

# About to Spray? Here's what you need:

**Spray in the booth** - reduces your exposure to solvents and paint aerosols

---

## **Respirator:**

**Supplied Air Respirator** - offers best protection from inhaling solvent and paint fumes

---

**Or One With Organic Vapor Cartridges and N95 paint pads** - protects you if the exposure is not too heavy

---

**Coveralls** - protect your skin and keep you from bringing dust home to your family

---

**Nitrile gloves** - protect your skin from isocyanates (in hardener) and most solvents

---

**Eye protection**

---

**Finally, don't remove any of your protective gear while working in the booth.**

**Wash hands thoroughly with soap and water afterwards!**
