NOTE language:en-us

NOTE Confidence: 0.893501108571429

00:00:02.280 --> 00:00:05.339 Today, so I'm going to try to

NOTE Confidence: 0.893501108571429

00:00:05.340 --> 00:00:07.914 get through this quickly so we

NOTE Confidence: 0.893501108571429

00:00:07.914 --> 00:00:10.639 can get to questions at the end.

NOTE Confidence: 0.893501108571429

00:00:10.640 --> 00:00:12.520 The very first thing I want to note

NOTE Confidence: 0.893501108571429

00:00:12.520 --> 00:00:14.870 is you may have noticed that you

NOTE Confidence: 0.893501108571429

00:00:14.870 --> 00:00:16.690 received the first notifications e-mail

NOTE Confidence: 0.893501108571429

00:00:16.750 --> 00:00:18.598 from Beatrix you have in a while.

NOTE Confidence: 0.893501108571429

00:00:18.600 --> 00:00:20.512 About 2 minutes ago.

NOTE Confidence: 0.893501108571429

00:00:20.512 --> 00:00:23.380 We discovered a bug with the

NOTE Confidence: 0.893501108571429

00:00:23.478 --> 00:00:26.210 notifications the other day.

NOTE Confidence: 0.893501108571429

00:00:26.210 --> 00:00:28.282 We sort of patch it over so we

NOTE Confidence: 0.893501108571429

00:00:28.282 --> 00:00:30.489 could get notifications out to you,

NOTE Confidence: 0.893501108571429

00:00:30.490 --> 00:00:31.590 at least for today.

NOTE Confidence: 0.893501108571429

00:00:31.590 --> 00:00:33.596 So if you hadn't been actively logging  
NOTE Confidence: 0.893501108571429

00:00:33.596 --> 00:00:35.668 in to check these queues every day,  
NOTE Confidence: 0.893501108571429

00:00:35.670 --> 00:00:37.410 which I assume many people don't,  
NOTE Confidence: 0.893501108571429

00:00:37.410 --> 00:00:40.275 especially if they're managing some  
NOTE Confidence: 0.893501108571429

00:00:40.275 --> 00:00:42.770 smaller organizations that don't get so,  
NOTE Confidence: 0.893501108571429

00:00:42.770 --> 00:00:45.730 so many news articles and  
NOTE Confidence: 0.893501108571429

00:00:45.730 --> 00:00:48.098 events suggested every day.  
NOTE Confidence: 0.893501108571429

00:00:48.100 --> 00:00:49.810 You might see a really big  
NOTE Confidence: 0.893501108571429

00:00:49.810 --> 00:00:51.460 number of items to review.  
NOTE Confidence: 0.893501108571429

00:00:51.460 --> 00:00:52.900 So I apologize that we weren't  
NOTE Confidence: 0.893501108571429

00:00:52.900 --> 00:00:54.218 able to get these notifications  
NOTE Confidence: 0.893501108571429

00:00:54.218 --> 00:00:55.758 out on a regular basis.  
NOTE Confidence: 0.893501108571429

00:00:55.760 --> 00:00:58.056 We're going to try to get them out  
NOTE Confidence: 0.893501108571429

00:00:58.060 --> 00:01:00.965 at least once more or a couple  
NOTE Confidence: 0.893501108571429

00:01:00.965 --> 00:01:03.657 times more next week if we can.  
NOTE Confidence: 0.893501108571429

00:01:03.660 --> 00:01:05.524 And then we should be able to solve

NOTE Confidence: 0.893501108571429

00:01:05.524 --> 00:01:07.474 all of the issues over the break and

NOTE Confidence: 0.893501108571429

00:01:07.474 --> 00:01:09.505 get back on a regular schedule when

NOTE Confidence: 0.893501108571429

00:01:09.505 --> 00:01:11.539 everybody's back in the new year.

NOTE Confidence: 0.893501108571429

00:01:11.540 --> 00:01:14.294 So I do apologize for that if you see

NOTE Confidence: 0.893501108571429

00:01:14.294 --> 00:01:16.181 something that's really wonky with

NOTE Confidence: 0.893501108571429

00:01:16.181 --> 00:01:18.330 what the counts or anything you saw.

NOTE Confidence: 0.893501108571429

00:01:18.330 --> 00:01:19.287 In the e-mail,

NOTE Confidence: 0.893501108571429

00:01:19.287 --> 00:01:21.520 just reach out to us and we'll

NOTE Confidence: 0.893501108571429

00:01:21.600 --> 00:01:22.950 try to sort it out.

NOTE Confidence: 0.940623831818182

00:01:24.970 --> 00:01:26.282 OK, so with that,

NOTE Confidence: 0.940623831818182

00:01:26.282 --> 00:01:31.000 I'm going to jump right into this. Umm.

NOTE Confidence: 0.940623831818182

00:01:31.000 --> 00:01:35.500 The suggested one goal of this system was to,

NOTE Confidence: 0.940623831818182

00:01:35.500 --> 00:01:37.480 because they were already so similar,

NOTE Confidence: 0.940623831818182

00:01:37.480 --> 00:01:40.550 really unify how we're managing

NOTE Confidence: 0.940623831818182

00:01:40.550 --> 00:01:43.620 suggested articles and suggested events.

NOTE Confidence: 0.940623831818182

00:01:43.620 --> 00:01:45.972 It's a lot of the same logic  
NOTE Confidence: 0.940623831818182

00:01:45.972 --> 00:01:48.260 is being used in both places,  
NOTE Confidence: 0.940623831818182

00:01:48.260 --> 00:01:50.157 but you will notice that right now,  
NOTE Confidence: 0.940623831818182

00:01:50.160 --> 00:01:52.204 the suggested articles page  
NOTE Confidence: 0.940623831818182

00:01:52.204 --> 00:01:54.759 that I'm looking at now,  
NOTE Confidence: 0.940623831818182

00:01:54.760 --> 00:01:57.910 and the suggested events page.  
NOTE Confidence: 0.940623831818182

00:01:57.910 --> 00:02:00.750 That I'm loading right here.  
NOTE Confidence: 0.940623831818182

00:02:00.750 --> 00:02:03.456 Have some slightly different controls right  
NOTE Confidence: 0.940623831818182

00:02:03.456 --> 00:02:07.286 now we are going to make that more similar.  
NOTE Confidence: 0.940623831818182

00:02:07.290 --> 00:02:09.108 We were just trying to make sure that we  
NOTE Confidence: 0.940623831818182

00:02:09.108 --> 00:02:11.147 have all the functionality that we need here.  
NOTE Confidence: 0.940623831818182

00:02:11.150 --> 00:02:13.790 One notable thing that is missing  
NOTE Confidence: 0.940623831818182

00:02:13.790 --> 00:02:17.880 is a lot of you.  
NOTE Confidence: 0.940623831818182

00:02:17.880 --> 00:02:20.076 Are using keywords to make your  
NOTE Confidence: 0.940623831818182

00:02:20.076 --> 00:02:22.424 news or events appear in specific  
NOTE Confidence: 0.940623831818182

00:02:22.424 --> 00:02:24.036 places on your website.

NOTE Confidence: 0.940623831818182  
00:02:24.040 --> 00:02:26.112 You're not necessarily just  
NOTE Confidence: 0.940623831818182  
00:02:26.112 --> 00:02:28.702 approving or rejecting each event  
NOTE Confidence: 0.940623831818182  
00:02:28.702 --> 00:02:30.979 you might be identifying.  
NOTE Confidence: 0.940623831818182  
00:02:30.980 --> 00:02:32.232 Specific articles,  
NOTE Confidence: 0.940623831818182  
00:02:32.232 --> 00:02:34.736 especially pretty popular on,  
NOTE Confidence: 0.940623831818182  
00:02:34.740 --> 00:02:36.276 but also you could do the  
NOTE Confidence: 0.940623831818182  
00:02:36.276 --> 00:02:37.300 same thing for events,  
NOTE Confidence: 0.940623831818182  
00:02:37.300 --> 00:02:38.560 be identifying specific news  
NOTE Confidence: 0.940623831818182  
00:02:38.560 --> 00:02:40.450 or events that you'd like to  
NOTE Confidence: 0.940623831818182  
00:02:40.506 --> 00:02:42.216 maybe feature on your homepage.  
NOTE Confidence: 0.940623831818182  
00:02:42.220 --> 00:02:44.656 And you don't necessarily want every  
NOTE Confidence: 0.940623831818182  
00:02:44.656 --> 00:02:47.179 single news article or event that's  
NOTE Confidence: 0.940623831818182  
00:02:47.180 --> 00:02:49.760 that you approve to necessarily appear  
NOTE Confidence: 0.940623831818182  
00:02:49.760 --> 00:02:52.599 front and center on the home page.  
NOTE Confidence: 0.940623831818182  
00:02:52.600 --> 00:02:56.320 Currently this is something we actually lost,  
NOTE Confidence: 0.940623831818182

00:02:56.320 --> 00:02:58.420 but we're going to add it  
NOTE Confidence: 0.940623831818182

00:02:58.420 --> 00:02:59.820 back and profile system.  
NOTE Confidence: 0.940623831818182

00:02:59.820 --> 00:03:02.952 When I go to my suggested articles page and  
NOTE Confidence: 0.940623831818182

00:03:02.952 --> 00:03:05.846 I were to open one of these suggestions,  
NOTE Confidence: 0.940623831818182

00:03:05.846 --> 00:03:10.860 I would have a handy UI right here when I  
NOTE Confidence: 0.940623831818182

00:03:10.860 --> 00:03:14.259 accepted to add a keyword and that's gone.  
NOTE Confidence: 0.940623831818182

00:03:14.260 --> 00:03:15.868 So in the meantime it's a  
NOTE Confidence: 0.940623831818182

00:03:15.868 --> 00:03:16.940 little bit more work.  
NOTE Confidence: 0.940623831818182

00:03:16.940 --> 00:03:19.510 I need to go into the article and I can  
NOTE Confidence: 0.940623831818182

00:03:19.585 --> 00:03:22.224 go into people and organizations use my.  
NOTE Confidence: 0.940623831818182

00:03:22.230 --> 00:03:25.618 Tag right here. Um.  
NOTE Confidence: 0.940623831818182

00:03:25.620 --> 00:03:28.560 And I could add my tags here.  
NOTE Confidence: 0.940623831818182

00:03:28.560 --> 00:03:30.360 Of course this I picked a bad article.  
NOTE Confidence: 0.940623831818182

00:03:30.360 --> 00:03:32.336 It's scheduled for publish  
NOTE Confidence: 0.940623831818182

00:03:32.336 --> 00:03:34.806 so I can't edit it.  
NOTE Confidence: 0.940623831818182

00:03:34.810 --> 00:03:35.678 That's a good read.

NOTE Confidence: 0.940623831818182  
00:03:35.678 --> 00:03:36.980 There's a good reason for that.  
NOTE Confidence: 0.940623831818182  
00:03:36.980 --> 00:03:38.128 We don't want people to be able  
NOTE Confidence: 0.940623831818182  
00:03:38.128 --> 00:03:39.380 to edit things that have already  
NOTE Confidence: 0.940623831818182  
00:03:39.380 --> 00:03:40.340 been scheduled for published.  
NOTE Confidence: 0.940623831818182  
00:03:40.340 --> 00:03:44.244 You have to actually cancel the scheduled  
NOTE Confidence: 0.940623831818182  
00:03:44.244 --> 00:03:46.956 publish before you can edit again.  
NOTE Confidence: 0.940623831818182  
00:03:46.960 --> 00:03:49.696 Um, anyway, so I would have to click edit,  
NOTE Confidence: 0.940623831818182  
00:03:49.700 --> 00:03:51.620 go to my people and organizations  
NOTE Confidence: 0.940623831818182  
00:03:51.620 --> 00:03:54.078 section and then I could tag with my.  
NOTE Confidence: 0.940623831818182  
00:03:54.080 --> 00:03:55.507 I think there is probably, yeah.  
NOTE Confidence: 0.940623831818182  
00:03:55.507 --> 00:03:57.516 We have a private keyword called home.  
NOTE Confidence: 0.940623831818182  
00:03:57.520 --> 00:03:59.400 This is frequently used to.  
NOTE Confidence: 0.940623831818182  
00:03:59.400 --> 00:04:01.064 I think some departments  
NOTE Confidence: 0.940623831818182  
00:04:01.064 --> 00:04:02.728 use other things like.  
NOTE Confidence: 0.940623831818182  
00:04:02.730 --> 00:04:04.310 Just because they started  
NOTE Confidence: 0.940623831818182

00:04:04.310 --> 00:04:06.285 doing them at different times.  
NOTE Confidence: 0.940623831818182

00:04:06.290 --> 00:04:09.111 But if you are not featuring your  
NOTE Confidence: 0.940623831818182

00:04:09.111 --> 00:04:11.408 homepage currently and you'd like to,  
NOTE Confidence: 0.940623831818182

00:04:11.410 --> 00:04:13.048 using the private tag home is a  
NOTE Confidence: 0.940623831818182

00:04:13.048 --> 00:04:14.681 perfectly good way to do that because  
NOTE Confidence: 0.940623831818182

00:04:14.681 --> 00:04:16.280 it's very clear that that is going  
NOTE Confidence: 0.940623831818182

00:04:16.280 --> 00:04:17.876 to make this go on your homepage.  
NOTE Confidence: 0.940623831818182

00:04:17.880 --> 00:04:20.346 It depends how it was configured  
NOTE Confidence: 0.940623831818182

00:04:20.346 --> 00:04:21.990 on the trading side.  
NOTE Confidence: 0.940623831818182

00:04:21.990 --> 00:04:25.814 So like a lot of other things that.  
NOTE Confidence: 0.940623831818182

00:04:25.820 --> 00:04:27.890 Integrate between Beatrix and the website.  
NOTE Confidence: 0.940623831818182

00:04:27.890 --> 00:04:30.068 If you need some help or you have questions  
NOTE Confidence: 0.940623831818182

00:04:30.068 --> 00:04:32.086 about starting to use this functionality,  
NOTE Confidence: 0.940623831818182

00:04:32.090 --> 00:04:33.854 reach out to us.  
NOTE Confidence: 0.940623831818182

00:04:33.854 --> 00:04:35.908 Why SM editor at yale.edu.  
NOTE Confidence: 0.940623831818182

00:04:35.908 --> 00:04:37.636 We can configure this for you.

NOTE Confidence: 0.830597484  
00:04:37.640 --> 00:04:40.130 Give you some basic instructions  
NOTE Confidence: 0.830597484  
00:04:40.130 --> 00:04:42.620 for managing this going forward.  
NOTE Confidence: 0.830597484  
00:04:42.620 --> 00:04:45.604 While I'm here, I will do a quick  
NOTE Confidence: 0.924824492  
00:04:47.820 --> 00:04:50.960 overview of the keywords themselves.  
NOTE Confidence: 0.924824492  
00:04:50.960 --> 00:04:53.112 There are some things in this people and  
NOTE Confidence: 0.924824492  
00:04:53.112 --> 00:04:54.655 organizations staff you're going to see  
NOTE Confidence: 0.924824492  
00:04:54.655 --> 00:04:56.580 before you actually see the lists of people,  
NOTE Confidence: 0.924824492  
00:04:56.580 --> 00:04:59.556 the lists of people and organizations,  
NOTE Confidence: 0.924824492  
00:04:59.560 --> 00:05:01.715 and those are the snoozeville  
NOTE Confidence: 0.924824492  
00:05:01.715 --> 00:05:02.577 visibility option,  
NOTE Confidence: 0.924824492  
00:05:02.580 --> 00:05:05.076 as well as these public and private tags.  
NOTE Confidence: 0.924824492  
00:05:05.080 --> 00:05:08.328 First off, news visibility.  
NOTE Confidence: 0.924824492  
00:05:08.330 --> 00:05:11.804 If I toggle right now this article is public,  
NOTE Confidence: 0.924824492  
00:05:11.810 --> 00:05:13.945 I am going to submit this article.  
NOTE Confidence: 0.924824492  
00:05:13.950 --> 00:05:16.342 I would like to share it to as  
NOTE Confidence: 0.924824492

00:05:16.342 --> 00:05:17.835 many different organizations and  
NOTE Confidence: 0.924824492

00:05:17.835 --> 00:05:20.307 websites as is appropriate and I  
NOTE Confidence: 0.924824492

00:05:20.307 --> 00:05:22.595 want anyone to be able to put it.  
NOTE Confidence: 0.924824492

00:05:22.600 --> 00:05:24.520 On their website if they'd like,  
NOTE Confidence: 0.924824492

00:05:24.520 --> 00:05:28.732 so I'm going to keep it as public if  
NOTE Confidence: 0.924824492

00:05:28.732 --> 00:05:31.152 instead maybe I'm uploading articles  
NOTE Confidence: 0.924824492

00:05:31.152 --> 00:05:34.628 for relating to the annual report for  
NOTE Confidence: 0.924824492

00:05:34.628 --> 00:05:37.394 my department or something like that,  
NOTE Confidence: 0.924824492

00:05:37.400 --> 00:05:39.065 maybe it's not doesn't necessarily  
NOTE Confidence: 0.924824492

00:05:39.065 --> 00:05:40.730 have to be super secret,  
NOTE Confidence: 0.924824492

00:05:40.730 --> 00:05:42.921 but it's not something that I really  
NOTE Confidence: 0.924824492

00:05:42.921 --> 00:05:45.140 want the normal person who's access  
NOTE Confidence: 0.924824492

00:05:45.140 --> 00:05:47.040 accessing my the normal person  
NOTE Confidence: 0.924824492

00:05:47.109 --> 00:05:49.239 from the public who's accessing my  
NOTE Confidence: 0.924824492

00:05:49.239 --> 00:05:51.383 department of such and such home  
NOTE Confidence: 0.924824492

00:05:51.383 --> 00:05:53.345 page to see these news articles.

NOTE Confidence: 0.924824492  
00:05:53.350 --> 00:05:55.990 Or even to be able to retrieve them at all,  
NOTE Confidence: 0.924824492  
00:05:55.990 --> 00:05:58.522 we can use this private option  
NOTE Confidence: 0.924824492  
00:05:58.522 --> 00:06:00.484 and that will number one.  
NOTE Confidence: 0.924824492  
00:06:00.484 --> 00:06:02.913 That is not going to suggest this  
NOTE Confidence: 0.924824492  
00:06:02.913 --> 00:06:04.875 article to any other organization  
NOTE Confidence: 0.924824492  
00:06:04.875 --> 00:06:07.191 unless I explicitly do so myself,  
NOTE Confidence: 0.924824492  
00:06:07.200 --> 00:06:09.174 which I'll get to in a second.  
NOTE Confidence: 0.924824492  
00:06:09.180 --> 00:06:10.305 Um, but also,  
NOTE Confidence: 0.924824492  
00:06:10.305 --> 00:06:12.930 you'll notice that if I've already submitted  
NOTE Confidence: 0.924824492  
00:06:13.000 --> 00:06:15.457 this article and I'm going back later,  
NOTE Confidence: 0.924824492  
00:06:15.460 --> 00:06:17.406 or if I've already started tagging people,  
NOTE Confidence: 0.924824492  
00:06:17.410 --> 00:06:20.386 this is actually going to remove any tags.  
NOTE Confidence: 0.924824492  
00:06:20.390 --> 00:06:21.838 That you have currently.  
NOTE Confidence: 0.924824492  
00:06:21.838 --> 00:06:23.648 Because if I tag people,  
NOTE Confidence: 0.924824492  
00:06:23.650 --> 00:06:25.468 then it's that news article is  
NOTE Confidence: 0.924824492

00:06:25.468 --> 00:06:27.610 going to appear on their profile.  
NOTE Confidence: 0.924824492

00:06:27.610 --> 00:06:29.255 It's and the article is going to  
NOTE Confidence: 0.924824492

00:06:29.255 --> 00:06:30.658 be suggested to the organizations  
NOTE Confidence: 0.924824492

00:06:30.658 --> 00:06:31.627 they belong to.  
NOTE Confidence: 0.924824492

00:06:31.630 --> 00:06:33.261 So we remove those tags if you  
NOTE Confidence: 0.924824492

00:06:33.261 --> 00:06:34.499 indicate this article is private,  
NOTE Confidence: 0.924824492

00:06:34.500 --> 00:06:35.832 because if it's private,  
NOTE Confidence: 0.924824492

00:06:35.832 --> 00:06:37.830 we don't want it appearing on  
NOTE Confidence: 0.924824492

00:06:37.899 --> 00:06:40.096 people's profiles or being suggested  
NOTE Confidence: 0.924824492

00:06:40.096 --> 00:06:41.624 other people's news cues.  
NOTE Confidence: 0.924824492

00:06:41.630 --> 00:06:43.548 So that's what this message is about,  
NOTE Confidence: 0.924824492

00:06:43.550 --> 00:06:44.330 is just telling you, hey,  
NOTE Confidence: 0.924824492

00:06:44.330 --> 00:06:47.750 you're going to lose some of your work or.  
NOTE Confidence: 0.924824492

00:06:47.750 --> 00:06:49.898 Because we can't share this article.  
NOTE Confidence: 0.924824492

00:06:49.900 --> 00:06:51.270 That's all this warning is.  
NOTE Confidence: 0.924824492

00:06:51.270 --> 00:06:52.510 I'm going to say yes.

NOTE Confidence: 0.924824492  
00:06:52.510 --> 00:06:55.916 You'll notice that there were some  
NOTE Confidence: 0.924824492  
00:06:55.916 --> 00:06:58.030 suggestions here before that are not missing.  
NOTE Confidence: 0.924824492  
00:06:58.030 --> 00:06:59.000 I probably should have scrolled  
NOTE Confidence: 0.924824492  
00:06:59.000 --> 00:06:59.970 down before I did that,  
NOTE Confidence: 0.924824492  
00:06:59.970 --> 00:07:01.618 but just trust me,  
NOTE Confidence: 0.924824492  
00:07:01.618 --> 00:07:03.266 it removed the suggestions  
NOTE Confidence: 0.924824492  
00:07:03.266 --> 00:07:04.730 that already existed,  
NOTE Confidence: 0.924824492  
00:07:04.730 --> 00:07:06.008 aside from the ones that I  
NOTE Confidence: 0.924824492  
00:07:06.008 --> 00:07:06.647 had explicitly said.  
NOTE Confidence: 0.924824492  
00:07:06.650 --> 00:07:07.214 And hey,  
NOTE Confidence: 0.924824492  
00:07:07.214 --> 00:07:10.092 I would like to add this to my abdominal  
NOTE Confidence: 0.924824492  
00:07:10.092 --> 00:07:12.807 imaging organization in the system,  
NOTE Confidence: 0.924824492  
00:07:12.810 --> 00:07:14.058 so it'll save that.  
NOTE Confidence: 0.79607562  
00:07:18.330 --> 00:07:22.229 OK, that's really it for news privacy.  
NOTE Confidence: 0.79607562  
00:07:22.230 --> 00:07:24.560 Public tags versus private tags.  
NOTE Confidence: 0.79607562

00:07:24.560 --> 00:07:26.432 There's not a whole lot of  
NOTE Confidence: 0.79607562

00:07:26.432 --> 00:07:27.680 difference between these two.  
NOTE Confidence: 0.79607562

00:07:27.680 --> 00:07:30.543 They both can be used to filter  
NOTE Confidence: 0.79607562

00:07:30.543 --> 00:07:33.765 lists of news or events to only  
NOTE Confidence: 0.79607562

00:07:33.765 --> 00:07:36.140 those with some specific tag.  
NOTE Confidence: 0.79607562

00:07:36.140 --> 00:07:40.375 The main difference is if I go,  
NOTE Confidence: 0.79607562

00:07:40.380 --> 00:07:42.610 sorry, just scooch my windows  
NOTE Confidence: 0.79607562

00:07:42.610 --> 00:07:45.620 around a little bit if I go to.  
NOTE Confidence: 0.79607562

00:07:45.620 --> 00:07:49.666 The website and I go to search.  
NOTE Confidence: 0.79607562

00:07:49.670 --> 00:07:52.058 Um, and I searched something that  
NOTE Confidence: 0.79607562

00:07:52.058 --> 00:07:55.870 will return some events, for example.  
NOTE Confidence: 0.79607562

00:07:55.870 --> 00:07:59.338 Um, I can then.  
NOTE Confidence: 0.79607562

00:07:59.340 --> 00:08:05.268 From my events facets here I can add a.  
NOTE Confidence: 0.79607562

00:08:05.270 --> 00:08:05.618 Keyword.  
NOTE Confidence: 0.79607562

00:08:05.618 --> 00:08:08.402 I'm the only keywords that I will see.  
NOTE Confidence: 0.79607562

00:08:08.410 --> 00:08:09.755 I could start typing some

NOTE Confidence: 0.79607562

00:08:09.755 --> 00:08:11.470 keyword that maybe I care about.

NOTE Confidence: 0.79607562

00:08:11.470 --> 00:08:14.354 The only keywords that are going to

NOTE Confidence: 0.79607562

00:08:14.354 --> 00:08:17.290 appear here are the public keywords.

NOTE Confidence: 0.79607562

00:08:17.290 --> 00:08:18.001 Case in point,

NOTE Confidence: 0.79607562

00:08:18.001 --> 00:08:19.950 we don't think we want things like home,

NOTE Confidence: 0.79607562

00:08:19.950 --> 00:08:21.938 which we're only really using as A

NOTE Confidence: 0.79607562

00:08:21.938 --> 00:08:24.209 tag to filter news for our home page.

NOTE Confidence: 0.79607562

00:08:24.210 --> 00:08:26.660 We don't really want that to appear

NOTE Confidence: 0.79607562

00:08:26.660 --> 00:08:30.390 here if somebody clicks more news.

NOTE Confidence: 0.79607562

00:08:30.390 --> 00:08:30.860 So actually,

NOTE Confidence: 0.79607562

00:08:30.860 --> 00:08:32.505 this is exactly what's going on in

NOTE Confidence: 0.79607562

00:08:32.505 --> 00:08:34.126 the Yale School of Public Health.

NOTE Confidence: 0.79607562

00:08:34.130 --> 00:08:35.930 They have a special keyword for

NOTE Confidence: 0.79607562

00:08:35.930 --> 00:08:37.730 their news that is limiting.

NOTE Confidence: 0.79607562

00:08:37.730 --> 00:08:39.476 They approve more news than necessarily

NOTE Confidence: 0.79607562

00:08:39.476 --> 00:08:41.369 what just appears on the home page,  
NOTE Confidence: 0.79607562

00:08:41.370 --> 00:08:43.042 but they just want a subset of that  
NOTE Confidence: 0.79607562

00:08:43.042 --> 00:08:44.728 news to appear on that home page.  
NOTE Confidence: 0.79607562

00:08:44.730 --> 00:08:46.548 So what they're doing is tagging  
NOTE Confidence: 0.79607562

00:08:46.548 --> 00:08:48.488 every article with A tag that's  
NOTE Confidence: 0.79607562

00:08:48.488 --> 00:08:50.480 called it's a private tag called  
NOTE Confidence: 0.79607562

00:08:50.480 --> 00:08:51.949 something like SPH featured,  
NOTE Confidence: 0.79607562

00:08:51.950 --> 00:08:55.555 I think if I click more news.  
NOTE Confidence: 0.79607562

00:08:55.560 --> 00:09:00.120 It will filter to that keyword.  
NOTE Confidence: 0.79607562

00:09:00.120 --> 00:09:03.116 However, we won't really expose it at.  
NOTE Confidence: 0.79607562

00:09:03.120 --> 00:09:04.230 We're not going to expose.  
NOTE Confidence: 0.79607562

00:09:04.230 --> 00:09:05.190 So you see the field,  
NOTE Confidence: 0.79607562

00:09:05.190 --> 00:09:07.770 the facet here for SPH feature,  
NOTE Confidence: 0.79607562

00:09:07.770 --> 00:09:09.177 but that's not going to be exposed.  
NOTE Confidence: 0.79607562

00:09:09.180 --> 00:09:11.150 And her list of keywords.  
NOTE Confidence: 0.79607562

00:09:11.150 --> 00:09:11.477 Actually,

NOTE Confidence: 0.79607562

00:09:11.477 --> 00:09:14.420 it looks like we've got a little issue here.

NOTE Confidence: 0.79607562

00:09:14.420 --> 00:09:16.388 We need to make a public keyword private,

NOTE Confidence: 0.79607562

00:09:16.390 --> 00:09:20.390 probably, but we'll fix that.

NOTE Confidence: 0.79607562

00:09:20.390 --> 00:09:22.606 We want these to be keywords that are

NOTE Confidence: 0.79607562

00:09:22.606 --> 00:09:24.702 going to make sense to somebody who

NOTE Confidence: 0.79607562

00:09:24.702 --> 00:09:26.910 is trying to search by topic here.

NOTE Confidence: 0.79607562

00:09:26.910 --> 00:09:28.375 So things like home aren't

NOTE Confidence: 0.79607562

00:09:28.375 --> 00:09:29.547 really helpful for them.

NOTE Confidence: 0.79607562

00:09:29.550 --> 00:09:31.238 They're not really meaningful.

NOTE Confidence: 0.79607562

00:09:31.238 --> 00:09:34.229 For someone who's trying to find articles

NOTE Confidence: 0.79607562

00:09:34.229 --> 00:09:37.325 or events that are on a particular subject.

NOTE Confidence: 0.79607562

00:09:37.330 --> 00:09:39.227 So that's the reasoning for the breakdown

NOTE Confidence: 0.79607562

00:09:39.227 --> 00:09:40.679 between public and private tags.

NOTE Confidence: 0.79607562

00:09:40.680 --> 00:09:41.092 Functionally,

NOTE Confidence: 0.79607562

00:09:41.092 --> 00:09:44.388 they are the same aside from that one

NOTE Confidence: 0.79607562

00:09:44.388 --> 00:09:46.641 difference that the public tags will  
NOTE Confidence: 0.79607562

00:09:46.641 --> 00:09:50.178 appear in these faceted searches on the web.  
NOTE Confidence: 0.79607562

00:09:50.180 --> 00:09:52.090 Website.  
NOTE Confidence: 0.79607562

00:09:52.090 --> 00:09:52.633 Umm,  
NOTE Confidence: 0.79607562

00:09:52.633 --> 00:09:56.977 that's really it for public and private tags.  
NOTE Confidence: 0.79607562

00:09:56.980 --> 00:10:01.130 You do need to contact us to add new tags.  
NOTE Confidence: 0.79607562

00:10:01.130 --> 00:10:03.296 This is another situation where it  
NOTE Confidence: 0.79607562

00:10:03.296 --> 00:10:05.929 used to be anyone could add A tag,  
NOTE Confidence: 0.79607562

00:10:05.930 --> 00:10:07.406 but we had so many duplicates.  
NOTE Confidence: 0.79607562

00:10:07.410 --> 00:10:08.835 There were things with typos  
NOTE Confidence: 0.79607562

00:10:08.835 --> 00:10:10.650 and things like that in there.  
NOTE Confidence: 0.79607562

00:10:10.650 --> 00:10:12.316 So we spent lots of time cleaning  
NOTE Confidence: 0.79607562

00:10:12.316 --> 00:10:14.368 it up and then we locked it down.  
NOTE Confidence: 0.79607562

00:10:14.370 --> 00:10:15.866 So you just need to make a request  
NOTE Confidence: 0.79607562

00:10:15.866 --> 00:10:16.748 for us to add it.  
NOTE Confidence: 0.79607562

00:10:16.750 --> 00:10:18.280 We'll make sure it's not some

NOTE Confidence: 0.79607562  
00:10:18.280 --> 00:10:19.045 kind of duplicate,  
NOTE Confidence: 0.79607562  
00:10:19.050 --> 00:10:20.438 and then if not,  
NOTE Confidence: 0.79607562  
00:10:20.438 --> 00:10:23.250 we will likely just add it for you.  
NOTE Confidence: 0.79607562  
00:10:23.250 --> 00:10:24.948 I'm going to take a minute.  
NOTE Confidence: 0.907974636666667  
00:10:24.950 --> 00:10:26.335 Do we have any questions  
NOTE Confidence: 0.907974636666667  
00:10:26.335 --> 00:10:27.443 up until this point?  
NOTE Confidence: 0.907974636666667  
00:10:27.450 --> 00:10:29.172 I see a couple that already  
NOTE Confidence: 0.907974636666667  
00:10:29.172 --> 00:10:30.690 got answered in the chat.  
NOTE Confidence: 0.907974636666667  
00:10:30.690 --> 00:10:33.456 Any other questions from anyone else?  
NOTE Confidence: 0.907974636666667  
00:10:33.460 --> 00:10:35.371 I was just make sure I answered  
NOTE Confidence: 0.907974636666667  
00:10:35.371 --> 00:10:36.446 that question correctly and  
NOTE Confidence: 0.907974636666667  
00:10:36.446 --> 00:10:37.640 did not just tell a lie.  
NOTE Confidence: 0.893385657142857  
00:10:39.830 --> 00:10:42.896 OK, so if people are right now,  
NOTE Confidence: 0.893385657142857  
00:10:42.900 --> 00:10:44.776 events don't appear at all in profiles.  
NOTE Confidence: 0.893385657142857  
00:10:44.780 --> 00:10:46.280 So there's that only  
NOTE Confidence: 0.893385657142857

00:10:46.280 --> 00:10:47.780 news appears in profiles.  
NOTE Confidence: 0.8907355433333333

00:10:49.880 --> 00:10:52.880 One of our wish list projects,  
NOTE Confidence: 0.8907355433333333

00:10:52.880 --> 00:10:54.636 that's not happening immediately  
NOTE Confidence: 0.8907355433333333

00:10:54.636 --> 00:10:56.392 but hopefully sometime next  
NOTE Confidence: 0.8907355433333333

00:10:56.392 --> 00:10:58.820 year is a redo of the profiles.  
NOTE Confidence: 0.8907355433333333

00:10:58.820 --> 00:11:02.817 The design is kind of limiting now,  
NOTE Confidence: 0.8907355433333333

00:11:02.820 --> 00:11:05.676 would be used to really long scrolling pages.  
NOTE Confidence: 0.8907355433333333

00:11:05.680 --> 00:11:08.536 It's not really necessary for us to break  
NOTE Confidence: 0.8907355433333333

00:11:08.536 --> 00:11:11.014 up everything into tabs like we do today.  
NOTE Confidence: 0.8907355433333333

00:11:11.020 --> 00:11:12.718 So we're going to look into.  
NOTE Confidence: 0.8907355433333333

00:11:12.720 --> 00:11:14.520 It's not going to be a drastic change,  
NOTE Confidence: 0.8907355433333333

00:11:14.520 --> 00:11:17.175 but we are going to sort of reconfigure and  
NOTE Confidence: 0.8907355433333333

00:11:17.175 --> 00:11:19.798 try to get a single page layout however.  
NOTE Confidence: 0.8907355433333333

00:11:19.800 --> 00:11:21.660 News articles will automatically go to  
NOTE Confidence: 0.8907355433333333

00:11:21.660 --> 00:11:23.490 profiles that does not require approval  
NOTE Confidence: 0.8907355433333333

00:11:23.490 --> 00:11:26.283 on the part of the faculty or staff person

NOTE Confidence: 0.890735543333333

00:11:26.283 --> 00:11:33.358 who you tag how but the important but is.

NOTE Confidence: 0.890735543333333

00:11:33.360 --> 00:11:34.386 When you user,

NOTE Confidence: 0.890735543333333

00:11:34.386 --> 00:11:37.257 we will soon be adding a another element

NOTE Confidence: 0.890735543333333

00:11:37.257 --> 00:11:40.057 to this dashboard that is called what's

NOTE Confidence: 0.890735543333333

00:11:40.057 --> 00:11:43.156 new and it's going to highlight things

NOTE Confidence: 0.890735543333333

00:11:43.156 --> 00:11:45.750 like events you've been tagged in,

NOTE Confidence: 0.890735543333333

00:11:45.750 --> 00:11:47.600 news you've been tagged in,

NOTE Confidence: 0.890735543333333

00:11:47.600 --> 00:11:50.144 and the faculty and staff do

NOTE Confidence: 0.890735543333333

00:11:50.144 --> 00:11:53.173 have the ability to go into their

NOTE Confidence: 0.890735543333333

00:11:53.173 --> 00:11:56.078 profile and go to this news page.

NOTE Confidence: 0.890735543333333

00:11:56.080 --> 00:11:57.344 They can remove themselves

NOTE Confidence: 0.890735543333333

00:11:57.344 --> 00:11:59.240 from news if they like here.

NOTE Confidence: 0.890735543333333

00:11:59.240 --> 00:12:00.728 All the same thing with events.

NOTE Confidence: 0.890735543333333

00:12:00.730 --> 00:12:03.306 They can go to their events page within

NOTE Confidence: 0.890735543333333

00:12:03.306 --> 00:12:06.243 their profile and remove any events that

NOTE Confidence: 0.890735543333333

00:12:06.243 --> 00:12:09.489 maybe they were incorrectly tagged in.  
NOTE Confidence: 0.8907355433333333

00:12:09.490 --> 00:12:10.785 So they do have control over this.  
NOTE Confidence: 0.8907355433333333

00:12:10.790 --> 00:12:11.310 They're not.  
NOTE Confidence: 0.8907355433333333

00:12:11.310 --> 00:12:12.350 We're not asking that.  
NOTE Confidence: 0.8907355433333333

00:12:12.350 --> 00:12:15.170 They actively approve it.  
NOTE Confidence: 0.8907355433333333

00:12:15.170 --> 00:12:18.066 The concern just was that they might not  
NOTE Confidence: 0.8907355433333333

00:12:18.066 --> 00:12:20.775 approve it so quickly and we want to  
NOTE Confidence: 0.8907355433333333

00:12:20.775 --> 00:12:23.898 make sure that this news it gets distributed.  
NOTE Confidence: 0.8907355433333333

00:12:23.900 --> 00:12:25.178 So yes, there's that they are  
NOTE Confidence: 0.8907355433333333

00:12:25.178 --> 00:12:26.720 going to get a notification.  
NOTE Confidence: 0.8907355433333333

00:12:26.720 --> 00:12:27.940 We're not asking for their  
NOTE Confidence: 0.8907355433333333

00:12:27.940 --> 00:12:28.916 approval at this time.  
NOTE Confidence: 0.8907355433333333

00:12:28.920 --> 00:12:31.080 We haven't had many issues yet.  
NOTE Confidence: 0.8907355433333333

00:12:31.080 --> 00:12:33.176 The issues are few and far between and  
NOTE Confidence: 0.8907355433333333

00:12:33.176 --> 00:12:35.089 it's usually an easy solution because they  
NOTE Confidence: 0.8907355433333333

00:12:35.089 --> 00:12:37.560 do have the ability to remove it themselves.

NOTE Confidence: 0.890735543333333  
00:12:37.560 --> 00:12:40.160 You all have the ability to in addition,  
NOTE Confidence: 0.890735543333333  
00:12:40.160 --> 00:12:40.443 well,  
NOTE Confidence: 0.890735543333333  
00:12:40.443 --> 00:12:42.990 I mean if you have access to their profile  
NOTE Confidence: 0.890735543333333  
00:12:43.053 --> 00:12:45.645 or to the news article or event in question.  
NOTE Confidence: 0.890735543333333  
00:12:45.650 --> 00:12:47.018 You have the ability to go  
NOTE Confidence: 0.890735543333333  
00:12:47.018 --> 00:12:47.702 multiple different ways.  
NOTE Confidence: 0.890735543333333  
00:12:47.710 --> 00:12:48.892 You can go to their profile  
NOTE Confidence: 0.890735543333333  
00:12:48.892 --> 00:12:49.950 or remove the tag here.  
NOTE Confidence: 0.890735543333333  
00:12:49.950 --> 00:12:52.502 You could go to the news article or  
NOTE Confidence: 0.890735543333333  
00:12:52.502 --> 00:12:54.806 event directly and remove the tag there.  
NOTE Confidence: 0.890735543333333  
00:12:54.810 --> 00:12:56.147 So it's very easy to fix if  
NOTE Confidence: 0.890735543333333  
00:12:56.147 --> 00:12:57.220 we do encounter a problem.  
NOTE Confidence: 0.890735543333333  
00:12:57.220 --> 00:12:59.956 We're not asking for approvals at this time.  
NOTE Confidence: 0.890735543333333  
00:12:59.960 --> 00:13:02.650 Umm.  
NOTE Confidence: 0.890735543333333  
00:13:02.650 --> 00:13:03.754 OK, that's that.  
NOTE Confidence: 0.890735543333333

00:13:03.754 --> 00:13:06.330 I got a little distracted by keywords  
NOTE Confidence: 0.8907355433333333

00:13:06.401 --> 00:13:08.718 when I was going through the news,  
NOTE Confidence: 0.8907355433333333

00:13:08.720 --> 00:13:11.646 so let me get back to that.  
NOTE Confidence: 0.8907355433333333

00:13:11.650 --> 00:13:12.294 Uh, sorry.  
NOTE Confidence: 0.8907355433333333

00:13:12.294 --> 00:13:14.870 I went on a little keyword tangent there,  
NOTE Confidence: 0.8907355433333333

00:13:14.870 --> 00:13:17.438 so let me get back to.  
NOTE Confidence: 0.8907355433333333

00:13:17.440 --> 00:13:20.415 My suggested news list and you'll see  
NOTE Confidence: 0.8907355433333333

00:13:20.415 --> 00:13:23.779 all these silly titles that the QA folks  
NOTE Confidence: 0.8907355433333333

00:13:23.779 --> 00:13:26.829 have been using for their test events.  
NOTE Confidence: 0.8907355433333333

00:13:26.830 --> 00:13:28.755 We do have this multi same multi  
NOTE Confidence: 0.8907355433333333

00:13:28.755 --> 00:13:30.450 select function we've added elsewhere,  
NOTE Confidence: 0.8907355433333333

00:13:30.450 --> 00:13:34.368 so if I'd like to, oh, I'm glad I did that.  
NOTE Confidence: 0.8907355433333333

00:13:34.370 --> 00:13:34.751 Importantly,  
NOTE Confidence: 0.8907355433333333

00:13:34.751 --> 00:13:37.037 the multi select feature is only  
NOTE Confidence: 0.8907355433333333

00:13:37.037 --> 00:13:39.383 going to work if you filtered  
NOTE Confidence: 0.8907355433333333

00:13:39.383 --> 00:13:40.895 to a single organization.

NOTE Confidence: 0.890735543333333  
00:13:40.900 --> 00:13:42.600 Um.  
NOTE Confidence: 0.890735543333333  
00:13:42.600 --> 00:13:44.622 This is because it's just really  
NOTE Confidence: 0.890735543333333  
00:13:44.622 --> 00:13:45.970 confusing to think about.  
NOTE Confidence: 0.767938408  
00:13:50.390 --> 00:13:52.910 Approving a single event.  
NOTE Confidence: 0.767938408  
00:13:52.910 --> 00:13:54.540 Well, sorry, not a single event,  
NOTE Confidence: 0.767938408  
00:13:54.540 --> 00:13:57.040 but multiple events to multiple  
NOTE Confidence: 0.767938408  
00:13:57.040 --> 00:13:59.040 calendars or organizations that  
NOTE Confidence: 0.767938408  
00:13:59.040 --> 00:14:01.336 you have access to at once.  
NOTE Confidence: 0.767938408  
00:14:01.340 --> 00:14:02.726 We just think it would be very  
NOTE Confidence: 0.767938408  
00:14:02.726 --> 00:14:04.198 easy to make mistakes that way.  
NOTE Confidence: 0.767938408  
00:14:04.200 --> 00:14:05.460 It actually wasn't totally clear  
NOTE Confidence: 0.767938408  
00:14:05.460 --> 00:14:07.518 in the UI that this is what was  
NOTE Confidence: 0.767938408  
00:14:07.518 --> 00:14:09.000 happening at first when we launched  
NOTE Confidence: 0.767938408  
00:14:09.000 --> 00:14:10.877 and we had some issues with news  
NOTE Confidence: 0.767938408  
00:14:10.877 --> 00:14:12.564 appearing in places where we weren't.  
NOTE Confidence: 0.767938408

00:14:12.564 --> 00:14:14.466 People who were approving it weren't  
NOTE Confidence: 0.767938408

00:14:14.466 --> 00:14:15.420 necessarily expecting it to.  
NOTE Confidence: 0.767938408

00:14:15.420 --> 00:14:17.022 They didn't even know they were  
NOTE Confidence: 0.767938408

00:14:17.022 --> 00:14:18.481 approving the news for multiple  
NOTE Confidence: 0.767938408

00:14:18.481 --> 00:14:20.479 organizations when they were doing so.  
NOTE Confidence: 0.767938408

00:14:20.480 --> 00:14:24.143 So we quickly released a hot fix for that.  
NOTE Confidence: 0.767938408

00:14:24.150 --> 00:14:26.229 That's the reason for this updated UI.  
NOTE Confidence: 0.767938408

00:14:26.230 --> 00:14:28.267 If I try to start selecting multiple  
NOTE Confidence: 0.767938408

00:14:28.267 --> 00:14:31.480 items in this list when I am looking at  
NOTE Confidence: 0.767938408

00:14:31.480 --> 00:14:32.996 suggestions for multiple organizations,  
NOTE Confidence: 0.767938408

00:14:33.000 --> 00:14:34.168 I'm going to get this error that hey,  
NOTE Confidence: 0.767938408

00:14:34.170 --> 00:14:35.562 you can't actually.  
NOTE Confidence: 0.767938408

00:14:35.562 --> 00:14:38.346 Act on multiple articles or events.  
NOTE Confidence: 0.767938408

00:14:38.350 --> 00:14:39.918 If I'm in calendar,  
NOTE Confidence: 0.767938408

00:14:39.918 --> 00:14:42.660 you can't act on multiple articles at  
NOTE Confidence: 0.767938408

00:14:42.660 --> 00:14:45.172 once until I filter to a single org.

NOTE Confidence: 0.767938408

00:14:45.180 --> 00:14:49.779 OK, so. If I filter to a single org.

NOTE Confidence: 0.767938408

00:14:49.780 --> 00:14:51.698 I don't want to use my abdominal,

NOTE Confidence: 0.767938408

00:14:51.700 --> 00:14:53.788 it's not here.

NOTE Confidence: 0.767938408

00:14:53.790 --> 00:14:56.643 So if I filter to my AIDS care profile,

NOTE Confidence: 0.767938408

00:14:56.650 --> 00:14:58.140 that's not the best option.

NOTE Confidence: 0.767938408

00:14:58.140 --> 00:15:01.488 I want something that has multiple.

NOTE Confidence: 0.767938408

00:15:01.490 --> 00:15:04.685 OK, so I filter to a single org now.

NOTE Confidence: 0.767938408

00:15:04.690 --> 00:15:06.930 Now when I start selecting multiple items,

NOTE Confidence: 0.767938408

00:15:06.930 --> 00:15:08.988 you can see that I can approve

NOTE Confidence: 0.767938408

00:15:08.988 --> 00:15:10.150 everything I've checked off,

NOTE Confidence: 0.767938408

00:15:10.150 --> 00:15:11.450 or reject everything I've checked

NOTE Confidence: 0.767938408

00:15:11.450 --> 00:15:12.490 off all at once.

NOTE Confidence: 0.767938408

00:15:12.490 --> 00:15:14.597 So it might be a little easier

NOTE Confidence: 0.767938408

00:15:14.597 --> 00:15:15.910 for you rather than.

NOTE Confidence: 0.767938408

00:15:15.910 --> 00:15:16.894 Just to click everything

NOTE Confidence: 0.767938408

00:15:16.894 --> 00:15:18.370 you know you want to accept,  
NOTE Confidence: 0.767938408

00:15:18.370 --> 00:15:19.805 easily get those out of the way,  
NOTE Confidence: 0.767938408

00:15:19.810 --> 00:15:21.722 and then you could take a more careful  
NOTE Confidence: 0.767938408

00:15:21.722 --> 00:15:23.607 look at whatever's left and see decide  
NOTE Confidence: 0.767938408

00:15:23.607 --> 00:15:25.848 if you have to accept or reject those.  
NOTE Confidence: 0.767938408

00:15:25.850 --> 00:15:26.327 Um,  
NOTE Confidence: 0.767938408

00:15:26.327 --> 00:15:29.189 you can also filter by submitters.  
NOTE Confidence: 0.767938408

00:15:29.190 --> 00:15:31.744 We don't have all of the filters  
NOTE Confidence: 0.767938408

00:15:31.744 --> 00:15:33.268 I'd like to have here yet.  
NOTE Confidence: 0.767938408

00:15:33.270 --> 00:15:35.106 We're going to work on that.  
NOTE Confidence: 0.767938408

00:15:35.110 --> 00:15:37.105 We really should have a filter for  
NOTE Confidence: 0.767938408

00:15:37.105 --> 00:15:39.540 this type so that you can filter  
NOTE Confidence: 0.767938408

00:15:39.540 --> 00:15:41.056 internal versus external news.  
NOTE Confidence: 0.767938408

00:15:41.060 --> 00:15:43.730 Um, same thing with events.  
NOTE Confidence: 0.767938408

00:15:43.730 --> 00:15:46.628 We do have some limited filters On  
NOTE Confidence: 0.767938408

00:15:46.628 --> 00:15:49.250 this date filter is really handy.

NOTE Confidence: 0.767938408

00:15:49.250 --> 00:15:51.610 So if you only want to look at a chunk

NOTE Confidence: 0.767938408

00:15:51.676 --> 00:15:53.721 if you have a ton of events in here.

NOTE Confidence: 0.767938408

00:15:53.721 --> 00:15:55.950 And you only want to focus on things

NOTE Confidence: 0.767938408

00:15:55.950 --> 00:15:58.029 that are coming in the next week.

NOTE Confidence: 0.767938408

00:15:58.030 --> 00:15:59.734 I could say, OK,

NOTE Confidence: 0.767938408

00:15:59.734 --> 00:16:02.322 that's happening from 12:15 to 12:22,

NOTE Confidence: 0.767938408

00:16:02.322 --> 00:16:04.616 apply that and it's, you know,

NOTE Confidence: 0.767938408

00:16:04.616 --> 00:16:06.317 this page didn't change all that much

NOTE Confidence: 0.767938408

00:16:06.317 --> 00:16:08.209 because there's so many items in this queue.

NOTE Confidence: 0.767938408

00:16:08.210 --> 00:16:09.190 I probably should have filtered

NOTE Confidence: 0.767938408

00:16:09.190 --> 00:16:11.880 to an org first, but.

NOTE Confidence: 0.767938408

00:16:11.880 --> 00:16:16.010 This should be filtering to.

NOTE Confidence: 0.767938408

00:16:16.010 --> 00:16:17.468 I don't know what's going on with this one.

NOTE Confidence: 0.767938408

00:16:17.470 --> 00:16:20.470 That's weird.

NOTE Confidence: 0.767938408

00:16:20.470 --> 00:16:20.854 Oh,

NOTE Confidence: 0.767938408

00:16:20.854 --> 00:16:23.542 it's an all day event that's happening  
NOTE Confidence: 0.767938408

00:16:23.542 --> 00:16:25.490 every day for the past four months.  
NOTE Confidence: 0.767938408

00:16:25.490 --> 00:16:28.990 So it does fit this filter that I put in.  
NOTE Confidence: 0.767938408

00:16:28.990 --> 00:16:30.724 It should be only filtering to  
NOTE Confidence: 0.767938408

00:16:30.724 --> 00:16:32.561 events that occur on the dates  
NOTE Confidence: 0.767938408

00:16:32.561 --> 00:16:33.805 that I've entered here.  
NOTE Confidence: 0.767938408

00:16:33.810 --> 00:16:34.510 Umm.  
NOTE Confidence: 0.836127785714286

00:16:36.710 --> 00:16:39.462 Any questions about filtering  
NOTE Confidence: 0.836127785714286

00:16:39.462 --> 00:16:41.526 approving news here?  
NOTE Confidence: 0.77503279

00:16:44.400 --> 00:16:45.570 I'll just demonstrate this because  
NOTE Confidence: 0.77503279

00:16:45.570 --> 00:16:47.778 the the UI is a little bit different.  
NOTE Confidence: 0.77503279

00:16:47.780 --> 00:16:49.556 Like I said, we're going to try to.  
NOTE Confidence: 0.77503279

00:16:49.560 --> 00:16:51.156 Make this a little more similar because  
NOTE Confidence: 0.77503279

00:16:51.156 --> 00:16:52.804 it's a little odd right now because  
NOTE Confidence: 0.77503279

00:16:52.804 --> 00:16:54.172 news and events are so similar,  
NOTE Confidence: 0.77503279

00:16:54.180 --> 00:16:57.036 but we're presenting it two different ways

NOTE Confidence: 0.77503279

00:16:57.040 --> 00:17:02.340 once I filter by an organization here.

NOTE Confidence: 0.77503279

00:17:02.340 --> 00:17:06.860 I should get the ability.

NOTE Confidence: 0.77503279

00:17:06.860 --> 00:17:08.700 It's not here. OK, well,

NOTE Confidence: 0.77503279

00:17:08.700 --> 00:17:10.756 Multiselect is one option that we don't have

NOTE Confidence: 0.77503279

00:17:10.756 --> 00:17:12.937 in events yet that's going to be added soon.

NOTE Confidence: 0.77503279

00:17:12.940 --> 00:17:15.586 That's going to be part of the

NOTE Confidence: 0.77503279

00:17:15.586 --> 00:17:20.040 unification of these two UI, so.

NOTE Confidence: 0.77503279

00:17:20.040 --> 00:17:22.098 If there's some data point that's not

NOTE Confidence: 0.77503279

00:17:22.098 --> 00:17:24.638 on here that you think could be helpful,

NOTE Confidence: 0.77503279

00:17:24.640 --> 00:17:26.016 please let us know.

NOTE Confidence: 0.77503279

00:17:26.016 --> 00:17:28.080 We are limited by real estate,

NOTE Confidence: 0.77503279

00:17:28.080 --> 00:17:29.088 of course, but.

NOTE Confidence: 0.808691705

00:17:32.100 --> 00:17:33.650 If there's something, maybe there's

NOTE Confidence: 0.808691705

00:17:33.650 --> 00:17:35.200 something more critical than status.

NOTE Confidence: 0.808691705

00:17:35.200 --> 00:17:36.712 I'm obviously not going to want

NOTE Confidence: 0.808691705

00:17:36.712 --> 00:17:37.720 to approve canceled events,  
NOTE Confidence: 0.808691705

00:17:37.720 --> 00:17:39.430 but maybe there's something more critical  
NOTE Confidence: 0.808691705

00:17:39.430 --> 00:17:41.540 than status would be helpful to see here.  
NOTE Confidence: 0.808691705

00:17:41.540 --> 00:17:45.132 Just let us know because we will be  
NOTE Confidence: 0.808691705

00:17:45.132 --> 00:17:47.890 tweaking these lists a bit. Umm.  
NOTE Confidence: 0.905822653333333

00:17:50.350 --> 00:17:53.489 I think that's if if people  
NOTE Confidence: 0.905822653333333

00:17:53.489 --> 00:17:54.428 have specific questions,  
NOTE Confidence: 0.905822653333333

00:17:54.430 --> 00:17:57.166 now would be a good time to ask.  
NOTE Confidence: 0.905822653333333

00:17:57.170 --> 00:18:00.086 As far as keywords and approving  
NOTE Confidence: 0.905822653333333

00:18:00.086 --> 00:18:02.030 or rejecting news goes,  
NOTE Confidence: 0.905822653333333

00:18:02.030 --> 00:18:04.809 that's really all there is to it.  
NOTE Confidence: 0.905822653333333

00:18:04.810 --> 00:18:06.931 We're trying to make your lives easier  
NOTE Confidence: 0.905822653333333

00:18:06.931 --> 00:18:09.556 by making quick links to the stuff from  
NOTE Confidence: 0.905822653333333

00:18:09.556 --> 00:18:11.211 this dashboard needs review section  
NOTE Confidence: 0.905822653333333

00:18:11.273 --> 00:18:13.235 as well as the notification emails.  
NOTE Confidence: 0.905822653333333

00:18:13.240 --> 00:18:14.404 When they're functioning

NOTE Confidence: 0.9058226533333333  
00:18:14.404 --> 00:18:16.344 properly and you receive them.  
NOTE Confidence: 0.9058226533333333  
00:18:16.350 --> 00:18:19.465 Those will also give you a QikLink  
NOTE Confidence: 0.9058226533333333  
00:18:19.465 --> 00:18:22.837 to approve or your news and events.  
NOTE Confidence: 0.9058226533333333  
00:18:22.840 --> 00:18:24.136 But yeah, if you have questions,  
NOTE Confidence: 0.9058226533333333  
00:18:24.140 --> 00:18:27.828 I'd love to start trying to address those.  
NOTE Confidence: 0.66683115  
00:18:28.970 --> 00:18:31.112 Mark will a campus group event  
NOTE Confidence: 0.66683115  
00:18:31.112 --> 00:18:33.409 ever appear? And suggested events.  
NOTE Confidence: 0.876274542857143  
00:18:37.210 --> 00:18:40.374 Only if you have set up well.  
NOTE Confidence: 0.90839744  
00:18:43.910 --> 00:18:45.854 Probably not. It would only  
NOTE Confidence: 0.90839744  
00:18:45.854 --> 00:18:47.930 appear if somebody who did not  
NOTE Confidence: 0.90839744  
00:18:48.008 --> 00:18:49.988 have access to the calendar.  
NOTE Confidence: 0.90839744  
00:18:49.990 --> 00:18:52.699 Found that event.  
NOTE Confidence: 0.90839744  
00:18:52.700 --> 00:18:54.398 So this is a little weird.  
NOTE Confidence: 0.90839744  
00:18:54.400 --> 00:18:58.350 I'd have to go to all events. Umm.  
NOTE Confidence: 0.7834459011111111  
00:19:00.420 --> 00:19:02.184 So I believe this is imported  
NOTE Confidence: 0.7834459011111111

00:19:02.184 --> 00:19:03.678 from campus groups, yes, so.  
NOTE Confidence: 0.7834459011111111

00:19:03.678 --> 00:19:05.806 Usually what would happen is you as  
NOTE Confidence: 0.7834459011111111

00:19:05.806 --> 00:19:07.887 the admin of your calendar would  
NOTE Confidence: 0.7834459011111111

00:19:07.887 --> 00:19:10.353 probably be the one who's looking for  
NOTE Confidence: 0.7834459011111111

00:19:10.353 --> 00:19:12.768 these events to add to your calendar,  
NOTE Confidence: 0.7834459011111111

00:19:12.770 --> 00:19:14.785 the only way they'd show  
NOTE Confidence: 0.7834459011111111

00:19:14.785 --> 00:19:16.397 up in suggested events.  
NOTE Confidence: 0.7834459011111111

00:19:16.400 --> 00:19:19.091 Would be if somebody else who did not have  
NOTE Confidence: 0.7834459011111111

00:19:19.091 --> 00:19:21.530 access to approved to your calendar said,  
NOTE Confidence: 0.7834459011111111

00:19:21.530 --> 00:19:25.514 looked at this event and said oh maybe.  
NOTE Confidence: 0.7834459011111111

00:19:25.520 --> 00:19:27.020 Internal medicine is interested in  
NOTE Confidence: 0.7834459011111111

00:19:27.020 --> 00:19:28.520 putting this on their calendar,  
NOTE Confidence: 0.7834459011111111

00:19:28.520 --> 00:19:30.424 and they could suggest it, but it would be.  
NOTE Confidence: 0.7834459011111111

00:19:30.424 --> 00:19:31.690 I don't know why somebody would  
NOTE Confidence: 0.7834459011111111

00:19:31.744 --> 00:19:32.980 be doing this if they would.  
NOTE Confidence: 0.7834459011111111

00:19:32.980 --> 00:19:34.905 Probably if they're looking for events that

NOTE Confidence: 0.783445901111111

00:19:34.905 --> 00:19:37.060 they want to suggest internal medicine,

NOTE Confidence: 0.783445901111111

00:19:37.060 --> 00:19:38.990 it's very likely that they

NOTE Confidence: 0.783445901111111

00:19:38.990 --> 00:19:40.534 have this access already,

NOTE Confidence: 0.783445901111111

00:19:40.540 --> 00:19:42.360 so when they hit suggest it would

NOTE Confidence: 0.783445901111111

00:19:42.360 --> 00:19:43.620 just automatically be approved.

NOTE Confidence: 0.783445901111111

00:19:43.620 --> 00:19:44.547 So it's possible,

NOTE Confidence: 0.783445901111111

00:19:44.547 --> 00:19:46.710 but very unlikely that somebody is going

NOTE Confidence: 0.783445901111111

00:19:46.765 --> 00:19:48.851 to decide to suggest a campus groups

NOTE Confidence: 0.783445901111111

00:19:48.851 --> 00:19:50.550 event unprompted to your calendar.

NOTE Confidence: 0.893993825625

00:19:52.880 --> 00:19:55.616 We can set up a subscription so that if

NOTE Confidence: 0.893993825625

00:19:55.616 --> 00:19:58.215 there is some calendar in campus group,

NOTE Confidence: 0.893993825625

00:19:58.220 --> 00:20:00.173 some group in campus groups with events

NOTE Confidence: 0.893993825625

00:20:00.173 --> 00:20:02.178 that you know you're interested in,

NOTE Confidence: 0.893993825625

00:20:02.180 --> 00:20:04.788 we can set it up so that there's

NOTE Confidence: 0.893993825625

00:20:04.788 --> 00:20:07.252 an automatic pull of those campus

NOTE Confidence: 0.893993825625

00:20:07.252 --> 00:20:09.517 groups events into your calendar,  
NOTE Confidence: 0.893993825625

00:20:09.520 --> 00:20:12.256 but I believe those don't get.  
NOTE Confidence: 0.893993825625

00:20:12.260 --> 00:20:14.060 I honestly would have to go back and check.  
NOTE Confidence: 0.893993825625

00:20:14.060 --> 00:20:15.310 I believe those just automatically  
NOTE Confidence: 0.893993825625

00:20:15.310 --> 00:20:16.560 get added to the calendar.  
NOTE Confidence: 0.893993825625

00:20:16.560 --> 00:20:20.268 I don't think they go on the approval queue.  
NOTE Confidence: 0.893993825625

00:20:20.270 --> 00:20:22.244 But don't quote me on that because  
NOTE Confidence: 0.893993825625

00:20:22.244 --> 00:20:25.800 I needed to double check. Umm.  
NOTE Confidence: 0.893993825625

00:20:25.800 --> 00:20:28.086 Any other questions about campus groups?  
NOTE Confidence: 0.893993825625

00:20:28.090 --> 00:20:29.390 We do have this integration  
NOTE Confidence: 0.893993825625

00:20:29.390 --> 00:20:30.170 with campus groups.  
NOTE Confidence: 0.893993825625

00:20:30.170 --> 00:20:31.482 I should have mentioned  
NOTE Confidence: 0.893993825625

00:20:31.482 --> 00:20:33.122 that a little bit earlier.  
NOTE Confidence: 0.893993825625

00:20:33.130 --> 00:20:34.905 If there is some student  
NOTE Confidence: 0.893993825625

00:20:34.905 --> 00:20:35.970 calendar being managed,  
NOTE Confidence: 0.893993825625

00:20:35.970 --> 00:20:37.762 managed on campus groups that has lots

NOTE Confidence: 0.893993825625

00:20:37.762 --> 00:20:39.550 of events that are relevant to you,

NOTE Confidence: 0.893993825625

00:20:39.550 --> 00:20:41.865 you probably want to check

NOTE Confidence: 0.893993825625

00:20:41.865 --> 00:20:43.899 out those events here.

NOTE Confidence: 0.893993825625

00:20:43.899 --> 00:20:46.754 You can also, like I said,

NOTE Confidence: 0.893993825625

00:20:46.754 --> 00:20:48.466 set up that subscription.

NOTE Confidence: 0.893993825625

00:20:48.470 --> 00:20:50.150 We can configure that for you

NOTE Confidence: 0.893993825625

00:20:50.150 --> 00:20:52.104 so that events from a particular

NOTE Confidence: 0.893993825625

00:20:52.104 --> 00:20:54.024 group will automatically be added.

NOTE Confidence: 0.893993825625

00:20:54.030 --> 00:20:55.240 Just contact us if that's

NOTE Confidence: 0.893993825625

00:20:55.240 --> 00:20:56.450 something that might be helpful.

NOTE Confidence: 0.893993825625

00:20:56.450 --> 00:20:56.820 For you.

NOTE Confidence: 0.7945195725

00:20:59.050 --> 00:21:02.004 Um, other events on campus groups or

NOTE Confidence: 0.7945195725

00:21:02.004 --> 00:21:04.560 anything else calendar approval related?

NOTE Confidence: 0.72539441

00:21:10.600 --> 00:21:14.820 I see Shari's asking.

NOTE Confidence: 0.72539441

00:21:14.820 --> 00:21:16.730 About how new stories are

NOTE Confidence: 0.72539441

00:21:16.730 --> 00:21:18.640 appearing if others don't have.  
NOTE Confidence: 0.838654564

00:21:20.990 --> 00:21:21.906 Yeah. No, that's fine.  
NOTE Confidence: 0.838654564

00:21:21.906 --> 00:21:23.280 We could move over to news.  
NOTE Confidence: 0.838654564

00:21:23.280 --> 00:21:27.580 Can you just elaborate a little bit, Sherry?  
NOTE Confidence: 0.838654564

00:21:27.580 --> 00:21:29.834 Like how how news stories are appearing.  
NOTE Confidence: 0.838654564

00:21:29.840 --> 00:21:33.858 So generally the suggested articles you see,  
NOTE Confidence: 0.838654564

00:21:33.860 --> 00:21:35.846 the primary way those are going  
NOTE Confidence: 0.838654564

00:21:35.846 --> 00:21:38.242 to end up there is if somebody  
NOTE Confidence: 0.838654564

00:21:38.242 --> 00:21:40.559 writes an article and they tag a  
NOTE Confidence: 0.838654564

00:21:40.639 --> 00:21:43.103 person who is a member of your org.  
NOTE Confidence: 0.838654564

00:21:43.110 --> 00:21:44.466 That's the usual way to do  
NOTE Confidence: 0.838654564

00:21:44.466 --> 00:21:45.370 it because it's automatic.  
NOTE Confidence: 0.838654564

00:21:45.370 --> 00:21:48.010 People are pretty good about tagging  
NOTE Confidence: 0.838654564

00:21:48.010 --> 00:21:52.596 the staff who are in their article.  
NOTE Confidence: 0.838654564

00:21:52.600 --> 00:21:55.474 There it is also possible for  
NOTE Confidence: 0.838654564

00:21:55.474 --> 00:21:57.390 people to explicitly suggest.

NOTE Confidence: 0.838654564

00:21:57.390 --> 00:22:01.289 A article or an event to another

NOTE Confidence: 0.838654564

00:22:01.289 --> 00:22:02.954 organization, I don't know.

NOTE Confidence: 0.838654564

00:22:02.954 --> 00:22:05.162 It's it's there as an option.

NOTE Confidence: 0.838654564

00:22:05.170 --> 00:22:08.159 I honestly don't know how often that

NOTE Confidence: 0.838654564

00:22:08.159 --> 00:22:10.070 happens that somebody is writing up

NOTE Confidence: 0.838654564

00:22:10.070 --> 00:22:11.488 a news article and they think, oh,

NOTE Confidence: 0.838654564

00:22:11.488 --> 00:22:13.232 this might be handy to have on such

NOTE Confidence: 0.838654564

00:22:13.232 --> 00:22:15.190 and such website that I don't manage.

NOTE Confidence: 0.838654564

00:22:15.190 --> 00:22:17.350 They can do it. It's an option that's there.

NOTE Confidence: 0.838654564

00:22:17.350 --> 00:22:20.615 That is a way that's articles and events

NOTE Confidence: 0.838654564

00:22:20.615 --> 00:22:24.080 could end up in your approval queues.

NOTE Confidence: 0.838654564

00:22:24.080 --> 00:22:24.772 But yeah,

NOTE Confidence: 0.838654564

00:22:24.772 --> 00:22:26.848 the primary way is from the

NOTE Confidence: 0.838654564

00:22:26.848 --> 00:22:28.823 people tags and the membership

NOTE Confidence: 0.838654564

00:22:28.823 --> 00:22:31.229 of those people that are tagged.

NOTE Confidence: 0.871156041578947

00:22:33.780 --> 00:22:36.902 Got it. And that my question was  
NOTE Confidence: 0.871156041578947

00:22:36.902 --> 00:22:39.824 more how actual news stories are  
NOTE Confidence: 0.871156041578947

00:22:39.824 --> 00:22:42.800 appearing now on our news feed.  
NOTE Confidence: 0.871156041578947

00:22:42.800 --> 00:22:45.052 But I I don't wanna, I didn't wanna  
NOTE Confidence: 0.871156041578947

00:22:45.052 --> 00:22:46.900 take this time if if other folks  
NOTE Confidence: 0.871156041578947

00:22:46.965 --> 00:22:48.855 had more specific questions to to  
NOTE Confidence: 0.871156041578947

00:22:48.855 --> 00:22:50.739 what you're going over right now.  
NOTE Confidence: 0.722821042

00:22:52.360 --> 00:22:54.720 Well, once you know it's,  
NOTE Confidence: 0.722821042

00:22:54.720 --> 00:22:56.568 I think we should just jump around  
NOTE Confidence: 0.722821042

00:22:56.568 --> 00:22:58.069 and answer whatever questions people  
NOTE Confidence: 0.722821042

00:22:58.069 --> 00:23:00.049 have because it's all pretty similar.  
NOTE Confidence: 0.83922103

00:23:01.550 --> 00:23:04.987 It's possible I didn't notice this before,  
NOTE Confidence: 0.83922103

00:23:04.990 --> 00:23:09.640 but I. I posted a story.  
NOTE Confidence: 0.83922103

00:23:09.640 --> 00:23:12.909 This morning and there seems to be a  
NOTE Confidence: 0.83922103

00:23:12.909 --> 00:23:15.429 new extra space column on the right  
NOTE Confidence: 0.83922103

00:23:15.429 --> 00:23:18.335 of both the homepage of my news

NOTE Confidence: 0.83922103  
00:23:18.335 --> 00:23:20.928 feed and within that article itself.  
NOTE Confidence: 0.83922103  
00:23:20.928 --> 00:23:23.298 Is that. Is that new?  
NOTE Confidence: 0.83922103  
00:23:23.300 --> 00:23:24.196 Is that a glitch?  
NOTE Confidence: 0.83922103  
00:23:24.196 --> 00:23:25.540 Is that can that be changed?  
NOTE Confidence: 0.900256995714286  
00:23:27.010 --> 00:23:29.320 So we decided to reverse these columns.  
NOTE Confidence: 0.900256995714286  
00:23:29.320 --> 00:23:30.204 This actually has nothing  
NOTE Confidence: 0.900256995714286  
00:23:30.204 --> 00:23:31.309 to do with the matrix,  
NOTE Confidence: 0.900256995714286  
00:23:31.310 --> 00:23:32.766 but I think it's relevant to everybody here,  
NOTE Confidence: 0.900256995714286  
00:23:32.770 --> 00:23:37.240 so I might as well go over it basically.  
NOTE Confidence: 0.900256995714286  
00:23:37.240 --> 00:23:39.656 We had our columns set up on this  
NOTE Confidence: 0.900256995714286  
00:23:39.656 --> 00:23:41.627 website so that I'm just trying  
NOTE Confidence: 0.900256995714286  
00:23:41.627 --> 00:23:43.980 to think of a good example here.  
NOTE Confidence: 0.900256995714286  
00:23:43.980 --> 00:23:45.906 Um, these columns were configured and  
NOTE Confidence: 0.900256995714286  
00:23:45.906 --> 00:23:48.329 of course I pick a one column page.  
NOTE Confidence: 0.766102385  
00:23:51.180 --> 00:23:54.096 Hmm. OK, here's a good example.  
NOTE Confidence: 0.766102385

00:23:54.100 --> 00:23:56.848 So and before we release the  
NOTE Confidence: 0.766102385

00:23:56.848 --> 00:23:59.680 navigation update a couple months ago,  
NOTE Confidence: 0.766102385

00:23:59.680 --> 00:24:02.284 we used to have side navigation that  
NOTE Confidence: 0.766102385

00:24:02.284 --> 00:24:04.004 appeared right here, right where  
NOTE Confidence: 0.766102385

00:24:04.004 --> 00:24:06.118 people's eyes first go on the page.  
NOTE Confidence: 0.766102385

00:24:06.120 --> 00:24:09.384 And that made sense because you might want  
NOTE Confidence: 0.766102385

00:24:09.384 --> 00:24:13.031 to see the other similar pages here before  
NOTE Confidence: 0.766102385

00:24:13.031 --> 00:24:15.497 you actually start reading the content.  
NOTE Confidence: 0.766102385

00:24:15.500 --> 00:24:17.943 Maybe there's some other more relevant page  
NOTE Confidence: 0.766102385

00:24:17.943 --> 00:24:20.608 that you could land on if you came from  
NOTE Confidence: 0.766102385

00:24:20.608 --> 00:24:23.089 Google or a search or something like that.  
NOTE Confidence: 0.766102385

00:24:23.090 --> 00:24:23.492 However,  
NOTE Confidence: 0.766102385

00:24:23.492 --> 00:24:26.306 now that we don't have side navigation,  
NOTE Confidence: 0.766102385

00:24:26.310 --> 00:24:28.290 particularly with a page like this,  
NOTE Confidence: 0.766102385

00:24:28.290 --> 00:24:30.074 it just looked really,  
NOTE Confidence: 0.766102385

00:24:30.074 --> 00:24:32.730 really odd to have this CTA,

NOTE Confidence: 0.766102385

00:24:32.730 --> 00:24:35.370 which is sort of auxiliary content.

NOTE Confidence: 0.766102385

00:24:35.370 --> 00:24:37.440 It's secondary to the main point of the page,

NOTE Confidence: 0.766102385

00:24:37.440 --> 00:24:40.260 which is to talk about this

NOTE Confidence: 0.766102385

00:24:40.260 --> 00:24:41.670 visiting elective program.

NOTE Confidence: 0.766102385

00:24:41.670 --> 00:24:43.550 People are coming to this page to read

NOTE Confidence: 0.766102385

00:24:43.550 --> 00:24:45.349 about the visiting elective program,

NOTE Confidence: 0.766102385

00:24:45.350 --> 00:24:47.006 and the very first thing they would see,

NOTE Confidence: 0.766102385

00:24:47.010 --> 00:24:47.979 because this side,

NOTE Confidence: 0.766102385

00:24:47.979 --> 00:24:49.917 the smaller side column appeared on

NOTE Confidence: 0.766102385

00:24:49.917 --> 00:24:52.262 the left instead of the right, is.

NOTE Confidence: 0.766102385

00:24:52.262 --> 00:24:55.334 This elective sub internship listing link.

NOTE Confidence: 0.766102385

00:24:55.340 --> 00:24:57.164 It was just kind of awkward

NOTE Confidence: 0.766102385

00:24:57.164 --> 00:24:58.919 because the way people read web

NOTE Confidence: 0.766102385

00:24:58.919 --> 00:25:00.815 pages is kind of like in an F.

NOTE Confidence: 0.766102385

00:25:00.820 --> 00:25:03.652 They start at the top, go left to right,

NOTE Confidence: 0.766102385

00:25:03.652 --> 00:25:05.820 at least English speakers and other  
NOTE Confidence: 0.766102385

00:25:05.820 --> 00:25:08.300 people who read languages left to right.  
NOTE Confidence: 0.766102385

00:25:08.300 --> 00:25:09.404 They start at the top of the page,  
NOTE Confidence: 0.766102385

00:25:09.410 --> 00:25:10.518 go left to right,  
NOTE Confidence: 0.766102385

00:25:10.518 --> 00:25:11.626 all the way down.  
NOTE Confidence: 0.766102385

00:25:11.630 --> 00:25:11.902 Um,  
NOTE Confidence: 0.766102385

00:25:11.902 --> 00:25:14.350 so this just makes a lot more sense for  
NOTE Confidence: 0.766102385

00:25:14.420 --> 00:25:16.415 conveying the most important information  
NOTE Confidence: 0.766102385

00:25:16.415 --> 00:25:19.049 that's on this page to the user.  
NOTE Confidence: 0.766102385

00:25:19.050 --> 00:25:21.528 That's why we flip these columns.  
NOTE Confidence: 0.766102385

00:25:21.530 --> 00:25:22.892 Is this creating some kind of  
NOTE Confidence: 0.766102385

00:25:22.892 --> 00:25:24.070 problem on the urology page?  
NOTE Confidence: 0.766102385

00:25:24.070 --> 00:25:25.330 I mean, to be honest,  
NOTE Confidence: 0.766102385

00:25:25.330 --> 00:25:26.920 I have obviously not having the  
NOTE Confidence: 0.766102385

00:25:26.920 --> 00:25:28.848 chance to look at every page yet,  
NOTE Confidence: 0.766102385

00:25:28.850 --> 00:25:31.524 so there might be some weird unintended.

NOTE Confidence: 0.766102385

00:25:31.530 --> 00:25:32.680 Consequences here.

NOTE Confidence: 0.481532234

00:25:33.030 --> 00:25:37.716 No I it just one. I I didn't.

NOTE Confidence: 0.481532234

00:25:37.716 --> 00:25:40.670 I didn't notice exactly what was different,

NOTE Confidence: 0.481532234

00:25:40.670 --> 00:25:42.350 but something was clearly different.

NOTE Confidence: 0.481532234

00:25:42.350 --> 00:25:45.680 Although when I go into an actual news story,

NOTE Confidence: 0.481532234

00:25:45.680 --> 00:25:47.626 the one I just posted this morning,

NOTE Confidence: 0.481532234

00:25:47.630 --> 00:25:50.222 which is that pet imaging one. Yes.

NOTE Confidence: 0.481532234

00:25:50.222 --> 00:25:53.036 Now there's just this like column to

NOTE Confidence: 0.481532234

00:25:53.036 --> 00:25:55.979 the right with nothing in it is can.

NOTE Confidence: 0.83988269375

00:25:56.110 --> 00:25:57.566 So that column to the right with

NOTE Confidence: 0.83988269375

00:25:57.566 --> 00:25:59.276 nothing in it used to be on the left,

NOTE Confidence: 0.848045561428571

00:25:59.770 --> 00:26:01.737 OK? And there was always that space.

NOTE Confidence: 0.854779622727273

00:26:01.910 --> 00:26:03.182 It was always there and now

NOTE Confidence: 0.854779622727273

00:26:03.182 --> 00:26:04.370 it's just to the right.

NOTE Confidence: 0.854779622727273

00:26:04.370 --> 00:26:05.816 And honestly, the reason why we

NOTE Confidence: 0.854779622727273

00:26:05.816 --> 00:26:07.605 keep this here is because if you  
NOTE Confidence: 0.854779622727273

00:26:07.605 --> 00:26:09.147 have a long paragraph like this,  
NOTE Confidence: 0.854779622727273

00:26:09.150 --> 00:26:10.238 if we're to stretch.  
NOTE Confidence: 0.854779622727273

00:26:10.238 --> 00:26:11.870 If it were to stretch the  
NOTE Confidence: 0.854779622727273

00:26:11.931 --> 00:26:13.406 entire width of the page,  
NOTE Confidence: 0.854779622727273

00:26:13.410 --> 00:26:15.287 it gets kind of hard to read if  
NOTE Confidence: 0.854779622727273

00:26:15.287 --> 00:26:16.543 you have to move all the way over  
NOTE Confidence: 0.854779622727273

00:26:16.543 --> 00:26:17.901 and then your eyes have to go all  
NOTE Confidence: 0.854779622727273

00:26:17.901 --> 00:26:19.109 the way back to the beginning.  
NOTE Confidence: 0.854779622727273

00:26:19.110 --> 00:26:20.922 So we're very intentionally if we  
NOTE Confidence: 0.854779622727273

00:26:20.922 --> 00:26:22.730 have long form content on a page,  
NOTE Confidence: 0.854779622727273

00:26:22.730 --> 00:26:24.422 we want that buffer there with  
NOTE Confidence: 0.854779622727273

00:26:24.422 --> 00:26:25.550 that extra side column,  
NOTE Confidence: 0.854779622727273

00:26:25.550 --> 00:26:26.430 even if it's empty,  
NOTE Confidence: 0.854779622727273

00:26:26.430 --> 00:26:28.420 because it makes the page much more readable.  
NOTE Confidence: 0.72084429

00:26:31.030 --> 00:26:34.546 Got it. Uh. On the main.

NOTE Confidence: 0.928553746666667  
00:26:36.620 --> 00:26:40.346 Can you just go to my main news page?  
NOTE Confidence: 0.775961943157895  
00:26:43.690 --> 00:26:45.454 And there's a bug that we're working  
NOTE Confidence: 0.775961943157895  
00:26:45.454 --> 00:26:47.654 to fix in case anybody notices this  
NOTE Confidence: 0.775961943157895  
00:26:47.654 --> 00:26:49.389 icon is not switching properly.  
NOTE Confidence: 0.775961943157895  
00:26:49.390 --> 00:26:50.335 It's really confusing,  
NOTE Confidence: 0.775961943157895  
00:26:50.335 --> 00:26:51.910 but hopefully we'll have a  
NOTE Confidence: 0.775961943157895  
00:26:51.910 --> 00:26:53.778 fix in the next hour or two.  
NOTE Confidence: 0.8390045225  
00:26:55.830 --> 00:26:58.008 Good news uh, but things seem  
NOTE Confidence: 0.8390045225  
00:26:58.008 --> 00:27:00.449 to be posting much quicker now.  
NOTE Confidence: 0.8390045225  
00:27:00.450 --> 00:27:02.921 I made a couple of quick tweaks  
NOTE Confidence: 0.8390045225  
00:27:02.921 --> 00:27:04.840 after posting that news story  
NOTE Confidence: 0.8390045225  
00:27:04.840 --> 00:27:07.220 and it was almost immediate. So  
NOTE Confidence: 0.8253931275  
00:27:07.230 --> 00:27:09.736 OK, so we have been struggling with  
NOTE Confidence: 0.8253931275  
00:27:09.736 --> 00:27:12.481 these issues of updates you make and  
NOTE Confidence: 0.8253931275  
00:27:12.481 --> 00:27:14.881 Beatrix not reflecting right away on  
NOTE Confidence: 0.8253931275

00:27:14.952 --> 00:27:17.544 the website we just made a change on.  
NOTE Confidence: 0.8253931275

00:27:17.550 --> 00:27:19.710 Once. That Tuesday or Wednesday,  
NOTE Confidence: 0.8253931275

00:27:19.710 --> 00:27:22.054 I can't remember. Honestly,  
NOTE Confidence: 0.8253931275

00:27:22.054 --> 00:27:25.454 that should mollify this issue somewhat.  
NOTE Confidence: 0.8253931275

00:27:25.454 --> 00:27:27.678 It's definitely not solved.  
NOTE Confidence: 0.8253931275

00:27:27.680 --> 00:27:29.004 If everything's working properly,  
NOTE Confidence: 0.8253931275

00:27:29.004 --> 00:27:31.569 any edit you make can be a tricks.  
NOTE Confidence: 0.8253931275

00:27:31.570 --> 00:27:33.595 Should be reflected on the  
NOTE Confidence: 0.8253931275

00:27:33.595 --> 00:27:36.980 site within 6 minutes. Umm.  
NOTE Confidence: 0.8253931275

00:27:36.980 --> 00:27:38.530 Were thought there's still some  
NOTE Confidence: 0.8253931275

00:27:38.530 --> 00:27:40.080 bugs that were working out.  
NOTE Confidence: 0.8253931275

00:27:40.080 --> 00:27:42.576 So if you are not seeing your update  
NOTE Confidence: 0.8253931275

00:27:42.576 --> 00:27:44.412 for like 10-15 minutes or longer,  
NOTE Confidence: 0.8253931275

00:27:44.412 --> 00:27:46.480 do you make a ticket with us?  
NOTE Confidence: 0.8253931275

00:27:46.480 --> 00:27:50.152 Let us know. Just give us a link to.  
NOTE Confidence: 0.8253931275

00:27:50.160 --> 00:27:54.150 The relevant screening Beatrix or the item,

NOTE Confidence: 0.8253931275

00:27:54.150 --> 00:27:56.466 the page that's not updating at

NOTE Confidence: 0.8253931275

00:27:56.466 --> 00:27:58.510 both would actually be great.

NOTE Confidence: 0.8253931275

00:27:58.510 --> 00:28:00.330 And we can look into it and

NOTE Confidence: 0.8253931275

00:28:00.330 --> 00:28:02.109 make sure that gets addressed.

NOTE Confidence: 0.8253931275

00:28:02.110 --> 00:28:03.713 This is the top issue we're trying

NOTE Confidence: 0.8253931275

00:28:03.713 --> 00:28:05.302 to solve right now because it's

NOTE Confidence: 0.8253931275

00:28:05.302 --> 00:28:06.727 really frustrating when you make

NOTE Confidence: 0.8253931275

00:28:06.727 --> 00:28:08.354 updates and Beatrix and you're not

NOTE Confidence: 0.8253931275

00:28:08.354 --> 00:28:10.065 sure if you did something wrong or

NOTE Confidence: 0.8253931275

00:28:10.065 --> 00:28:11.430 it's just taking a while to update.

NOTE Confidence: 0.8253931275

00:28:11.430 --> 00:28:14.146 So we are aware of those issues.

NOTE Confidence: 0.8253931275

00:28:14.150 --> 00:28:15.746 Unfortunately, it's not a simple fix.

NOTE Confidence: 0.8253931275

00:28:15.750 --> 00:28:17.185 It's lots of smaller issues

NOTE Confidence: 0.8253931275

00:28:17.185 --> 00:28:18.046 that we're having.

NOTE Confidence: 0.8253931275

00:28:18.050 --> 00:28:18.412 Well,

NOTE Confidence: 0.8253931275

00:28:18.412 --> 00:28:20.222 some bigger and some smaller  
NOTE Confidence: 0.8253931275

00:28:20.222 --> 00:28:22.610 issues that are all contributing.  
NOTE Confidence: 0.8253931275

00:28:22.610 --> 00:28:23.494 We are making progress.  
NOTE Confidence: 0.8253931275

00:28:23.494 --> 00:28:25.607 It's going to take a little more time to fix.  
NOTE Confidence: 0.8253931275

00:28:25.610 --> 00:28:28.816 I'm really hoping by the 1st week.  
NOTE Confidence: 0.8253931275

00:28:28.820 --> 00:28:29.888 Of 2023 we have,  
NOTE Confidence: 0.8253931275

00:28:29.888 --> 00:28:31.866 we're in a much better place and  
NOTE Confidence: 0.8253931275

00:28:31.866 --> 00:28:33.750 we can actually work to start  
NOTE Confidence: 0.8253931275

00:28:33.750 --> 00:28:35.589 shortening that six minute window.  
NOTE Confidence: 0.8253931275

00:28:35.590 --> 00:28:36.610 So it's more immediate.  
NOTE Confidence: 0.820636328

00:28:38.130 --> 00:28:40.150 Yeah, but as Aaron said, much faster.  
NOTE Confidence: 0.820636328

00:28:40.150 --> 00:28:43.020 At least today I I just saw  
NOTE Confidence: 0.820636328

00:28:43.020 --> 00:28:45.070 Amanda's question and there was.  
NOTE Confidence: 0.820636328

00:28:45.070 --> 00:28:48.028 I tried posting this news story  
NOTE Confidence: 0.820636328

00:28:48.028 --> 00:28:50.940 last night and it it was Zach  
NOTE Confidence: 0.820636328

00:28:50.940 --> 00:28:52.550 and I were going back and forth.

NOTE Confidence: 0.820636328

00:28:52.550 --> 00:28:54.210 It was like a conundrum.

NOTE Confidence: 0.820636328

00:28:54.210 --> 00:28:56.150 All these weird errors and

NOTE Confidence: 0.820636328

00:28:56.150 --> 00:28:58.680 but but it was fine today.

NOTE Confidence: 0.760820746666667

00:28:59.030 --> 00:29:00.254 Amanda is very observant

NOTE Confidence: 0.760820746666667

00:29:00.254 --> 00:29:01.784 because she is exactly right.

NOTE Confidence: 0.760820746666667

00:29:01.790 --> 00:29:03.547 We had a sync that was happy.

NOTE Confidence: 0.760820746666667

00:29:03.550 --> 00:29:05.034 Happening at 4:30 Umm.

NOTE Confidence: 0.760820746666667

00:29:05.034 --> 00:29:06.889 There's actually the campus group

NOTE Confidence: 0.760820746666667

00:29:06.889 --> 00:29:08.728 sync that was causing issue.

NOTE Confidence: 0.760820746666667

00:29:08.730 --> 00:29:10.782 The problem was we were syncing

NOTE Confidence: 0.760820746666667

00:29:10.782 --> 00:29:13.102 with them at I think 9:30,

NOTE Confidence: 0.760820746666667

00:29:13.102 --> 00:29:16.114 noon and 4:30 and the problem

NOTE Confidence: 0.760820746666667

00:29:16.114 --> 00:29:19.618 is that sync created all these.

NOTE Confidence: 0.7974330495

00:29:22.650 --> 00:29:24.702 Necessitated lots of forced updates to

NOTE Confidence: 0.7974330495

00:29:24.702 --> 00:29:27.127 the site and just like totally backed

NOTE Confidence: 0.7974330495

00:29:27.127 --> 00:29:29.437 up the queue of sending out those,  
NOTE Confidence: 0.7974330495

00:29:29.440 --> 00:29:31.832 force those updates to  
NOTE Confidence: 0.7974330495

00:29:31.832 --> 00:29:34.224 the website from Beatrix.  
NOTE Confidence: 0.7974330495

00:29:34.230 --> 00:29:36.650 So we've disabled those syncs.  
NOTE Confidence: 0.7974330495

00:29:36.650 --> 00:29:38.687 They're not happening at those times anymore,  
NOTE Confidence: 0.7974330495

00:29:38.690 --> 00:29:41.270 so hopefully you don't see that  
NOTE Confidence: 0.7974330495

00:29:41.270 --> 00:29:42.990 4:30 problem any longer.  
NOTE Confidence: 0.7974330495

00:29:42.990 --> 00:29:44.502 Instead, the sink is just happening  
NOTE Confidence: 0.7974330495

00:29:44.502 --> 00:29:46.750 once a day in the middle of the night  
NOTE Confidence: 0.7974330495

00:29:46.750 --> 00:29:48.550 when hopefully nobody's editing it.  
NOTE Confidence: 0.7974330495

00:29:48.550 --> 00:29:50.470 I think it's 2:30 AM,  
NOTE Confidence: 0.7974330495

00:29:50.470 --> 00:29:52.898 hopefully nobody's online submitting.  
NOTE Confidence: 0.7974330495

00:29:52.898 --> 00:29:54.719 These articles then.  
NOTE Confidence: 0.7974330495

00:29:54.720 --> 00:29:57.712 But yeah, so you shouldn't see those really  
NOTE Confidence: 0.7974330495

00:29:57.712 --> 00:30:02.420 long delays any longer late afternoon,  
NOTE Confidence: 0.7974330495

00:30:02.420 --> 00:30:04.940 around midday and in the morning.

NOTE Confidence: 0.7974330495

00:30:04.940 --> 00:30:06.858 There are still some remaining issues though,

NOTE Confidence: 0.7974330495

00:30:06.860 --> 00:30:08.596 so I can't say it's totally solved,

NOTE Confidence: 0.7974330495

00:30:08.600 --> 00:30:10.406 but that was a big problem that

NOTE Confidence: 0.7974330495

00:30:10.406 --> 00:30:11.819 is now should be solved.

NOTE Confidence: 0.897699551428572

00:30:14.700 --> 00:30:16.149 Thanks so much. That's all I had.

NOTE Confidence: 0.897699551428572

00:30:16.150 --> 00:30:18.274 Thanks for everyone's, uh,

NOTE Confidence: 0.897699551428572

00:30:18.274 --> 00:30:20.548 obliging this one-on-one in a meeting.

NOTE Confidence: 0.851503201111111

00:30:20.560 --> 00:30:22.394 No, no, no, no. This is helpful

NOTE Confidence: 0.851503201111111

00:30:22.394 --> 00:30:23.553 for everybody. I think so,

NOTE Confidence: 0.851503201111111

00:30:23.553 --> 00:30:24.819 but thanks for bringing that up.

NOTE Confidence: 0.722587364

00:30:25.510 --> 00:30:28.030 And and Zach just, uh,

NOTE Confidence: 0.722587364

00:30:28.030 --> 00:30:29.454 nicked my last e-mail.

NOTE Confidence: 0.722587364

00:30:29.454 --> 00:30:30.878 Mark just answered it.

NOTE Confidence: 0.722587364

00:30:30.880 --> 00:30:31.648 So we're all set.

NOTE Confidence: 0.718441376

00:30:32.080 --> 00:30:35.600 OK. Thanks. You're welcome, Zach.

NOTE Confidence: 0.718441376

00:30:35.600 --> 00:30:39.040 Thanks, mark. Any other questions?  
NOTE Confidence: 0.744695662

00:30:42.890 --> 00:30:44.550 I'm happy to. I mean, we have plenty of time,  
NOTE Confidence: 0.744695662

00:30:44.550 --> 00:30:47.814 so I'm happy to talk about questions about  
NOTE Confidence: 0.744695662

00:30:47.814 --> 00:30:50.028 approving news or events. And keywords.  
NOTE Confidence: 0.744695662

00:30:50.028 --> 00:30:52.460 Or about the updates that went out today,  
NOTE Confidence: 0.744695662

00:30:52.460 --> 00:30:54.427 the biggest change was that column flip.  
NOTE Confidence: 0.895889590769231

00:30:59.560 --> 00:31:01.205 If not, I'm happy to give everybody  
NOTE Confidence: 0.895889590769231

00:31:01.205 --> 00:31:02.730 1/2 hour back with their time.  
NOTE Confidence: 0.895889590769231

00:31:02.730 --> 00:31:04.650 I'm sure everybody could use it.  
NOTE Confidence: 0.895889590769231

00:31:04.650 --> 00:31:07.338 Um, so one last call for questions.  
NOTE Confidence: 0.897360563571429

00:31:08.850 --> 00:31:10.930 I just have a comment to say that  
NOTE Confidence: 0.897360563571429

00:31:10.930 --> 00:31:13.098 I think it's all coming together.  
NOTE Confidence: 0.897360563571429

00:31:13.100 --> 00:31:15.179 So I still may have more questions,  
NOTE Confidence: 0.897360563571429

00:31:15.180 --> 00:31:17.315 but but this has been really helpful.  
NOTE Confidence: 0.897360563571429

00:31:17.320 --> 00:31:19.238 So I think this one in particular  
NOTE Confidence: 0.897360563571429

00:31:19.238 --> 00:31:21.585 and kind of bringing all the things

NOTE Confidence: 0.897360563571429

00:31:21.585 --> 00:31:23.114 together and I'm sure there'll be

NOTE Confidence: 0.897360563571429

00:31:23.114 --> 00:31:24.404 more questions as things go forward.

NOTE Confidence: 0.897360563571429

00:31:24.404 --> 00:31:26.074 But just thank you again to all of you

NOTE Confidence: 0.897360563571429

00:31:26.074 --> 00:31:27.706 for all of your work on this continually.

NOTE Confidence: 0.897360563571429

00:31:27.706 --> 00:31:29.997 I've I've noticed some of the tweaks and

NOTE Confidence: 0.897360563571429

00:31:29.997 --> 00:31:31.859 changes and it's and it's really great.

NOTE Confidence: 0.897360563571429

00:31:31.860 --> 00:31:32.540 So thank

NOTE Confidence: 0.863277297

00:31:32.550 --> 00:31:33.634 you and happy holidays.

NOTE Confidence: 0.863277297

00:31:33.634 --> 00:31:35.260 Thank you for all your feedback.

NOTE Confidence: 0.863277297

00:31:35.260 --> 00:31:36.502 It really is helpful for what

NOTE Confidence: 0.863277297

00:31:36.502 --> 00:31:37.799 we're trying to tweak these things

NOTE Confidence: 0.863277297

00:31:37.799 --> 00:31:39.077 and get things to work right.

NOTE Confidence: 0.863277297

00:31:39.080 --> 00:31:40.288 So we really appreciate

NOTE Confidence: 0.863277297

00:31:40.288 --> 00:31:41.496 any feedback you have.

NOTE Confidence: 0.856494474285714

00:31:42.180 --> 00:31:43.640 I try not to be a pest, but I'm.

NOTE Confidence: 0.856494474285714

00:31:43.640 --> 00:31:45.630 I'm always glad I don't worry about that.

NOTE Confidence: 0.805376781666667

00:31:46.080 --> 00:31:48.888 Don't let that be a barrier.

NOTE Confidence: 0.805376781666667

00:31:48.890 --> 00:31:50.674 Thank you. Alright.

NOTE Confidence: 0.805376781666667

00:31:50.674 --> 00:31:52.330 If there's nothing else,

NOTE Confidence: 0.805376781666667

00:31:52.330 --> 00:31:53.530 thank everybody so much.

NOTE Confidence: 0.805376781666667

00:31:53.530 --> 00:31:55.530 If you have additional questions later on,

NOTE Confidence: 0.805376781666667

00:31:55.530 --> 00:31:56.790 please let us know at wise.

NOTE Confidence: 0.805376781666667

00:31:56.790 --> 00:31:58.730 I'm the editor at yale.edu.

NOTE Confidence: 0.805376781666667

00:31:58.730 --> 00:32:01.430 And thanks so much for joining.

NOTE Confidence: 0.805376781666667

00:32:01.430 --> 00:32:04.000 Thank you.
