NOTE language:en-us

NOTE Confidence: 0.79925996

 $00:00:02.640 \longrightarrow 00:00:08.800$ I was diagnosed at the age of 39 in 2007 with

NOTE Confidence: 0.79925996

00:00:08.931 --> 00:00:12.267 stage two adino carcinoma.

NOTE Confidence: 0.9387317

00:00:16.910 --> 00:00:20.549 Because I wasn't in any pain, I thought

NOTE Confidence: 0.9387317

 $00{:}00{:}20.550 \dashrightarrow 00{:}00{:}23.280$ that it would eventually go away.

NOTE Confidence: 0.8837162

 $00:00:33.120 \longrightarrow 00:00:34.860$ Women of average risk for breast cancer,

NOTE Confidence: 0.8837162

 $00:00:34.860 \longrightarrow 00:00:36.702$ and that's most women should start

NOTE Confidence: 0.8837162

 $00:00:36.702 \longrightarrow 00:00:38.361$ screening somewhere between the ages of

NOTE Confidence: 0.8837162

 $00:00:38.361 \longrightarrow 00:00:40.169$ 40 and 50 years of age and should have

NOTE Confidence: 0.8837162

 $00{:}00{:}40.169 \to 00{:}00{:}41.793$ a mammogram every one to two years.

NOTE Confidence: 0.86472476

 $00:00:46.620 \longrightarrow 00:00:48.260$ Risk factors include ones

NOTE Confidence: 0.86472476

00:00:48.260 --> 00:00:50.726 age, ones, family history, and ethnicity,

NOTE Confidence: 0.86472476

 $00:00:50.730 \longrightarrow 00:00:52.462$ and prior medical conditions.

NOTE Confidence: 0.86472476

 $00:00:52.462 \longrightarrow 00:00:55.895$ An genetics but the number one risk factor

NOTE Confidence: 0.86472476

 $00:00:55.895 \longrightarrow 00:00:58.534$ for breast cancer is being a woman.

NOTE Confidence: 0.87298656

 $00{:}01{:}03.190 \dashrightarrow 00{:}01{:}05.580$ There are some women who are at

NOTE Confidence: 0.87298656

 $00:01:05.580 \longrightarrow 00:01:07.865$ intermediate or high risk for breast

NOTE Confidence: 0.87298656

 $00:01:07.865 \longrightarrow 00:01:10.505$ cancer and they should start screening

NOTE Confidence: 0.87298656

 $00:01:10.505 \longrightarrow 00:01:12.238$ sometimes earlier than age 40,

NOTE Confidence: 0.87298656

 $00:01:12.240 \longrightarrow 00:01:14.388$ and they might choose to have

NOTE Confidence: 0.87298656

 $00:01:14.388 \longrightarrow 00:01:15.820$ a supplemental screening in

NOTE Confidence: 0.87298656

 $00:01:15.886 \longrightarrow 00:01:17.518$ addition to the mammogram,

NOTE Confidence: 0.87298656

 $00:01:17.520 \longrightarrow 00:01:19.782$ and that would be having an

NOTE Confidence: 0.87298656

 $00{:}01{:}19.782 \dashrightarrow 00{:}01{:}21.290$ MRI or screening ultrasound

NOTE Confidence: 0.926024

 $00:01:30.310 \longrightarrow 00:01:34.090$ It's great to be a part of a group

NOTE Confidence: 0.926024

 $00{:}01{:}34.090 \dashrightarrow 00{:}01{:}36.190$ where you might say something

NOTE Confidence: 0.926024

 $00:01:36.190 \longrightarrow 00:01:38.290$ that might touch someone else,

NOTE Confidence: 0.926024

00:01:38.290 --> 00:01:41.198 help someone else or.

NOTE Confidence: 0.926024

00:01:41.200 --> 00:01:43.160 Just just the camaraderie

NOTE Confidence: 0.926024

 $00:01:43.160 \longrightarrow 00:01:45.120$ of women is wonderful.

NOTE Confidence: 0.926024

 $00{:}01{:}45.120 --> 00{:}01{:}48.060$ It's OK to ask for help.

NOTE Confidence: 0.926024

00:01:48.060 --> 00:01:49.040 Absolutely, absolutely.
