

Intervention:	Intervention Name				
Desired Action:	Describe desired action				
Associated Interventions:	Describe associated interventions			Workflow Step:	Xref to workflow schematic
				Specific CDS Intervention/ CIS Application:	Xref to current CDS screen flow step (if applicable)
Specific Clinical Goal(s):	Improve patient education and empowerment	Improve patient satisfaction with care	Optimize decision making	Prevent errors of omission/ commission	Optimize treatment of chronic conditions
	Mark if relevant	Mark if relevant	Mark if relevant	Mark if relevant	Mark if relevant
Baseline Performance:					
Desired Outcome:					
Approach:	Describe required design approach for this intervention				
Clinical Background:	Describe relevant clinical background information for this intervention				
Variations From Guideline:	Describe relevant exceptions from original guideline (xref to other documentation if necessary)				
Selection Criteria:	Describe logic required to invoke this intervention		Target Population For Intervention:	Describe target patient population	
User interface:	Describe required user interface (eg. Charts, radio buttons, text alerts/messages)				
Monitoring and Evaluation:	Describe approach to evaluation (xref to Evaluation Plan if applicable)				
Jobs Expected To Be Affected:	Describe impact on expected user's positions and duties				
Possible Adverse Consequences Of Implementation:	Describe possible adverse consequences of intervention and plan for mitigating risks				
Primary Stakeholder(s)	Describe primary stakeholders (in clinic)		Clinical Champion(s):	Name clinical champion for implementation support	
Required Delivery Date	Describe factors impacting implementation timing
