NOTE duration:"00:01:55.7120000"

NOTE language:en-us

NOTE Confidence: 0.883261642857143

00:00:00.000 --> 00:00:03.560 My name is Harry Deshpande.

NOTE Confidence: 0.883261642857143

00:00:03.560 --> 00:00:06.710 I'm in, I'm a medical oncologist

NOTE Confidence: 0.883261642857143

00:00:06.710 --> 00:00:08.860 at the Yale Cancer Center.

NOTE Confidence: 0.883261642857143

00:00:08.860 --> 00:00:12.132 The patients that I see here are patients

NOTE Confidence: 0.883261642857143

00:00:12.132 --> 00:00:14.450 with sarcomas and thyroid cancer,

NOTE Confidence: 0.883261642857143

00:00:14.450 --> 00:00:17.264 and I also see patients who have

NOTE Confidence: 0.883261642857143

00:00:17.264 --> 00:00:19.180 cancers of unknown primary.

NOTE Confidence: 0.883261642857143

00:00:19.180 --> 00:00:21.330 When I left medical school,

NOTE Confidence: 0.883261642857143

00:00:21.330 --> 00:00:23.910 I actually wanted to do something

NOTE Confidence: 0.883261642857143

00:00:23.910 --> 00:00:25.200 called infectious disease.

NOTE Confidence: 0.883261642857143

00:00:25.200 --> 00:00:28.704 But then I realized after my first rotation

NOTE Confidence: 0.883261642857143

00:00:28.704 --> 00:00:31.649 in oncology that I loved the subject.

NOTE Confidence: 0.883261642857143

00:00:31.650 --> 00:00:35.087 I really enjoyed working with the patience.

NOTE Confidence: 0.883261642857143

00:00:35.090 --> 00:00:37.330 With the staff, the nurses,

NOTE Confidence: 0.883261642857143

00:00:37.330 --> 00:00:38.226 the researchers,

NOTE Confidence: 0.883261642857143

00:00:38.226 --> 00:00:39.570 the attending physicians,

NOTE Confidence: 0.883261642857143

00:00:39.570 --> 00:00:42.585 and I knew then that I wanted to do

NOTE Confidence: 0.883261642857143

00:00:42.585 --> 00:00:45.925 on koleji many of my patients are

NOTE Confidence: 0.883261642857143

00:00:45.925 --> 00:00:49.019 very scared they haven't heard of

NOTE Confidence: 0.883261642857143

00:00:49.019 --> 00:00:51.664 sarcomas or even thyroid cancers,

NOTE Confidence: 0.883261642857143

00:00:51.670 --> 00:00:55.246 and so they don't know what to expect,

NOTE Confidence: 0.883261642857143

00:00:55.250 --> 00:00:58.826 and this is probably the main part of

NOTE Confidence: 0.883261642857143

00:00:58.826 --> 00:01:02.867 my job and the team that I work with.

NOTE Confidence: 0.883261642857143

00:01:02.870 --> 00:01:07.054 I have an excellent set of practice nurses.

NOTE Confidence: 0.883261642857143

00:01:07.060 --> 00:01:09.304 And treatment nurses who I work

NOTE Confidence: 0.883261642857143

00:01:09.304 --> 00:01:12.399 with and they spend a lot of time

NOTE Confidence: 0.883261642857143

00:01:12.399 --> 00:01:14.304 with the patients guiding them

NOTE Confidence: 0.883261642857143

00:01:14.304 --> 00:01:16.009 through their treatments,

NOTE Confidence: 0.883261642857143

00:01:16.010 --> 00:01:18.050 which can be very complex.

NOTE Confidence: 0.883261642857143

00:01:18.050 --> 00:01:20.899 I mainly do what's called clinical research,

NOTE Confidence: 0.883261642857143

00:01:20.900 --> 00:01:24.900 though that doesn't involve going into a lab.

NOTE Confidence: 0.883261642857143

00:01:24.900 --> 00:01:27.216 It doesn't involve test tubes or

NOTE Confidence: 0.883261642857143

00:01:27.216 --> 00:01:28.374 anything like that,

NOTE Confidence: 0.883261642857143

00:01:28.380 --> 00:01:31.656 but what I do do is.

NOTE Confidence: 0.883261642857143

00:01:31.660 --> 00:01:35.128 Often try to see if new

NOTE Confidence: 0.883261642857143

00:01:35.128 --> 00:01:37.440 medicines that are either.

NOTE Confidence: 0.883261642857143

00:01:37.440 --> 00:01:39.620 Given to us by pharmaceutical

NOTE Confidence: 0.883261642857143

00:01:39.620 --> 00:01:41.800 companies or through the National

NOTE Confidence: 0.883261642857143

00:01:41.877 --> 00:01:44.053 Cancer Institute are useful

NOTE Confidence: 0.883261642857143

00:01:44.053 --> 00:01:45.685 against various conditions.

NOTE Confidence: 0.883261642857143

00:01:45.690 --> 00:01:49.085 In my case it would be sarcomas

NOTE Confidence: 0.883261642857143

00:01:49.085 --> 00:01:50.540 or thyroid cancers.
