| Review screen | From what I understand you are drinking/using [insert screening data]… We know that drinking above certain levels can cause problems, such as [insert facts]…I am concerned about your drinking/ drug use.  
| Make connection | What connection (if any) do you see between your drinking/ drug use and this medical visit?  
  
  If patient sees connection:  
  - reiterate what patient has said  
  If patient does not see connection:  
  - make one using facts  
| Show NIAAA guidelines & norms | These are what we consider the upper limits of low risk drinking for your age and sex. By low risk we mean that you would be less likely to experience illness or injury if you stayed within these guidelines. |
| **4. Enhance motivation** |  
| Readiness to change | [Show readiness ruler] On a scale from 1-10, how ready are you to change any aspect of your drinking or seek treatment?  
| Develop discrepancy | If patient says:  
  - ≥2 ask Why did you choose that number and not a lower one?;  
  - ≤1 or unwilling, ask What would make this a problem for you?…How important would it be for you to prevent that from happening?…Have you ever done anything you wish you hadn’t while drinking? Discuss pros & cons. |
| **5. Negotiate & advise** |  
| Negotiate goal | Reiterate what patient says in Step 3 and say, What’s the next step?  
| Give advice | If you can stay within these limits you will be less likely to experience [further] illness or injury related to alcohol/drug use.  
| Summarize | This is what I’ve heard you say…Here is a drinking/treatment agreement I would like you to fill out, reinforcing your new drinking or treatment goals. This is really an agreement between you and yourself.  
| Provide handouts | Provide:  
  - Drinking agreement or treatment agreement  
  - Patient general health information handout  
| Suggest PC f/u | Suggest f/u to discuss drinking/ drug use  
| Thank patient | Thank patient for his/her time |
