

WEBVTT

NOTE duration: "00:00:52.650"

NOTE Confidence: 0.96562

00:00:02.480 --> 00:00:03.760 For these patients who have

NOTE Confidence: 0.96562

00:00:03.760 --> 00:00:05.759 metastatic prostate cancer, then the

NOTE Confidence: 0.96562

00:00:05.759 --> 00:00:07.040 current standard of care is

NOTE Confidence: 0.96562

00:00:07.040 --> 00:00:08.639 systemic therapy, or some so

NOTE Confidence: 0.96562

00:00:08.639 --> 00:00:10.099 called the hormonal therapy,

NOTE Confidence: 0.93969446

00:00:10.639 --> 00:00:12.019 plus or minus chemotherapy.

NOTE Confidence: 0.9957003

00:00:13.375 --> 00:00:14.095 And again,

NOTE Confidence: 0.6312905

00:00:14.815 --> 00:00:15.715 that and those

NOTE Confidence: 0.8190132

00:00:16.095 --> 00:00:16.595 agents,

NOTE Confidence: 0.92705584

00:00:17.055 --> 00:00:18.655 are given that results of

NOTE Confidence: 0.92705584

00:00:18.655 --> 00:00:19.954 about a three year survival,

NOTE Confidence: 0.9745675

00:00:20.335 --> 00:00:21.855 median survival for these patients

NOTE Confidence: 0.9745675

00:00:21.855 --> 00:00:23.235 right now. So,

NOTE Confidence: 0.8480854

00:00:24.335 --> 00:00:25.375 what I'm trying to do

NOTE Confidence: 0.8480854

00:00:25.375 --> 00:00:26.735 right now in our study

NOTE Confidence: 0.8480854

00:00:26.735 --> 00:00:28.280 is, is that does a,

NOTE Confidence: 0.81534415

00:00:29.300 --> 00:00:31.320 site reduction or removing

NOTE Confidence: 0.88575125

00:00:31.860 --> 00:00:33.000 the local disease,

NOTE Confidence: 0.9538121

00:00:33.860 --> 00:00:36.420 help treat systemic disease? So

NOTE Confidence: 0.9538121

00:00:36.420 --> 00:00:37.300 what I mean by that

NOTE Confidence: 0.9538121

00:00:37.300 --> 00:00:38.900 is, is that, if we

NOTE Confidence: 0.9538121

00:00:38.900 --> 00:00:39.795 take out

NOTE Confidence: 0.9657857

00:00:40.195 --> 00:00:41.394 the site where the cancer

NOTE Confidence: 0.9657857

00:00:41.394 --> 00:00:43.155 came from, then will the

NOTE Confidence: 0.9657857

00:00:43.155 --> 00:00:45.254 hormonal therapy, will the chemotherapy

NOTE Confidence: 0.9657857

00:00:45.475 --> 00:00:46.295 be more effective

NOTE Confidence: 0.96913683

00:00:46.914 --> 00:00:48.515 against prostate cancer that has

NOTE Confidence: 0.96913683

00:00:48.515 --> 00:00:49.714 gone to the bones, to

NOTE Confidence: 0.96913683

00:00:49.714 --> 00:00:51.315 the lymph nodes, or liver,

NOTE Confidence: 0.96913683

00:00:51.315 --> 00:00:52.195 or other part of the

NOTE Confidence: 0.96913683  
00:00:52.195 --> 00:00:52.650 body?
