NOTE language:en-us

NOTE Confidence: 0.9883555

 $00:00:00.000 \longrightarrow 00:00:02.634$ My name is Rachel Greenup and

NOTE Confidence: 0.9883555

00:00:02.634 --> 00:00:05.200 I'm a breast cancer surgeon.

NOTE Confidence: 0.9883555

 $00:00:05.200 \longrightarrow 00:00:07.155$ Breast cancer surgery is very

NOTE Confidence: 0.9883555

 $00{:}00{:}07.155 \dashrightarrow 00{:}00{:}10.013$ unique and that we really have the

NOTE Confidence: 0.9883555

 $00:00:10.013 \longrightarrow 00:00:12.491$ opportunity to work with women and

NOTE Confidence: 0.9883555

00:00:12.491 --> 00:00:14.841 their families to make decisions that

NOTE Confidence: 0.9883555

00:00:14.841 --> 00:00:17.433 work best for them and their lives.

NOTE Confidence: 0.9883555

00:00:17.433 --> 00:00:19.911 There's so many treatment choices we

NOTE Confidence: 0.9883555

00:00:19.911 --> 00:00:22.690 have the opportunity to be involved in

NOTE Confidence: 0.9883555

00:00:22.690 --> 00:00:24.898 care at diagnosis and during treatment,

NOTE Confidence: 0.9883555

 $00{:}00{:}24.900 \dashrightarrow 00{:}00{:}27.588$ but also because so many of our

NOTE Confidence: 0.9883555

 $00:00:27.588 \longrightarrow 00:00:29.630$ patients do well long term.

NOTE Confidence: 0.9883555

 $00:00:29.630 \longrightarrow 00:00:31.098$ We have the rare.

NOTE Confidence: 0.9883555

 $00{:}00{:}31.098 \to 00{:}00{:}33.890$ Opportunity to be part of women's lives

NOTE Confidence: 0.9883555

 $00:00:33.890 \longrightarrow 00:00:36.470$ beyond treatment and to survivorship.

NOTE Confidence: 0.9883555

 $00{:}00{:}36.470 \dashrightarrow 00{:}00{:}39.382$ So I am the daughter of two physicians

NOTE Confidence: 0.9883555

 $00:00:39.382 \longrightarrow 00:00:42.054$ and my parents love what they did

NOTE Confidence: 0.9883555

 $00:00:42.054 \longrightarrow 00:00:44.890$ so much that it was contagious.

NOTE Confidence: 0.9883555

 $00:00:44.890 \longrightarrow 00:00:47.296$ Their first visit with me is

NOTE Confidence: 0.9883555

00:00:47.296 --> 00:00:48.900 really reviewing their diagnosis,

NOTE Confidence: 0.9883555

 $00:00:48.900 \longrightarrow 00:00:50.058$ their treatment options,

NOTE Confidence: 0.9883555

 $00:00:50.058 \longrightarrow 00:00:52.760$ and what the course of treatment will

NOTE Confidence: 0.9883555

 $00:00:52.827 \longrightarrow 00:00:55.317$ look like from the surgical perspective.

NOTE Confidence: 0.9883555

 $00{:}00{:}55.320 \dashrightarrow 00{:}00{:}57.515$ It's a really personal decision

NOTE Confidence: 0.9883555

 $00:00:57.515 \longrightarrow 00:01:00.588$ about whether women want to come meet

NOTE Confidence: 0.9883555

 $00:01:00.588 \longrightarrow 00:01:02.988$ their team alone or with support.

NOTE Confidence: 0.9883555

 $00:01:02.990 \longrightarrow 00:01:05.886$ Many of my patients find it to be

NOTE Confidence: 0.9883555

 $00:01:05.886 \longrightarrow 00:01:09.358$ such an overwhelming time that having.

NOTE Confidence: 0.9883555

 $00:01:09.360 \longrightarrow 00:01:11.817$ Friends or family there as a second

NOTE Confidence: 0.9883555

00:01:11.817 --> 00:01:14.535 set of ears can be really important

NOTE Confidence: 0.9883555

 $00:01:14.535 \longrightarrow 00:01:16.911$ as they work back through the

NOTE Confidence: 0.9883555

 $00:01:16.991 \longrightarrow 00:01:19.306$ series of complex decisions they'll

NOTE Confidence: 0.9883555

 $00:01:19.306 \longrightarrow 00:01:21.621$ make with their care team.

NOTE Confidence: 0.9883555

 $00{:}01{:}21.630 \dashrightarrow 00{:}01{:}24.178$ But I am a health services researcher

NOTE Confidence: 0.9883555

 $00:01:24.178 \longrightarrow 00:01:26.540$ and I study cancer outcomes.

NOTE Confidence: 0.9883555

 $00{:}01{:}26.540 \dashrightarrow 00{:}01{:}29.708$ My specific focus looks at the burden of

NOTE Confidence: 0.9883555

00:01:29.708 --> 00:01:32.257 Breast Cancer Care on patients lives,

NOTE Confidence: 0.9883555

00:01:32.260 --> 00:01:33.788 including time off work,

NOTE Confidence: 0.9883555

 $00:01:33.788 \longrightarrow 00:01:35.698$ the financial repercussions of a

NOTE Confidence: 0.9883555

 $00{:}01{:}35.698 \mathrel{--}{>} 00{:}01{:}37.579$ cancer diagnosis and treatment,

NOTE Confidence: 0.9883555

00:01:37.580 --> 00:01:38.843 including financial toxicity.

NOTE Confidence: 0.9883555

 $00{:}01{:}38.843 \dashrightarrow 00{:}01{:}41.578$ I also study. Value in cancer care.

NOTE Confidence: 0.9883555

00:01:41.578 --> 00:01:44.400 As we think about providing high quality,

NOTE Confidence: 0.9883555

00:01:44.400 --> 00:01:46.350 patient centered care to women

NOTE Confidence: 0.9883555

 $00:01:46.350 \longrightarrow 00:01:47.910$ at the population level.

NOTE Confidence: 0.9883555

 $00:01:47.910 \longrightarrow 00:01:51.030$ So I've I'm very connected to my patients.

NOTE Confidence: 0.9883555

00:01:51.030 --> 00:01:53.382 Most of us who go into breast

NOTE Confidence: 0.9883555

 $00:01:53.382 \longrightarrow 00:01:55.272$ oncology care chose Breast Cancer

NOTE Confidence: 0.9883555

 $00:01:55.272 \longrightarrow 00:01:57.702$ Care because women are the decision

NOTE Confidence: 0.9883555

 $00:01:57.702 \longrightarrow 00:01:59.610$ makers in their families.

NOTE Confidence: 0.9883555

 $00:01:59.610 \longrightarrow 00:02:01.956$ They hold their families up and

NOTE Confidence: 0.9883555

 $00:02:01.956 \longrightarrow 00:02:04.751$ it's a time where they really need

NOTE Confidence: 0.9883555

 $00:02:04.751 \dashrightarrow 00:02:07.902$ to let people take care of them and

NOTE Confidence: 0.9883555

 $00:02:07.902 \longrightarrow 00:02:10.224$ our Yale Cancer team can help.

NOTE Confidence: 0.9883555

 $00:02:10.230 \longrightarrow 00:02:10.740$ Do that.
