NOTE language:en-us

NOTE Confidence: 0.83746415

00:00:00.000 --> 00:00:02.723 I'm Henry Shaw. I'm an associate professor

NOTE Confidence: 0.83746415

00:00:02.723 --> 00:00:05.092 in the division of Plastic Surgery

NOTE Confidence: 0.83746415

00:00:05.092 --> 00:00:07.724 and also the founding director of the

NOTE Confidence: 0.83746415

00:00:07.794 --> 00:00:10.278 Yale Return of Wound Healing Program,

NOTE Confidence: 0.83746415

00:00:10.280 --> 00:00:12.464 and we treat patients with difficult

NOTE Confidence: 0.83746415

00:00:12.464 --> 00:00:14.648 wounds for any reason, anywhere in

NOTE Confidence: 0.83746415

00:00:14.648 --> 00:00:17.560 the body and in any age of patient.

NOTE Confidence: 0.83746415

00:00:17.560 --> 00:00:20.108 And so for with the SMILE program,

NOTE Confidence: 0.83746415

00:00:20.110 --> 00:00:22.539 we often see patients who have wounds

NOTE Confidence: 0.83746415

00:00:22.539 --> 00:00:25.446 because of their cancer or because of the

NOTE Confidence: 0.83746415

00:00:25.446 --> 00:00:27.760 treatment they needed for their cancer.

NOTE Confidence: 0.83746415

00:00:27.760 --> 00:00:29.580 I like talking to people.

NOTE Confidence: 0.83746415

00:00:29.580 --> 00:00:31.510 I like meeting lots of.

NOTE Confidence: 0.83746415

00:00:31.510 --> 00:00:33.154 Different types of people,

1

NOTE Confidence: 0.83746415

00:00:33.154 --> 00:00:35.209 and that's something that I

NOTE Confidence: 0.83746415

00:00:35.209 --> 00:00:37.147 definitely get in my current work,

NOTE Confidence: 0.83746415

00:00:37.150 --> 00:00:40.158 and I like to be a problem solver.

NOTE Confidence: 0.83746415

00:00:40.160 --> 00:00:41.864 That is something that even though

NOTE Confidence: 0.83746415

00:00:41.864 --> 00:00:44.556 it can be very challenging and the

NOTE Confidence: 0.83746415

00:00:44.556 --> 00:00:46.544 solutions aren't always straightforward,

NOTE Confidence: 0.83746415

00:00:46.550 --> 00:00:48.632 I felt that that combination of

NOTE Confidence: 0.83746415

00:00:48.632 --> 00:00:50.900 science and talking with people with

NOTE Confidence: 0.83746415

00:00:50.900 --> 00:00:52.935 something that was very appealing.

NOTE Confidence: 0.83746415

00:00:52.940 --> 00:00:55.488 One of the things that I've noticed

NOTE Confidence: 0.83746415

00:00:55.488 --> 00:00:57.835 with trying to get challenging wounds

NOTE Confidence: 0.83746415

00:00:57.835 --> 00:01:00.586 to heal is that people who live

NOTE Confidence: 0.83746415

00:01:00.664 --> 00:01:03.359 alone or have no real social support.

NOTE Confidence: 0.83746415

00:01:03.360 --> 00:01:05.747 Can have a real hard time getting

NOTE Confidence: 0.83746415

00:01:05.747 --> 00:01:07.240 a wound to heal,

NOTE Confidence: 0.83746415

00:01:07.240 --> 00:01:09.616 so I definitely encourage patients to

NOTE Confidence: 0.83746415

00:01:09.616 --> 00:01:11.812 bring family members or someone who

NOTE Confidence: 0.83746415

00:01:11.812 --> 00:01:14.438 can act as a coach or guide to help

NOTE Confidence: 0.83746415

00:01:14.438 --> 00:01:16.318 reinforce the recommendations that I

NOTE Confidence: 0.83746415

00:01:16.318 --> 00:01:20.090 make to help get their wounds to heal.

NOTE Confidence: 0.83746415

00:01:20.090 --> 00:01:21.785 We have a.

NOTE Confidence: 0.83746415

00:01:21.790 --> 00:01:23.746 Team of Moon nurses, when clinicians,

NOTE Confidence: 0.83746415

00:01:23.750 --> 00:01:25.394 both on the outpatient side as

NOTE Confidence: 0.83746415

00:01:25.394 --> 00:01:27.660 well as in the inpatient program,

NOTE Confidence: 0.83746415

00:01:27.660 --> 00:01:29.682 so when a patient gets admitted

NOTE Confidence: 0.83746415

00:01:29.682 --> 00:01:31.699 to Smile Hospital and there is

NOTE Confidence: 0.83746415

00:01:31.699 --> 00:01:33.199 a concern about a wound,

NOTE Confidence: 0.83746415

00:01:33.200 --> 00:01:36.125 our team will be console Tidd and we will.

NOTE Confidence: 0.83746415

00:01:36.130 --> 00:01:38.356 The patient will be seen by our

NOTE Confidence: 0.83746415

00:01:38.356 --> 00:01:39.941 impatient when clinicians and will

NOTE Confidence: 0.83746415

00:01:39.941 --> 00:01:41.651 make sure that they are connected

NOTE Confidence: 0.83746415

00:01:41.651 --> 00:01:43.729 with our outpatient wound clinic and

NOTE Confidence: 0.83746415

00:01:43.729 --> 00:01:45.907 oftentimes the same provider who sees

NOTE Confidence: 0.83746415

00:01:45.910 --> 00:01:47.912 him on the inpatient will follow up

NOTE Confidence: 0.83746415

00:01:47.912 --> 00:01:50.308 with them in the outpatient setting and

NOTE Confidence: 0.83746415

00:01:50.308 --> 00:01:52.522 we found that many patients really.

NOTE Confidence: 0.83746415

00:01:52.530 --> 00:01:54.270 Appreciate that and have that continuity.

NOTE Confidence: 0.83746415

00:01:54.270 --> 00:01:56.709 I always do my best to try to help

NOTE Confidence: 0.83746415

00:01:56.709 --> 00:01:58.619 patients get their wounds to heal.

NOTE Confidence: 0.83746415

00:01:58.620 --> 00:02:00.650 I can't promise that it'll heal overnight,

NOTE Confidence: 0.83746415

00:02:00.650 --> 00:02:02.743 but I will work with the patient

NOTE Confidence: 0.83746415

00:02:02.743 --> 00:02:04.805 and stick with them as long as

NOTE Confidence: 0.83746415

00:02:04.805 --> 00:02:06.449 they want to stick with me.
