Low Back Pain Questionnaire

98%

GEISINGER

We are asking for your permission to audio record the discussion you will have with your doctor today.

Our goal is to understand how to improve patient and doctor communication. Participation is voluntary and declining will not affect your care. If you do agree, will securely transmit the recording to Johns Hopkins researchers who will evaluate the discussion. We will share the evaluation with your doctor.

There is minimal risk to your privacy from participating. Federal laws require that we protect the privacy of your health information. To protect your privacy, the recording and transcriptions will be stripped of identifiers, stored on password protected computers by Geisinger researchers, and kept as confidential as possible. Your information will only be used or shared for research and education. Your recording will be combined and stored with health information about you in a form that is not linked to any identifiers. Johns Hopkins researchers will destroy all recordings and transcriptions. When reporting results, patient information will be grouped together, not reported individually.

eLowBackPain CDS Recording Tab

The screenshot shows a web browser window titled "eLBP CDS - Windows Internet Explorer". The address bar displays "http://chrdevweb/eLBP/content/record.aspx". The browser's menu bar includes "File", "Edit", "View", "Favorites", "Tools", and "Help". The Favorites bar contains several items: "CHR Training", "CHR Admin Tools Dev", "CHR Admin Tools Pilot", "Pilot Illume Web Console", and "eProjects - Home". The main content area is titled "ELBP, FEAR D" and "RECORD VISIT CONVERSATION". A red indicator shows "Not Recording". A yellow banner states: "This patient has agreed to have their back pain visit with you recorded." Below this, the "Recording Status" is "Recording Not Started", and the instruction is "Push START to Begin Recording". A large "START" button is centered, with a timer below it showing "00 : 00". A left sidebar contains navigation icons for "Record", "Patient Data", "Physical Exam", "Care Discussion", and "Progress Note". The bottom status bar shows "Local intranet" and "100%" zoom.

eLBP CDS

ELBP, FEAR D **CARE DISCUSSION** Not Recording

Overview	Medication Advice	Work Advice
<ul style="list-style-type: none"> Possible muscle strain or sprain LBP should improve on own in 1-3 weeks Learn what works best to reduce pain and prevent recurrence No reason pain should not remit on own Discuss concerns 	<ul style="list-style-type: none"> NSAIDs reduce pain and inflammation Reducing pain improves ability to be active Patient thinks OTCs are helpful Patient thinks opiates will be helpful 	
Patient Concerns	Activity Advice	Psychological Well-Being
<ul style="list-style-type: none"> Concerned that pain will prevent them from being active Stay as active as possible Pain may limit activities right now but you should be able to gradually resume usual activities Initially there may be some pain with activity, but that is ok 	<ul style="list-style-type: none"> Staying active usually reduces pain Stay as active as possible but avoid staying too long in one position Walking every day helps reduce pain. Start by walking at your usual pace and increase a little each day. It may be helpful to keep records of walking and bring them back to a follow up visit if one is scheduled. 	
Medical Assessment	Guideline Recommendations	SELECT ORDERS
<p>Based on the following:</p> <ul style="list-style-type: none"> Current LBP episode has lasted < 6 wks LBP comes and goes Mild pain interference Mild-mod pain intensity Non specific LBP 	<p>Medications</p> <ul style="list-style-type: none"> Opioids not recommended for non-specific LBP Opioids do not reduce inflammation and may reduce activity If essential, consider short-acting opioids and limit to a few days supply for flare-ups Patient has not tried an OTC <p>Imaging Orders</p> <ul style="list-style-type: none"> No imaging procedure is recommended given the patient's assessment. Patient thinks imaging will be helpful <p>Referrals</p> <ul style="list-style-type: none"> No referral is recommended given the patient's assessment. Patient thinks surgery will be helpful Patient thinks PT will be helpful Patient thinks back pain specialist will be helpful
