The Yale School of Public Health is accepting applications from Israeli citizens who seek PhD degrees in public health with a focus on either public health modeling or cancer epidemiology. Successful candidates will receive full tuition, a generous stipend, health insurance and a travel allowance.

This is a special initiative designed to strengthen public health research capacity in Israel. The accepted candidates are expected to return to Israel upon completion of the degree or a related post-doctoral fellowship.

The PhD program at the Yale School of Public Health is one of the strongest and most competitive in the United States. Its faculty engage in interdisciplinary research across the spectrum of public health; disease modeling and cancer prevention and control are two of its core strengths.

Please label at the top of the Application Personal Statement: “Israel Pre-doctoral Fellowship”.

In the personal statement please include why you wish to return to Israel and general plans upon return.

- General GRE required. Scores must be released electronically by the Educational Testing Service (ETS) and be less than 5 years old. • TOEFL is required from applicants whose native language is not English. Scores must be less than 2 years old. • The ETS institution code is 3987 (Graduate School of Arts and Sciences). • The International English Language Testing System (IELTS) test is acceptable in lieu of TOEFL scores. • Contact Melanie Elliot (below) for TOEFL waiver information. • For more information about the application process please visit: http://gsas.yale.edu/admission-graduate-school
