It is critical that you are able to identify the exact site(s) that will be treated on the day of your appointment. Inability to identify the biopsy site will result in cancellation of the Mohs surgery. Identification is achieved by:

1. Visible scar where biopsy was performed. You can put your finger on the site.
2. A photograph of the biopsy site provided by you or your dermatologist (bring on appointment day).
3. A diagram with measurements of the biopsy site provided by your dermatologist (bring on appointment day).

Please read the contents carefully prior to your appointment. If you have any questions please call our office at 203-785-3466. We appreciate the opportunity to care for you.
