

WEBVTT

NOTE duration:"00:01:24.5010000"

NOTE recognizability:0.851

NOTE language:en-us

NOTE Confidence: 0.87365603

00:00:08.840 --> 00:00:10.058 many research questions

NOTE Confidence: 0.87365603

00:00:10.060 --> 00:00:12.930 that they can ask outside of the

NOTE Confidence: 0.87365603

00:00:12.930 --> 00:00:14.968 bench research. There are clinical

NOTE Confidence: 0.87365603

00:00:14.970 --> 00:00:17.672 research as well as more like anthropology

NOTE Confidence: 0.87365603

00:00:17.672 --> 00:00:20.289 or qualitative and mixed method research.

NOTE Confidence: 0.87365603

00:00:20.290 --> 00:00:22.594 My project this year is we're

NOTE Confidence: 0.87365603

00:00:22.594 --> 00:00:25.200 taking like 50 to 100 patients

NOTE Confidence: 0.87365603

00:00:25.200 --> 00:00:28.464 and trying to apply genomic analysis to them.

NOTE Confidence: 0.87365603

00:00:28.470 --> 00:00:30.110 I'm interested in understanding

NOTE Confidence: 0.87365603

00:00:30.110 --> 00:00:31.334 host microbe interactions,

NOTE Confidence: 0.87365603

00:00:31.334 --> 00:00:33.782 so bacteria interaction with the gut,

NOTE Confidence: 0.87365603

00:00:33.790 --> 00:00:36.322 but I'm also interested in education

NOTE Confidence: 0.87365603

00:00:36.322 --> 00:00:38.010 research specifically right now.

NOTE Confidence: 0.87365603

00:00:38.010 --> 00:00:40.400 Medical education and disparity. I've  
NOTE Confidence: 0.8401352

00:00:40.400 --> 00:00:43.268 spent most of my time working  
NOTE Confidence: 0.8401352

00:00:43.268 --> 00:00:45.180 with Doctor Chappar in  
NOTE Confidence: 0.8401352

00:00:45.180 --> 00:00:46.611 breast surgery research,  
NOTE Confidence: 0.8401352

00:00:46.611 --> 00:00:49.473 so my research is really diverse.  
NOTE Confidence: 0.8401352

00:00:49.480 --> 00:00:52.348 It kind of spans the spectrum,  
NOTE Confidence: 0.8401352

00:00:52.350 --> 00:00:54.338 everything from doing collaborative  
NOTE Confidence: 0.8401352

00:00:54.338 --> 00:00:56.326 translational research to large  
NOTE Confidence: 0.8401352

00:00:56.326 --> 00:00:58.706 databases looking at clinical research  
NOTE Confidence: 0.8401352

00:00:58.706 --> 00:01:00.474 questions and population health.  
NOTE Confidence: 0.8401352

00:01:00.480 --> 00:01:04.296 Students at Yale can do research with US,  
NOTE Confidence: 0.8401352

00:01:04.300 --> 00:01:06.268 understanding consciousness from a  
NOTE Confidence: 0.8401352

00:01:06.268 --> 00:01:08.236 neuroscientific perspective and how.  
NOTE Confidence: 0.8401352

00:01:08.240 --> 00:01:09.540 Understanding consciousness can help  
NOTE Confidence: 0.8401352

00:01:09.540 --> 00:01:11.165 patients with brain disorders here  
NOTE Confidence: 0.7990144

00:01:11.170 --> 00:01:13.746 at Yale. They really encourage you to take

NOTE Confidence: 0.7990144

00:01:13.746 --> 00:01:16.036 any research interest that you have and,

NOTE Confidence: 0.7990144

00:01:16.040 --> 00:01:17.670 like, go forth with them.
