTE Confidence: 0.933863689

00:04:50.550 --> 00:04:53.800 chair or your boss or someone said, you know,

NOTE Confidence: 0.933863689

00:04:53.800 --> 00:04:56.188 you'd better start writing and you were like,

NOTE Confidence: 0.933863689

00:04:56.188 --> 00:04:57.480 what the hell? Me publish.

NOTE Confidence: 0.933863689

00:04:57.480 --> 00:04:59.400 Impossible. No, I can't do it.

NOTE Confidence: 0.933863689

00:04:59.400 --> 00:05:00.640 I'm so scared. It's terrible.

NOTE Confidence: 0.933863689

00:05:00.640 --> 00:05:01.284 It's terrible.

NOTE Confidence: 0.933863689

00:05:01.284 --> 00:05:01.928 It's terrible.

NOTE Confidence: 0.933863689

00:05:01.928 --> 00:05:04.839 But then when we took a panoramic view,

NOTE Confidence: 0.933863689

00:05:04.840 --> 00:05:06.240 this is what we saw.

NOTE Confidence: 0.933863689

00:05:06.240 --> 00:05:09.236 And you can see yourself in there,

NOTE Confidence: 0.933863689

00:05:09.240 --> 00:05:10.904 that you're not alone.

NOTE Confidence: 0.933863689

00:05:10.904 --> 00:05:12.568 Anyone can identify where

NOTE Confidence: 0.933863689

00:05:12.568 --> 00:05:14.119 that photograph was taken.

NOTE Confidence: 0.6706807475

00:05:16.800 --> 00:05:17.560 Hold on, it's moving.
NOTE Confidence: 0.87696258

00:05:20.560 --> 00:05:22.520 Anyone going once, Going twice.
NOTE Confidence: 0.81092425222222

00:05:25.080 --> 00:05:26.556 OK, now you need to work up the crowd.
NOTE Confidence: 0.81092425222222

00:05:26.560 --> 00:05:27.600 Remember, I can't see them.
NOTE Confidence: 0.94532861444444

00:05:28.160 --> 00:05:31.472 I know. Well, I think that they're trying to.
NOTE Confidence: 0.94532861444444

00:05:31.480 --> 00:05:33.111 It's like kind of the worldal where
NOTE Confidence: 0.94532861444444

00:05:33.111 --> 00:05:34.950 you see a a screen view and then
NOTE Confidence: 0.94532861444444

00:05:34.950 --> 00:05:36.571 you have to guess a country and
NOTE Confidence: 0.94532861444444

00:05:36.571 --> 00:05:38.475 then you see how far away you are.
NOTE Confidence: 0.797034462857143

00:05:39.760 --> 00:05:41.517 There's a big hint and a flag.
NOTE Confidence: 0.797034462857143

00:05:41.520 --> 00:05:43.472 Is this in Mexico City? Yes.
NOTE Confidence: 0.797034462857143

00:05:43.472 --> 00:05:47.408 And the winner is Chelsea. Chelsea.
NOTE Confidence: 0.797034462857143

00:05:47.408 --> 00:05:49.931 Yeah, that's Mexico City. El.
NOTE Confidence: 0.797034462857143

00:05:49.931 --> 00:05:51.437 So, Carlo, the flag of Mexico,
NOTE Confidence: 0.797034462857143

00:05:51.440 --> 00:05:53.640 And why did I put in Mexico City?
NOTE Confidence: 0.797034462857143

00:05:53.640 --> 00:05:54.798 Because that's where I come from.

NOTE Confidence: 0.797034462857143
00:05:54.800 --> 00:05:56.364 That's my native city.
NOTE Confidence: 0.797034462857143
00:05:56.364 --> 00:05:58.946 So my me and my 25,000,000 best
NOTE Confidence: 0.797034462857143
00:05:58.946 --> 00:06:00.198 friends welcome you there.
NOTE Confidence: 0.797034462857143
00:06:00.200 --> 00:06:02.120 Anytime voted best travel
NOTE Confidence: 0.797034462857143
00:06:02.120 --> 00:06:04.040 destination of the world,
NOTE Confidence: 0.797034462857143
00:06:04.040 --> 00:06:05.360 actually by the New York Times.
NOTE Confidence: 0.797034462857143
00:06:05.360 --> 00:06:06.288 It's wonderful.
NOTE Confidence: 0.797034462857143
00:06:06.288 --> 00:06:07.680 Anyway, you see,
NOTE Confidence: 0.797034462857143
00:06:07.680 --> 00:06:10.432 all of those people are afraid of publishing
NOTE Confidence: 0.797034462857143
00:06:10.432 --> 00:06:12.710 and they're having a support group
NOTE Confidence: 0.797034462857143
00:06:12.710 --> 00:06:14.996 because everybody is afraid to publish.
NOTE Confidence: 0.797034462857143
00:06:15.000 --> 00:06:16.464 So we could spend the whole
NOTE Confidence: 0.797034462857143
00:06:16.464 --> 00:06:17.440 time talking about this.
NOTE Confidence: 0.797034462857143
00:06:17.440 --> 00:06:18.560 I won't do that,
NOTE Confidence: 0.797034462857143
00:06:18.560 --> 00:06:20.240 but I will share something that,
NOTE Confidence: 0.797034462857143

00:06:20.240 --> 00:06:23.516 to me was a little bit of an epiphany.

NOTE Confidence: 0.797034462857143

00:06:23.520 --> 00:06:24.640 And that is it.

NOTE Confidence: 0.797034462857143

00:06:24.640 --> 00:06:26.040 In this day and age,

NOTE Confidence: 0.797034462857143

00:06:26.040 --> 00:06:29.334 all of us are spending lots of time on

NOTE Confidence: 0.797034462857143

00:06:29.334 --> 00:06:33.179 the computer keyboard on the right.

NOTE Confidence: 0.797034462857143

00:06:33.179 --> 00:06:35.078 And for some,

NOTE Confidence: 0.797034462857143

00:06:35.080 --> 00:06:37.480 especially those who were born

NOTE Confidence: 0.797034462857143

00:06:37.480 --> 00:06:39.880 before whatever year it was,

NOTE Confidence: 0.797034462857143

00:06:39.880 --> 00:06:43.240 those who are computer natives.

NOTE Confidence: 0.797034462857143

00:06:43.240 --> 00:06:45.340 Computer natives tend to think

NOTE Confidence: 0.797034462857143

00:06:45.340 --> 00:06:47.440 really well on a keyboard,

NOTE Confidence: 0.797034462857143

00:06:47.440 --> 00:06:49.169 and that's why you see young people

NOTE Confidence: 0.797034462857143

00:06:49.169 --> 00:06:50.679 taking notes all over the place.

NOTE Confidence: 0.797034462857143

00:06:50.680 --> 00:06:52.444 And some of you may not be quite so

NOTE Confidence: 0.797034462857143

00:06:52.444 --> 00:06:54.332 young and you do it, and God bless.

NOTE Confidence: 0.797034462857143

00:06:54.332 --> 00:06:56.600 But what I found is that for

NOTE Confidence: 0.797034462857143
00:06:56.684 --> 00:06:58.798 some of us of a certain age,
NOTE Confidence: 0.797034462857143
00:06:58.800 --> 00:07:01.800 I was born in 1966.
NOTE Confidence: 0.797034462857143
00:07:01.800 --> 00:07:04.920 I didn't see a computer till my 20s,
NOTE Confidence: 0.797034462857143
00:07:04.920 --> 00:07:08.161 and I learned all my thinking skills
NOTE Confidence: 0.797034462857143
00:07:08.161 --> 00:07:12.637 on the left with coffee and a pad of paper.
NOTE Confidence: 0.797034462857143
00:07:12.640 --> 00:07:14.400 And that's how I think,
NOTE Confidence: 0.797034462857143
00:07:14.400 --> 00:07:16.234 and it took me a long time,
NOTE Confidence: 0.797034462857143
00:07:16.240 --> 00:07:18.634 well into my time here at Yale,
NOTE Confidence: 0.797034462857143
00:07:18.640 --> 00:07:20.116 to realize that some of the
NOTE Confidence: 0.921329464285714
00:07:22.160 --> 00:07:24.615 writer's block or the difficulty
NOTE Confidence: 0.921329464285714
00:07:24.615 --> 00:07:26.560 with writing simply had to do
NOTE Confidence: 0.921329464285714
00:07:26.560 --> 00:07:28.000 with the instrument that I used.
NOTE Confidence: 0.921329464285714
00:07:28.000 --> 00:07:31.192 Once I moved to writing back again
NOTE Confidence: 0.921329464285714
00:07:31.192 --> 00:07:34.396 with pen on paper and then translating
NOTE Confidence: 0.921329464285714
00:07:34.396 --> 00:07:36.868 that into computer text by dictating
NOTE Confidence: 0.921329464285714

00:07:36.868 --> 00:07:39.759 it into some software that transcribe,
NOTE Confidence: 0.921329464285714

00:07:39.760 --> 00:07:42.076 my productivity just went sky high.
NOTE Confidence: 0.921329464285714

00:07:42.080 --> 00:07:44.670 And now I do everything that way
NOTE Confidence: 0.921329464285714

00:07:44.670 --> 00:07:46.560 because I found that not only
NOTE Confidence: 0.921329464285714

00:07:46.560 --> 00:07:48.798 hadn't I not learned the skills,
NOTE Confidence: 0.921329464285714

00:07:48.800 --> 00:07:50.564 but I wonder whether I have some
NOTE Confidence: 0.921329464285714

00:07:50.564 --> 00:07:52.194 kind of disability in I definitely
NOTE Confidence: 0.921329464285714

00:07:52.194 --> 00:07:53.554 have a disability in typing,
NOTE Confidence: 0.921329464285714

00:07:53.560 --> 00:07:56.038 for example, and I could never have
NOTE Confidence: 0.921329464285714

00:07:56.038 --> 00:07:58.080 my ideas go fast enough.
NOTE Confidence: 0.921329464285714

00:07:58.080 --> 00:08:01.398 My point here is not to
NOTE Confidence: 0.921329464285714

00:08:01.400 --> 00:08:05.080 priscillatize paper and pen,
NOTE Confidence: 0.921329464285714

00:08:05.080 --> 00:08:08.128 but rather for you to make a self
NOTE Confidence: 0.921329464285714

00:08:08.128 --> 00:08:10.964 inventory of how are you most
NOTE Confidence: 0.921329464285714

00:08:10.964 --> 00:08:12.938 comfortable writing in what place,
NOTE Confidence: 0.921329464285714

00:08:12.938 --> 00:08:14.853 in what space, in what instrument,

NOTE Confidence: 0.921329464285714
00:08:14.853 --> 00:08:17.030 Because you want to be able to
NOTE Confidence: 0.921329464285714
00:08:17.099 --> 00:08:19.500 produce in a unencumbered, fluid way.
NOTE Confidence: 0.921329464285714
00:08:19.500 --> 00:08:21.840 And it makes a huge difference.
NOTE Confidence: 0.921329464285714
00:08:21.840 --> 00:08:25.836 To me, this was absolutely transformative.
NOTE Confidence: 0.921329464285714
00:08:25.840 --> 00:08:28.480 OK, moving from the mental part,
NOTE Confidence: 0.921329464285714
00:08:28.480 --> 00:08:30.960 let's get to the mechanics.
NOTE Confidence: 0.921329464285714
00:08:30.960 --> 00:08:31.520 So
NOTE Confidence: 0.956668327857143
00:08:33.560 --> 00:08:35.324 you know when you're writing you
NOTE Confidence: 0.956668327857143
00:08:35.324 --> 00:08:37.757 need to have a good story to tell.
NOTE Confidence: 0.956668327857143
00:08:37.760 --> 00:08:40.585 You know there's no substitute for
NOTE Confidence: 0.956668327857143
00:08:40.585 --> 00:08:44.400 a good story or for good science.
NOTE Confidence: 0.956668327857143
00:08:44.400 --> 00:08:48.432 I put story here and I put it in
NOTE Confidence: 0.956668327857143
00:08:48.432 --> 00:08:52.380 the locations because your science
NOTE Confidence: 0.956668327857143
00:08:52.380 --> 00:08:57.280 will be the more readable, legible,
NOTE Confidence: 0.956668327857143
00:08:57.280 --> 00:08:59.880 sellable, engageable if it is
NOTE Confidence: 0.956668327857143

00:08:59.880 --> 00:09:03.320 told in a story like pattern.
NOTE Confidence: 0.956668327857143

00:09:03.320 --> 00:09:04.620 Obviously you don't need
NOTE Confidence: 0.956668327857143

00:09:04.620 --> 00:09:05.595 to create characters,
NOTE Confidence: 0.956668327857143

00:09:05.600 --> 00:09:07.154 but you need to tell a story.
NOTE Confidence: 0.956668327857143

00:09:07.160 --> 00:09:09.905 And we're going to go into some of the
NOTE Confidence: 0.956668327857143

00:09:09.905 --> 00:09:12.514 points that are helpful to tell a story,
NOTE Confidence: 0.956668327857143

00:09:12.520 --> 00:09:15.566 to tell a scientific story and
NOTE Confidence: 0.956668327857143

00:09:15.566 --> 00:09:18.726 that we editors look for because
NOTE Confidence: 0.956668327857143

00:09:18.726 --> 00:09:20.800 we know that we readers for them.
NOTE Confidence: 0.952296561818182

00:09:24.080 --> 00:09:25.388 So what are some of the
NOTE Confidence: 0.952296561818182

00:09:25.388 --> 00:09:26.520 things that we look for?
NOTE Confidence: 0.952296561818182

00:09:26.520 --> 00:09:29.120 So is this something new?
NOTE Confidence: 0.952296561818182

00:09:29.120 --> 00:09:30.064 Is this science new?
NOTE Confidence: 0.952296561818182

00:09:30.064 --> 00:09:31.999 And not everything needs to be super new.
NOTE Confidence: 0.952296561818182

00:09:32.000 --> 00:09:33.920 Replication is a basis of science.
NOTE Confidence: 0.952296561818182

00:09:33.920 --> 00:09:35.480 So is this a timely application?

NOTE Confidence: 0.952296561818182
00:09:35.480 --> 00:09:37.800 That's great.
NOTE Confidence: 0.952296561818182
00:09:37.800 --> 00:09:40.600 Is this true?
NOTE Confidence: 0.952296561818182
00:09:40.600 --> 00:09:42.100 Is it true?
NOTE Confidence: 0.952296561818182
00:09:42.100 --> 00:09:44.780 And once again, Dana,
NOTE Confidence: 0.952296561818182
00:09:44.780 --> 00:09:45.320 are you getting
NOTE Confidence: 0.777501325
00:09:49.080 --> 00:09:51.998 it's good, it's good, OK?
NOTE Confidence: 0.777501325
00:09:52.000 --> 00:09:54.835 Is it true? Is it internally valid?
NOTE Confidence: 0.777501325
00:09:54.840 --> 00:09:57.792 And note that I put true also in quotations,
NOTE Confidence: 0.777501325
00:09:57.800 --> 00:10:00.040 because we no matter how
NOTE Confidence: 0.777501325
00:10:00.040 --> 00:10:01.832 fancy scientists we are,
NOTE Confidence: 0.777501325
00:10:01.840 --> 00:10:03.400 we don't really own truth.
NOTE Confidence: 0.777501325
00:10:03.400 --> 00:10:05.760 We try to approximate truth,
NOTE Confidence: 0.777501325
00:10:05.760 --> 00:10:09.288 and one of the approximations is by
NOTE Confidence: 0.777501325
00:10:09.288 --> 00:10:12.826 paying attention to internal validity,
NOTE Confidence: 0.777501325
00:10:12.826 --> 00:10:16.010 to the things that make the
NOTE Confidence: 0.777501325

00:10:16.010 --> 00:10:19.027 machine of science the the the the
NOTE Confidence: 0.777501325

00:10:19.027 --> 00:10:21.673 machine of the paper do its job.
NOTE Confidence: 0.777501325

00:10:21.680 --> 00:10:24.291 We also looked at a different type
NOTE Confidence: 0.777501325

00:10:24.291 --> 00:10:26.656 of validity, external validity.
NOTE Confidence: 0.777501325

00:10:26.656 --> 00:10:29.080 Is it generalizable?
NOTE Confidence: 0.777501325

00:10:29.080 --> 00:10:31.385 Can this story be relevant
NOTE Confidence: 0.777501325

00:10:31.385 --> 00:10:34.355 to other than this very small
NOTE Confidence: 0.777501325

00:10:34.355 --> 00:10:37.200 group or sample or individuals?
NOTE Confidence: 0.777501325

00:10:37.200 --> 00:10:40.714 And finally, we looked at the ethics.
NOTE Confidence: 0.777501325

00:10:40.720 --> 00:10:41.376 In fact,
NOTE Confidence: 0.777501325

00:10:41.376 --> 00:10:43.672 the ethics are so important that I'm
NOTE Confidence: 0.777501325

00:10:43.672 --> 00:10:47.360 going to go into it in some detail later on.
NOTE Confidence: 0.777501325

00:10:47.360 --> 00:10:50.139 Bear in mind that editor only looks
NOTE Confidence: 0.777501325

00:10:50.139 --> 00:10:52.880 at your title and your abstract.
NOTE Confidence: 0.777501325

00:10:52.880 --> 00:10:54.650 They don't get into reading your
NOTE Confidence: 0.777501325

00:10:54.650 --> 00:10:56.200 whole article until much later,

NOTE Confidence: 0.777501325
00:10:56.200 --> 00:10:58.318 So early on in editors looking
NOTE Confidence: 0.777501325
00:10:58.318 --> 00:11:00.840 like a hawk of these issues.
NOTE Confidence: 0.777501325
00:11:00.840 --> 00:11:04.920 Novelty, internal and external validity,
NOTE Confidence: 0.777501325
00:11:04.920 --> 00:11:05.988 and the ethics.
NOTE Confidence: 0.777501325
00:11:05.988 --> 00:11:09.080 And if one of those doesn't pass muster,
NOTE Confidence: 0.777501325
00:11:09.080 --> 00:11:12.600 then the paper you know dies a quick death.
NOTE Confidence: 0.930058754444444
00:11:15.640 --> 00:11:17.878 So some of the elements of
NOTE Confidence: 0.930058754444444
00:11:17.878 --> 00:11:20.856 telling a story, well well,
NOTE Confidence: 0.930058754444444
00:11:20.856 --> 00:11:24.048 start with whetting the appetite of the
NOTE Confidence: 0.930058754444444
00:11:24.048 --> 00:11:27.038 reader with an engaging introduction.
NOTE Confidence: 0.930058754444444
00:11:27.040 --> 00:11:30.154 And here there actually are some
NOTE Confidence: 0.930058754444444
00:11:30.154 --> 00:11:33.801 very specific steps as to what makes
NOTE Confidence: 0.930058754444444
00:11:33.801 --> 00:11:36.753 an introduction work or not work.
NOTE Confidence: 0.930058754444444
00:11:36.760 --> 00:11:39.084 The 1st is that you start with
NOTE Confidence: 0.930058754444444
00:11:39.084 --> 00:11:40.080 stating a problem.
NOTE Confidence: 0.930058754444444

00:11:40.080 --> 00:11:44.440 This is what we know in this area of science,
NOTE Confidence: 0.9300587544444444

00:11:44.440 --> 00:11:48.040 and this is as far as the sign has taken us.
NOTE Confidence: 0.9300587544444444

00:11:48.040 --> 00:11:49.320 This is the background.
NOTE Confidence: 0.9737221

00:11:51.800 --> 00:11:55.320 But then you need to tell what is the gap,
NOTE Confidence: 0.9737221

00:11:55.320 --> 00:11:58.116 What is missing in that science.
NOTE Confidence: 0.9737221

00:11:58.120 --> 00:11:59.605 Often you will see introductions
NOTE Confidence: 0.9737221

00:11:59.605 --> 00:12:01.931 that go on and on and on and
NOTE Confidence: 0.9737221

00:12:01.931 --> 00:12:03.479 on and on about the problem,
NOTE Confidence: 0.9737221

00:12:03.480 --> 00:12:05.485 because they become mini literature
NOTE Confidence: 0.9737221

00:12:05.485 --> 00:12:08.312 reviews and you've already put your writer,
NOTE Confidence: 0.9737221

00:12:08.312 --> 00:12:10.360 your reader, to sleep.
NOTE Confidence: 0.9737221

00:12:10.360 --> 00:12:12.516 The problem should be one paragraph two.
NOTE Confidence: 0.9737221

00:12:12.520 --> 00:12:15.370 Maybe the gap should be one
NOTE Confidence: 0.9737221

00:12:15.370 --> 00:12:17.220 paragraph two maybe. So,
NOTE Confidence: 0.9737221

00:12:17.220 --> 00:12:21.000 in light of what we know in the literature.
NOTE Confidence: 0.9737221

00:12:21.000 --> 00:12:23.000 There is this particular hole,

NOTE Confidence: 0.9737221

00:12:23.000 --> 00:12:25.880 this gap, this is what's missing,

NOTE Confidence: 0.9737221

00:12:25.880 --> 00:12:29.160 and the hook is how you and your work in

NOTE Confidence: 0.9737221

00:12:29.243 --> 00:12:32.355 this paper are going to fill this gap.

NOTE Confidence: 0.9737221

00:12:32.360 --> 00:12:36.168 So this problem gap hook heuristic

NOTE Confidence: 0.9737221

00:12:36.168 --> 00:12:39.672 problem gap gap hook is incredibly

NOTE Confidence: 0.9737221

00:12:39.672 --> 00:12:42.680 valuable for the early parts of a paper,

NOTE Confidence: 0.9737221

00:12:42.680 --> 00:12:45.484 and I always follow them.

NOTE Confidence: 0.9737221

00:12:45.484 --> 00:12:47.318 And when you read your next paper,

NOTE Confidence: 0.9737221

00:12:47.320 --> 00:12:49.624 pay attention and see if the

NOTE Confidence: 0.9737221

00:12:49.624 --> 00:12:51.160 authors are doing that.

NOTE Confidence: 0.9737221

00:12:51.160 --> 00:12:51.742 But it already,

NOTE Confidence: 0.9737221

00:12:51.742 --> 00:12:52.518 as you can see,

NOTE Confidence: 0.9737221

00:12:52.520 --> 00:12:55.076 starts putting this story into play.

NOTE Confidence: 0.840493677777778

00:12:59.000 --> 00:13:00.554 You may have heard of the M

NOTE Confidence: 0.840493677777778

00:13:00.554 --> 00:13:01.656 rat format, We all know it,

NOTE Confidence: 0.840493677777778

00:13:01.656 --> 00:13:03.159 even if we don't know it's called that.
NOTE Confidence: 0.840493677777778

00:13:03.160 --> 00:13:06.640 But that's a introduction, methods,
NOTE Confidence: 0.840493677777778

00:13:06.640 --> 00:13:08.252 results and discussion format.
NOTE Confidence: 0.840493677777778

00:13:08.252 --> 00:13:10.670 M RAT and that's how all
NOTE Confidence: 0.840493677777778

00:13:10.747 --> 00:13:12.358 abstracts are written.
NOTE Confidence: 0.926584841764706

00:13:14.960 --> 00:13:16.736 This is just a reminder because
NOTE Confidence: 0.926584841764706

00:13:16.736 --> 00:13:18.695 one of our previous sessions was
NOTE Confidence: 0.926584841764706

00:13:18.695 --> 00:13:20.480 all about writing an abstract.
NOTE Confidence: 0.926584841764706

00:13:20.480 --> 00:13:22.640 So this is just a couple of highlights.
NOTE Confidence: 0.926584841764706

00:13:22.640 --> 00:13:25.152 But the methods now on a paper need
NOTE Confidence: 0.926584841764706

00:13:25.152 --> 00:13:28.319 to be touching on these same elements.
NOTE Confidence: 0.926584841764706

00:13:28.320 --> 00:13:30.600 Who were the folks, the individuals,
NOTE Confidence: 0.926584841764706

00:13:30.600 --> 00:13:35.080 the patients on involved in the experiment?
NOTE Confidence: 0.926584841764706

00:13:35.080 --> 00:13:37.280 What was done with them?
NOTE Confidence: 0.926584841764706

00:13:37.280 --> 00:13:40.718 To them? How was it done?
NOTE Confidence: 0.926584841764706

00:13:40.720 --> 00:13:41.920 Where was it done?

NOTE Confidence: 0.926584841764706
00:13:41.920 --> 00:13:43.120 When was it done?
NOTE Confidence: 0.926584841764706
00:13:43.120 --> 00:13:46.368 So the the basic W questions go
NOTE Confidence: 0.926584841764706
00:13:46.368 --> 00:13:48.861 into the methods and the IRB
NOTE Confidence: 0.926584841764706
00:13:48.861 --> 00:13:50.696 information back to the ethics
NOTE Confidence: 0.926584841764706
00:13:50.696 --> 00:13:52.560 also goes in the methods.
NOTE Confidence: 0.847334421
00:13:55.280 --> 00:13:57.140 Papers quickly sunk if there
NOTE Confidence: 0.847334421
00:13:57.140 --> 00:13:59.000 are questions on the IRB.
NOTE Confidence: 0.847334421
00:13:59.000 --> 00:14:00.508 If there's no IRB,
NOTE Confidence: 0.847334421
00:14:00.508 --> 00:14:02.266 there's no paper unless it
NOTE Confidence: 0.847334421
00:14:02.266 --> 00:14:03.518 doesn't involve human subject.
NOTE Confidence: 0.894487671333333
00:14:07.400 --> 00:14:10.312 The next part that are the results also
NOTE Confidence: 0.894487671333333
00:14:10.312 --> 00:14:12.797 have their dance steps if you will
NOTE Confidence: 0.894487671333333
00:14:12.800 --> 00:14:16.118 that are replicated from the abstract
NOTE Confidence: 0.894487671333333
00:14:16.120 --> 00:14:19.144 which is the pico mnemonic and you
NOTE Confidence: 0.894487671333333
00:14:19.144 --> 00:14:21.960 might remember this from epidemiology.
NOTE Confidence: 0.894487671333333

00:14:21.960 --> 00:14:28.542 So population exposure, comparison and or
NOTE Confidence: 0.894487671333333

00:14:28.542 --> 00:14:34.880 control outcome and time. So you know,
NOTE Confidence: 0.932197706

00:14:38.400 --> 00:14:45.550 just making it up here we had a group of
NOTE Confidence: 0.932197706

00:14:45.550 --> 00:14:50.560 20 adolescents with bipolar one disorder.
NOTE Confidence: 0.932197706

00:14:50.560 --> 00:14:52.600 Half of them were girls.
NOTE Confidence: 0.932197706

00:14:52.600 --> 00:14:56.429 We exposed half of them to a
NOTE Confidence: 0.932197706

00:14:56.429 --> 00:14:58.725 psychosocial intervention and the
NOTE Confidence: 0.932197706

00:14:58.725 --> 00:15:01.480 others to a weightless control.
NOTE Confidence: 0.932197706

00:15:01.480 --> 00:15:04.994 Our outcome was the measure of depression,
NOTE Confidence: 0.932197706

00:15:05.000 --> 00:15:09.760 XY and Z and our control group,
NOTE Confidence: 0.932197706

00:15:09.760 --> 00:15:12.252 the comparison group was just in the
NOTE Confidence: 0.932197706

00:15:12.252 --> 00:15:15.222 wait list but they didn't get the
NOTE Confidence: 0.932197706

00:15:15.222 --> 00:15:19.736 intervention the outcome the the result
NOTE Confidence: 0.932197706

00:15:19.736 --> 00:15:22.568 was X plus minus standard deviation
NOTE Confidence: 0.932197706

00:15:22.568 --> 00:15:25.520 compared to Y plus standard deviation and
NOTE Confidence: 0.932197706

00:15:25.520 --> 00:15:28.960 we did this study over X amount of time.

NOTE Confidence: 0.932197706

00:15:28.960 --> 00:15:31.876 So these are very basic elements,

NOTE Confidence: 0.932197706

00:15:31.880 --> 00:15:34.202 but in following them that this

NOTE Confidence: 0.932197706

00:15:34.202 --> 00:15:36.634 will start providing A rubric to

NOTE Confidence: 0.932197706

00:15:36.634 --> 00:15:38.876 writing a traditional database paper.

NOTE Confidence: 0.932197706

00:15:38.876 --> 00:15:42.096 And there should always be an echo

NOTE Confidence: 0.932197706

00:15:42.096 --> 00:15:44.424 between this in the results of

NOTE Confidence: 0.932197706

00:15:44.424 --> 00:15:46.920 your paper and in the abstract,

NOTE Confidence: 0.932197706

00:15:46.920 --> 00:15:49.503 and an echo of all of this

NOTE Confidence: 0.932197706

00:15:49.503 --> 00:15:51.880 the methods in the abstract.

NOTE Confidence: 0.932197706

00:15:51.880 --> 00:15:54.238 I If some of you attended,

NOTE Confidence: 0.932197706

00:15:54.240 --> 00:15:58.410 I'd like to to say and to think that a paper,

NOTE Confidence: 0.932197706

00:15:58.410 --> 00:16:01.920 an article is an extended abstract,

NOTE Confidence: 0.932197706

00:16:01.920 --> 00:16:03.201 an expanded abstract.

NOTE Confidence: 0.932197706

00:16:03.201 --> 00:16:04.909 So I highly recommend

NOTE Confidence: 0.932197706

00:16:04.909 --> 00:16:06.880 starting with your abstract,

NOTE Confidence: 0.932197706

00:16:06.880 --> 00:16:09.520 starting to put these high high
NOTE Confidence: 0.932197706

00:16:09.520 --> 00:16:12.320 value pieces on the puzzle,
NOTE Confidence: 0.932197706

00:16:12.320 --> 00:16:14.936 and once you have them you can start
NOTE Confidence: 0.932197706

00:16:14.936 --> 00:16:17.039 putting words and making it bigger.
NOTE Confidence: 0.932197706

00:16:17.040 --> 00:16:18.596 It'll be scientifically more
NOTE Confidence: 0.932197706

00:16:18.596 --> 00:16:21.600 sound that if you do the reverse.
NOTE Confidence: 0.932197706

00:16:21.600 --> 00:16:24.022 If you start with a writing the
NOTE Confidence: 0.932197706

00:16:24.022 --> 00:16:26.486 whole paper and then try to squeeze
NOTE Confidence: 0.932197706

00:16:26.486 --> 00:16:28.514 out an abstract out of it.
NOTE Confidence: 0.932197706

00:16:28.520 --> 00:16:30.635 Think of the abstract as a of the bones,
NOTE Confidence: 0.932197706

00:16:30.640 --> 00:16:32.800 as a skeleton of your paper.
NOTE Confidence: 0.932197706

00:16:32.800 --> 00:16:33.352 Much better,
NOTE Confidence: 0.932197706

00:16:33.352 --> 00:16:34.732 start with the bones and
NOTE Confidence: 0.932197706

00:16:34.732 --> 00:16:36.119 then start adding the flash.
NOTE Confidence: 0.75979581875

00:16:39.240 --> 00:16:41.865 Another way of summarizing the
NOTE Confidence: 0.75979581875

00:16:41.865 --> 00:16:45.608 M rat format is that we start

NOTE Confidence: 0.75979581875

00:16:45.608 --> 00:16:48.200 with the title and the abstract.

NOTE Confidence: 0.75979581875

00:16:48.200 --> 00:16:50.440 Again, this is important enough that we

NOTE Confidence: 0.75979581875

00:16:50.497 --> 00:16:52.800 spend a whole session talking about this,

NOTE Confidence: 0.75979581875

00:16:52.800 --> 00:16:55.752 the introduction which is the why of the

NOTE Confidence: 0.75979581875

00:16:55.752 --> 00:16:59.000 paper and which goes with this problem gap,

NOTE Confidence: 0.75979581875

00:16:59.000 --> 00:17:02.000 Huck method approach, the methods,

NOTE Confidence: 0.75979581875

00:17:02.000 --> 00:17:05.312 how it was done with all those W questions,

NOTE Confidence: 0.75979581875

00:17:05.320 --> 00:17:07.546 the results we just went over that

NOTE Confidence: 0.75979581875

00:17:07.546 --> 00:17:10.280 in a pico format. What was found

NOTE Confidence: 0.75979581875

00:17:10.280 --> 00:17:13.080 in the discussion is the So what?

NOTE Confidence: 0.75979581875

00:17:13.080 --> 00:17:15.998 You know, you found that, so now what?

NOTE Confidence: 0.75979581875

00:17:16.000 --> 00:17:17.875 The discussion is a little

NOTE Confidence: 0.75979581875

00:17:17.875 --> 00:17:19.000 bit more freestyle.

NOTE Confidence: 0.75979581875

00:17:19.000 --> 00:17:21.270 There isn't a nifty little

NOTE Confidence: 0.75979581875

00:17:21.270 --> 00:17:24.000 acronym that I can give you,

NOTE Confidence: 0.75979581875

00:17:24.000 --> 00:17:26.880 but you should strive to not be redundant.

NOTE Confidence: 0.75979581875

00:17:26.880 --> 00:17:29.160 To summarize, to provide the gestalt,

NOTE Confidence: 0.75979581875

00:17:29.160 --> 00:17:31.040 not to go to micro,

NOTE Confidence: 0.75979581875

00:17:31.040 --> 00:17:32.960 Definitely not put any numbers here.

NOTE Confidence: 0.75979581875

00:17:32.960 --> 00:17:35.725 All the numbers belong in the results

NOTE Confidence: 0.75979581875

00:17:35.725 --> 00:17:37.944 only you want to provide a view

NOTE Confidence: 0.75979581875

00:17:37.944 --> 00:17:40.198 of the forest and not the trees.

NOTE Confidence: 0.75979581875

00:17:40.200 --> 00:17:42.780 And you also want to be not so neutral and

NOTE Confidence: 0.75979581875

00:17:42.851 --> 00:17:45.435 so scientific that you don't take a stand.

NOTE Confidence: 0.75979581875

00:17:45.440 --> 00:17:47.800 You did the hard work, so take a stand.

NOTE Confidence: 0.75979581875

00:17:47.800 --> 00:17:49.720 You know this intervention is better

NOTE Confidence: 0.75979581875

00:17:49.783 --> 00:17:51.955 than this intervention was not better

NOTE Confidence: 0.75979581875

00:17:51.955 --> 00:17:54.036 than Just don't be mealy mouthed here.

NOTE Confidence: 0.75979581875

00:17:54.040 --> 00:17:55.759 Go for it.

NOTE Confidence: 0.75979581875

00:17:55.760 --> 00:17:57.600 Include the limitations so that

NOTE Confidence: 0.75979581875

00:17:57.600 --> 00:17:59.760 others don't point them to you.

NOTE Confidence: 0.75979581875
00:17:59.760 --> 00:18:02.052 First you If you point out
NOTE Confidence: 0.75979581875
00:18:02.052 --> 00:18:04.000 our sample size was low,
NOTE Confidence: 0.75979581875
00:18:04.000 --> 00:18:06.376 then the reviewer is going to have a harder
NOTE Confidence: 0.75979581875
00:18:06.376 --> 00:18:08.519 time saying their sample size was low.
NOTE Confidence: 0.75979581875
00:18:08.520 --> 00:18:10.380 When you already incorporated
NOTE Confidence: 0.75979581875
00:18:10.380 --> 00:18:12.240 that and addressed it.
NOTE Confidence: 0.75979581875
00:18:12.240 --> 00:18:14.320 What are your next steps?
NOTE Confidence: 0.75979581875
00:18:14.320 --> 00:18:16.280 And try to end on a strong note.
NOTE Confidence: 0.75979581875
00:18:16.280 --> 00:18:18.160 On a positive note,
NOTE Confidence: 0.75979581875
00:18:18.160 --> 00:18:21.999 you know these findings tell us that Boom,
NOTE Confidence: 0.75979581875
00:18:22.000 --> 00:18:22.416 you know,
NOTE Confidence: 0.75979581875
00:18:22.416 --> 00:18:23.040 go for it.
NOTE Confidence: 0.75979581875
00:18:23.040 --> 00:18:23.760 Be bold.
NOTE Confidence: 0.863025932857143
00:18:26.160 --> 00:18:31.074 As unrigid as the discussion format is,
NOTE Confidence: 0.863025932857143
00:18:31.080 --> 00:18:35.840 the references are the epitome.
NOTE Confidence: 0.863025932857143

00:18:35.840 --> 00:18:37.448 They epitomize rigidity.
NOTE Confidence: 0.863025932857143

00:18:37.448 --> 00:18:39.592 There's nothing as rigid
NOTE Confidence: 0.863025932857143

00:18:39.592 --> 00:18:42.039 as a reference list of A
NOTE Confidence: 0.911459066666667

00:18:44.320 --> 00:18:46.186 scholarly article,
NOTE Confidence: 0.911459066666667

00:18:46.186 --> 00:18:48.863 and for many of you I'm sure this
NOTE Confidence: 0.911459066666667

00:18:48.863 --> 00:18:50.416 is going to be redundant knowledge.
NOTE Confidence: 0.911459066666667

00:18:50.416 --> 00:18:52.880 For some of you it may be new,
NOTE Confidence: 0.911459066666667

00:18:52.880 --> 00:18:54.040 but in any event,
NOTE Confidence: 0.911459066666667

00:18:54.040 --> 00:18:56.241 you don't want to write a paper
NOTE Confidence: 0.911459066666667

00:18:56.241 --> 00:18:58.557 without the help of your computer,
NOTE Confidence: 0.911459066666667

00:18:58.560 --> 00:19:00.915 without the help of software
NOTE Confidence: 0.911459066666667

00:19:00.915 --> 00:19:02.799 to organize your references.
NOTE Confidence: 0.911459066666667

00:19:02.800 --> 00:19:05.520 There are three major products,
NOTE Confidence: 0.911459066666667

00:19:05.520 --> 00:19:08.132 Mendeley, Endnote, and Zotero,
NOTE Confidence: 0.911459066666667

00:19:08.132 --> 00:19:11.397 that I don't have here.
NOTE Confidence: 0.911459066666667

00:19:11.400 --> 00:19:13.984 They're all very similar.

NOTE Confidence: 0.911459066666667

00:19:13.984 --> 00:19:16.672 They're all available through the

NOTE Confidence: 0.911459066666667

00:19:16.672 --> 00:19:19.920 software library or even online for free.

NOTE Confidence: 0.911459066666667

00:19:19.920 --> 00:19:22.314 There's fancy versions that you pay for,

NOTE Confidence: 0.911459066666667

00:19:22.320 --> 00:19:24.516 but you don't really need that.

NOTE Confidence: 0.911459066666667

00:19:24.520 --> 00:19:26.794 And this is a snapshot from

NOTE Confidence: 0.911459066666667

00:19:26.794 --> 00:19:29.169 my Mendeley library in which I

NOTE Confidence: 0.911459066666667

00:19:29.169 --> 00:19:31.119 put all my different papers.

NOTE Confidence: 0.911459066666667

00:19:31.120 --> 00:19:33.328 And one of the beautiful things

NOTE Confidence: 0.911459066666667

00:19:33.328 --> 00:19:36.102 that you see is how if you

NOTE Confidence: 0.911459066666667

00:19:36.102 --> 00:19:38.557 know when you download APDF,

NOTE Confidence: 0.911459066666667

00:19:38.560 --> 00:19:41.992 it is the the the file is named

NOTE Confidence: 0.911459066666667

00:19:41.992 --> 00:19:43.880 something horrible like 13X2C3PO.

NOTE Confidence: 0.911459066666667

00:19:43.880 --> 00:19:46.280 Something makes no sense.

NOTE Confidence: 0.911459066666667

00:19:46.280 --> 00:19:48.016 And one of the things that these

NOTE Confidence: 0.911459066666667

00:19:48.016 --> 00:19:50.277 programs do is that they name your file

NOTE Confidence: 0.911459066666667

00:19:50.277 --> 00:19:52.029 exactly like they're named and they
NOTE Confidence: 0.911459066666667

00:19:52.029 --> 00:19:53.957 put all the data in the right files.
NOTE Confidence: 0.911459066666667

00:19:53.960 --> 00:19:56.158 And it makes your life much easier.
NOTE Confidence: 0.911459066666667

00:19:56.160 --> 00:19:58.200 If you haven't started a library,
NOTE Confidence: 0.911459066666667

00:19:58.200 --> 00:19:58.920 start it.
NOTE Confidence: 0.911459066666667

00:19:58.920 --> 00:20:01.440 You will never go back and you
NOTE Confidence: 0.911459066666667

00:20:01.440 --> 00:20:03.880 just accrue it over the years.
NOTE Confidence: 0.911459066666667

00:20:03.880 --> 00:20:05.900 It's simple enough to export
NOTE Confidence: 0.911459066666667

00:20:05.900 --> 00:20:07.920 references from your library to
NOTE Confidence: 0.911459066666667

00:20:07.991 --> 00:20:10.461 someone else's references to download
NOTE Confidence: 0.911459066666667

00:20:10.461 --> 00:20:12.437 them into different formats.
NOTE Confidence: 0.911459066666667

00:20:12.440 --> 00:20:15.040 It's very flexible and it's
NOTE Confidence: 0.911459066666667

00:20:15.040 --> 00:20:16.600 really a lifesaver.
NOTE Confidence: 0.911459066666667

00:20:16.600 --> 00:20:18.040 This is just to give you an idea.
NOTE Confidence: 0.911459066666667

00:20:18.040 --> 00:20:18.856 This is a paper.
NOTE Confidence: 0.911459066666667

00:20:18.856 --> 00:20:20.080 Don't worry about writing the paper,

NOTE Confidence: 0.911459066666667
00:20:20.080 --> 00:20:21.168 that's not the point.
NOTE Confidence: 0.911459066666667
00:20:21.168 --> 00:20:23.440 But you see here that the references
NOTE Confidence: 0.953546874
00:20:25.960 --> 00:20:30.160 383934, they are organized in
NOTE Confidence: 0.953546874
00:20:30.160 --> 00:20:31.318 numerical orderly fashion.
NOTE Confidence: 0.953546874
00:20:31.318 --> 00:20:33.634 And this is the John the
NOTE Confidence: 0.953546874
00:20:33.634 --> 00:20:35.199 JAMA citation format.
NOTE Confidence: 0.953546874
00:20:35.200 --> 00:20:36.832 And you see that it puts
NOTE Confidence: 0.953546874
00:20:36.832 --> 00:20:38.880 it as a nice superscript.
NOTE Confidence: 0.953546874
00:20:38.880 --> 00:20:40.140 So let's say that you
NOTE Confidence: 0.953546874
00:20:40.140 --> 00:20:41.400 sent this paper and alas,
NOTE Confidence: 0.953546874
00:20:41.400 --> 00:20:45.117 it was not accepted with great hosannas.
NOTE Confidence: 0.953546874
00:20:45.120 --> 00:20:48.594 So you revise and you send it somewhere else.
NOTE Confidence: 0.953546874
00:20:48.600 --> 00:20:50.364 And maybe that same paper goes
NOTE Confidence: 0.953546874
00:20:50.364 --> 00:20:52.682 to a journal that now asked for
NOTE Confidence: 0.953546874
00:20:52.682 --> 00:20:54.118 a different citation style,
NOTE Confidence: 0.953546874

00:20:54.120 --> 00:20:55.764 let's say the American
NOTE Confidence: 0.953546874

00:20:55.764 --> 00:20:56.997 Psychological Association format.
NOTE Confidence: 0.953546874

00:20:57.000 --> 00:20:59.916 That is a name, year style.
NOTE Confidence: 0.953546874

00:20:59.920 --> 00:21:03.820 And to go from this style to this
NOTE Confidence: 0.953546874

00:21:03.820 --> 00:21:05.920 style takes all of one second.
NOTE Confidence: 0.953546874

00:21:05.920 --> 00:21:07.840 You just press a button and
NOTE Confidence: 0.953546874

00:21:07.840 --> 00:21:09.120 it changes the formatting.
NOTE Confidence: 0.953546874

00:21:09.120 --> 00:21:10.840 Imagine doing that by hand.
NOTE Confidence: 0.953546874

00:21:10.840 --> 00:21:11.653 Or better yet,
NOTE Confidence: 0.953546874

00:21:11.653 --> 00:21:13.279 don't imagine it was very painful.
NOTE Confidence: 0.953546874

00:21:13.280 --> 00:21:17.360 So. So there you go.
NOTE Confidence: 0.953546874

00:21:17.360 --> 00:21:19.796 So you've prepared now your manuscript.
NOTE Confidence: 0.953546874

00:21:19.800 --> 00:21:20.572 It's ready.
NOTE Confidence: 0.953546874

00:21:20.572 --> 00:21:22.840 It's telling a story, it's organized,
NOTE Confidence: 0.953546874

00:21:22.840 --> 00:21:23.560 it's orderly.
NOTE Confidence: 0.953546874

00:21:23.560 --> 00:21:25.648 You're very proud, and you should be.

NOTE Confidence: 0.953546874

00:21:25.648 --> 00:21:27.600 You worked very hard to this moment.

NOTE Confidence: 0.953546874

00:21:27.600 --> 00:21:31.320 And now, dear editor,

NOTE Confidence: 0.953546874

00:21:31.320 --> 00:21:33.680 so think like an editor.

NOTE Confidence: 0.953546874

00:21:33.680 --> 00:21:35.954 I already mentioned that most early

NOTE Confidence: 0.953546874

00:21:35.954 --> 00:21:38.309 rejections are based on the abstract

NOTE Confidence: 0.953546874

00:21:38.309 --> 00:21:40.234 and the method section alone,

NOTE Confidence: 0.953546874

00:21:40.240 --> 00:21:44.185 the vast majority with the volume

NOTE Confidence: 0.953546874

00:21:44.185 --> 00:21:46.360 of submissions that editors get.

NOTE Confidence: 0.953546874

00:21:46.360 --> 00:21:49.195 We cannot possibly read the whole thing,

NOTE Confidence: 0.953546874

00:21:49.200 --> 00:21:50.436 so we look at the abstract,

NOTE Confidence: 0.953546874

00:21:50.440 --> 00:21:53.400 the methods, the title,

NOTE Confidence: 0.953546874

00:21:53.400 --> 00:21:56.040 but especially the abstract.

NOTE Confidence: 0.953546874

00:21:56.040 --> 00:21:57.923 Maybe we get to the methods and

NOTE Confidence: 0.953546874

00:21:57.923 --> 00:21:59.560 very quickly make an assessment.

NOTE Confidence: 0.953546874

00:21:59.560 --> 00:22:00.520 The abstract can tell me,

NOTE Confidence: 0.953546874

00:22:00.520 --> 00:22:02.158 is this well written or not?
NOTE Confidence: 0.953546874

00:22:02.160 --> 00:22:03.188 What is it's about?
NOTE Confidence: 0.953546874

00:22:03.188 --> 00:22:05.397 Maybe I need to go to the methods
NOTE Confidence: 0.953546874

00:22:05.397 --> 00:22:07.504 to learn a little bit more about
NOTE Confidence: 0.953546874

00:22:07.504 --> 00:22:09.655 how it was done and the title.
NOTE Confidence: 0.953546874

00:22:09.655 --> 00:22:11.115 Is this something interesting?
NOTE Confidence: 0.953546874

00:22:11.120 --> 00:22:11.936 Am I engaged?
NOTE Confidence: 0.953546874

00:22:11.936 --> 00:22:15.000 You know, the story factor,
NOTE Confidence: 0.953546874

00:22:15.000 --> 00:22:16.712 your introduction and your
NOTE Confidence: 0.953546874

00:22:16.712 --> 00:22:18.424 conclusions will really very
NOTE Confidence: 0.953546874

00:22:18.424 --> 00:22:21.080 rarely be read in depth early on,
NOTE Confidence: 0.953546874

00:22:21.080 --> 00:22:24.320 which goes to the earlier point I made.
NOTE Confidence: 0.953546874

00:22:24.320 --> 00:22:25.456 Start with your abstract,
NOTE Confidence: 0.953546874

00:22:25.456 --> 00:22:27.960 but don't leave it as an afterthought.
NOTE Confidence: 0.953546874

00:22:27.960 --> 00:22:30.220 Continue polishing it as you
NOTE Confidence: 0.953546874

00:22:30.220 --> 00:22:32.480 go because your whole paper

NOTE Confidence: 0.781665696

00:22:34.520 --> 00:22:37.200 destiny rides on the abstract.

NOTE Confidence: 0.781665696

00:22:37.200 --> 00:22:40.080 I cannot emphasize enough.

NOTE Confidence: 0.781665696

00:22:40.080 --> 00:22:42.000 Now we all think that publishing

NOTE Confidence: 0.781665696

00:22:42.000 --> 00:22:43.621 looks something like this, right?

NOTE Confidence: 0.781665696

00:22:43.621 --> 00:22:46.008 That these nasty editors are out to

NOTE Confidence: 0.781665696

00:22:46.008 --> 00:22:48.858 get you and sword you down and cut your

NOTE Confidence: 0.781665696

00:22:48.858 --> 00:22:51.597 head off and doing all sorts of things.

NOTE Confidence: 0.781665696

00:22:51.600 --> 00:22:53.416 And you know, sometimes it can feel like

NOTE Confidence: 0.781665696

00:22:53.416 --> 00:22:55.317 that and sometimes it can be like that,

NOTE Confidence: 0.781665696

00:22:55.320 --> 00:22:58.480 but more times I can.

NOTE Confidence: 0.781665696

00:22:58.480 --> 00:23:02.096 I see it as a growth process where the

NOTE Confidence: 0.781665696

00:23:02.096 --> 00:23:04.928 peer review can really enhance your

NOTE Confidence: 0.781665696

00:23:04.928 --> 00:23:08.235 article and you shouldn't make use of it.

NOTE Confidence: 0.781665696

00:23:08.240 --> 00:23:12.040 So present your way in an engaging way.

NOTE Confidence: 0.781665696

00:23:12.040 --> 00:23:13.339 That's something that,

NOTE Confidence: 0.781665696

00:23:13.339 --> 00:23:14.638 again, will help
NOTE Confidence: 0.961965

00:23:17.120 --> 00:23:18.998 not only in the article itself,
NOTE Confidence: 0.961965

00:23:19.000 --> 00:23:21.436 but even in the cover letter.
NOTE Confidence: 0.961965

00:23:21.440 --> 00:23:23.880 Cover letters are often underappreciated,
NOTE Confidence: 0.961965

00:23:23.880 --> 00:23:25.826 and we think that they're just something
NOTE Confidence: 0.961965

00:23:25.826 --> 00:23:28.359 we need to do and write in a very boring,
NOTE Confidence: 0.961965

00:23:28.360 --> 00:23:29.318 legalistic language.
NOTE Confidence: 0.961965

00:23:29.318 --> 00:23:31.713 I encourage you to again
NOTE Confidence: 0.961965

00:23:31.713 --> 00:23:34.557 take a stand and make a case.
NOTE Confidence: 0.961965

00:23:34.560 --> 00:23:37.710 Dear Editor, I really hope that you
NOTE Confidence: 0.961965

00:23:37.710 --> 00:23:40.090 will look favorably on this submission,
NOTE Confidence: 0.961965

00:23:40.090 --> 00:23:43.050 because I have seen how much of this
NOTE Confidence: 0.961965

00:23:43.050 --> 00:23:45.978 era is of interest in your journal and
NOTE Confidence: 0.961965

00:23:45.978 --> 00:23:48.759 it's becoming a nascent era of science.
NOTE Confidence: 0.961965

00:23:48.760 --> 00:23:51.520 Whatever you, you create a small,
NOTE Confidence: 0.961965

00:23:51.520 --> 00:23:56.096 engaging Love my paper.

NOTE Confidence: 0.961965

00:23:56.096 --> 00:24:00.280 Dear Editor, It's not unusual at all,

NOTE Confidence: 0.961965

00:24:00.280 --> 00:24:02.360 and in fact it's something to be encouraged,

NOTE Confidence: 0.961965

00:24:02.360 --> 00:24:03.746 within reason,

NOTE Confidence: 0.961965

00:24:03.746 --> 00:24:07.274 to consider the editor an e-mail,

NOTE Confidence: 0.961965

00:24:07.274 --> 00:24:09.159 you know, to your editor.

NOTE Confidence: 0.961965

00:24:09.160 --> 00:24:10.960 I'm considering sending this.

NOTE Confidence: 0.961965

00:24:10.960 --> 00:24:13.546 This is what it's like, you know,

NOTE Confidence: 0.961965

00:24:13.546 --> 00:24:15.800 whatever, you know how to write an e-mail.

NOTE Confidence: 0.961965

00:24:15.800 --> 00:24:18.264 What I would not do is attach your

NOTE Confidence: 0.961965

00:24:18.264 --> 00:24:20.524 whole paper, your CV, your abstract,

NOTE Confidence: 0.961965

00:24:20.524 --> 00:24:21.757 your childhood photographs.

NOTE Confidence: 0.961965

00:24:21.760 --> 00:24:24.350 And no, it's just a simple e-mail

NOTE Confidence: 0.961965

00:24:24.350 --> 00:24:27.318 and if the editor is interested,

NOTE Confidence: 0.961965

00:24:27.320 --> 00:24:29.400 she will respond saying, yeah,

NOTE Confidence: 0.961965

00:24:29.400 --> 00:24:31.240 please send me the abstract,

NOTE Confidence: 0.961965

00:24:31.240 --> 00:24:34.040 please send me the draft or
NOTE Confidence: 0.961965

00:24:34.040 --> 00:24:37.240 uploaded into the website.
NOTE Confidence: 0.961965

00:24:37.240 --> 00:24:38.040 But they might tell you,
NOTE Confidence: 0.961965

00:24:38.040 --> 00:24:38.955 well, thank you,
NOTE Confidence: 0.961965

00:24:38.955 --> 00:24:40.480 but it's not for us.
NOTE Confidence: 0.961965

00:24:40.480 --> 00:24:41.536 So I really,
NOTE Confidence: 0.961965

00:24:41.536 --> 00:24:43.648 really encourage you to to think
NOTE Confidence: 0.961965

00:24:43.648 --> 00:24:45.600 about approaching the editor in time.
NOTE Confidence: 0.956258748888889

00:24:50.680 --> 00:24:51.692 Don't irritate the editor.
NOTE Confidence: 0.956258748888889

00:24:51.692 --> 00:24:52.957 It's never a good idea.
NOTE Confidence: 0.956258748888889

00:24:52.960 --> 00:24:55.676 So, you know, don't dismiss obvious stuff.
NOTE Confidence: 0.956258748888889

00:24:55.680 --> 00:24:57.080 So pay attention to the
NOTE Confidence: 0.956258748888889

00:24:57.080 --> 00:24:58.480 instructions for authors you know.
NOTE Confidence: 0.956258748888889

00:24:58.480 --> 00:24:59.666 Format accordingly,
NOTE Confidence: 0.956258748888889

00:24:59.666 --> 00:25:02.038 do the right sections.
NOTE Confidence: 0.956258748888889

00:25:02.040 --> 00:25:04.315 All of that and I just mentioned.

NOTE Confidence: 0.956258748888889
00:25:04.320 --> 00:25:07.920 Avoid others pointing your limitations.
NOTE Confidence: 0.956258748888889
00:25:07.920 --> 00:25:12.159 Beat them to it by noting it in your
NOTE Confidence: 0.956258748888889
00:25:12.160 --> 00:25:14.160 discussion under a limitation section.
NOTE Confidence: 0.806322275
00:25:18.080 --> 00:25:19.040 If there is a
NOTE Confidence: 0.977122286666667
00:25:21.080 --> 00:25:25.040 message to this chat is be bold,
NOTE Confidence: 0.977122286666667
00:25:25.040 --> 00:25:27.160 be bold, don't hold back.
NOTE Confidence: 0.977122286666667
00:25:27.160 --> 00:25:28.920 This is your opportunity
NOTE Confidence: 0.977122286666667
00:25:28.920 --> 00:25:30.560 to get this paper in.
NOTE Confidence: 0.977122286666667
00:25:30.560 --> 00:25:32.408 So be bold from the moment
NOTE Confidence: 0.977122286666667
00:25:32.408 --> 00:25:34.160 that you approach the editor.
NOTE Confidence: 0.977122286666667
00:25:34.160 --> 00:25:36.519 Be bold in a title you know.
NOTE Confidence: 0.977122286666667
00:25:36.520 --> 00:25:39.040 Don't make it so soporific.
NOTE Confidence: 0.977122286666667
00:25:39.040 --> 00:25:41.920 Be bold in taking a stand.
NOTE Confidence: 0.977122286666667
00:25:41.920 --> 00:25:43.452 Don't be mealy mouthed.
NOTE Confidence: 0.977122286666667
00:25:43.452 --> 00:25:46.114 I think that we as scientists can
NOTE Confidence: 0.977122286666667

00:25:46.114 --> 00:25:48.244 get to be like well, on the one hand,
NOTE Confidence: 0.977122286666667

00:25:48.244 --> 00:25:49.480 on the other hand on the one.
NOTE Confidence: 0.977122286666667

00:25:49.480 --> 00:25:51.420 No take a stand.
NOTE Confidence: 0.977122286666667

00:25:51.420 --> 00:25:53.508 So be bold, darn it.
NOTE Confidence: 0.977122286666667

00:25:53.508 --> 00:25:56.020 Part of being bold is also submitting to
NOTE Confidence: 0.977122286666667

00:25:56.093 --> 00:25:58.917 places where you think you could never live.
NOTE Confidence: 0.977122286666667

00:25:58.920 --> 00:26:00.432 We're going to get to that in a second.
NOTE Confidence: 0.977122286666667

00:26:00.440 --> 00:26:01.496 So be bold.
NOTE Confidence: 0.977122286666667

00:26:01.496 --> 00:26:03.430 You know the the golden rule of
NOTE Confidence: 0.977122286666667

00:26:03.430 --> 00:26:05.367 thumb is that if you and your
NOTE Confidence: 0.977122286666667

00:26:05.367 --> 00:26:07.293 heart of heart thinks that your
NOTE Confidence: 0.977122286666667

00:26:07.293 --> 00:26:08.798 journal belongs at this level,
NOTE Confidence: 0.977122286666667

00:26:08.800 --> 00:26:10.948 submitted at this level,
NOTE Confidence: 0.977122286666667

00:26:10.948 --> 00:26:12.559 submitted up one,
NOTE Confidence: 0.977122286666667

00:26:12.560 --> 00:26:14.080 and if it gets rejected,
NOTE Confidence: 0.977122286666667

00:26:14.080 --> 00:26:18.000 maybe you win where you initially thought,

NOTE Confidence: 0.977122286666667
00:26:18.000 --> 00:26:20.480 don't pitch it down.
NOTE Confidence: 0.977122286666667
00:26:20.480 --> 00:26:22.520 That's doing yourself a disservice.
NOTE Confidence: 0.958659693333333
00:26:25.800 --> 00:26:28.320 Some of you may not be native
NOTE Confidence: 0.958659693333333
00:26:28.320 --> 00:26:30.420 Spanish speakers. I am not.
NOTE Confidence: 0.958659693333333
00:26:30.420 --> 00:26:33.760 Spanish is my native language, CI Signor.
NOTE Confidence: 0.958659693333333
00:26:33.760 --> 00:26:37.920 And it's really important to know that now
NOTE Confidence: 0.958659693333333
00:26:38.022 --> 00:26:42.438 that English is the lingua franca of science,
NOTE Confidence: 0.958659693333333
00:26:42.440 --> 00:26:44.192 that you don't have to be
NOTE Confidence: 0.958659693333333
00:26:44.192 --> 00:26:45.960 a a native English speaker.
NOTE Confidence: 0.958659693333333
00:26:45.960 --> 00:26:47.880 You know, born and bred in London and
NOTE Confidence: 0.958659693333333
00:26:47.880 --> 00:26:50.038 going to Eton College in order to write.
NOTE Confidence: 0.958659693333333
00:26:50.040 --> 00:26:52.600 We can all do it. So, couple of pointers.
NOTE Confidence: 0.958659693333333
00:26:52.600 --> 00:26:54.580 Can someone outside of your field
NOTE Confidence: 0.958659693333333
00:26:54.642 --> 00:26:56.958 understand what you're trying to convey?
NOTE Confidence: 0.958659693333333
00:26:56.960 --> 00:26:58.600 That's a very good idea.
NOTE Confidence: 0.958659693333333

00:26:58.600 --> 00:27:00.400 The the, the grandma approach.
NOTE Confidence: 0.9586596933333333

00:27:00.400 --> 00:27:02.044 You know, can your grandma understand
NOTE Confidence: 0.9586596933333333

00:27:02.044 --> 00:27:03.880 the basics of what you're saying?
NOTE Confidence: 0.9586596933333333

00:27:03.880 --> 00:27:05.836 Or your roommate, or your friend,
NOTE Confidence: 0.9586596933333333

00:27:05.840 --> 00:27:07.880 or someone outside of your lab?
NOTE Confidence: 0.9586596933333333

00:27:07.880 --> 00:27:08.534 That is good.
NOTE Confidence: 0.9586596933333333

00:27:08.534 --> 00:27:09.406 That won't tell you
NOTE Confidence: 0.9586596933333333

00:27:09.406 --> 00:27:10.440 anything about the science,
NOTE Confidence: 0.9586596933333333

00:27:10.440 --> 00:27:13.051 but it's going to tell you about
NOTE Confidence: 0.9586596933333333

00:27:13.051 --> 00:27:15.000 the legibility of the paper.
NOTE Confidence: 0.9586596933333333

00:27:15.000 --> 00:27:17.520 If English is not your native language,
NOTE Confidence: 0.9586596933333333

00:27:17.520 --> 00:27:19.880 is there someone in your team who
NOTE Confidence: 0.9586596933333333

00:27:19.880 --> 00:27:21.080 you can approach and hear?
NOTE Confidence: 0.9586596933333333

00:27:21.080 --> 00:27:22.608 You know, it's easy.
NOTE Confidence: 0.9586596933333333

00:27:22.608 --> 00:27:24.518 There's lots of English speakers.
NOTE Confidence: 0.9586596933333333

00:27:24.520 --> 00:27:26.688 There's some consideration to

NOTE Confidence: 0.9586596933333333

00:27:26.688 --> 00:27:28.314 professional polishing services.

NOTE Confidence: 0.9586596933333333

00:27:28.320 --> 00:27:30.182 You you could submit the article somewhere

NOTE Confidence: 0.9586596933333333

00:27:30.182 --> 00:27:32.438 and they can Polish it and make it pretty.

NOTE Confidence: 0.9586596933333333

00:27:32.440 --> 00:27:35.777 In my experience they're the the

NOTE Confidence: 0.9586596933333333

00:27:35.777 --> 00:27:37.559 juice is not worth the squeeze.

NOTE Confidence: 0.9586596933333333

00:27:37.560 --> 00:27:38.980 They're probably more expensive

NOTE Confidence: 0.9586596933333333

00:27:38.980 --> 00:27:40.400 than what they get,

NOTE Confidence: 0.9586596933333333

00:27:40.400 --> 00:27:42.670 but they are out there and when

NOTE Confidence: 0.9586596933333333

00:27:42.670 --> 00:27:44.793 we get to one of the software's

NOTE Confidence: 0.9586596933333333

00:27:44.793 --> 00:27:48.358 I'll give you some ideas.

NOTE Confidence: 0.9586596933333333

00:27:48.360 --> 00:27:51.048 This also makes me think as we

NOTE Confidence: 0.9586596933333333

00:27:51.048 --> 00:27:52.760 talk about international science

NOTE Confidence: 0.9586596933333333

00:27:52.760 --> 00:27:56.840 that there are ways of getting

NOTE Confidence: 0.9586596933333333

00:27:56.840 --> 00:27:58.720 science or in publishing science,

NOTE Confidence: 0.9586596933333333

00:27:58.720 --> 00:28:02.398 even if you have limited resources.

NOTE Confidence: 0.9586596933333333

00:28:02.400 --> 00:28:04.520 So let me start with the good news.
NOTE Confidence: 0.9586596933333333

00:28:04.520 --> 00:28:07.040 This is a map from a consortium
NOTE Confidence: 0.9586596933333333

00:28:07.040 --> 00:28:07.760 called Henari.
NOTE Confidence: 0.9586596933333333

00:28:07.760 --> 00:28:11.012 I can't remember what the acronym stands for,
NOTE Confidence: 0.9586596933333333

00:28:11.012 --> 00:28:13.432 but these are low income
NOTE Confidence: 0.9586596933333333

00:28:13.432 --> 00:28:15.280 countries around the world.
NOTE Confidence: 0.9586596933333333

00:28:15.280 --> 00:28:17.920 And from all of those countries,
NOTE Confidence: 0.9586596933333333

00:28:17.920 --> 00:28:21.890 through this Henari supported by WHO you
NOTE Confidence: 0.9586596933333333

00:28:21.890 --> 00:28:24.200 can get access to every single journal,
NOTE Confidence: 0.9586596933333333

00:28:24.200 --> 00:28:27.084 you essentially get like the Yale Library
NOTE Confidence: 0.9586596933333333

00:28:27.084 --> 00:28:29.724 at your fingertips, but through WHO.
NOTE Confidence: 0.9586596933333333

00:28:29.724 --> 00:28:31.596 So that's very good.
NOTE Confidence: 0.9586596933333333

00:28:31.600 --> 00:28:35.000 That is as a user you can get the science.
NOTE Confidence: 0.9586596933333333

00:28:35.000 --> 00:28:36.040 It's still being worked out,
NOTE Confidence: 0.9586596933333333

00:28:36.040 --> 00:28:39.070 but some of there's some overlap
NOTE Confidence: 0.9586596933333333

00:28:39.070 --> 00:28:41.740 between these countries if you want

NOTE Confidence: 0.9586596933333333

00:28:41.740 --> 00:28:44.908 to submit and publish and a lot of

NOTE Confidence: 0.9586596933333333

00:28:44.908 --> 00:28:47.170 publishing these days is Open Access

NOTE Confidence: 0.9586596933333333

00:28:47.255 --> 00:28:50.215 as we'll talk about that there can be

NOTE Confidence: 0.9586596933333333

00:28:50.215 --> 00:28:52.244 reduced or no fees for submitting.

NOTE Confidence: 0.9586596933333333

00:28:52.244 --> 00:28:55.156 So it's a good resource to know about.

NOTE Confidence: 0.9586596933333333

00:28:55.160 --> 00:28:56.219 As I say,

NOTE Confidence: 0.9586596933333333

00:28:56.219 --> 00:28:58.690 particularly for those of you who have

NOTE Confidence: 0.9586596933333333

00:28:58.769 --> 00:29:02.370 collaborations outside of the US and

NOTE Confidence: 0.9586596933333333

00:29:02.370 --> 00:29:04.798 particularly in low income countries,

NOTE Confidence: 0.8926932305

00:29:10.280 --> 00:29:12.272 we're still thinking, we're still in

NOTE Confidence: 0.8926932305

00:29:12.272 --> 00:29:14.422 the part of submitting the paper and

NOTE Confidence: 0.8926932305

00:29:14.422 --> 00:29:17.720 what do you need to think about South?

NOTE Confidence: 0.8926932305

00:29:17.720 --> 00:29:19.785 Very importantly, we need to

NOTE Confidence: 0.8926932305

00:29:19.785 --> 00:29:21.437 adhere to ethical principles.

NOTE Confidence: 0.8926932305

00:29:21.440 --> 00:29:25.194 And this may sound, well, I'm very

NOTE Confidence: 0.8926932305

00:29:25.194 --> 00:29:27.273 ethical and I know you're very ethical.
NOTE Confidence: 0.8926932305

00:29:27.280 --> 00:29:31.277 But ethicality raises all sorts of issues.
NOTE Confidence: 0.8926932305

00:29:31.280 --> 00:29:34.040 So conflict of interest, of course,
NOTE Confidence: 0.8926932305

00:29:34.040 --> 00:29:35.516 has gotten a lot of attention.
NOTE Confidence: 0.8926932305

00:29:35.520 --> 00:29:37.878 Financial conflict of interest in particular,
NOTE Confidence: 0.723178024

00:29:40.360 --> 00:29:41.512 redundant publication.
NOTE Confidence: 0.723178024

00:29:41.512 --> 00:29:43.672 So salami slicing, you know,
NOTE Confidence: 0.723178024

00:29:43.672 --> 00:29:45.400 you have a big study and you could
NOTE Confidence: 0.723178024

00:29:45.450 --> 00:29:47.116 have told the story in two papers,
NOTE Confidence: 0.723178024

00:29:47.120 --> 00:29:49.480 but you did 100 papers.
NOTE Confidence: 0.723178024

00:29:49.480 --> 00:29:51.880 Anyone know what LPU is?
NOTE Confidence: 0.723178024

00:29:51.880 --> 00:29:53.840 If not, Doctor Dunn will tell us.
NOTE Confidence: 0.723178024

00:29:53.840 --> 00:29:55.954 But anyone again, I can't see you,
NOTE Confidence: 0.6668091

00:29:59.600 --> 00:30:02.480 Dana LPUI don't know if I know
NOTE Confidence: 0.961229176666667

00:30:02.480 --> 00:30:03.278 what that is.
NOTE Confidence: 0.8900642575

00:30:04.120 --> 00:30:05.872 Well, see, This is why you come to

NOTE Confidence: 0.8900642575

00:30:05.872 --> 00:30:07.312 yes exclamation learn stuff, right?

NOTE Confidence: 0.8900642575

00:30:07.312 --> 00:30:09.904 So now you learned that LPU

NOTE Confidence: 0.8900642575

00:30:09.904 --> 00:30:11.680 is least publishable unit.

NOTE Confidence: 0.8900642575

00:30:11.680 --> 00:30:15.080 So that's the tendency to try to squeeze

NOTE Confidence: 0.8900642575

00:30:15.080 --> 00:30:18.045 out many unnecessary small little

NOTE Confidence: 0.8900642575

00:30:18.045 --> 00:30:21.160 papers just to get a publication,

NOTE Confidence: 0.8900642575

00:30:21.160 --> 00:30:23.524 which doesn't help the science and

NOTE Confidence: 0.8900642575

00:30:23.524 --> 00:30:25.360 ultimately doesn't help your CV.

NOTE Confidence: 0.8900642575

00:30:25.360 --> 00:30:28.960 So it it it's important to know that many,

NOTE Confidence: 0.8900642575

00:30:28.960 --> 00:30:32.840 many, many studies yield more than one paper,

NOTE Confidence: 0.8900642575

00:30:32.840 --> 00:30:34.548 but you need to be mindful of

NOTE Confidence: 0.8900642575

00:30:34.548 --> 00:30:35.640 how many is many,

NOTE Confidence: 0.8900642575

00:30:35.640 --> 00:30:37.280 and there's such a thing as too many.

NOTE Confidence: 0.848236001428571

00:30:39.720 --> 00:30:42.597 Use sensitive use of language is a

NOTE Confidence: 0.848236001428571

00:30:42.600 --> 00:30:44.478 big bugaboo for me. In particular,

NOTE Confidence: 0.848236001428571

00:30:44.480 --> 00:30:48.477 I'm a child psychiatrist and I'm very
NOTE Confidence: 0.848236001428571

00:30:48.480 --> 00:30:51.994 irritated when I read words like the
NOTE Confidence: 0.848236001428571

00:30:51.994 --> 00:30:57.280 schizophrenic mother or the, I don't know,
NOTE Confidence: 0.848236001428571

00:30:57.280 --> 00:31:00.300 the cirrhotic or alcoholic person
NOTE Confidence: 0.848236001428571

00:31:00.300 --> 00:31:03.400 because they then become secondary
NOTE Confidence: 0.848236001428571

00:31:03.400 --> 00:31:06.252 characters to their disease, right?
NOTE Confidence: 0.848236001428571

00:31:06.252 --> 00:31:08.856 So if you're going to talk about
NOTE Confidence: 0.848236001428571

00:31:08.856 --> 00:31:10.692 those individuals, I encourage you
NOTE Confidence: 0.848236001428571

00:31:10.692 --> 00:31:12.876 to always use person first language.
NOTE Confidence: 0.848236001428571

00:31:12.880 --> 00:31:14.880 The man with schizophrenia,
NOTE Confidence: 0.848236001428571

00:31:14.880 --> 00:31:16.880 not the schizophrenic man,
NOTE Confidence: 0.848236001428571

00:31:16.880 --> 00:31:20.318 the man with cirrhosis or alcoholism,
NOTE Confidence: 0.848236001428571

00:31:20.320 --> 00:31:22.396 not the alcoholic or cirrhotic man,
NOTE Confidence: 0.848236001428571

00:31:22.400 --> 00:31:26.296 et cetera. And fraudulent research,
NOTE Confidence: 0.848236001428571

00:31:26.296 --> 00:31:29.400 you know, just making it up is something
NOTE Confidence: 0.848236001428571

00:31:29.400 --> 00:31:31.236 that hopefully none of us will will see.

NOTE Confidence: 0.848236001428571
00:31:31.240 --> 00:31:32.400 But to be aware of
NOTE Confidence: 0.892903508571429
00:31:34.800 --> 00:31:36.855 something quite regularly
NOTE Confidence: 0.892903508571429
00:31:36.855 --> 00:31:39.595 seen as authorship issues,
NOTE Confidence: 0.892903508571429
00:31:39.600 --> 00:31:40.228 authorship, vagaries.
NOTE Confidence: 0.892903508571429
00:31:40.228 --> 00:31:41.798 Am I the first author?
NOTE Confidence: 0.892903508571429
00:31:41.800 --> 00:31:42.840 Are you the second author?
NOTE Confidence: 0.892903508571429
00:31:42.840 --> 00:31:44.400 Are you the third author?
NOTE Confidence: 0.892903508571429
00:31:44.400 --> 00:31:47.120 And I mean, the key thing to know
NOTE Confidence: 0.892903508571429
00:31:47.120 --> 00:31:49.610 here is really address it openly
NOTE Confidence: 0.892903508571429
00:31:49.610 --> 00:31:52.803 in words coming out of your mouth
NOTE Confidence: 0.892903508571429
00:31:52.803 --> 00:31:55.180 and your colleagues not don't
NOTE Confidence: 0.892903508571429
00:31:55.180 --> 00:31:57.640 make any assumptions and try to
NOTE Confidence: 0.892903508571429
00:31:57.640 --> 00:32:00.768 put it into paper and say this
NOTE Confidence: 0.892903508571429
00:32:00.768 --> 00:32:02.676 is your there's an understanding.
NOTE Confidence: 0.892903508571429
00:32:02.676 --> 00:32:05.616 Now if along the way it turns out that
NOTE Confidence: 0.892903508571429

00:32:05.616 --> 00:32:07.832 Dana ended up doing most of the work,
NOTE Confidence: 0.892903508571429

00:32:07.840 --> 00:32:09.877 it would be very appropriate to say,
NOTE Confidence: 0.892903508571429

00:32:09.880 --> 00:32:11.518 OK, Dana, you know, you're right,
NOTE Confidence: 0.892903508571429

00:32:11.520 --> 00:32:12.240 you did most of the work.
NOTE Confidence: 0.892903508571429

00:32:12.240 --> 00:32:13.913 So now you become the first author
NOTE Confidence: 0.892903508571429

00:32:13.913 --> 00:32:15.599 and I become the second author.
NOTE Confidence: 0.892903508571429

00:32:15.600 --> 00:32:16.440 So in in other words,
NOTE Confidence: 0.892903508571429

00:32:16.440 --> 00:32:19.116 it it's a fluid, iterative thing.
NOTE Confidence: 0.892903508571429

00:32:19.120 --> 00:32:21.840 It's not sealed in stone.
NOTE Confidence: 0.892903508571429

00:32:21.840 --> 00:32:24.024 The other thing that's very helpful to
NOTE Confidence: 0.892903508571429

00:32:24.024 --> 00:32:26.760 know here is our friend the asterisk.
NOTE Confidence: 0.892903508571429

00:32:26.760 --> 00:32:29.010 Our friend the asterisk has
NOTE Confidence: 0.892903508571429

00:32:29.010 --> 00:32:31.517 solved many of you know problems.
NOTE Confidence: 0.892903508571429

00:32:31.520 --> 00:32:34.760 So anyone what is an asterisk
NOTE Confidence: 0.892903508571429

00:32:34.760 --> 00:32:37.040 in in an authorship order?
NOTE Confidence: 0.8399194625

00:32:41.920 --> 00:32:46.000 Go first, go last. I'm sorry,

NOTE Confidence: 0.8399194625
00:32:46.000 --> 00:32:48.359 like Co first author or Cole asterisk?
NOTE Confidence: 0.790602213333333
00:32:48.800 --> 00:32:49.919 Exactly. Yes. Yep.
NOTE Confidence: 0.790602213333333
00:32:49.919 --> 00:32:51.038 So shared authorship,
NOTE Confidence: 0.790602213333333
00:32:51.040 --> 00:32:52.320 shared authorship and shared
NOTE Confidence: 0.790602213333333
00:32:52.320 --> 00:32:54.662 authorship is really, really important.
NOTE Confidence: 0.790602213333333
00:32:54.662 --> 00:32:58.117 Basic scientists are much more
NOTE Confidence: 0.790602213333333
00:32:58.120 --> 00:33:00.800 familiar with it and often will use it.
NOTE Confidence: 0.790602213333333
00:33:00.800 --> 00:33:04.136 But we should really be aware of it
NOTE Confidence: 0.790602213333333
00:33:04.136 --> 00:33:08.438 that even though it was Dunn and Martin,
NOTE Confidence: 0.790602213333333
00:33:08.440 --> 00:33:10.396 they were if there's an asterisk,
NOTE Confidence: 0.790602213333333
00:33:10.400 --> 00:33:13.480 equal credit or the other way around,
NOTE Confidence: 0.790602213333333
00:33:13.480 --> 00:33:15.064 that's very, very important.
NOTE Confidence: 0.790602213333333
00:33:15.064 --> 00:33:17.440 It's usually used for first authors,
NOTE Confidence: 0.790602213333333
00:33:17.440 --> 00:33:20.360 but it can also be done for Co last authors.
NOTE Confidence: 0.790602213333333
00:33:20.360 --> 00:33:23.102 And it can be helpful in
NOTE Confidence: 0.790602213333333

00:33:23.102 --> 00:33:24.473 in dissipating tension,
NOTE Confidence: 0.790602213333333
00:33:24.480 --> 00:33:27.637 because if you don't dissipate the tension,
NOTE Confidence: 0.790602213333333
00:33:27.640 --> 00:33:29.768 this is such a common problem that
NOTE Confidence: 0.790602213333333
00:33:29.768 --> 00:33:32.440 you end up first going to your boss.
NOTE Confidence: 0.790602213333333
00:33:32.440 --> 00:33:34.540 You know, while Dana doesn't want to
NOTE Confidence: 0.790602213333333
00:33:34.540 --> 00:33:36.198 show doesn't want it, let's just do it.
NOTE Confidence: 0.790602213333333
00:33:36.200 --> 00:33:37.760 You know, Dana really didn't want
NOTE Confidence: 0.790602213333333
00:33:37.760 --> 00:33:39.600 to be my didn't want to share.
NOTE Confidence: 0.790602213333333
00:33:39.600 --> 00:33:40.520 I thought I was first.
NOTE Confidence: 0.790602213333333
00:33:40.520 --> 00:33:42.000 She thought she was first.
NOTE Confidence: 0.790602213333333
00:33:42.000 --> 00:33:43.524 She didn't want to do the
NOTE Confidence: 0.790602213333333
00:33:43.524 --> 00:33:44.840 asterisk thing because you know,
NOTE Confidence: 0.790602213333333
00:33:44.840 --> 00:33:46.400 she's Dana and you know her.
NOTE Confidence: 0.790602213333333
00:33:46.400 --> 00:33:48.331 So then I say Dana, you know what?
NOTE Confidence: 0.790602213333333
00:33:48.331 --> 00:33:49.633 You and I cannot solve this.
NOTE Confidence: 0.790602213333333
00:33:49.640 --> 00:33:51.280 So we're going to go to our boss,

NOTE Confidence: 0.790602213333333

00:33:51.280 --> 00:33:53.520 we're going to go to Janet Hafler,

NOTE Confidence: 0.790602213333333

00:33:53.520 --> 00:33:55.200 and we're going to talk to Janet.

NOTE Confidence: 0.790602213333333

00:33:55.200 --> 00:33:56.600 And even after we went,

NOTE Confidence: 0.790602213333333

00:33:56.600 --> 00:33:58.040 we couldn't solve it.

NOTE Confidence: 0.790602213333333

00:33:58.040 --> 00:34:00.999 So then Janet said it's it's beyond me,

NOTE Confidence: 0.790602213333333

00:34:01.000 --> 00:34:02.200 guys, I can't solve it.

NOTE Confidence: 0.790602213333333

00:34:02.200 --> 00:34:03.720 You guys couldn't solve it.

NOTE Confidence: 0.790602213333333

00:34:03.720 --> 00:34:06.942 I think that you need to go to to

NOTE Confidence: 0.790602213333333

00:34:06.942 --> 00:34:09.474 the Dean's office and the Dean.

NOTE Confidence: 0.790602213333333

00:34:09.480 --> 00:34:11.928 Dean Brown wouldn't be the person

NOTE Confidence: 0.790602213333333

00:34:11.928 --> 00:34:13.560 dealing with this directly.

NOTE Confidence: 0.790602213333333

00:34:13.560 --> 00:34:15.558 But Dean Brown has an an

NOTE Confidence: 0.557603

00:34:18.240 --> 00:34:19.072 associate Dean.

NOTE Confidence: 0.557603

00:34:19.072 --> 00:34:21.718 I I I forget the exact title of it.

NOTE Confidence: 0.557603

00:34:21.720 --> 00:34:24.352 My my, my chair. Actually Linda Mays

NOTE Confidence: 0.557603

00:34:24.352 --> 00:34:26.611 holds this position where you would
NOTE Confidence: 0.557603

00:34:26.611 --> 00:34:29.488 go in and you would say you know,
NOTE Confidence: 0.557603

00:34:29.488 --> 00:34:31.920 she said, he said what do you think?
NOTE Confidence: 0.557603

00:34:31.920 --> 00:34:33.099 And it's resolved.
NOTE Confidence: 0.557603

00:34:33.099 --> 00:34:35.064 Obviously you never want to
NOTE Confidence: 0.557603

00:34:35.064 --> 00:34:37.342 end up in that office, right?
NOTE Confidence: 0.557603

00:34:37.342 --> 00:34:39.154 You want to solve it yourself,
NOTE Confidence: 0.557603

00:34:39.160 --> 00:34:42.296 which is why I'm saying we solved it early.
NOTE Confidence: 0.557603

00:34:42.296 --> 00:34:44.960 A very similar thing might happen if,
NOTE Confidence: 0.557603

00:34:44.960 --> 00:34:49.300 for example, we submitted a paper and
NOTE Confidence: 0.557603

00:34:49.300 --> 00:34:53.640 it was Dana Dunn and Andres Martin,
NOTE Confidence: 0.557603

00:34:53.640 --> 00:34:55.355 and Andres Martin saw this and said,
NOTE Confidence: 0.557603

00:34:55.360 --> 00:34:56.280 you know that Dana Dunn,
NOTE Confidence: 0.557603

00:34:56.280 --> 00:34:57.640 she didn't give me credit.
NOTE Confidence: 0.557603

00:34:57.640 --> 00:34:58.999 I'm so upset.
NOTE Confidence: 0.557603

00:34:58.999 --> 00:35:01.717 So I write to my boss,

NOTE Confidence: 0.557603

00:35:01.720 --> 00:35:03.888 I write to the Dean, I write to whatever.

NOTE Confidence: 0.557603

00:35:03.888 --> 00:35:06.250 And then it becomes a big issue because

NOTE Confidence: 0.557603

00:35:06.250 --> 00:35:08.574 there is an investigation to find out

NOTE Confidence: 0.557603

00:35:08.574 --> 00:35:11.037 what happened here and to make it right.

NOTE Confidence: 0.557603

00:35:11.040 --> 00:35:12.624 What I'm showing you here, Dana.

NOTE Confidence: 0.557603

00:35:12.624 --> 00:35:14.160 We're friends, You know?

NOTE Confidence: 0.557603

00:35:14.160 --> 00:35:15.480 I love you. I appreciate you.

NOTE Confidence: 0.557603

00:35:15.480 --> 00:35:16.560 But you're my, you know,

NOTE Confidence: 0.557603

00:35:16.560 --> 00:35:17.172 foil today.

NOTE Confidence: 0.557603

00:35:17.172 --> 00:35:17.478 So,

NOTE Confidence: 0.903279008

00:35:20.000 --> 00:35:21.320 Dana, did she run away?

NOTE Confidence: 0.8568344

00:35:21.960 --> 00:35:24.000 No. I'm fine with your being your foil.

NOTE Confidence: 0.849393510909091

00:35:24.440 --> 00:35:26.044 OK, good. Thank you.

NOTE Confidence: 0.849393510909091

00:35:26.044 --> 00:35:28.920 So this this screenshot is from COPE,

NOTE Confidence: 0.849393510909091

00:35:28.920 --> 00:35:31.840 the Committee on Publication Ethics.

NOTE Confidence: 0.849393510909091

00:35:31.840 --> 00:35:33.680 It's another very helpful
NOTE Confidence: 0.849393510909091
00:35:33.680 --> 00:35:35.520 website to know about.
NOTE Confidence: 0.849393510909091
00:35:35.520 --> 00:35:37.384 It is put together by editors of all
NOTE Confidence: 0.849393510909091
00:35:37.384 --> 00:35:39.279 the top journals around the world.
NOTE Confidence: 0.849393510909091
00:35:39.280 --> 00:35:40.760 It's based in London,
NOTE Confidence: 0.849393510909091
00:35:40.760 --> 00:35:42.240 but it's all online.
NOTE Confidence: 0.849393510909091
00:35:42.240 --> 00:35:45.880 And the idea is that if you are not sure,
NOTE Confidence: 0.849393510909091
00:35:45.880 --> 00:35:47.344 you say, you know,
NOTE Confidence: 0.849393510909091
00:35:47.344 --> 00:35:50.280 I didn't like how this was handled.
NOTE Confidence: 0.849393510909091
00:35:50.280 --> 00:35:52.848 You can go here and find all these
NOTE Confidence: 0.849393510909091
00:35:52.848 --> 00:35:55.381 flow charts and there are flow charts
NOTE Confidence: 0.849393510909091
00:35:55.381 --> 00:35:58.040 about problems in order of authorship,
NOTE Confidence: 0.849393510909091
00:35:58.040 --> 00:36:03.320 plagiarism, self plagiarism,
NOTE Confidence: 0.849393510909091
00:36:03.320 --> 00:36:04.360 unnecessary publications.
NOTE Confidence: 0.849393510909091
00:36:04.360 --> 00:36:07.480 There's a whole world out there.
NOTE Confidence: 0.849393510909091
00:36:07.480 --> 00:36:10.240 So it it's something helpful to know about.

NOTE Confidence: 0.849393510909091
00:36:10.240 --> 00:36:11.479 And just for you to know that
NOTE Confidence: 0.849393510909091
00:36:11.479 --> 00:36:12.680 there is this special advice.
NOTE Confidence: 0.849393510909091
00:36:12.680 --> 00:36:14.186 Special Advisor to the Dean is
NOTE Confidence: 0.849393510909091
00:36:14.186 --> 00:36:16.080 the name of the title someone who
NOTE Confidence: 0.849393510909091
00:36:16.080 --> 00:36:17.760 deals with all of these issues.
NOTE Confidence: 0.945579246666667
00:36:21.880 --> 00:36:24.478 What about plagiarism and self plagiarism?
NOTE Confidence: 0.945579246666667
00:36:24.480 --> 00:36:27.144 Well, I have to say that the world has
NOTE Confidence: 0.945579246666667
00:36:27.144 --> 00:36:29.652 changed and I think in general for the
NOTE Confidence: 0.945579246666667
00:36:29.652 --> 00:36:32.876 better, but it's a little bit scary.
NOTE Confidence: 0.945579246666667
00:36:32.880 --> 00:36:37.248 And that is that when you submit
NOTE Confidence: 0.945579246666667
00:36:37.248 --> 00:36:40.065 a manuscript to 99% of journals,
NOTE Confidence: 0.945579246666667
00:36:40.065 --> 00:36:42.643 the very first thing the journal will do
NOTE Confidence: 0.945579246666667
00:36:42.643 --> 00:36:44.834 is put it through a plagiarism detector,
NOTE Confidence: 0.945579246666667
00:36:44.840 --> 00:36:48.960 software that will identify issues
NOTE Confidence: 0.945579246666667
00:36:48.960 --> 00:36:51.160 and it will identify plagiarism,
NOTE Confidence: 0.945579246666667

00:36:51.160 --> 00:36:53.918 but it will also identify self plagiarism
NOTE Confidence: 0.945579246666667

00:36:53.918 --> 00:36:56.520 and it will give you a report.
NOTE Confidence: 0.945579246666667

00:36:56.520 --> 00:36:59.400 There are several on the user side.
NOTE Confidence: 0.945579246666667

00:36:59.400 --> 00:37:00.320 On the author side,
NOTE Confidence: 0.945579246666667

00:37:00.320 --> 00:37:02.595 there's several things that you can consider.
NOTE Confidence: 0.945579246666667

00:37:02.600 --> 00:37:04.478 And I'm showing you here Grammarly,
NOTE Confidence: 0.945579246666667

00:37:04.480 --> 00:37:07.960 which is a particularly useful 1.
NOTE Confidence: 0.945579246666667

00:37:07.960 --> 00:37:10.263 The Grammarly that you can get for
NOTE Confidence: 0.945579246666667

00:37:10.263 --> 00:37:12.840 free can help you with language use,
NOTE Confidence: 0.945579246666667

00:37:12.840 --> 00:37:14.892 with sentence, with grammar.
NOTE Confidence: 0.945579246666667

00:37:14.892 --> 00:37:15.918 That's great,
NOTE Confidence: 0.945579246666667

00:37:15.920 --> 00:37:17.474 but the Grammarly that you pay for,
NOTE Confidence: 0.945579246666667

00:37:17.480 --> 00:37:18.720 and it's not super expensive,
NOTE Confidence: 0.945579246666667

00:37:18.720 --> 00:37:22.234 it's maybe \$100 a year gives you,
NOTE Confidence: 0.945579246666667

00:37:22.240 --> 00:37:23.842 you know, it identifies the writing
NOTE Confidence: 0.945579246666667

00:37:23.842 --> 00:37:25.200 issues like the other ones,

NOTE Confidence: 0.945579246666667

00:37:25.200 --> 00:37:26.040 but as you can see,

NOTE Confidence: 0.945579246666667

00:37:26.040 --> 00:37:27.252 it identifies plagiarism.

NOTE Confidence: 0.945579246666667

00:37:27.252 --> 00:37:30.240 So this particular manuscript had a 16%,

NOTE Confidence: 0.945579246666667

00:37:30.240 --> 00:37:34.720 which sounds scary, but in fact it isn't.

NOTE Confidence: 0.945579246666667

00:37:34.720 --> 00:37:37.737 The usual number that we worry about

NOTE Confidence: 0.945579246666667

00:37:37.737 --> 00:37:41.200 is above 25%, because that 16%

NOTE Confidence: 0.945579246666667

00:37:41.200 --> 00:37:43.800 includes things like references,

NOTE Confidence: 0.945579246666667

00:37:43.800 --> 00:37:45.152 references like titles, etcetera.

NOTE Confidence: 0.945579246666667

00:37:45.152 --> 00:37:47.537 This is the kind of things that

NOTE Confidence: 0.945579246666667

00:37:47.537 --> 00:37:49.037 it does with your language,

NOTE Confidence: 0.945579246666667

00:37:49.040 --> 00:37:50.960 clarity, you know, passive voice,

NOTE Confidence: 0.945579246666667

00:37:50.960 --> 00:37:52.800 misuse of very, very common,

NOTE Confidence: 0.945579246666667

00:37:52.800 --> 00:37:54.932 wordy sentences,

NOTE Confidence: 0.945579246666667

00:37:54.932 --> 00:37:55.998 etcetera.

NOTE Confidence: 0.945579246666667

00:37:56.000 --> 00:37:58.248 This is an example from a paper of

NOTE Confidence: 0.945579246666667

00:37:58.248 --> 00:38:00.690 mine in which this sentence was
NOTE Confidence: 0.945579246666667

00:38:00.690 --> 00:38:02.955 picked up as potentially plagiarized,
NOTE Confidence: 0.945579246666667

00:38:02.960 --> 00:38:05.160 picked up from this article.
NOTE Confidence: 0.945579246666667

00:38:05.160 --> 00:38:07.872 And in fact the article is about an
NOTE Confidence: 0.945579246666667

00:38:07.872 --> 00:38:09.599 instrument about climate change,
NOTE Confidence: 0.945579246666667

00:38:09.600 --> 00:38:12.360 and we use language verbatim.
NOTE Confidence: 0.945579246666667

00:38:12.360 --> 00:38:13.356 But it was good to know.
NOTE Confidence: 0.945579246666667

00:38:13.360 --> 00:38:15.196 And what we did is that we added quotations,
NOTE Confidence: 0.945579246666667

00:38:15.200 --> 00:38:17.498 what's We added quotations on both
NOTE Confidence: 0.945579246666667

00:38:17.498 --> 00:38:19.919 sides and that solved the problem.
NOTE Confidence: 0.945579246666667

00:38:19.920 --> 00:38:21.439 I'm sorry, my slides are jumping around.
NOTE Confidence: 0.945579246666667

00:38:21.440 --> 00:38:21.760 Hold on
NOTE Confidence: 0.957623358

00:38:23.800 --> 00:38:25.560 similarly about the other one.
NOTE Confidence: 0.957623358

00:38:25.560 --> 00:38:28.724 And note the number here, 3:44 and 3:45.
NOTE Confidence: 0.957623358

00:38:28.724 --> 00:38:32.000 This means that Grammarly identified 345 and
NOTE Confidence: 0.957623358

00:38:32.000 --> 00:38:34.504 counting issues on a paper that I thought

NOTE Confidence: 0.957623358

00:38:34.504 --> 00:38:37.477 that I thought was completely ready to go.

NOTE Confidence: 0.957623358

00:38:37.480 --> 00:38:40.430 So you can learn a lot as you can see for

NOTE Confidence: 0.957623358

00:38:40.430 --> 00:38:43.222 both the grammar but also being mindful of

NOTE Confidence: 0.957623358

00:38:43.222 --> 00:38:46.237 when you may be self plagiarizing yourself.

NOTE Confidence: 0.957623358

00:38:46.240 --> 00:38:47.452 And it's very scary.

NOTE Confidence: 0.957623358

00:38:47.452 --> 00:38:49.595 That's happened to me now twice that

NOTE Confidence: 0.957623358

00:38:49.595 --> 00:38:51.715 a journal comes back to me and says,

NOTE Confidence: 0.957623358

00:38:51.720 --> 00:38:53.320 you know, we're concerned

NOTE Confidence: 0.957623358

00:38:53.320 --> 00:38:55.320 because the score was whatever.

NOTE Confidence: 0.957623358

00:38:55.320 --> 00:38:56.594 And I went back and I saw

NOTE Confidence: 0.957623358

00:38:56.594 --> 00:38:58.079 that it was mostly references,

NOTE Confidence: 0.957623358

00:38:58.080 --> 00:38:58.832 mostly methods,

NOTE Confidence: 0.957623358

00:38:58.832 --> 00:39:01.840 and I was able to to change it.

NOTE Confidence: 0.957623358

00:39:01.840 --> 00:39:04.080 Methods can really count

NOTE Confidence: 0.957623358

00:39:04.080 --> 00:39:06.040 towards the plagiarism.

NOTE Confidence: 0.887145

00:39:08.920 --> 00:39:13.476 OK, last part, the trials and tribulations

NOTE Confidence: 0.887145

00:39:13.476 --> 00:39:16.720 of a paper that has been submitted.

NOTE Confidence: 0.887145

00:39:16.720 --> 00:39:19.720 So let's learn from rejections.

NOTE Confidence: 0.887145

00:39:19.720 --> 00:39:21.316 Rejections come in two main flavors.

NOTE Confidence: 0.887145

00:39:21.320 --> 00:39:23.300 There's a quick one which

NOTE Confidence: 0.887145

00:39:23.300 --> 00:39:25.999 generally has to do with the fit,

NOTE Confidence: 0.887145

00:39:26.000 --> 00:39:28.650 the fit of your paper. In this germ,

NOTE Confidence: 0.887145

00:39:28.650 --> 00:39:31.200 you usually don't get feedback.

NOTE Confidence: 0.887145

00:39:31.200 --> 00:39:33.516 It's called a desk rejection sometimes,

NOTE Confidence: 0.887145

00:39:33.520 --> 00:39:35.064 and you know you don't make a big

NOTE Confidence: 0.887145

00:39:35.064 --> 00:39:36.485 deal out of it other than, well,

NOTE Confidence: 0.887145

00:39:36.485 --> 00:39:37.920 maybe I didn't pick the right turn.

NOTE Confidence: 0.872768528571429

00:39:40.120 --> 00:39:41.996 The other rejection is a slow rejection,

NOTE Confidence: 0.872768528571429

00:39:42.000 --> 00:39:43.245 the one that takes several

NOTE Confidence: 0.872768528571429

00:39:43.245 --> 00:39:44.920 weeks to a couple of months.

NOTE Confidence: 0.872768528571429

00:39:44.920 --> 00:39:45.972 And those rejections usually

NOTE Confidence: 0.872768528571429
00:39:45.972 --> 00:39:48.000 have to do more with the content,
NOTE Confidence: 0.872768528571429
00:39:48.000 --> 00:39:51.120 with the science, with the writing.
NOTE Confidence: 0.872768528571429
00:39:51.120 --> 00:39:53.680 And even though it's rejected,
NOTE Confidence: 0.872768528571429
00:39:53.680 --> 00:39:54.720 they come with feedback.
NOTE Confidence: 0.872768528571429
00:39:54.720 --> 00:39:56.966 And they come with a lot of feedback
NOTE Confidence: 0.872768528571429
00:39:56.966 --> 00:39:59.157 that you should really take into account.
NOTE Confidence: 0.872768528571429
00:39:59.160 --> 00:40:01.092 Doesn't mean that you need to
NOTE Confidence: 0.872768528571429
00:40:01.092 --> 00:40:02.380 slavishly adhere to everything
NOTE Confidence: 0.872768528571429
00:40:02.442 --> 00:40:03.678 that the feedback does.
NOTE Confidence: 0.872768528571429
00:40:03.680 --> 00:40:06.080 Not every feedback is good,
NOTE Confidence: 0.872768528571429
00:40:06.080 --> 00:40:08.320 but there's a lot to be learned.
NOTE Confidence: 0.872768528571429
00:40:08.320 --> 00:40:11.200 So before you send it to the next journal,
NOTE Confidence: 0.872768528571429
00:40:11.200 --> 00:40:13.414 see what from this rejection can
NOTE Confidence: 0.872768528571429
00:40:13.414 --> 00:40:15.378 you address That will improve
NOTE Confidence: 0.872768528571429
00:40:15.378 --> 00:40:17.752 your paper and that's what will
NOTE Confidence: 0.872768528571429

00:40:17.752 --> 00:40:19.692 strengthen the paper throughout the
NOTE Confidence: 0.872768528571429

00:40:19.692 --> 00:40:21.440 process of submission and rejection.
NOTE Confidence: 0.92154456

00:40:23.760 --> 00:40:26.070 The great writer by the name
NOTE Confidence: 0.92154456

00:40:26.070 --> 00:40:29.240 of Snoopy knows a lot about
NOTE Confidence: 0.92154456

00:40:29.240 --> 00:40:32.756 about this and he wrote this.
NOTE Confidence: 0.83864653

00:40:35.040 --> 00:40:36.324 So dear contributor,
NOTE Confidence: 0.83864653

00:40:36.324 --> 00:40:39.034 the letter comes to Snoopy.
NOTE Confidence: 0.83864653

00:40:39.040 --> 00:40:41.038 Thank you so much for submitting
NOTE Confidence: 0.83864653

00:40:41.038 --> 00:40:43.040 your story to our magazine.
NOTE Confidence: 0.905200297777778

00:40:45.280 --> 00:40:47.700 To save time, we are
NOTE Confidence: 0.905200297777778

00:40:47.700 --> 00:40:49.636 enclosing 2 rejection slips,
NOTE Confidence: 0.905200297777778

00:40:49.640 --> 00:40:51.894 1 for this story and one for
NOTE Confidence: 0.905200297777778

00:40:51.894 --> 00:40:53.840 the next story you send us.
NOTE Confidence: 0.905200297777778

00:40:53.840 --> 00:40:55.674 And that's what it can feel like.
NOTE Confidence: 0.905200297777778

00:40:55.680 --> 00:40:57.516 That no matter what you do,
NOTE Confidence: 0.905200297777778

00:40:57.520 --> 00:41:00.000 you're being rejected and rejected.

NOTE Confidence: 0.905200297777778
00:41:00.000 --> 00:41:03.920 But rejection really strengthens you.
NOTE Confidence: 0.905200297777778
00:41:03.920 --> 00:41:07.200 So what now? What now?
NOTE Confidence: 0.905200297777778
00:41:07.200 --> 00:41:09.600 If you've been invited to
NOTE Confidence: 0.905200297777778
00:41:09.600 --> 00:41:11.040 revise and resubmit,
NOTE Confidence: 0.905200297777778
00:41:11.040 --> 00:41:12.918 that is fantastic.
NOTE Confidence: 0.9638896
00:41:16.840 --> 00:41:17.480 You know
NOTE Confidence: 0.93791634
00:41:19.680 --> 00:41:23.650 respond to reviewers comments
NOTE Confidence: 0.93791634
00:41:23.650 --> 00:41:26.800 in a way that makes sense.
NOTE Confidence: 0.93791634
00:41:26.800 --> 00:41:29.439 Writing a review letter or a revision
NOTE Confidence: 0.93791634
00:41:29.439 --> 00:41:32.198 letter is one of the intellectually
NOTE Confidence: 0.93791634
00:41:32.200 --> 00:41:34.120 most challenging parts of writing,
NOTE Confidence: 0.93791634
00:41:34.120 --> 00:41:35.956 because you really need to be
NOTE Confidence: 0.93791634
00:41:35.956 --> 00:41:38.080 all in and engaged and remember,
NOTE Confidence: 0.93791634
00:41:38.080 --> 00:41:39.196 you don't want to blow it.
NOTE Confidence: 0.93791634
00:41:39.200 --> 00:41:40.100 You're halfway there.
NOTE Confidence: 0.93791634

00:41:40.100 --> 00:41:41.600 They're inviting you to revise,
NOTE Confidence: 0.93791634

00:41:41.600 --> 00:41:42.821 You're showing interest.
NOTE Confidence: 0.93791634

00:41:42.821 --> 00:41:44.449 Most revise and resubmit
NOTE Confidence: 0.93791634

00:41:44.449 --> 00:41:46.759 letters end up being published.
NOTE Confidence: 0.93791634

00:41:46.760 --> 00:41:48.200 So don't screw it up
NOTE Confidence: 0.907019585

00:41:50.600 --> 00:41:52.196 what I do. So, you know,
NOTE Confidence: 0.907019585

00:41:52.200 --> 00:41:54.120 never take decision letters personally.
NOTE Confidence: 0.907019585

00:41:54.120 --> 00:41:55.432 Be civil and proactive
NOTE Confidence: 0.907019585

00:41:55.432 --> 00:41:57.072 and stick to the facts.
NOTE Confidence: 0.907019585

00:41:57.080 --> 00:42:01.432 And what I always do is that I start
NOTE Confidence: 0.907019585

00:42:01.432 --> 00:42:04.240 with language that's something like this.
NOTE Confidence: 0.907019585

00:42:04.240 --> 00:42:05.172 I really thank them,
NOTE Confidence: 0.907019585

00:42:05.172 --> 00:42:06.536 thank them, thank them.
NOTE Confidence: 0.907019585

00:42:06.536 --> 00:42:10.120 I tell them that I pasted their letter.
NOTE Confidence: 0.885648828

00:42:12.800 --> 00:42:14.640 We we include our responses
NOTE Confidence: 0.885648828

00:42:14.640 --> 00:42:16.480 interspersed with your decision letter.

NOTE Confidence: 0.885648828

00:42:16.480 --> 00:42:18.000 So the entire letter that

NOTE Confidence: 0.885648828

00:42:18.000 --> 00:42:19.520 they send out is there,

NOTE Confidence: 0.885648828

00:42:19.520 --> 00:42:21.438 but it's very clear in blue letters.

NOTE Confidence: 0.885648828

00:42:21.440 --> 00:42:23.918 What are the changes that you're making?

NOTE Confidence: 0.885648828

00:42:23.920 --> 00:42:26.080 In the revised manuscript itself,

NOTE Confidence: 0.885648828

00:42:26.080 --> 00:42:28.000 you also indicated, and you know,

NOTE Confidence: 0.885648828

00:42:28.000 --> 00:42:29.720 I use that yellow highlight.

NOTE Confidence: 0.885648828

00:42:29.720 --> 00:42:31.360 So however you do it,

NOTE Confidence: 0.885648828

00:42:31.360 --> 00:42:34.590 make it easy on the editor to see

NOTE Confidence: 0.885648828

00:42:34.590 --> 00:42:36.360 the changes and let them know

NOTE Confidence: 0.885648828

00:42:36.360 --> 00:42:38.539 that you are in agreement that

NOTE Confidence: 0.885648828

00:42:38.539 --> 00:42:40.434 that you are being responsive.

NOTE Confidence: 0.885648828

00:42:40.440 --> 00:42:42.358 So the words are not important here,

NOTE Confidence: 0.885648828

00:42:42.360 --> 00:42:44.600 but my point is that the black letters

NOTE Confidence: 0.885648828

00:42:44.600 --> 00:42:47.000 are from the decision letter and the

NOTE Confidence: 0.885648828

00:42:47.000 --> 00:42:49.240 blue letters are from my response letter.
NOTE Confidence: 0.885648828

00:42:49.240 --> 00:42:51.466 So my response letters are really
NOTE Confidence: 0.885648828

00:42:51.466 --> 00:42:54.240 long and have a lot of blue ink.
NOTE Confidence: 0.885648828

00:42:54.240 --> 00:42:56.680 Now, you don't have to agree with everything.
NOTE Confidence: 0.885648828

00:42:56.680 --> 00:42:58.300 If you don't agree and they
NOTE Confidence: 0.885648828

00:42:58.300 --> 00:42:59.640 didn't get something you say,
NOTE Confidence: 0.885648828

00:42:59.640 --> 00:43:00.828 well, you know,
NOTE Confidence: 0.885648828

00:43:00.828 --> 00:43:03.600 we respectfully disagree because XY and Z,
NOTE Confidence: 0.885648828

00:43:03.600 --> 00:43:05.160 you just stick to the facts.
NOTE Confidence: 0.843351312222222

00:43:07.320 --> 00:43:09.678 All right, So that was a what to next?
NOTE Confidence: 0.843351312222222

00:43:09.680 --> 00:43:13.280 What about the where to next?
NOTE Confidence: 0.843351312222222

00:43:13.280 --> 00:43:14.560 You know, balance your ambition.
NOTE Confidence: 0.843351312222222

00:43:14.560 --> 00:43:17.157 New England Journal of Medicine with realism.
NOTE Confidence: 0.843351312222222

00:43:17.160 --> 00:43:19.116 You know, whatever it might be,
NOTE Confidence: 0.843351312222222

00:43:19.120 --> 00:43:21.433 prioritize how visible,
NOTE Confidence: 0.843351312222222

00:43:21.433 --> 00:43:24.517 timely your science is.

NOTE Confidence: 0.843351312222222

00:43:24.520 --> 00:43:26.080 Think globally, but act locally.

NOTE Confidence: 0.843351312222222

00:43:26.080 --> 00:43:28.950 Not everything needs to go to global

NOTE Confidence: 0.843351312222222

00:43:28.950 --> 00:43:30.631 publications and regional publications

NOTE Confidence: 0.843351312222222

00:43:30.631 --> 00:43:33.695 can be very very important in smaller and

NOTE Confidence: 0.843351312222222

00:43:33.695 --> 00:43:36.396 sub sub speciality journals are right.

NOTE Confidence: 0.843351312222222

00:43:36.400 --> 00:43:38.794 Don't just think about the impact factor,

NOTE Confidence: 0.843351312222222

00:43:38.800 --> 00:43:43.440 think of who this will reach and how it will

NOTE Confidence: 0.843351312222222

00:43:43.552 --> 00:43:46.719 reach and how long can your findings wait.

NOTE Confidence: 0.843351312222222

00:43:46.720 --> 00:43:48.320 I mean, maybe you're set

NOTE Confidence: 0.843351312222222

00:43:48.320 --> 00:43:49.414 on publishing in Science,

NOTE Confidence: 0.843351312222222

00:43:49.414 --> 00:43:51.560 but that might take a couple of years.

NOTE Confidence: 0.843351312222222

00:43:51.560 --> 00:43:53.646 Maybe you can think of something else

NOTE Confidence: 0.843351312222222

00:43:53.646 --> 00:43:55.676 and get something on your CV early on,

NOTE Confidence: 0.843351312222222

00:43:55.680 --> 00:43:57.640 especially if you need it as an

NOTE Confidence: 0.843351312222222

00:43:57.640 --> 00:43:58.680 assistant professor early on.

NOTE Confidence: 0.843351312222222

00:43:58.680 --> 00:43:59.320 For example,
NOTE Confidence: 0.864652881818182

00:44:04.200 --> 00:44:06.522 Open Access journals I mentioned are
NOTE Confidence: 0.864652881818182

00:44:06.522 --> 00:44:08.720 good and they're increasingly available,
NOTE Confidence: 0.864652881818182

00:44:08.720 --> 00:44:10.435 and I wouldn't be surprised if some
NOTE Confidence: 0.864652881818182

00:44:10.435 --> 00:44:12.380 years from now they were the majority
NOTE Confidence: 0.864652881818182

00:44:12.380 --> 00:44:14.114 of journals and Open Access journal.
NOTE Confidence: 0.864652881818182

00:44:14.120 --> 00:44:16.872 Just as a reminder, you, the author,
NOTE Confidence: 0.864652881818182

00:44:16.872 --> 00:44:19.950 need to pay for the publication
NOTE Confidence: 0.864652881818182

00:44:19.950 --> 00:44:22.800 once the paper is accepted.
NOTE Confidence: 0.864652881818182

00:44:22.800 --> 00:44:26.520 The fees vary, but are usually around \$2000.
NOTE Confidence: 0.95223216

00:44:28.680 --> 00:44:30.210 But there's also for every
NOTE Confidence: 0.95223216

00:44:30.210 --> 00:44:31.434 good Open Access journal.
NOTE Confidence: 0.95223216

00:44:31.440 --> 00:44:34.440 There are now many predatory publications.
NOTE Confidence: 0.95223216

00:44:34.440 --> 00:44:35.884 Just today I've received,
NOTE Confidence: 0.95223216

00:44:35.884 --> 00:44:38.501 I kid you not 6 invitations to
NOTE Confidence: 0.95223216

00:44:38.501 --> 00:44:40.376 send to some obscure journal

NOTE Confidence: 0.95223216

00:44:40.376 --> 00:44:41.876 I've never heard about.

NOTE Confidence: 0.95223216

00:44:41.880 --> 00:44:43.236 So you need to be mindful,

NOTE Confidence: 0.95223216

00:44:43.240 --> 00:44:46.830 especially around Open Access,

NOTE Confidence: 0.95223216

00:44:46.830 --> 00:44:49.005 that they're legit and not

NOTE Confidence: 0.95223216

00:44:49.005 --> 00:44:49.875 predatory publications.

NOTE Confidence: 0.66745777

00:44:52.280 --> 00:44:54.160 Preprint servers I'll give you.

NOTE Confidence: 0.66745777

00:44:54.160 --> 00:44:55.440 I'll show you an example,

NOTE Confidence: 0.66745777

00:44:55.440 --> 00:44:56.824 but in many journals,

NOTE Confidence: 0.66745777

00:44:56.824 --> 00:44:58.554 both traditional and Open Access,

NOTE Confidence: 0.66745777

00:44:58.560 --> 00:45:02.434 as soon as you upload your paper and

NOTE Confidence: 0.66745777

00:45:02.434 --> 00:45:04.233 you send it to a review process,

NOTE Confidence: 0.66745777

00:45:04.240 --> 00:45:06.200 that will take several months,

NOTE Confidence: 0.66745777

00:45:06.200 --> 00:45:07.620 At the same time,

NOTE Confidence: 0.66745777

00:45:07.620 --> 00:45:11.200 it can be submitted to a preprint server.

NOTE Confidence: 0.66745777

00:45:11.200 --> 00:45:12.915 Always take that option when you want.

NOTE Confidence: 0.66745777

00:45:12.920 --> 00:45:14.385 You can also just upload
NOTE Confidence: 0.66745777

00:45:14.385 --> 00:45:15.557 to a preprint server.
NOTE Confidence: 0.66745777

00:45:15.560 --> 00:45:18.800 A preprint server makes your PDF
NOTE Confidence: 0.66745777

00:45:18.800 --> 00:45:21.600 available and findable and it gives it
NOTE Confidence: 0.66745777

00:45:21.600 --> 00:45:24.760 a DOI right away so that you don't need
NOTE Confidence: 0.66745777

00:45:24.760 --> 00:45:27.759 to wait time for the science to show.
NOTE Confidence: 0.66745777

00:45:27.760 --> 00:45:30.739 How do you find a publication then you other
NOTE Confidence: 0.66745777

00:45:30.739 --> 00:45:33.437 than the five or ten journals you know.
NOTE Confidence: 0.66745777

00:45:33.440 --> 00:45:35.100 These are two websites
NOTE Confidence: 0.66745777

00:45:35.100 --> 00:45:36.760 that I highly recommend.
NOTE Confidence: 0.66745777

00:45:36.760 --> 00:45:40.888 This one is through the library,
NOTE Confidence: 0.66745777

00:45:40.888 --> 00:45:42.360 you can find it.
NOTE Confidence: 0.66745777

00:45:42.360 --> 00:45:48.290 MJL is medical journal list and you
NOTE Confidence: 0.66745777

00:45:48.290 --> 00:45:51.512 tap in here, you know your topic,
NOTE Confidence: 0.66745777

00:45:51.512 --> 00:45:53.402 your abstract and it'll give
NOTE Confidence: 0.66745777

00:45:53.402 --> 00:45:55.359 you matches for journals.

NOTE Confidence: 0.66745777
00:45:55.360 --> 00:45:56.680 Another very widely available
NOTE Confidence: 0.66745777
00:45:56.680 --> 00:45:58.000 one is called Jane,
NOTE Confidence: 0.66745777
00:45:58.000 --> 00:46:00.680 which is journal author name.
NOTE Confidence: 0.66745777
00:46:00.680 --> 00:46:03.998 What is it in count estimator
NOTE Confidence: 0.66745777
00:46:04.000 --> 00:46:05.424 and it's quite remarkable.
NOTE Confidence: 0.66745777
00:46:05.424 --> 00:46:09.060 What I did here is put the title You can
NOTE Confidence: 0.66745777
00:46:09.060 --> 00:46:11.488 see part of the title Embracing Languages,
NOTE Confidence: 0.66745777
00:46:11.488 --> 00:46:12.064 Patient Simulation.
NOTE Confidence: 0.66745777
00:46:12.064 --> 00:46:13.792 You can't see the whole title,
NOTE Confidence: 0.66745777
00:46:13.800 --> 00:46:16.278 but it includes the words qualitative,
NOTE Confidence: 0.66745777
00:46:16.280 --> 00:46:16.715 psychiatry,
NOTE Confidence: 0.66745777
00:46:16.715 --> 00:46:20.195 those kind of keywords and in two seconds.
NOTE Confidence: 0.66745777
00:46:20.200 --> 00:46:23.431 This is a list of journals that I have
NOTE Confidence: 0.66745777
00:46:23.431 --> 00:46:26.877 that go from really great ideas like BMJ,
NOTE Confidence: 0.66745777
00:46:26.880 --> 00:46:28.450 Medical Education that probably I
NOTE Confidence: 0.66745777

00:46:28.450 --> 00:46:30.268 wouldn't have thought about to one
NOTE Confidence: 0.66745777

00:46:30.268 --> 00:46:31.836 that is not a good match for me,
NOTE Confidence: 0.66745777

00:46:31.840 --> 00:46:33.760 like the Pan African Medical Journal.
NOTE Confidence: 0.66745777

00:46:33.760 --> 00:46:35.026 Probably not good.
NOTE Confidence: 0.66745777

00:46:35.026 --> 00:46:36.714 So there's a range,
NOTE Confidence: 0.66745777

00:46:36.720 --> 00:46:38.910 but then you can evaluate which
NOTE Confidence: 0.66745777

00:46:38.910 --> 00:46:40.060 ones are available,
NOTE Confidence: 0.66745777

00:46:40.060 --> 00:46:42.160 which ones are Open Access,
NOTE Confidence: 0.66745777

00:46:42.160 --> 00:46:42.660 etcetera,
NOTE Confidence: 0.66745777

00:46:42.660 --> 00:46:43.160 etcetera.
NOTE Confidence: 0.66745777

00:46:43.160 --> 00:46:45.160 So very helpful tool.
NOTE Confidence: 0.58630884

00:46:47.880 --> 00:46:52.888 To give you an idea, this is a paper
NOTE Confidence: 0.58630884

00:46:52.888 --> 00:46:56.600 we submitted close to two years ago.
NOTE Confidence: 0.58630884

00:46:56.600 --> 00:46:58.510 And you see research Square
NOTE Confidence: 0.58630884

00:46:58.510 --> 00:47:00.038 is a preprint server.
NOTE Confidence: 0.58630884

00:47:00.040 --> 00:47:01.925 So the the journal immediately

NOTE Confidence: 0.58630884
00:47:01.925 --> 00:47:04.360 send it to this preprint server,
NOTE Confidence: 0.58630884
00:47:04.360 --> 00:47:09.972 it's not typeset, it's APDF and you see
NOTE Confidence: 0.58630884
00:47:09.972 --> 00:47:12.000 that it says it is not peer reviewed
NOTE Confidence: 0.58630884
00:47:12.000 --> 00:47:14.693 to take with a grain of salt, etcetera.
NOTE Confidence: 0.58630884
00:47:14.693 --> 00:47:18.976 But in this preprint server we submitted
NOTE Confidence: 0.58630884
00:47:18.976 --> 00:47:21.420 in July of 2022 and you see that
NOTE Confidence: 0.58630884
00:47:21.420 --> 00:47:23.439 on that very day when we submitted,
NOTE Confidence: 0.58630884
00:47:23.440 --> 00:47:25.480 we already have something that's findable,
NOTE Confidence: 0.58630884
00:47:25.480 --> 00:47:30.780 ADOI and sorry, sorry.
NOTE Confidence: 0.58630884
00:47:30.780 --> 00:47:33.330 And then after review,
NOTE Confidence: 0.58630884
00:47:33.330 --> 00:47:37.240 it was the next version which was you know,
NOTE Confidence: 0.58630884
00:47:37.240 --> 00:47:39.035 six months later and eventually
NOTE Confidence: 0.58630884
00:47:39.035 --> 00:47:41.280 when it was published in April.
NOTE Confidence: 0.58630884
00:47:41.280 --> 00:47:43.806 So it's almost a year ahead
NOTE Confidence: 0.58630884
00:47:43.806 --> 00:47:46.600 of when it was published.
NOTE Confidence: 0.58630884

00:47:46.600 --> 00:47:48.000 So preprint servers are very,
NOTE Confidence: 0.58630884
00:47:48.000 --> 00:47:49.800 very helpful.
NOTE Confidence: 0.58630884
00:47:49.800 --> 00:47:52.523 My last point is that there are
NOTE Confidence: 0.58630884
00:47:52.523 --> 00:47:54.879 other doors in two journals.
NOTE Confidence: 0.58630884
00:47:54.880 --> 00:47:57.564 It's not all scientific articles,
NOTE Confidence: 0.58630884
00:47:57.564 --> 00:48:00.844 so you know you want to try to keep on
NOTE Confidence: 0.58630884
00:48:00.844 --> 00:48:02.834 writing because writing begets writing.
NOTE Confidence: 0.58630884
00:48:02.840 --> 00:48:05.372 Volunteers, A reviewer or don't turn
NOTE Confidence: 0.58630884
00:48:05.372 --> 00:48:08.160 down offers when they come your way.
NOTE Confidence: 0.58630884
00:48:08.160 --> 00:48:10.160 They will help you be a better writer,
NOTE Confidence: 0.58630884
00:48:10.160 --> 00:48:12.680 a better critic of your own work.
NOTE Confidence: 0.58630884
00:48:12.680 --> 00:48:14.672 Letters to the editor and miscellaneous
NOTE Confidence: 0.58630884
00:48:14.672 --> 00:48:16.600 pieces will teach you something.
NOTE Confidence: 0.58630884
00:48:16.600 --> 00:48:19.714 I am a huge, huge fan of book reviews.
NOTE Confidence: 0.58630884
00:48:19.720 --> 00:48:23.812 I wrote many book reviews that then led to
NOTE Confidence: 0.58630884
00:48:23.812 --> 00:48:25.918 my being a book review editor of a journal.

NOTE Confidence: 0.58630884

00:48:25.920 --> 00:48:28.440 Then that led me to being the journal,

NOTE Confidence: 0.58630884

00:48:28.440 --> 00:48:30.680 the editor in chief of that journal.

NOTE Confidence: 0.58630884

00:48:30.680 --> 00:48:32.156 So book reviews are a way

NOTE Confidence: 0.58630884

00:48:32.156 --> 00:48:33.520 of engaging with the topic,

NOTE Confidence: 0.58630884

00:48:33.520 --> 00:48:36.120 of getting a feel for what publishing is,

NOTE Confidence: 0.58630884

00:48:36.120 --> 00:48:38.440 picking up a topic that's of your interest.

NOTE Confidence: 0.58630884

00:48:38.440 --> 00:48:39.798 So I could go on and on.

NOTE Confidence: 0.905968680909091

00:48:41.920 --> 00:48:44.008 And not all stories have the

NOTE Confidence: 0.905968680909091

00:48:44.008 --> 00:48:46.080 traditional format that I've mentioned.

NOTE Confidence: 0.905968680909091

00:48:46.080 --> 00:48:47.908 For example, qualitative science,

NOTE Confidence: 0.905968680909091

00:48:47.908 --> 00:48:50.193 which is my main interest,

NOTE Confidence: 0.905968680909091

00:48:50.200 --> 00:48:52.874 doesn't quite fit everything that we said.

NOTE Confidence: 0.905968680909091

00:48:52.880 --> 00:48:54.494 But the point is that there

NOTE Confidence: 0.905968680909091

00:48:54.494 --> 00:48:56.120 are many ways of writing,

NOTE Confidence: 0.957825954

00:48:58.320 --> 00:48:59.520 so finally, just do it.

NOTE Confidence: 0.957825954

00:48:59.520 --> 00:49:02.600 Life is filled with reasons to procrastinate,
NOTE Confidence: 0.957825954

00:49:02.600 --> 00:49:04.035 look to be polished, but not perfect.
NOTE Confidence: 0.957825954

00:49:04.040 --> 00:49:06.280 The perfect is the enemy of the good.
NOTE Confidence: 0.957825954

00:49:06.280 --> 00:49:08.394 And going back to the prophet Snoopy,
NOTE Confidence: 0.957825954

00:49:08.400 --> 00:49:10.360 he he knew what I've told you,
NOTE Confidence: 0.957825954

00:49:10.360 --> 00:49:13.356 you know, good writing is hard work.
NOTE Confidence: 0.957825954

00:49:13.360 --> 00:49:14.836 It's hard work, but it's really,
NOTE Confidence: 0.957825954

00:49:14.840 --> 00:49:16.080 really worthwhile.
NOTE Confidence: 0.957825954

00:49:16.080 --> 00:49:18.560 In this last slide,
NOTE Confidence: 0.957825954

00:49:18.560 --> 00:49:20.716 if you're interested to use AQR code,
NOTE Confidence: 0.957825954

00:49:20.720 --> 00:49:22.848 it will take you to these two
NOTE Confidence: 0.957825954

00:49:22.848 --> 00:49:24.086 very short articles, very,
NOTE Confidence: 0.957825954

00:49:24.086 --> 00:49:26.320 very short articles that I did
NOTE Confidence: 0.957825954

00:49:26.320 --> 00:49:28.720 in a small publication.
NOTE Confidence: 0.957825954

00:49:28.720 --> 00:49:30.436 1 is what we talked about,
NOTE Confidence: 0.957825954

00:49:30.440 --> 00:49:32.872 pointers to get your work published in the

NOTE Confidence: 0.957825954

00:49:32.872 --> 00:49:34.592 academic literature and the other revisits

NOTE Confidence: 0.957825954

00:49:34.592 --> 00:49:36.520 what we talked about some weeks ago,

NOTE Confidence: 0.957825954

00:49:36.520 --> 00:49:39.568 which is tips to help you

NOTE Confidence: 0.957825954

00:49:39.568 --> 00:49:41.600 write an effective abstract.

NOTE Confidence: 0.957825954

00:49:41.600 --> 00:49:43.316 And I think that with that,

NOTE Confidence: 0.957825954

00:49:43.320 --> 00:49:44.760 what I'm going to do is

NOTE Confidence: 0.88450272

00:49:47.440 --> 00:49:49.360 point this and maybe Linda,

NOTE Confidence: 0.88450272

00:49:49.360 --> 00:49:51.168 if you don't mind putting this in the

NOTE Confidence: 0.88450272

00:49:51.168 --> 00:49:52.692 chat because I want to stop the share

NOTE Confidence: 0.88450272

00:49:52.692 --> 00:49:54.560 so that I can see if there's any faces.

NOTE Confidence: 0.88450272

00:49:54.560 --> 00:49:57.278 I I I'm going on faith that there are.

NOTE Confidence: 0.88450272

00:49:57.280 --> 00:49:58.280 So we really appreciate

NOTE Confidence: 0.731897282307692

00:49:58.280 --> 00:49:59.648 and there's also some questions in

NOTE Confidence: 0.731897282307692

00:49:59.648 --> 00:50:01.158 the chat that we'll ask and good,

NOTE Confidence: 0.731897282307692

00:50:01.160 --> 00:50:02.399 good, I'm going to stop the chat.

NOTE Confidence: 0.731897282307692

00:50:02.400 --> 00:50:05.252 Let's give people a minute to do
NOTE Confidence: 0.731897282307692

00:50:05.252 --> 00:50:08.278 that survey. So I don't want to
NOTE Confidence: 0.856871015

00:50:10.760 --> 00:50:12.878 distract people from doing the survey,
NOTE Confidence: 0.856871015

00:50:12.880 --> 00:50:14.400 but there's a few questions.
NOTE Confidence: 0.715229288

00:50:21.040 --> 00:50:23.240 And if the timer's gone, the timer's,
NOTE Confidence: 0.924308514285714

00:50:26.440 --> 00:50:29.520 I feel like 45 seconds has passed. Are
NOTE Confidence: 0.770909273333333

00:50:30.720 --> 00:50:32.556 you still seeing, are you still
NOTE Confidence: 0.770909273333333

00:50:32.556 --> 00:50:34.400 seeing my slides? No. All
NOTE Confidence: 0.830368482857143

00:50:37.600 --> 00:50:39.436 right. The evaluation is in the
NOTE Confidence: 0.830368482857143

00:50:39.436 --> 00:50:41.320 the chat for people who didn't
NOTE Confidence: 0.830368482857143

00:50:41.320 --> 00:50:44.480 catch the catch it before is,
NOTE Confidence: 0.696171246

00:50:46.640 --> 00:50:48.120 is Deb Levy still on?
NOTE Confidence: 0.696171246

00:50:48.120 --> 00:50:50.276 She had a really good question about
NOTE Confidence: 0.696171246

00:50:50.280 --> 00:50:52.760 the tension between potentially
NOTE Confidence: 0.696171246

00:50:52.760 --> 00:50:55.240 plagiarisms and research methods.
NOTE Confidence: 0.943768773

00:50:58.480 --> 00:51:01.040 I am still here. I can come on camera too.

NOTE Confidence: 0.943768773

00:51:01.040 --> 00:51:03.278 I'm in my informal writing mode,

NOTE Confidence: 0.943768773

00:51:03.280 --> 00:51:08.560 so responding to her an article review.

NOTE Confidence: 0.943768773

00:51:08.560 --> 00:51:11.432 So I was asking to speak to the the

NOTE Confidence: 0.943768773

00:51:11.432 --> 00:51:13.761 methods I'm more involved in some work

NOTE Confidence: 0.943768773

00:51:13.761 --> 00:51:16.015 that like I'm finding that there's so

NOTE Confidence: 0.943768773

00:51:16.015 --> 00:51:17.920 much terminology that comes you know,

NOTE Confidence: 0.943768773

00:51:17.920 --> 00:51:19.528 like we're doing a scoping review

NOTE Confidence: 0.943768773

00:51:19.528 --> 00:51:21.327 and you talk about like there's

NOTE Confidence: 0.943768773

00:51:21.327 --> 00:51:22.953 two sentences just to say prisma,

NOTE Confidence: 0.943768773

00:51:22.953 --> 00:51:24.012 scoping review, whatever.

NOTE Confidence: 0.943768773

00:51:24.012 --> 00:51:26.880 You know, I'm, I'm expanding a little,

NOTE Confidence: 0.943768773

00:51:26.880 --> 00:51:30.318 but how do you balance the need to

NOTE Confidence: 0.943768773

00:51:30.320 --> 00:51:33.248 be standardized and show your rigor

NOTE Confidence: 0.943768773

00:51:33.248 --> 00:51:36.042 and your methodology and cite all of

NOTE Confidence: 0.943768773

00:51:36.042 --> 00:51:38.046 these sources and the articles with

NOTE Confidence: 0.943768773

00:51:38.046 --> 00:51:40.552 the risk that if you hit a certain
NOTE Confidence: 0.943768773

00:51:40.552 --> 00:51:42.439 number of words and sentences,
NOTE Confidence: 0.943768773

00:51:42.440 --> 00:51:44.408 you might be triggered on a
NOTE Confidence: 0.943768773

00:51:44.408 --> 00:51:45.720 plagiarism kind of thing,
NOTE Confidence: 0.943768773

00:51:45.720 --> 00:51:46.200 even if it's
NOTE Confidence: 0.883699742

00:51:46.200 --> 00:51:48.257 cited, of course. Yeah. Thanks, Deb.
NOTE Confidence: 0.883699742

00:51:48.257 --> 00:51:51.176 I think that Grammarly is fantastic because
NOTE Confidence: 0.883699742

00:51:51.176 --> 00:51:53.958 let's say that you put the sentence,
NOTE Confidence: 0.883699742

00:51:53.960 --> 00:51:56.288 you know, we use Scopus for
NOTE Confidence: 0.883699742

00:51:56.288 --> 00:51:59.356 it and it would flag it as.
NOTE Confidence: 0.883699742

00:51:59.360 --> 00:52:01.790 Now the beautiful thing is that
NOTE Confidence: 0.883699742

00:52:01.790 --> 00:52:05.039 if you put we use Scopus for X,
NOTE Confidence: 0.883699742

00:52:05.040 --> 00:52:07.000 if you just change the order or
NOTE Confidence: 0.883699742

00:52:07.000 --> 00:52:09.096 the small wording and keep Scopus,
NOTE Confidence: 0.883699742

00:52:09.096 --> 00:52:12.661 the plagiarism goes away and it will
NOTE Confidence: 0.883699742

00:52:12.661 --> 00:52:14.401 show you you can rerun it and it'll

NOTE Confidence: 0.883699742

00:52:14.401 --> 00:52:16.039 you know you see it going down.

NOTE Confidence: 0.883699742

00:52:16.040 --> 00:52:18.007 So a lot of these plagiarism and

NOTE Confidence: 0.883699742

00:52:18.007 --> 00:52:19.468 self plagiarism issues are are

NOTE Confidence: 0.883699742

00:52:19.468 --> 00:52:21.154 kind of innocent things that you

NOTE Confidence: 0.883699742

00:52:21.154 --> 00:52:22.080 wouldn't think about.

NOTE Confidence: 0.883699742

00:52:22.080 --> 00:52:27.520 So that's good, very helpful Grammarly.

NOTE Confidence: 0.883699742

00:52:28.280 --> 00:52:30.840 Thanks Sans.

NOTE Confidence: 0.831200977

00:52:30.840 --> 00:52:32.128 There was a the number of questions

NOTE Confidence: 0.831200977

00:52:32.128 --> 00:52:33.696 in the chat that had to do with

NOTE Confidence: 0.831200977

00:52:33.696 --> 00:52:34.671 getting some of the resources.

NOTE Confidence: 0.831200977

00:52:34.680 --> 00:52:36.552 But I think people now have links to Jane.

NOTE Confidence: 0.831200977

00:52:36.560 --> 00:52:38.436 They have links to they could have

NOTE Confidence: 0.831200977

00:52:38.436 --> 00:52:40.599 a couple of ideas of where they can

NOTE Confidence: 0.831200977

00:52:40.599 --> 00:52:43.608 go and put their names in or there

NOTE Confidence: 0.831200977

00:52:43.608 --> 00:52:46.560 are articles and get H factors.

NOTE Confidence: 0.831200977

00:52:46.560 --> 00:52:47.550 Anybody else have a question
NOTE Confidence: 0.831200977

00:52:47.550 --> 00:52:48.880 that I might not be seeing,
NOTE Confidence: 0.831200977

00:52:48.880 --> 00:52:51.960 please feel free to. I did
NOTE Confidence: 0.938935176363636

00:52:51.960 --> 00:52:54.641 not talk by the way about H
NOTE Confidence: 0.938935176363636

00:52:54.641 --> 00:52:56.560 factors or impact factors.
NOTE Confidence: 0.938935176363636

00:52:56.560 --> 00:52:57.760 I kind of Pooh poohed them
NOTE Confidence: 0.938935176363636

00:52:57.760 --> 00:52:59.120 a little bit and I and I do.
NOTE Confidence: 0.938935176363636

00:52:59.120 --> 00:53:00.585 But if you're really interested
NOTE Confidence: 0.938935176363636

00:53:00.585 --> 00:53:02.492 to know which are the ranked
NOTE Confidence: 0.938935176363636

00:53:02.492 --> 00:53:04.040 journals for your specialty,
NOTE Confidence: 0.938935176363636

00:53:04.040 --> 00:53:06.815 that's something that again in
NOTE Confidence: 0.938935176363636

00:53:06.815 --> 00:53:08.960 the website through it'll come
NOTE Confidence: 0.938935176363636

00:53:08.960 --> 00:53:10.400 to me exactly what it's called.
NOTE Confidence: 0.792098948333333

00:53:13.000 --> 00:53:14.632 But there's a place where you can put
NOTE Confidence: 0.792098948333333

00:53:14.632 --> 00:53:16.504 tell me the top ranked in psychiatry
NOTE Confidence: 0.792098948333333

00:53:16.504 --> 00:53:17.702 and child psychiatry, etcetera.

NOTE Confidence: 0.792098948333333
00:53:17.702 --> 00:53:19.754 And since I'm forgetting right now,
NOTE Confidence: 0.792098948333333
00:53:19.760 --> 00:53:21.391 clearly this is a good time to
NOTE Confidence: 0.792098948333333
00:53:21.391 --> 00:53:23.239 put a plug for our incredible,
NOTE Confidence: 0.792098948333333
00:53:23.240 --> 00:53:24.336 incredible librarians.
NOTE Confidence: 0.792098948333333
00:53:24.336 --> 00:53:28.720 If you ask a librarian by an e-mail,
NOTE Confidence: 0.792098948333333
00:53:28.720 --> 00:53:30.477 you'll have the answer in five seconds.
NOTE Confidence: 0.792098948333333
00:53:30.480 --> 00:53:33.438 I mean, they are just incredible.
NOTE Confidence: 0.792098948333333
00:53:33.440 --> 00:53:34.296 And they'll remember exactly
NOTE Confidence: 0.792098948333333
00:53:34.296 --> 00:53:35.580 what's a website if you then
NOTE Confidence: 0.792098948333333
00:53:35.622 --> 00:53:36.595 want to go and look at it.
NOTE Confidence: 0.881418343333333
00:53:38.160 --> 00:53:38.800 And they've been very
NOTE Confidence: 0.881418343333333
00:53:38.800 --> 00:53:39.600 helpful in the chat too.
NOTE Confidence: 0.881418343333333
00:53:39.600 --> 00:53:40.868 I really appreciate it.
NOTE Confidence: 0.881418343333333
00:53:40.868 --> 00:53:42.453 There's a question also about
NOTE Confidence: 0.881418343333333
00:53:42.453 --> 00:53:44.276 how to choose the final author
NOTE Confidence: 0.881418343333333

00:53:44.280 --> 00:53:47.280 if there's any principles. Yep.
NOTE Confidence: 0.908945803076923

00:53:47.920 --> 00:53:50.344 Yeah, so. So the general rule of thumb
NOTE Confidence: 0.908945803076923

00:53:50.344 --> 00:53:53.268 is that the first author is a person
NOTE Confidence: 0.908945803076923

00:53:53.268 --> 00:53:56.640 who does the bulk of the writing and
NOTE Confidence: 0.908945803076923

00:53:56.640 --> 00:54:00.240 takes the ownership of the writing.
NOTE Confidence: 0.908945803076923

00:54:00.240 --> 00:54:02.788 And the general rule of thumb is
NOTE Confidence: 0.908945803076923

00:54:02.788 --> 00:54:05.601 that the senior author is the person
NOTE Confidence: 0.908945803076923

00:54:05.601 --> 00:54:08.256 who supported it, that supported it.
NOTE Confidence: 0.908945803076923

00:54:08.256 --> 00:54:11.560 Not just by paying and being invisible,
NOTE Confidence: 0.908945803076923

00:54:11.560 --> 00:54:14.020 but by really being engaged and
NOTE Confidence: 0.908945803076923

00:54:14.020 --> 00:54:15.960 putting their hands in the dirt.
NOTE Confidence: 0.908945803076923

00:54:15.960 --> 00:54:18.020 You know, you, the 1st and the last
NOTE Confidence: 0.908945803076923

00:54:18.020 --> 00:54:19.828 author need to have their hands in
NOTE Confidence: 0.908945803076923

00:54:19.828 --> 00:54:23.713 the dirt of the paper and and at some
NOTE Confidence: 0.908945803076923

00:54:23.713 --> 00:54:24.877 point in professional development,
NOTE Confidence: 0.908945803076923

00:54:24.880 --> 00:54:26.868 for those of you who are early

NOTE Confidence: 0.908945803076923
00:54:26.868 --> 00:54:27.720 in your career,
NOTE Confidence: 0.908945803076923
00:54:27.720 --> 00:54:29.394 early on you want to be a first author.
NOTE Confidence: 0.908945803076923
00:54:29.400 --> 00:54:32.000 It's like the greatest thing in the world.
NOTE Confidence: 0.908945803076923
00:54:32.000 --> 00:54:32.609 At some point,
NOTE Confidence: 0.908945803076923
00:54:32.609 --> 00:54:34.560 the last thing in the world you want to be,
NOTE Confidence: 0.908945803076923
00:54:34.560 --> 00:54:36.520 you want to be the last author because
NOTE Confidence: 0.908945803076923
00:54:36.520 --> 00:54:38.507 you want to see those young people shine
NOTE Confidence: 0.908945803076923
00:54:38.507 --> 00:54:40.877 as they do and you want to be supportive.
NOTE Confidence: 0.908945803076923
00:54:40.880 --> 00:54:42.637 But it's one of those ethical things
NOTE Confidence: 0.908945803076923
00:54:42.637 --> 00:54:44.340 that if someone says, oh, you know,
NOTE Confidence: 0.908945803076923
00:54:44.340 --> 00:54:46.640 since I paid for it and I'm the chairman,
NOTE Confidence: 0.908945803076923
00:54:46.640 --> 00:54:49.160 I'm going to be no.
NOTE Confidence: 0.908945803076923
00:54:49.160 --> 00:54:51.238 And that's when it, you know, gets tricky.
NOTE Confidence: 0.908945803076923
00:54:51.238 --> 00:54:53.032 That person might be the 5th
NOTE Confidence: 0.908945803076923
00:54:53.032 --> 00:54:54.040 sandwich whatever author.
NOTE Confidence: 0.908945803076923

00:54:54.040 --> 00:54:54.400 But
NOTE Confidence: 0.9079873875

00:54:56.400 --> 00:54:59.411 there's a question about what makes a
NOTE Confidence: 0.9079873875

00:54:59.411 --> 00:55:00.953 journal predatory and how to identify.
NOTE Confidence: 0.9079873875

00:55:00.960 --> 00:55:02.120 Like are there lists of.
NOTE Confidence: 0.693657345

00:55:02.840 --> 00:55:05.756 Yeah, yeah. No it's it's very,
NOTE Confidence: 0.693657345

00:55:05.760 --> 00:55:07.116 so you got to be careful.
NOTE Confidence: 0.693657345

00:55:07.120 --> 00:55:08.928 I I think that you want to go
NOTE Confidence: 0.693657345

00:55:08.928 --> 00:55:10.687 and look very carefully at the
NOTE Confidence: 0.693657345

00:55:10.687 --> 00:55:12.547 journal to see that it's legit
NOTE Confidence: 0.693657345

00:55:12.610 --> 00:55:14.514 that it has a couple of volumes.
NOTE Confidence: 0.693657345

00:55:14.520 --> 00:55:17.640 If it's volume one, number one,
NOTE Confidence: 0.693657345

00:55:17.640 --> 00:55:20.720 probably don't submit there.
NOTE Confidence: 0.693657345

00:55:20.720 --> 00:55:23.624 If it is associated with a
NOTE Confidence: 0.693657345

00:55:23.624 --> 00:55:25.076 reputable publishing house,
NOTE Confidence: 0.693657345

00:55:25.080 --> 00:55:26.418 Springer or whatever,
NOTE Confidence: 0.693657345

00:55:26.418 --> 00:55:30.478 you know you're feeling good and

NOTE Confidence: 0.693657345

00:55:30.478 --> 00:55:32.704 you can just Google and say you

NOTE Confidence: 0.693657345

00:55:32.704 --> 00:55:35.197 know is JAMA a reputable journal

NOTE Confidence: 0.693657345

00:55:35.200 --> 00:55:37.400 is whatever a reputable journal,

NOTE Confidence: 0.693657345

00:55:37.400 --> 00:55:38.680 and it'll it'll tell you

NOTE Confidence: 0.604307884

00:55:41.360 --> 00:55:44.000 what's your experience been with

NOTE Confidence: 0.604307884

00:55:44.000 --> 00:55:45.364 various AI editing services.

NOTE Confidence: 0.604307884

00:55:45.364 --> 00:55:47.410 I've seen a new one from

NOTE Confidence: 0.604307884

00:55:47.484 --> 00:55:49.758 Springer Nature with Curie.

NOTE Confidence: 0.604307884

00:55:49.760 --> 00:55:51.755 I played around with it with a

NOTE Confidence: 0.604307884

00:55:51.755 --> 00:55:53.440 manuscript the other day and it

NOTE Confidence: 0.604307884

00:55:53.440 --> 00:55:55.240 seemed to give some helpful advice,

NOTE Confidence: 0.604307884

00:55:55.240 --> 00:55:57.048 but I'm just wondering if things like that

NOTE Confidence: 0.604307884

00:55:57.048 --> 00:55:58.758 and tools like that have been helpful,

NOTE Confidence: 0.604307884

00:55:58.760 --> 00:56:00.050 especially for those who maybe don't

NOTE Confidence: 0.604307884

00:56:00.050 --> 00:56:01.519 speak English as the first language.

NOTE Confidence: 0.933063337894737

00:56:02.920 --> 00:56:04.660 Yeah. Now that's a great question
NOTE Confidence: 0.933063337894737

00:56:04.660 --> 00:56:06.737 and I I suspect a question that
NOTE Confidence: 0.933063337894737

00:56:06.737 --> 00:56:09.720 will be changing by the day by the
NOTE Confidence: 0.933063337894737

00:56:09.720 --> 00:56:13.560 day because it's getting so good.
NOTE Confidence: 0.933063337894737

00:56:13.560 --> 00:56:17.960 I but I haven't used that software.
NOTE Confidence: 0.933063337894737

00:56:17.960 --> 00:56:20.088 I don't I don't know but I suspect
NOTE Confidence: 0.933063337894737

00:56:20.088 --> 00:56:22.036 that it could be helpful especially
NOTE Confidence: 0.933063337894737

00:56:22.036 --> 00:56:24.523 to a non you know someone who's
NOTE Confidence: 0.933063337894737

00:56:24.523 --> 00:56:26.518 not very comfortable with with
NOTE Confidence: 0.933063337894737

00:56:26.518 --> 00:56:28.918 English but I I just don't know.
NOTE Confidence: 0.933063337894737

00:56:28.920 --> 00:56:31.008 I also this is not to answer your
NOTE Confidence: 0.933063337894737

00:56:31.008 --> 00:56:32.670 question but just to introduce
NOTE Confidence: 0.933063337894737

00:56:32.670 --> 00:56:34.475 another of the complications here
NOTE Confidence: 0.933063337894737

00:56:34.480 --> 00:56:36.838 in my work in qualitative methods.
NOTE Confidence: 0.933063337894737

00:56:36.840 --> 00:56:40.395 I think it's just a matter of time between.
NOTE Confidence: 0.933063337894737

00:56:40.400 --> 00:56:45.775 AI does our data analysis in just as

NOTE Confidence: 0.933063337894737
00:56:45.775 --> 00:56:48.719 good or even a more sophisticated way,
NOTE Confidence: 0.933063337894737
00:56:48.720 --> 00:56:50.160 especially if you're looking at,
NOTE Confidence: 0.933063337894737
00:56:50.160 --> 00:56:53.440 you know, tons of transcripts.
NOTE Confidence: 0.933063337894737
00:56:53.440 --> 00:56:54.160 So you know
NOTE Confidence: 0.803313192
00:56:59.000 --> 00:57:00.960 and thanks for somebody, Diane.
NOTE Confidence: 0.803313192
00:57:00.960 --> 00:57:03.993 Put a list of where you can look up
NOTE Confidence: 0.867534
00:57:14.960 --> 00:57:15.360 predatoryjournalsbealslist.netpredator.org
NOTE Confidence: 0.867534
00:57:15.360 --> 00:57:15.760 itsays.net.
NOTE Confidence: 0.7795293675
00:57:17.920 --> 00:57:20.195 Yeah. Or were you talking
NOTE Confidence: 0.7795293675
00:57:20.195 --> 00:57:21.960 about another site, Andreas?
NOTE Confidence: 0.7795293675
00:57:21.960 --> 00:57:24.080 No, no, that was a joke. Oh,
NOTE Confidence: 0.682522865
00:57:25.840 --> 00:57:27.640 OK okpredator.net I I I was waiting
NOTE Confidence: 0.682522865
00:57:27.640 --> 00:57:30.080 to see when the dying would drop.
NOTE Confidence: 0.882126472857143
00:57:34.360 --> 00:57:36.048 We have fun together.
NOTE Confidence: 0.882126472857143
00:57:36.048 --> 00:57:38.000 Any other questions? Any questions?
NOTE Confidence: 0.632164806923077

00:57:40.560 --> 00:57:43.115 Dana and Andreas Fortuna asked
NOTE Confidence: 0.632164806923077

00:57:43.115 --> 00:57:45.159 the question about whether
NOTE Confidence: 0.632164806923077

00:57:45.159 --> 00:57:47.480 librarians are HIPAA certified to
NOTE Confidence: 0.632164806923077

00:57:47.480 --> 00:57:49.080 help with patient data emerging.
NOTE Confidence: 0.632164806923077

00:57:49.080 --> 00:57:51.640 Need a librarians want to answer that?
NOTE Confidence: 0.850339838

00:57:54.520 --> 00:57:55.832 Hi, this is Janine.
NOTE Confidence: 0.850339838

00:57:55.832 --> 00:57:58.314 We'd like to reach out to Doctor
NOTE Confidence: 0.850339838

00:57:58.314 --> 00:58:01.398 Diada and do some more questions.
NOTE Confidence: 0.850339838

00:58:01.400 --> 00:58:03.136 Ask him a little bit more about
NOTE Confidence: 0.850339838

00:58:03.136 --> 00:58:04.498 what he's after and whether
NOTE Confidence: 0.850339838

00:58:04.498 --> 00:58:05.734 that's something that Service
NOTE Confidence: 0.850339838

00:58:05.734 --> 00:58:07.438 Librarian can provide or if we can
NOTE Confidence: 0.818594635

00:58:09.680 --> 00:58:10.985 suggest someone who might be
NOTE Confidence: 0.818594635

00:58:10.985 --> 00:58:12.760 able to might be able to help.
NOTE Confidence: 0.818594635

00:58:12.760 --> 00:58:15.118 So if that's OK. Doctor Diaz.
NOTE Confidence: 0.818594635

00:58:15.120 --> 00:58:16.720 Yeah. Thank you. Yeah.

NOTE Confidence: 0.818594635

00:58:16.720 --> 00:58:19.960 That sounds great. Thank you.

NOTE Confidence: 0.652273934545455

00:58:19.960 --> 00:58:21.040 Yeah. And big shout out to

NOTE Confidence: 0.652273934545455

00:58:21.040 --> 00:58:22.240 our friends of the librarians.

NOTE Confidence: 0.652273934545455

00:58:22.240 --> 00:58:24.676 You guys are great. So helpful

NOTE Confidence: 0.9113497675

00:58:25.560 --> 00:58:28.724 he. And thanks for helping in the

NOTE Confidence: 0.9113497675

00:58:28.724 --> 00:58:32.200 chat with so many resources to

NOTE Confidence: 0.9113497675

00:58:32.200 --> 00:58:35.400 everybody and thank you Andreas.

NOTE Confidence: 0.9113497675

00:58:35.400 --> 00:58:36.492 We appreciate everybody's feedback.

NOTE Confidence: 0.9113497675

00:58:36.492 --> 00:58:39.292 And I'll see you in a couple of weeks for

NOTE Confidence: 0.9113497675

00:58:39.292 --> 00:58:40.960 one of the clinical teaching sessions.

NOTE Confidence: 0.9113497675

00:58:40.960 --> 00:58:42.272 I don't know if that that was on

NOTE Confidence: 0.9113497675

00:58:42.272 --> 00:58:43.640 the last slide probably maybe the,

NOTE Confidence: 0.6999066633333333

00:58:45.720 --> 00:58:48.158 Oh yeah, I didn't hold on. I have it

NOTE Confidence: 0.9493847933333333

00:58:48.280 --> 00:58:51.675 remind people that I think it is

NOTE Confidence: 0.9493847933333333

00:58:51.675 --> 00:58:54.280 teaching when time is limited.

NOTE Confidence: 0.9493847933333333

00:58:54.280 --> 00:58:56.760 My bad, is that right?
NOTE Confidence: 0.9493847933333333

00:58:56.760 --> 00:58:59.040 Master Adaptive.
NOTE Confidence: 0.9493847933333333

00:58:59.040 --> 00:59:00.570 Oh, the Master Adaptive Learner
NOTE Confidence: 0.9493847933333333

00:59:00.570 --> 00:59:02.288 is the Med End Discussion Group
NOTE Confidence: 0.9493847933333333

00:59:02.288 --> 00:59:03.760 on Thursday, February 22nd.
NOTE Confidence: 0.5012327533333333

00:59:06.320 --> 00:59:08.615 Anyway, we'll send emails around and
NOTE Confidence: 0.5012327533333333

00:59:08.615 --> 00:59:12.720 hope to see you at the next one.
NOTE Confidence: 0.5012327533333333

00:59:12.720 --> 00:59:16.234 Leave it up there. There we go.
NOTE Confidence: 0.5012327533333333

00:59:16.240 --> 00:59:17.640 Teaching in the ambulatory setting.
NOTE Confidence: 0.5012327533333333

00:59:17.640 --> 00:59:18.840 Otherwise also known as
NOTE Confidence: 0.5012327533333333

00:59:18.840 --> 00:59:20.640 teaching kind of on the fly.
NOTE Confidence: 0.5012327533333333

00:59:20.640 --> 00:59:24.240 So it's a it's a good one for for many of us.
NOTE Confidence: 0.96546369

00:59:30.030 --> 00:59:32.628 Thanks again, everyone. Thank you everyone.
NOTE Confidence: 0.937096595

00:59:35.510 --> 00:59:35.950 Thank you.
