RESEARCH STUDY FOR FUNCTIONAL SEIZURES

EMAIL US

Yale is conducting a research study assessing treatments for pediatric functional seizures (FS), a type of Functional Neurological Disorder

WHO IS ELIGIBLE?

Children ages 11–18 with an EEG confirmed diagnosis of FS/PNES/PNEA

INTERESTED?

Anyone interested can call 203-737-7720 or email FNDStudy@yale.edu

****Please provide the patient's family with a copy of their EEG report with confirmation that an FS was captured and a note confirming FS diagnosis.**

DESCRIPTION OF STUDY

- All participants receive one of the 2 well known cognitive behavioral treatments (therapy) for FS.
- Participants will take part in 12 weekly therapy sessions and 5 lab visits (over 1 year).
- Lab visits will be held over a Zoom call.
- All but the 1st therapy session will be conducted via video telehealth
- **No insurance** is needed and treatment is free of cost.
- Children and parents will be reimbursed for their time for lab visits and therapy sessions up to \$250 total.

PHYSICIANS CAN CONTACT DR. MAKHANI AT FNDSTUDY@YALE.EDU
