

WEBVTT

NOTE duration:"00:32:45"

NOTE recognizability:0.862

NOTE language:en-us

NOTE Confidence: 0.7171798025

00:00:03.400 --> 00:00:04.399 I'm sorry Richard.

NOTE Confidence: 0.7171798025

00:00:04.399 --> 00:00:07.600 No, uh, you know we told people one o'clock.

NOTE Confidence: 0.7171798025

00:00:07.600 --> 00:00:10.372 It's possible that a couple people may

NOTE Confidence: 0.7171798025

00:00:10.372 --> 00:00:13.196 may join and I I know shadi's still on.

NOTE Confidence: 0.7171798025

00:00:13.196 --> 00:00:14.908 But uhm, Richard really wanted to

NOTE Confidence: 0.7171798025

00:00:14.908 --> 00:00:16.941 give you the floor to to discuss

NOTE Confidence: 0.7171798025

00:00:16.941 --> 00:00:18.987 and share anything that you'd like,

NOTE Confidence: 0.7171798025

00:00:18.990 --> 00:00:22.190 but also we'll see who stays on become,

NOTE Confidence: 0.7171798025

00:00:22.190 --> 00:00:25.494 you know, see if if people have

NOTE Confidence: 0.7171798025

00:00:25.494 --> 00:00:26.830 questions about, you.

NOTE Confidence: 0.7171798025

00:00:26.830 --> 00:00:29.560 Know just the process in various initiatives.

NOTE Confidence: 0.7171798025

00:00:29.560 --> 00:00:30.504 You know one thing.

NOTE Confidence: 0.7171798025

00:00:30.504 --> 00:00:32.659 I think that as we were planning a

NOTE Confidence: 0.7171798025

00:00:32.659 --> 00:00:34.349 conference and speaking with our
NOTE Confidence: 0.7171798025

00:00:34.350 --> 00:00:36.948 both our senior folks or chairs
NOTE Confidence: 0.7171798025

00:00:36.948 --> 00:00:40.480 and as well as our junior people,
NOTE Confidence: 0.7171798025

00:00:40.480 --> 00:00:41.401 the sense was,
NOTE Confidence: 0.7171798025

00:00:41.401 --> 00:00:44.002 I think in a very positive way that
NOTE Confidence: 0.7171798025

00:00:44.002 --> 00:00:46.655 there have been a number of initiatives
NOTE Confidence: 0.7171798025

00:00:46.655 --> 00:00:49.889 which NINDS and I have launched 4 early.
NOTE Confidence: 0.7171798025

00:00:49.890 --> 00:00:53.682 You know early career and just
NOTE Confidence: 0.7171798025

00:00:53.682 --> 00:00:55.434 done early career folks in general,
NOTE Confidence: 0.7171798025

00:00:55.440 --> 00:00:57.210 but also related to some of
NOTE Confidence: 0.7171798025

00:00:57.210 --> 00:00:59.090 the topics that you mentioned.
NOTE Confidence: 0.7171798025

00:00:59.090 --> 00:01:00.788 Or you know before in your.
NOTE Confidence: 0.7171798025

00:01:00.790 --> 00:01:03.700 Earlier talks soum.
NOTE Confidence: 0.7171798025

00:01:03.700 --> 00:01:04.201 You know so,
NOTE Confidence: 0.7171798025

00:01:04.201 --> 00:01:05.603 so we thought this would be good for
NOTE Confidence: 0.7171798025

00:01:05.603 --> 00:01:06.933 him to have some exchange about that.

NOTE Confidence: 0.7171798025

00:01:06.940 --> 00:01:09.124 You know even the no see that

NOTE Confidence: 0.7171798025

00:01:09.124 --> 00:01:10.595 you that you mentioned.

NOTE Confidence: 0.7171798025

00:01:10.595 --> 00:01:12.674 I know that we've had several

NOTE Confidence: 0.7171798025

00:01:12.674 --> 00:01:14.214 faculty that would be eligible

NOTE Confidence: 0.7171798025

00:01:14.214 --> 00:01:16.018 that have asked about it but

NOTE Confidence: 0.7171798025

00:01:16.018 --> 00:01:17.710 didn't know exactly how it worked.

NOTE Confidence: 0.7171798025

00:01:17.710 --> 00:01:19.050 So anyway,

NOTE Confidence: 0.872080246

00:01:19.870 --> 00:01:21.600 OK, no, no, that's good.

NOTE Confidence: 0.872080246

00:01:21.600 --> 00:01:23.592 Yeah, and we are still according

NOTE Confidence: 0.872080246

00:01:23.592 --> 00:01:27.401 to my clock, 2 minutes early.

NOTE Confidence: 0.872080246

00:01:27.401 --> 00:01:30.080 So factor Janice is also on.

NOTE Confidence: 0.872080246

00:01:30.080 --> 00:01:33.810 He may have to drop off a little early but.

NOTE Confidence: 0.872080246

00:01:33.810 --> 00:01:35.700 Yes, I have one of my.

NOTE Confidence: 0.872080246

00:01:35.700 --> 00:01:38.510 Inage colleagues here that I.

NOTE Confidence: 0.872080246

00:01:38.510 --> 00:01:41.588 Respect as well.

NOTE Confidence: 0.872080246

00:01:41.590 --> 00:01:44.206 He and I have been working
NOTE Confidence: 0.872080246

00:01:44.206 --> 00:01:47.120 together with a lot of K23.
NOTE Confidence: 0.872080246

00:01:47.120 --> 00:01:48.880 Individuals come.
NOTE Confidence: 0.872080246

00:01:48.880 --> 00:01:52.672 Some have been quite successful after
NOTE Confidence: 0.872080246

00:01:52.672 --> 00:01:56.680 you know meeting with them too, so.
NOTE Confidence: 0.872080246

00:01:56.680 --> 00:01:59.308 I'm glad that he could come.
NOTE Confidence: 0.872080246

00:01:59.310 --> 00:02:02.694 Be here for at least part of the time.
NOTE Confidence: 0.872080246

00:02:02.700 --> 00:02:04.276 Maybe if I come.
NOTE Confidence: 0.872080246

00:02:04.276 --> 00:02:06.640 The trainees if you guys are
NOTE Confidence: 0.872080246

00:02:06.730 --> 00:02:08.218 on an over early,
NOTE Confidence: 0.872080246

00:02:08.220 --> 00:02:09.114 but if you.
NOTE Confidence: 0.872080246

00:02:09.114 --> 00:02:10.902 Have any questions or want to
NOTE Confidence: 0.872080246

00:02:10.902 --> 00:02:12.787 say hi or anything for you?
NOTE Confidence: 0.849838585

00:02:15.070 --> 00:02:16.906 So turn on your video or.
NOTE Confidence: 0.8993696925

00:02:17.650 --> 00:02:19.444 Yeah, I I encourage everyone in
NOTE Confidence: 0.8993696925

00:02:19.444 --> 00:02:21.258 general and especially I think in

NOTE Confidence: 0.8993696925

00:02:21.258 --> 00:02:22.926 this smaller group of folks were

NOTE Confidence: 0.8993696925

00:02:22.926 --> 00:02:25.232 willing to turn on their video. I can.

NOTE Confidence: 0.8993696925

00:02:25.232 --> 00:02:27.720 It might be really helpful and you know,

NOTE Confidence: 0.8993696925

00:02:27.720 --> 00:02:29.608 is I think folks in our consortium now.

NOTE Confidence: 0.8993696925

00:02:29.610 --> 00:02:32.263 I certainly won't have no problem calling

NOTE Confidence: 0.8993696925

00:02:32.263 --> 00:02:35.607 people out in embarrassing them a little bit,

NOTE Confidence: 0.8993696925

00:02:35.610 --> 00:02:37.188 so I may forget a few,

NOTE Confidence: 0.8993696925

00:02:37.190 --> 00:02:41.630 but I I do see you know Adam to have none.

NOTE Confidence: 0.8993696925

00:02:41.630 --> 00:02:43.205 And Nils Petersen,

NOTE Confidence: 0.8993696925

00:02:43.205 --> 00:02:47.738 who are both K award ease and I see.

NOTE Confidence: 0.8993696925

00:02:47.740 --> 00:02:51.064 Others that either have caves under

NOTE Confidence: 0.8993696925

00:02:51.064 --> 00:02:54.378 review or putting them in or and yet

NOTE Confidence: 0.8993696925

00:02:54.378 --> 00:02:55.932 others that are involved in various

NOTE Confidence: 0.8993696925

00:02:55.932 --> 00:02:57.169 other fellowship training programs

NOTE Confidence: 0.8993696925

00:02:57.169 --> 00:02:58.540 and research programs as well.

NOTE Confidence: 0.86299955

00:03:01.410 --> 00:03:05.460 May I just lead with a question about just
NOTE Confidence: 0.86299955

00:03:05.460 --> 00:03:10.010 the definition of race? You know, the NIH
NOTE Confidence: 0.90143079

00:03:10.020 --> 00:03:15.110 uses has always used the classification
NOTE Confidence: 0.867595486666667

00:03:15.110 --> 00:03:18.202 of black, white, Hispanic.
NOTE Confidence: 0.867595486666667

00:03:18.202 --> 00:03:21.560 It's it's. It's not necessarily
NOTE Confidence: 0.867595486666667

00:03:21.560 --> 00:03:24.240 what people self identify as and
NOTE Confidence: 0.867595486666667

00:03:24.240 --> 00:03:27.798 doesn't really account for a wider,
NOTE Confidence: 0.867595486666667

00:03:27.800 --> 00:03:30.376 broader perspective about race.
NOTE Confidence: 0.867595486666667

00:03:30.376 --> 00:03:32.160 I know it's a little unrelated,
NOTE Confidence: 0.867595486666667

00:03:32.160 --> 00:03:35.360 but is there any internal discussion about?
NOTE Confidence: 0.867595486666667

00:03:35.360 --> 00:03:38.030 Changing the way those
NOTE Confidence: 0.867595486666667

00:03:38.030 --> 00:03:40.550 characteristics are reported.
NOTE Confidence: 0.867595486666667

00:03:40.550 --> 00:03:42.340 No, it's a great question.
NOTE Confidence: 0.867595486666667

00:03:42.340 --> 00:03:46.900 Karen, UM, so I've been working.
NOTE Confidence: 0.867595486666667

00:03:46.900 --> 00:03:49.812 Actually, one of the leads is my
NOTE Confidence: 0.867595486666667

00:03:49.812 --> 00:03:51.980 colleagues Dr Carolena Mendoza Pacino,

NOTE Confidence: 0.867595486666667
00:03:51.980 --> 00:03:55.200 who's been updating the the Phoenix Toolkit,
NOTE Confidence: 0.867595486666667
00:03:55.200 --> 00:03:59.134 which is a common data elements set up and
NOTE Confidence: 0.867595486666667
00:03:59.134 --> 00:04:01.646 we have been looking at issues related to
NOTE Confidence: 0.867595486666667
00:04:01.646 --> 00:04:03.960 social determinants of health and race,
NOTE Confidence: 0.867595486666667
00:04:03.960 --> 00:04:05.344 ethnic categories and everything.
NOTE Confidence: 0.867595486666667
00:04:05.344 --> 00:04:07.420 As I mentioned at the outset,
NOTE Confidence: 0.867595486666667
00:04:07.420 --> 00:04:08.616 a lot of HR's.
NOTE Confidence: 0.867595486666667
00:04:08.616 --> 00:04:11.560 They're very limited in terms of the kind of
NOTE Confidence: 0.867595486666667
00:04:11.560 --> 00:04:14.094 information that you can collect around race,
NOTE Confidence: 0.867595486666667
00:04:14.100 --> 00:04:17.484 ethnicity, and their issues.
NOTE Confidence: 0.867595486666667
00:04:17.484 --> 00:04:19.490 Around you know a lot of
NOTE Confidence: 0.867595486666667
00:04:19.490 --> 00:04:19.954 different categories,
NOTE Confidence: 0.867595486666667
00:04:19.960 --> 00:04:21.052 including mixed race,
NOTE Confidence: 0.867595486666667
00:04:21.052 --> 00:04:23.236 which is within one because now
NOTE Confidence: 0.867595486666667
00:04:23.236 --> 00:04:25.620 we know that the number of people
NOTE Confidence: 0.867595486666667

00:04:25.620 --> 00:04:27.899 who are defining as self defining,
NOTE Confidence: 0.867595486666667

00:04:27.900 --> 00:04:30.100 which is the way that this should go.
NOTE Confidence: 0.867595486666667

00:04:30.100 --> 00:04:31.704 'cause that's probably more
NOTE Confidence: 0.867595486666667

00:04:31.704 --> 00:04:33.709 aligned with risk factors based
NOTE Confidence: 0.867595486666667

00:04:33.709 --> 00:04:36.000 upon how people define themselves,
NOTE Confidence: 0.867595486666667

00:04:36.000 --> 00:04:38.055 mixed race categories, and so
NOTE Confidence: 0.867595486666667

00:04:38.055 --> 00:04:40.110 oftentimes that's difficult to collect.
NOTE Confidence: 0.867595486666667

00:04:40.110 --> 00:04:42.130 In some of these databases.
NOTE Confidence: 0.867595486666667

00:04:42.130 --> 00:04:44.223 And so yeah, I think it's something
NOTE Confidence: 0.867595486666667

00:04:44.223 --> 00:04:46.009 that we've been talking about,
NOTE Confidence: 0.867595486666667

00:04:46.010 --> 00:04:47.095 and it's something that has to be.
NOTE Confidence: 0.867595486666667

00:04:47.100 --> 00:04:48.840 Updated and I am HD.
NOTE Confidence: 0.867595486666667

00:04:48.840 --> 00:04:51.560 Uses the term of.
NOTE Confidence: 0.867595486666667

00:04:51.560 --> 00:04:53.654 And I used to find health
NOTE Confidence: 0.867595486666667

00:04:53.654 --> 00:04:55.050 disparities populations which has
NOTE Confidence: 0.867595486666667

00:04:55.118 --> 00:04:56.598 gotten a lot of pushback,

NOTE Confidence: 0.867595486666667
00:04:56.600 --> 00:04:59.258 so it's sort of pejorative health
NOTE Confidence: 0.867595486666667
00:04:59.258 --> 00:05:01.030 disparities populations that term.
NOTE Confidence: 0.867595486666667
00:05:01.030 --> 00:05:02.506 But then it has like blacks,
NOTE Confidence: 0.867595486666667
00:05:02.510 --> 00:05:03.704 Hispanics, Native Americans,
NOTE Confidence: 0.867595486666667
00:05:03.704 --> 00:05:06.092 and it goes into those categories.
NOTE Confidence: 0.867595486666667
00:05:06.100 --> 00:05:08.172 But there are a lot of categories
NOTE Confidence: 0.867595486666667
00:05:08.172 --> 00:05:10.199 that are sort of not mentioned,
NOTE Confidence: 0.867595486666667
00:05:10.200 --> 00:05:13.776 and and it's not totally clear.
NOTE Confidence: 0.867595486666667
00:05:13.780 --> 00:05:15.244 And so when you start talking
NOTE Confidence: 0.867595486666667
00:05:15.244 --> 00:05:16.858 about mixed race and all of that,
NOTE Confidence: 0.867595486666667
00:05:16.860 --> 00:05:19.483 and raised because it's so it,
NOTE Confidence: 0.867595486666667
00:05:19.483 --> 00:05:21.398 it is the social construct.
NOTE Confidence: 0.867595486666667
00:05:21.400 --> 00:05:22.780 And then when you start talking
NOTE Confidence: 0.867595486666667
00:05:22.780 --> 00:05:24.418 about mixed race and all of that it,
NOTE Confidence: 0.867595486666667
00:05:24.420 --> 00:05:26.284 it starts to fall apart and then when
NOTE Confidence: 0.867595486666667

00:05:26.284 --> 00:05:28.235 we try to apply that to global 'cause
NOTE Confidence: 0.867595486666667

00:05:28.235 --> 00:05:30.359 we look at the common data elements.
NOTE Confidence: 0.867595486666667

00:05:30.360 --> 00:05:32.628 But when you go to a global setting you
NOTE Confidence: 0.867595486666667

00:05:32.628 --> 00:05:34.718 know what does black mean in Africa.
NOTE Confidence: 0.867595486666667

00:05:34.720 --> 00:05:36.244 You know in the African countries
NOTE Confidence: 0.867595486666667

00:05:36.244 --> 00:05:37.979 you know it doesn't mean anything.
NOTE Confidence: 0.867595486666667

00:05:37.980 --> 00:05:40.316 So I mean it's a purely sort of,
NOTE Confidence: 0.867595486666667

00:05:40.320 --> 00:05:41.316 you know,
NOTE Confidence: 0.867595486666667

00:05:41.316 --> 00:05:43.806 United States focused social construct.
NOTE Confidence: 0.867595486666667

00:05:43.810 --> 00:05:45.508 It has a lot of problems,
NOTE Confidence: 0.867595486666667

00:05:45.510 --> 00:05:47.202 but I think defining the problem
NOTE Confidence: 0.867595486666667

00:05:47.202 --> 00:05:49.014 and tackling it just as you
NOTE Confidence: 0.867595486666667

00:05:49.014 --> 00:05:50.258 mentioned is very important.
NOTE Confidence: 0.867595486666667

00:05:50.260 --> 00:05:52.059 We do have to collect the data
NOTE Confidence: 0.867595486666667

00:05:52.059 --> 00:05:54.058 because it is an important marker.
NOTE Confidence: 0.867595486666667

00:05:54.060 --> 00:05:55.368 We can't sort of ignore it,

NOTE Confidence: 0.867595486666667
00:05:55.370 --> 00:05:57.500 but it is an important marker
NOTE Confidence: 0.867595486666667
00:05:57.500 --> 00:05:59.600 because it's so closely linked to
NOTE Confidence: 0.867595486666667
00:05:59.600 --> 00:06:01.400 health outcomes and you know the
NOTE Confidence: 0.867595486666667
00:06:01.400 --> 00:06:02.600 social determinants of health,
NOTE Confidence: 0.867595486666667
00:06:02.600 --> 00:06:04.420 but it's very problematic.
NOTE Confidence: 0.869633413076923
00:06:06.580 --> 00:06:08.492 From all I can go into talking about
NOTE Confidence: 0.869633413076923
00:06:08.492 --> 00:06:10.832 for a long time it issue you're right.
NOTE Confidence: 0.869633413076923
00:06:10.832 --> 00:06:12.315 So thank you know I appreciate it
NOTE Confidence: 0.869633413076923
00:06:12.315 --> 00:06:14.012 and I don't want it to track from the
NOTE Confidence: 0.869633413076923
00:06:14.012 --> 00:06:15.716 from the other early career folks,
NOTE Confidence: 0.869633413076923
00:06:15.720 --> 00:06:19.396 but it is something that obviously is.
NOTE Confidence: 0.869633413076923
00:06:19.396 --> 00:06:22.210 It seems like it needs some correction,
NOTE Confidence: 0.869633413076923
00:06:22.210 --> 00:06:25.930 but yeah, yeah, I agree.
NOTE Confidence: 0.869633413076923
00:06:25.930 --> 00:06:28.681 Uhm, so please if anyone has you
NOTE Confidence: 0.869633413076923
00:06:28.681 --> 00:06:31.220 know any comments about things that
NOTE Confidence: 0.869633413076923

00:06:31.220 --> 00:06:33.782 I talked about please jump out.
NOTE Confidence: 0.869633413076923

00:06:33.790 --> 00:06:37.456 You know one thing that a lot of people
NOTE Confidence: 0.869633413076923

00:06:37.456 --> 00:06:39.545 don't do it it's it's been published
NOTE Confidence: 0.869633413076923

00:06:39.545 --> 00:06:42.265 and we talked about this at the NIH.
NOTE Confidence: 0.869633413076923

00:06:42.270 --> 00:06:44.070 I'll that.
NOTE Confidence: 0.869633413076923

00:06:44.070 --> 00:06:46.122 Researchers that actually contact
NOTE Confidence: 0.869633413076923

00:06:46.122 --> 00:06:47.148 their program.
NOTE Confidence: 0.869633413076923

00:06:47.150 --> 00:06:49.187 Officials at the NIH and they interact
NOTE Confidence: 0.869633413076923

00:06:49.187 --> 00:06:51.688 with them a lot that they actually do
NOTE Confidence: 0.869633413076923

00:06:51.688 --> 00:06:53.666 better and review so we can actually
NOTE Confidence: 0.869633413076923

00:06:53.666 --> 00:06:56.149 be very helpful at the NIH in terms of
NOTE Confidence: 0.869633413076923

00:06:56.149 --> 00:06:58.165 interacting with us and talking to us.
NOTE Confidence: 0.869633413076923

00:06:58.170 --> 00:06:59.610 And so, as I mentioned at the outset,
NOTE Confidence: 0.869633413076923

00:06:59.610 --> 00:07:00.870 some of you may have missed it.
NOTE Confidence: 0.869633413076923

00:07:00.870 --> 00:07:02.124 That Scott Janice,
NOTE Confidence: 0.869633413076923

00:07:02.124 --> 00:07:03.378 who's on here?

NOTE Confidence: 0.869633413076923
00:07:03.380 --> 00:07:05.270 He's over the stroke program.
NOTE Confidence: 0.869633413076923
00:07:05.270 --> 00:07:06.824 He and I we've met with quite
NOTE Confidence: 0.869633413076923
00:07:06.824 --> 00:07:08.993 a few we we both have different
NOTE Confidence: 0.869633413076923
00:07:08.993 --> 00:07:10.429 styles and different ways.
NOTE Confidence: 0.869633413076923
00:07:10.430 --> 00:07:11.926 Sort of attacking this,
NOTE Confidence: 0.869633413076923
00:07:11.926 --> 00:07:14.460 but we've met with several K 23.
NOTE Confidence: 0.869633413076923
00:07:14.460 --> 00:07:16.910 Uhm candidates and we sort of go
NOTE Confidence: 0.869633413076923
00:07:16.910 --> 00:07:19.828 through and we reach or specific games.
NOTE Confidence: 0.869633413076923
00:07:19.830 --> 00:07:22.497 We offer comments about the process and
NOTE Confidence: 0.869633413076923
00:07:22.497 --> 00:07:25.450 everything and so that's part of what we do.
NOTE Confidence: 0.869633413076923
00:07:25.450 --> 00:07:28.510 But people sometimes don't contact us.
NOTE Confidence: 0.869633413076923
00:07:28.510 --> 00:07:29.258 We are very busy,
NOTE Confidence: 0.869633413076923
00:07:29.258 --> 00:07:30.560 but that's part of what we do.
NOTE Confidence: 0.869633413076923
00:07:30.560 --> 00:07:34.590 We can schedule time to do this and you know,
NOTE Confidence: 0.869633413076923
00:07:34.590 --> 00:07:35.820 I think we actually like it.
NOTE Confidence: 0.869633413076923

00:07:35.820 --> 00:07:37.900 You know it's a lot of interesting work
NOTE Confidence: 0.869633413076923

00:07:37.900 --> 00:07:40.137 that we get to read about and to hear.
NOTE Confidence: 0.869633413076923

00:07:40.140 --> 00:07:42.121 You know how people are thinking about
NOTE Confidence: 0.869633413076923

00:07:42.121 --> 00:07:44.550 things and so we could really offer a lot.
NOTE Confidence: 0.869633413076923

00:07:44.550 --> 00:07:47.646 So I guess my first point of advice
NOTE Confidence: 0.869633413076923

00:07:47.646 --> 00:07:51.087 is to contact us at the at the NIH
NOTE Confidence: 0.869633413076923

00:07:51.087 --> 00:07:53.665 and Inds if you're considering
NOTE Confidence: 0.869633413076923

00:07:53.665 --> 00:07:56.910 submitting to us what we normally do,
NOTE Confidence: 0.869633413076923

00:07:56.910 --> 00:07:58.770 we have different areas of expertise.
NOTE Confidence: 0.869633413076923

00:07:58.770 --> 00:08:01.014 If it's something my expertise is
NOTE Confidence: 0.869633413076923

00:08:01.014 --> 00:08:03.000 through vascular disease and stroke,
NOTE Confidence: 0.869633413076923

00:08:03.000 --> 00:08:04.715 and obviously you know HealthEquity
NOTE Confidence: 0.869633413076923

00:08:04.715 --> 00:08:06.430 health disparities in global health.
NOTE Confidence: 0.869633413076923

00:08:06.430 --> 00:08:08.170 But if it's another area,
NOTE Confidence: 0.869633413076923

00:08:08.170 --> 00:08:10.338 then we'll bring on.
NOTE Confidence: 0.869633413076923

00:08:10.338 --> 00:08:13.823 I can get someone from the NIDS

NOTE Confidence: 0.869633413076923
00:08:13.823 --> 00:08:15.636 who has an expertise in, let's say.
NOTE Confidence: 0.869633413076923
00:08:15.636 --> 00:08:18.960 If it's Ms or something in the 80 RT space,
NOTE Confidence: 0.869633413076923
00:08:18.960 --> 00:08:20.794 or epilepsy or or something else I
NOTE Confidence: 0.869633413076923
00:08:20.794 --> 00:08:23.007 can pull on my colleagues and we
NOTE Confidence: 0.869633413076923
00:08:23.007 --> 00:08:25.059 normally will have these joint meetings
NOTE Confidence: 0.869633413076923
00:08:25.060 --> 00:08:28.119 and go through and discuss your your
NOTE Confidence: 0.869633413076923
00:08:28.119 --> 00:08:30.452 specific games and your application
NOTE Confidence: 0.869633413076923
00:08:30.452 --> 00:08:33.254 and the other parts of review.
NOTE Confidence: 0.869633413076923
00:08:33.260 --> 00:08:35.330 So that's that's the first point
NOTE Confidence: 0.869633413076923
00:08:35.330 --> 00:08:38.350 that I'd say come.
NOTE Confidence: 0.869633413076923
00:08:38.350 --> 00:08:38.630 Thank
NOTE Confidence: 0.907050928181818
00:08:38.640 --> 00:08:40.536 you Richard. You know that's such
NOTE Confidence: 0.907050928181818
00:08:40.536 --> 00:08:42.190 a generous and important offer,
NOTE Confidence: 0.907050928181818
00:08:42.190 --> 00:08:44.080 because if I was writing AK,
NOTE Confidence: 0.907050928181818
00:08:44.080 --> 00:08:46.606 I can't imagine having better input
NOTE Confidence: 0.907050928181818

00:08:46.606 --> 00:08:48.790 and reviewers from somebody at NINDS
NOTE Confidence: 0.907050928181818

00:08:48.790 --> 00:08:50.890 who sort of boots on the ground.
NOTE Confidence: 0.907050928181818

00:08:50.890 --> 00:08:53.730 You have access to the top people you've
NOTE Confidence: 0.907050928181818

00:08:53.730 --> 00:08:56.427 written and reviewed hundreds of grants.
NOTE Confidence: 0.907050928181818

00:08:56.430 --> 00:08:59.142 I mean to have your expertise and and
NOTE Confidence: 0.907050928181818

00:08:59.142 --> 00:09:01.629 review eyes would just be invaluable.
NOTE Confidence: 0.907050928181818

00:09:01.630 --> 00:09:03.177 So thank you for making that offer.
NOTE Confidence: 0.907050928181818

00:09:03.180 --> 00:09:03.800 That's great.
NOTE Confidence: 0.9391833

00:09:04.900 --> 00:09:08.883 Right? Yeah wait, I might add just so that
NOTE Confidence: 0.9391833

00:09:08.883 --> 00:09:10.580 folks understand with training grants.
NOTE Confidence: 0.914776938571429

00:09:10.580 --> 00:09:12.275 Training grants are
NOTE Confidence: 0.914776938571429

00:09:12.275 --> 00:09:14.535 specific to the institutes.
NOTE Confidence: 0.914776938571429

00:09:14.540 --> 00:09:17.088 So even though that the the mechanisms
NOTE Confidence: 0.914776938571429

00:09:17.088 --> 00:09:19.330 are used broadly across NIH training
NOTE Confidence: 0.914776938571429

00:09:19.330 --> 00:09:21.836 in cancer or heart disease is very
NOTE Confidence: 0.914776938571429

00:09:21.905 --> 00:09:24.360 different than training in neurology.

NOTE Confidence: 0.914776938571429
00:09:24.360 --> 00:09:25.890 So when we have study
NOTE Confidence: 0.914776938571429
00:09:25.890 --> 00:09:27.114 sections that review these,
NOTE Confidence: 0.914776938571429
00:09:27.120 --> 00:09:29.316 these are Institute review study sections.
NOTE Confidence: 0.914776938571429
00:09:29.320 --> 00:09:31.618 These are not CSR study sections,
NOTE Confidence: 0.914776938571429
00:09:31.620 --> 00:09:34.070 so they are run effectively in House,
NOTE Confidence: 0.914776938571429
00:09:34.070 --> 00:09:36.670 and that means that a culture gets developed.
NOTE Confidence: 0.914776938571429
00:09:36.670 --> 00:09:37.348 Within the review,
NOTE Confidence: 0.914776938571429
00:09:37.348 --> 00:09:38.252 and that's really what
NOTE Confidence: 0.914776938571429
00:09:38.252 --> 00:09:39.449 Richard kind of speaking to.
NOTE Confidence: 0.914776938571429
00:09:39.450 --> 00:09:41.562 There's a lot of nuances with
NOTE Confidence: 0.914776938571429
00:09:41.562 --> 00:09:42.970 training programs that neither
NOTE Confidence: 0.914776938571429
00:09:43.036 --> 00:09:45.268 Richard nor I are like up to speed on,
NOTE Confidence: 0.914776938571429
00:09:45.270 --> 00:09:46.910 and that's why we have a training office.
NOTE Confidence: 0.914776938571429
00:09:46.910 --> 00:09:49.102 We have another resource to help us think
NOTE Confidence: 0.914776938571429
00:09:49.102 --> 00:09:51.070 through some of those policy things too,
NOTE Confidence: 0.914776938571429

00:09:51.070 --> 00:09:52.750 but it's not like writing a narrow one.
NOTE Confidence: 0.914776938571429

00:09:52.750 --> 00:09:54.829 It's a very different type of approach,
NOTE Confidence: 0.914776938571429

00:09:54.830 --> 00:09:58.271 but I think from that standpoint Mark,
NOTE Confidence: 0.914776938571429

00:09:58.271 --> 00:10:00.308 that's kind of what you're getting too.
NOTE Confidence: 0.914776938571429

00:10:00.310 --> 00:10:01.354 Is that you know,
NOTE Confidence: 0.914776938571429

00:10:01.354 --> 00:10:03.997 we hear and we listen to sort of what
NOTE Confidence: 0.914776938571429

00:10:03.997 --> 00:10:06.025 the culture is within those reviews,
NOTE Confidence: 0.914776938571429

00:10:06.030 --> 00:10:07.482 and that's really what.
NOTE Confidence: 0.914776938571429

00:10:07.482 --> 00:10:10.112 We're trying to respond to we can't
NOTE Confidence: 0.914776938571429

00:10:10.112 --> 00:10:12.038 write somebody's grant come off,
NOTE Confidence: 0.914776938571429

00:10:12.038 --> 00:10:14.360 and we can offer opinions or
NOTE Confidence: 0.914776938571429

00:10:14.430 --> 00:10:16.964 suggestions which you know, I think,
NOTE Confidence: 0.914776938571429

00:10:16.964 --> 00:10:19.500 are important for folks just to think about,
NOTE Confidence: 0.914776938571429

00:10:19.500 --> 00:10:21.284 you know, and not because we make them,
NOTE Confidence: 0.914776938571429

00:10:21.290 --> 00:10:22.840 but more because if somebody
NOTE Confidence: 0.914776938571429

00:10:22.840 --> 00:10:24.390 is thinking about the problem,

NOTE Confidence: 0.914776938571429

00:10:24.390 --> 00:10:25.830 it's worth rethinking about it,

NOTE Confidence: 0.914776938571429

00:10:25.830 --> 00:10:27.830 because perhaps you're just not

NOTE Confidence: 0.914776938571429

00:10:27.830 --> 00:10:29.546 articulating it clear enough yet that

NOTE Confidence: 0.914776938571429

00:10:29.546 --> 00:10:31.786 she would have to get to a level of a,

NOTE Confidence: 0.914776938571429

00:10:31.790 --> 00:10:32.926 you know, grant application.

NOTE Confidence: 0.914776938571429

00:10:32.926 --> 00:10:33.778 We can't solve.

NOTE Confidence: 0.914776938571429

00:10:33.780 --> 00:10:35.508 Those problems were not even allowed

NOTE Confidence: 0.914776938571429

00:10:35.508 --> 00:10:36.941 to write your grants, because.

NOTE Confidence: 0.914776938571429

00:10:36.941 --> 00:10:38.908 You know that that goes negatively interview,

NOTE Confidence: 0.914776938571429

00:10:38.910 --> 00:10:40.709 but I think that's the whole process.

NOTE Confidence: 0.914776938571429

00:10:40.710 --> 00:10:43.230 This just having the conversations,

NOTE Confidence: 0.914776938571429

00:10:43.230 --> 00:10:44.850 not just with folks like us,

NOTE Confidence: 0.914776938571429

00:10:44.850 --> 00:10:47.447 but also you know with with the

NOTE Confidence: 0.914776938571429

00:10:47.447 --> 00:10:50.139 mentors and and perhaps even other

NOTE Confidence: 0.914776938571429

00:10:50.139 --> 00:10:52.407 fellows who have received K23,

NOTE Confidence: 0.914776938571429

00:10:52.407 --> 00:10:53.792 they've gone through the experience
NOTE Confidence: 0.914776938571429

00:10:53.792 --> 00:10:55.495 and they have a perspective on
NOTE Confidence: 0.914776938571429

00:10:55.495 --> 00:10:57.399 it that you know gives them some
NOTE Confidence: 0.914776938571429

00:10:57.399 --> 00:10:59.055 insight on how to be successful so.
NOTE Confidence: 0.863671781666667

00:11:01.440 --> 00:11:03.004 Thank you, yeah, more
NOTE Confidence: 0.863671781666667

00:11:03.004 --> 00:11:04.260 valuable insights. Thank you.
NOTE Confidence: 0.950563418333333

00:11:07.830 --> 00:11:12.660 So please just jump out and.
NOTE Confidence: 0.950563418333333

00:11:12.660 --> 00:11:14.465 Ask any questions about anything
NOTE Confidence: 0.950563418333333

00:11:14.465 --> 00:11:16.634 I talked about earlier or anything
NOTE Confidence: 0.950563418333333

00:11:16.634 --> 00:11:19.180 on your mind or the other piece.
NOTE Confidence: 0.950563418333333

00:11:19.180 --> 00:11:23.127 Is that if you have an application and it's
NOTE Confidence: 0.950563418333333

00:11:23.127 --> 00:11:25.376 not one that's appropriate for any ideas,
NOTE Confidence: 0.950563418333333

00:11:25.380 --> 00:11:28.251 we can also be helpful at referring you to
NOTE Confidence: 0.950563418333333

00:11:28.251 --> 00:11:31.010 someone at one of the other eye sees as well.
NOTE Confidence: 0.950563418333333

00:11:31.010 --> 00:11:34.120 You do want to open up your possibility of
NOTE Confidence: 0.950563418333333

00:11:34.120 --> 00:11:36.520 funding by looking at other institutes.

NOTE Confidence: 0.950563418333333

00:11:36.520 --> 00:11:39.019 If your research area falls in another

NOTE Confidence: 0.950563418333333

00:11:39.019 --> 00:11:41.630 category, but since you all are,

NOTE Confidence: 0.950563418333333

00:11:41.630 --> 00:11:43.160 since this is stroke net, I'm short.

NOTE Confidence: 0.950563418333333

00:11:43.160 --> 00:11:45.080 Broken so it should be related to us.

NOTE Confidence: 0.794520650909091

00:11:46.660 --> 00:11:50.220 Great, I I know there are a bunch of Ali

NOTE Confidence: 0.794520650909091

00:11:50.313 --> 00:11:52.844 and Mike and some of our stroke net fellows,

NOTE Confidence: 0.794520650909091

00:11:52.850 --> 00:11:55.118 Rachel and others so it's great to

NOTE Confidence: 0.794520650909091

00:11:55.118 --> 00:11:57.368 see a Nishant. I mean a bunch of folks

NOTE Confidence: 0.794520650909091

00:11:57.368 --> 00:11:59.207 here so it's so fair to speak up.

NOTE Confidence: 0.794520650909091

00:11:59.210 --> 00:12:02.239 I might pair it to Richard and Scott.

NOTE Confidence: 0.794520650909091

00:12:02.239 --> 00:12:05.408 A few questions that I know I've heard from

NOTE Confidence: 0.794520650909091

00:12:05.408 --> 00:12:08.890 some of you recently won and Scott, you may.

NOTE Confidence: 0.794520650909091

00:12:08.890 --> 00:12:10.850 I think you've touched on this recently.

NOTE Confidence: 0.794520650909091

00:12:10.850 --> 00:12:13.178 You know, as people are transitioning

NOTE Confidence: 0.794520650909091

00:12:13.178 --> 00:12:16.996 from K20 threes and stroke net fellows.

NOTE Confidence: 0.794520650909091

00:12:17.000 --> 00:12:17.900 You know they've seen,
NOTE Confidence: 0.794520650909091

00:12:17.900 --> 00:12:19.025 I think in recent memory,
NOTE Confidence: 0.794520650909091

00:12:19.030 --> 00:12:21.148 we've all seen large phase three
NOTE Confidence: 0.794520650909091

00:12:21.148 --> 00:12:23.336 trials at stroke net which you
NOTE Confidence: 0.794520650909091

00:12:23.336 --> 00:12:25.096 know certain type of trial,
NOTE Confidence: 0.794520650909091

00:12:25.100 --> 00:12:26.975 and I think sometimes may
NOTE Confidence: 0.794520650909091

00:12:26.975 --> 00:12:28.475 feel intimidating or but,
NOTE Confidence: 0.794520650909091

00:12:28.480 --> 00:12:30.872 but maybe you can also comment a little
NOTE Confidence: 0.794520650909091

00:12:30.872 --> 00:12:33.556 bit about how the network is thinking about
NOTE Confidence: 0.794520650909091

00:12:33.560 --> 00:12:37.375 phase one or smaller phase two trials,
NOTE Confidence: 0.794520650909091

00:12:37.380 --> 00:12:38.988 minimal numbers of centers because I
NOTE Confidence: 0.794520650909091

00:12:38.988 --> 00:12:41.142 think there are a number of people here
NOTE Confidence: 0.794520650909091

00:12:41.142 --> 00:12:43.934 that I I know are working on programs
NOTE Confidence: 0.794520650909091

00:12:43.934 --> 00:12:45.866 where that you know that may be relevant.
NOTE Confidence: 0.773912688

00:12:47.080 --> 00:12:49.408 Yeah, uhm, so I'm you know
NOTE Confidence: 0.773912688

00:12:49.408 --> 00:12:50.960 I'm very favorable I.

NOTE Confidence: 0.773912688

00:12:50.960 --> 00:12:54.616 I think one of the goals or stroke

NOTE Confidence: 0.773912688

00:12:54.616 --> 00:12:56.945 net that we're still working on

NOTE Confidence: 0.773912688

00:12:56.945 --> 00:12:59.735 was there was a idea of continuity

NOTE Confidence: 0.773912688

00:12:59.735 --> 00:13:02.255 of development that you know that

NOTE Confidence: 0.773912688

00:13:02.255 --> 00:13:04.856 we can evolve ideas through some

NOTE Confidence: 0.773912688

00:13:04.856 --> 00:13:07.774 of the earlier work and then have

NOTE Confidence: 0.773912688

00:13:07.774 --> 00:13:09.744 that sort of memory embedded

NOTE Confidence: 0.773912688

00:13:09.744 --> 00:13:12.139 within the system that would help

NOTE Confidence: 0.773912688

00:13:12.139 --> 00:13:14.359 rapidly advance it to a larger,

NOTE Confidence: 0.773912688

00:13:14.360 --> 00:13:15.732 definitive study if that's

NOTE Confidence: 0.773912688

00:13:15.732 --> 00:13:17.104 where the science went.

NOTE Confidence: 0.773912688

00:13:17.110 --> 00:13:18.580 You know, and I think you know

NOTE Confidence: 0.773912688

00:13:18.580 --> 00:13:19.210 there's there's questions.

NOTE Confidence: 0.773912688

00:13:19.210 --> 00:13:19.516 Naturally,

NOTE Confidence: 0.773912688

00:13:19.516 --> 00:13:21.964 when we launched in that were already there,

NOTE Confidence: 0.773912688

00:13:21.970 --> 00:13:23.610 which is why we had some of the

NOTE Confidence: 0.773912688

00:13:23.610 --> 00:13:24.779 large Bay Street trials.

NOTE Confidence: 0.773912688

00:13:24.780 --> 00:13:26.515 I think there's some natural

NOTE Confidence: 0.773912688

00:13:26.515 --> 00:13:27.903 questions and prevention that

NOTE Confidence: 0.773912688

00:13:27.903 --> 00:13:29.737 have led to phase three trials.

NOTE Confidence: 0.773912688

00:13:29.740 --> 00:13:30.356 You know?

NOTE Confidence: 0.773912688

00:13:30.356 --> 00:13:30.664 Truthfully,

NOTE Confidence: 0.773912688

00:13:30.664 --> 00:13:32.820 it's a little easier to design A

NOTE Confidence: 0.773912688

00:13:32.886 --> 00:13:34.727 phase three trial than it is to

NOTE Confidence: 0.773912688

00:13:34.727 --> 00:13:36.889 design A phase one or phase two trial,

NOTE Confidence: 0.773912688

00:13:36.890 --> 00:13:37.244 you know,

NOTE Confidence: 0.773912688

00:13:37.244 --> 00:13:38.483 but I don't think that's a reason

NOTE Confidence: 0.773912688

00:13:38.483 --> 00:13:39.750 to kind of steer away from it.

NOTE Confidence: 0.773912688

00:13:39.750 --> 00:13:40.902 But, you know, I,

NOTE Confidence: 0.773912688

00:13:40.902 --> 00:13:42.986 I would just sort of echo that

NOTE Confidence: 0.773912688

00:13:42.986 --> 00:13:45.002 we're looking at a lot of ways

NOTE Confidence: 0.773912688

00:13:45.002 --> 00:13:47.317 of sort of advancing the science.

NOTE Confidence: 0.773912688

00:13:47.320 --> 00:13:48.268 The biology,

NOTE Confidence: 0.773912688

00:13:48.268 --> 00:13:52.060 UM and not just kind of going after.

NOTE Confidence: 0.773912688

00:13:52.060 --> 00:13:52.640 You know,

NOTE Confidence: 0.773912688

00:13:52.640 --> 00:13:54.380 maybe necessarily the big ticket items.

NOTE Confidence: 0.773912688

00:13:54.380 --> 00:13:56.870 Maybe it's going after what could

NOTE Confidence: 0.773912688

00:13:56.870 --> 00:13:58.480 actually change the course of

NOTE Confidence: 0.773912688

00:13:58.480 --> 00:13:59.780 the disease would be important

NOTE Confidence: 0.773912688

00:13:59.780 --> 00:14:01.280 to the patients you know.

NOTE Confidence: 0.773912688

00:14:01.280 --> 00:14:01.860 I I,

NOTE Confidence: 0.773912688

00:14:01.860 --> 00:14:04.180 I wanted to build on something Richard said,

NOTE Confidence: 0.773912688

00:14:04.180 --> 00:14:05.762 just as a as a general comment

NOTE Confidence: 0.773912688

00:14:05.762 --> 00:14:07.457 'cause we get this sort of all

NOTE Confidence: 0.773912688

00:14:07.457 --> 00:14:08.903 the time when people reach out

NOTE Confidence: 0.773912688

00:14:08.961 --> 00:14:10.396 they'll say is this something

NOTE Confidence: 0.773912688

00:14:10.396 --> 00:14:11.831 and Inds is interested in.
NOTE Confidence: 0.773912688

00:14:11.840 --> 00:14:13.933 This is something that you will find
NOTE Confidence: 0.773912688

00:14:13.933 --> 00:14:16.026 you know well the truth of it is
NOTE Confidence: 0.773912688

00:14:16.026 --> 00:14:18.419 is that you know we we have that we get.
NOTE Confidence: 0.773912688

00:14:18.420 --> 00:14:20.396 The money to be able to administer it,
NOTE Confidence: 0.773912688

00:14:20.400 --> 00:14:21.780 but we're really listening to
NOTE Confidence: 0.773912688

00:14:21.780 --> 00:14:23.763 you to tell us whether or not
NOTE Confidence: 0.773912688

00:14:23.763 --> 00:14:25.395 something is important to be done.
NOTE Confidence: 0.773912688

00:14:25.400 --> 00:14:28.115 So really, the expertise in the field, right?
NOTE Confidence: 0.773912688

00:14:28.115 --> 00:14:29.290 And the expertise and the
NOTE Confidence: 0.773912688

00:14:29.290 --> 00:14:30.760 knowledge of where we need to go,
NOTE Confidence: 0.773912688

00:14:30.760 --> 00:14:33.165 and so the reviewers are
NOTE Confidence: 0.773912688

00:14:33.165 --> 00:14:34.608 not government employees.
NOTE Confidence: 0.773912688

00:14:34.610 --> 00:14:37.136 The reviewers are picked from the
NOTE Confidence: 0.773912688

00:14:37.136 --> 00:14:38.820 various academic institutions and
NOTE Confidence: 0.773912688

00:14:38.888 --> 00:14:41.177 in responding to what they see as

NOTE Confidence: 0.773912688

00:14:41.177 --> 00:14:43.667 the priorities and needs within the field.

NOTE Confidence: 0.773912688

00:14:43.670 --> 00:14:45.286 So I think those two kind of go

NOTE Confidence: 0.773912688

00:14:45.286 --> 00:14:46.999 hand in hand because we're really

NOTE Confidence: 0.773912688

00:14:46.999 --> 00:14:48.559 trying to follow the thread.

NOTE Confidence: 0.773912688

00:14:48.560 --> 00:14:50.450 NIH has a unique position because

NOTE Confidence: 0.773912688

00:14:50.450 --> 00:14:52.603 we can do things that companies

NOTE Confidence: 0.773912688

00:14:52.603 --> 00:14:54.678 might not necessarily be interested

NOTE Confidence: 0.773912688

00:14:54.678 --> 00:14:56.811 in because it's further down

NOTE Confidence: 0.773912688

00:14:56.811 --> 00:14:58.447 the stream of development.

NOTE Confidence: 0.773912688

00:14:58.450 --> 00:15:00.396 We're really looking to bend the science

NOTE Confidence: 0.773912688

00:15:00.396 --> 00:15:02.079 pathway and try to move forward,

NOTE Confidence: 0.773912688

00:15:02.080 --> 00:15:03.946 so just sort of thoughts

NOTE Confidence: 0.773912688

00:15:03.946 --> 00:15:05.190 to keep in mind.

NOTE Confidence: 0.773912688

00:15:05.190 --> 00:15:06.084 But yeah, absolutely,

NOTE Confidence: 0.773912688

00:15:06.084 --> 00:15:08.170 I think you know if it doesn't

NOTE Confidence: 0.773912688

00:15:08.232 --> 00:15:10.437 fit stroke that we do have many
NOTE Confidence: 0.773912688

00:15:10.437 --> 00:15:12.009 different pathways that would be
NOTE Confidence: 0.773912688

00:15:12.009 --> 00:15:13.695 preliminary to doing a trial that
NOTE Confidence: 0.773912688

00:15:13.695 --> 00:15:15.820 we can also open up those doors.
NOTE Confidence: 0.773912688

00:15:15.820 --> 00:15:17.255 'cause again we sort of see this
NOTE Confidence: 0.773912688

00:15:17.255 --> 00:15:18.610 as a pure developmental.
NOTE Confidence: 0.773912688

00:15:18.610 --> 00:15:20.092 Hopefully all the way from the
NOTE Confidence: 0.773912688

00:15:20.092 --> 00:15:21.775 basic science up to the translation
NOTE Confidence: 0.773912688

00:15:21.775 --> 00:15:23.365 and eventually to the trials.
NOTE Confidence: 0.8760106675

00:15:26.670 --> 00:15:28.833 Thanks and I I just put my
NOTE Confidence: 0.8760106675

00:15:28.833 --> 00:15:30.479 email address in the chat.
NOTE Confidence: 0.8760106675

00:15:30.480 --> 00:15:32.832 So if you you know think of something
NOTE Confidence: 0.8760106675

00:15:32.832 --> 00:15:34.904 that you want to email and ask
NOTE Confidence: 0.8760106675

00:15:34.904 --> 00:15:37.018 me about later on, but it's got.
NOTE Confidence: 0.8760106675

00:15:37.018 --> 00:15:38.974 That's that's a great point that
NOTE Confidence: 0.8760106675

00:15:38.974 --> 00:15:41.165 he just made that you know you

NOTE Confidence: 0.8760106675

00:15:41.170 --> 00:15:43.312 are in the field and the experts

NOTE Confidence: 0.8760106675

00:15:43.312 --> 00:15:45.327 if you think of a great idea

NOTE Confidence: 0.8760106675

00:15:45.330 --> 00:15:47.238 that you would like to develop,

NOTE Confidence: 0.8760106675

00:15:47.240 --> 00:15:48.818 then you know that's your idea.

NOTE Confidence: 0.8760106675

00:15:48.820 --> 00:15:50.458 And then we can sort of let you know,

NOTE Confidence: 0.8760106675

00:15:50.460 --> 00:15:53.628 sort of. Uhm, you know where it fits?

NOTE Confidence: 0.8760106675

00:15:53.630 --> 00:15:54.758 Or you can talk to us and say,

NOTE Confidence: 0.8760106675

00:15:54.760 --> 00:15:56.158 hey, this is an important problem.

NOTE Confidence: 0.8760106675

00:15:56.160 --> 00:15:57.912 It's something we need to focus

NOTE Confidence: 0.8760106675

00:15:57.912 --> 00:15:59.186 on and go from there.

NOTE Confidence: 0.8760106675

00:15:59.186 --> 00:16:00.650 That that's how some of the

NOTE Confidence: 0.8760106675

00:16:00.710 --> 00:16:02.198 best ideas sort of come out.

NOTE Confidence: 0.8760106675

00:16:02.200 --> 00:16:06.610 It's sort of that bedside back to the bench.

NOTE Confidence: 0.8760106675

00:16:06.610 --> 00:16:07.200 Sometimes

NOTE Confidence: 0.882612852222222

00:16:07.210 --> 00:16:09.622 we can help sort of with the competing space.

NOTE Confidence: 0.882612852222222

00:16:09.630 --> 00:16:11.912 You know that's one of the downsides
NOTE Confidence: 0.8826128522222222

00:16:11.912 --> 00:16:14.285 with the federal funding is that we only
NOTE Confidence: 0.8826128522222222

00:16:14.285 --> 00:16:16.316 have so much in our pot, which means,
NOTE Confidence: 0.8826128522222222

00:16:16.316 --> 00:16:17.504 and we have to distribute it.
NOTE Confidence: 0.8826128522222222

00:16:17.510 --> 00:16:19.746 We have a very large you know,
NOTE Confidence: 0.8826128522222222

00:16:19.746 --> 00:16:21.774 portfolio of diseases that are covered
NOTE Confidence: 0.8826128522222222

00:16:21.774 --> 00:16:23.432 in neurology and we're responsible
NOTE Confidence: 0.8826128522222222

00:16:23.432 --> 00:16:25.280 pretty much for all of them.
NOTE Confidence: 0.8826128522222222

00:16:25.280 --> 00:16:28.088 So it doesn't mean that we have unlimited
NOTE Confidence: 0.8826128522222222

00:16:28.088 --> 00:16:29.770 opportunities to overlap things.
NOTE Confidence: 0.8826128522222222

00:16:29.770 --> 00:16:31.330 But sometimes where we can,
NOTE Confidence: 0.8826128522222222

00:16:31.330 --> 00:16:33.226 we can sort of spot is sort of
NOTE Confidence: 0.8826128522222222

00:16:33.226 --> 00:16:34.810 where that things are moving,
NOTE Confidence: 0.8826128522222222

00:16:34.810 --> 00:16:37.030 and maybe try and help.
NOTE Confidence: 0.8826128522222222

00:16:37.030 --> 00:16:37.934 Push that into a,
NOTE Confidence: 0.8826128522222222

00:16:37.934 --> 00:16:39.290 you know into its own model

NOTE Confidence: 0.882612852222222

00:16:39.342 --> 00:16:40.897 niche that would be successful.

NOTE Confidence: 0.951171144545455

00:16:42.510 --> 00:16:44.820 Richard and Scott, something that I've

NOTE Confidence: 0.951171144545455

00:16:44.820 --> 00:16:47.010 noticed across the research portfolio,

NOTE Confidence: 0.951171144545455

00:16:47.010 --> 00:16:49.978 is that more and more studies are including

NOTE Confidence: 0.951171144545455

00:16:49.978 --> 00:16:52.384 biomarkers either in the main study or

NOTE Confidence: 0.951171144545455

00:16:52.384 --> 00:16:54.710 in a subsequent study or sub study,

NOTE Confidence: 0.951171144545455

00:16:54.710 --> 00:16:57.506 and you know, I'm just interested

NOTE Confidence: 0.951171144545455

00:16:57.506 --> 00:16:59.370 in your perspective because.

NOTE Confidence: 0.951171144545455

00:16:59.370 --> 00:17:01.068 Again, you see the whole portfolio,

NOTE Confidence: 0.951171144545455

00:17:01.070 --> 00:17:03.710 not just stroke, but cancer.

NOTE Confidence: 0.951171144545455

00:17:03.710 --> 00:17:06.548 Ms other things.

NOTE Confidence: 0.951171144545455

00:17:06.550 --> 00:17:09.646 What has been the track record of these

NOTE Confidence: 0.951171144545455

00:17:09.646 --> 00:17:12.060 biomarkers across the research enterprise?

NOTE Confidence: 0.951171144545455

00:17:12.060 --> 00:17:14.660 Are they? Do they end up being helpful

NOTE Confidence: 0.951171144545455

00:17:14.660 --> 00:17:18.390 in 90% of the cases or 5% of the cases,

NOTE Confidence: 0.951171144545455

00:17:18.390 --> 00:17:20.927 or does it vary just so much by
NOTE Confidence: 0.951171144545455

00:17:20.927 --> 00:17:23.489 disease and in terms of being helpful,
NOTE Confidence: 0.951171144545455

00:17:23.490 --> 00:17:25.350 are they helpful for prognosis,
NOTE Confidence: 0.951171144545455

00:17:25.350 --> 00:17:27.051 diagnosis, triage therapies?
NOTE Confidence: 0.951171144545455

00:17:27.051 --> 00:17:29.886 Because certainly they're very popular,
NOTE Confidence: 0.951171144545455

00:17:29.890 --> 00:17:31.640 but so far I haven't heard the
NOTE Confidence: 0.951171144545455

00:17:31.640 --> 00:17:33.223 end result of the impact that
NOTE Confidence: 0.951171144545455

00:17:33.223 --> 00:17:35.015 they may or may not have had.
NOTE Confidence: 0.914343333333334

00:17:37.860 --> 00:17:39.078 Yeah, excuse me,
NOTE Confidence: 0.914343333333334

00:17:39.078 --> 00:17:41.514 I think it's a great question.
NOTE Confidence: 0.914343333333334

00:17:41.520 --> 00:17:45.378 We actually. I think it depends.
NOTE Confidence: 0.914343333333334

00:17:45.380 --> 00:17:48.798 I I know in the ADR D space that there are
NOTE Confidence: 0.914343333333334

00:17:48.798 --> 00:17:51.700 a lot of biomarkers out there because of,
NOTE Confidence: 0.914343333333334

00:17:51.700 --> 00:17:54.364 you know, early detection of of
NOTE Confidence: 0.914343333333334

00:17:54.364 --> 00:17:56.661 the Alzheimer's or various types
NOTE Confidence: 0.914343333333334

00:17:56.661 --> 00:17:59.289 of dementia as well as biomarkers.

NOTE Confidence: 0.91434333333334
00:17:59.290 --> 00:18:02.098 You know Mr Imaging and all of that,
NOTE Confidence: 0.91434333333334
00:18:02.100 --> 00:18:04.445 and so there may be certain areas
NOTE Confidence: 0.91434333333334
00:18:04.445 --> 00:18:06.239 where a biomarker is helpful.
NOTE Confidence: 0.91434333333334
00:18:06.240 --> 00:18:08.424 It can be helpful and less invasive.
NOTE Confidence: 0.91434333333334
00:18:08.430 --> 00:18:11.856 Helpful, less invasive way of diagnosing
NOTE Confidence: 0.91434333333334
00:18:11.860 --> 00:18:15.172 or a way of picking up sort of early
NOTE Confidence: 0.91434333333334
00:18:15.172 --> 00:18:17.548 disease or preclinical disease.
NOTE Confidence: 0.91434333333334
00:18:17.550 --> 00:18:19.657 And so there are certain spaces where
NOTE Confidence: 0.91434333333334
00:18:19.657 --> 00:18:21.569 the biomarker field is very important.
NOTE Confidence: 0.91434333333334
00:18:21.570 --> 00:18:23.509 The other thing is good for translation.
NOTE Confidence: 0.91434333333334
00:18:23.510 --> 00:18:26.080 If there's something that's happening
NOTE Confidence: 0.91434333333334
00:18:26.080 --> 00:18:28.358 in the preclinical space or something
NOTE Confidence: 0.91434333333334
00:18:28.358 --> 00:18:30.536 that we need to take from clinical
NOTE Confidence: 0.91434333333334
00:18:30.536 --> 00:18:32.251 space and go back and look at
NOTE Confidence: 0.91434333333334
00:18:32.251 --> 00:18:34.029 it in the preclinical space,
NOTE Confidence: 0.91434333333334

00:18:34.030 --> 00:18:35.460 that may be important from
NOTE Confidence: 0.91434333333334

00:18:35.460 --> 00:18:36.604 that standpoint as well.
NOTE Confidence: 0.91434333333334

00:18:36.610 --> 00:18:39.394 So I I think it sort of depends.
NOTE Confidence: 0.91434333333334

00:18:39.400 --> 00:18:40.160 You know,
NOTE Confidence: 0.91434333333334

00:18:40.160 --> 00:18:43.743 we sort of look at things and if we
NOTE Confidence: 0.91434333333334

00:18:43.743 --> 00:18:47.359 can tie it to the preclinical sort of
NOTE Confidence: 0.91434333333334

00:18:47.359 --> 00:18:50.436 biomarker space and the disease space,
NOTE Confidence: 0.91434333333334

00:18:50.440 --> 00:18:51.900 then you know we're getting
NOTE Confidence: 0.91434333333334

00:18:51.900 --> 00:18:53.771 the basic scientists as well as
NOTE Confidence: 0.91434333333334

00:18:53.771 --> 00:18:54.827 the clinical scientists.
NOTE Confidence: 0.91434333333334

00:18:54.830 --> 00:18:57.210 And I think the NIH wants to
NOTE Confidence: 0.91434333333334

00:18:57.210 --> 00:18:59.240 fund both types of research.
NOTE Confidence: 0.91434333333334

00:18:59.240 --> 00:19:01.977 But also if there's a good clinical
NOTE Confidence: 0.91434333333334

00:19:01.977 --> 00:19:04.151 intervention that you have that you
NOTE Confidence: 0.91434333333334

00:19:04.151 --> 00:19:06.305 know doesn't have a biomarker doesn't
NOTE Confidence: 0.91434333333334

00:19:06.305 --> 00:19:08.620 mean that that's not important or not.

NOTE Confidence: 0.91434333333334

00:19:08.620 --> 00:19:10.426 One other thing I want to mention,

NOTE Confidence: 0.91434333333334

00:19:10.430 --> 00:19:13.678 that sort of Scott to that point was

NOTE Confidence: 0.91434333333334

00:19:13.678 --> 00:19:16.490 solicited versus unsolicited applications,

NOTE Confidence: 0.91434333333334

00:19:16.490 --> 00:19:19.156 and sort of a point that Scott brought

NOTE Confidence: 0.91434333333334

00:19:19.156 --> 00:19:21.634 up that we do have solicitations.

NOTE Confidence: 0.91434333333334

00:19:21.640 --> 00:19:24.118 We know that a lot of applications

NOTE Confidence: 0.91434333333334

00:19:24.118 --> 00:19:25.180 that come in,

NOTE Confidence: 0.91434333333334

00:19:25.180 --> 00:19:26.660 there's just sort of independent,

NOTE Confidence: 0.91434333333334

00:19:26.660 --> 00:19:27.734 you know,

NOTE Confidence: 0.91434333333334

00:19:27.734 --> 00:19:30.419 research that that the investigator

NOTE Confidence: 0.91434333333334

00:19:30.419 --> 00:19:33.089 suggests and submits for funding.

NOTE Confidence: 0.91434333333334

00:19:33.090 --> 00:19:35.510 But we do know that a lot of research is

NOTE Confidence: 0.91434333333334

00:19:35.575 --> 00:19:38.059 sparked by solicitation in certain areas,

NOTE Confidence: 0.91434333333334

00:19:38.060 --> 00:19:39.172 and so we are.

NOTE Confidence: 0.91434333333334

00:19:39.172 --> 00:19:41.220 Thinking about that and we do think

NOTE Confidence: 0.91434333333334

00:19:41.220 --> 00:19:44.916 uniquely so it goes to your point mark,
NOTE Confidence: 0.91434333333334

00:19:44.920 --> 00:19:47.468 we do have solicitations that we're looking,
NOTE Confidence: 0.91434333333334

00:19:47.470 --> 00:19:49.654 and we may ask specifically that we're
NOTE Confidence: 0.91434333333334

00:19:49.654 --> 00:19:51.717 looking for biomarkers in a particular area,
NOTE Confidence: 0.91434333333334

00:19:51.720 --> 00:19:53.955 or we're looking for something
NOTE Confidence: 0.91434333333334

00:19:53.955 --> 00:19:56.190 where something can be translated.
NOTE Confidence: 0.91434333333334

00:19:56.190 --> 00:19:57.714 From preclinical to clinical,
NOTE Confidence: 0.91434333333334

00:19:57.714 --> 00:20:00.410 we may ask specifically and we do
NOTE Confidence: 0.91434333333334

00:20:00.410 --> 00:20:02.125 those solicitations in order to
NOTE Confidence: 0.91434333333334

00:20:02.125 --> 00:20:04.579 spark research in a particular area.
NOTE Confidence: 0.91434333333334

00:20:04.580 --> 00:20:07.310 So we do expect to have more
NOTE Confidence: 0.91434333333334

00:20:07.310 --> 00:20:10.620 solicitations in the HealthEquity space,
NOTE Confidence: 0.91434333333334

00:20:10.620 --> 00:20:14.078 and you know other spaces as well.
NOTE Confidence: 0.91434333333334

00:20:14.080 --> 00:20:15.529 Just wanted to put that in there
NOTE Confidence: 0.91434333333334

00:20:15.529 --> 00:20:16.913 too that there are certain things
NOTE Confidence: 0.91434333333334

00:20:16.913 --> 00:20:18.341 so the other benefit of speaking

NOTE Confidence: 0.91434333333334
00:20:18.341 --> 00:20:19.921 to us ahead of time is that there
NOTE Confidence: 0.91434333333334
00:20:19.921 --> 00:20:21.614 may be some solicitations out there
NOTE Confidence: 0.91434333333334
00:20:21.614 --> 00:20:24.260 that you may not be familiar of,
NOTE Confidence: 0.91434333333334
00:20:24.260 --> 00:20:29.016 and there may be a benefit of applying to.
NOTE Confidence: 0.91434333333334
00:20:29.020 --> 00:20:32.620 Solicitations so.
NOTE Confidence: 0.91434333333334
00:20:32.620 --> 00:20:33.610 Martin aren't
NOTE Confidence: 0.80344698111111
00:20:33.620 --> 00:20:36.473 your question just a tad bit you know I?
NOTE Confidence: 0.80344698111111
00:20:36.480 --> 00:20:38.685 I don't know if biomarkers is the
NOTE Confidence: 0.80344698111111
00:20:38.685 --> 00:20:41.508 sort of new tonight buzzword, I mean.
NOTE Confidence: 0.80344698111111
00:20:41.508 --> 00:20:43.671 Obviously there's a lot of research that
NOTE Confidence: 0.80344698111111
00:20:43.671 --> 00:20:46.024 covers all the areas that you mentioned
NOTE Confidence: 0.80344698111111
00:20:46.024 --> 00:20:47.860 from discovery to progress station.
NOTE Confidence: 0.80344698111111
00:20:47.860 --> 00:20:49.804 All that kind of stuff how we might predict
NOTE Confidence: 0.80344698111111
00:20:49.804 --> 00:20:51.457 whether somebody develops in the disease,
NOTE Confidence: 0.80344698111111
00:20:51.460 --> 00:20:53.076 that kind of thing.
NOTE Confidence: 0.80344698111111

00:20:53.076 --> 00:20:55.810 But I think you know from our interests
NOTE Confidence: 0.8034469811111111

00:20:55.810 --> 00:20:57.560 where we've sort of focused on,
NOTE Confidence: 0.8034469811111111

00:20:57.560 --> 00:20:59.600 I think because technology has advanced
NOTE Confidence: 0.8034469811111111

00:20:59.600 --> 00:21:02.699 as much as it has and we have different.
NOTE Confidence: 0.8034469811111111

00:21:02.700 --> 00:21:03.468 Opportunities as well.
NOTE Confidence: 0.8034469811111111

00:21:03.468 --> 00:21:05.909 I think you see a lot more of these
NOTE Confidence: 0.8034469811111111

00:21:05.909 --> 00:21:07.673 kind of mirroring together like you,
NOTE Confidence: 0.8034469811111111

00:21:07.680 --> 00:21:08.524 Walter cautious,
NOTE Confidence: 0.8034469811111111

00:21:08.524 --> 00:21:11.900 has you know he has a distinct interest
NOTE Confidence: 0.8034469811111111

00:21:11.977 --> 00:21:15.113 in our sort of middle phase trials and
NOTE Confidence: 0.8034469811111111

00:21:15.113 --> 00:21:17.813 really trying to bring the treatment
NOTE Confidence: 0.8034469811111111

00:21:17.813 --> 00:21:20.113 closer to the biological target.
NOTE Confidence: 0.8034469811111111

00:21:20.120 --> 00:21:22.082 You know as a way of really sort of
NOTE Confidence: 0.8034469811111111

00:21:22.090 --> 00:21:24.358 having some basis for deciding whether or
NOTE Confidence: 0.8034469811111111

00:21:24.358 --> 00:21:27.226 not we should go on to do one of these
NOTE Confidence: 0.8034469811111111

00:21:27.226 --> 00:21:29.073 expensive large clinical type studies.

NOTE Confidence: 0.8034469811111111
00:21:29.073 --> 00:21:31.719 And that's what actually you know,
NOTE Confidence: 0.8034469811111111
00:21:31.720 --> 00:21:33.016 created neuro next.
NOTE Confidence: 0.8034469811111111
00:21:33.016 --> 00:21:35.176 For the broader neurology space,
NOTE Confidence: 0.8034469811111111
00:21:35.180 --> 00:21:36.554 and it's a lot of things
NOTE Confidence: 0.8034469811111111
00:21:36.554 --> 00:21:37.720 that we sometimes look for.
NOTE Confidence: 0.8034469811111111
00:21:37.720 --> 00:21:40.282 So when we when I think of you know where the
NOTE Confidence: 0.8034469811111111
00:21:40.282 --> 00:21:42.400 where the opportunities are for biomarkers,
NOTE Confidence: 0.8034469811111111
00:21:42.400 --> 00:21:44.284 I think there are multifaceted some
NOTE Confidence: 0.8034469811111111
00:21:44.284 --> 00:21:46.709 of its to learn about the disease.
NOTE Confidence: 0.8034469811111111
00:21:46.710 --> 00:21:48.814 Some of it you know is to help
NOTE Confidence: 0.8034469811111111
00:21:48.814 --> 00:21:50.404 potentially build in so that we
NOTE Confidence: 0.8034469811111111
00:21:50.404 --> 00:21:51.916 could use it more effectively in
NOTE Confidence: 0.8034469811111111
00:21:51.971 --> 00:21:53.777 some of these early phase trials,
NOTE Confidence: 0.8034469811111111
00:21:53.780 --> 00:21:55.068 and some of it might just be
NOTE Confidence: 0.8034469811111111
00:21:55.068 --> 00:21:55.900 in that discovery space.
NOTE Confidence: 0.8034469811111111

00:21:55.900 --> 00:21:57.118 And that's what Richard is talking about.

NOTE Confidence: 0.8034469811111111

00:21:57.120 --> 00:21:58.239 There's there's a.

NOTE Confidence: 0.8034469811111111

00:21:58.239 --> 00:22:00.104 There's a vast interest across

NOTE Confidence: 0.8034469811111111

00:22:00.104 --> 00:22:01.440 many different diseases,

NOTE Confidence: 0.8034469811111111

00:22:01.440 --> 00:22:03.360 not just stroke with, you know.

NOTE Confidence: 0.8034469811111111

00:22:03.360 --> 00:22:05.929 How we can sort of capitalize on?

NOTE Confidence: 0.8034469811111111

00:22:05.930 --> 00:22:07.778 You know what we now know in

NOTE Confidence: 0.8034469811111111

00:22:07.778 --> 00:22:09.049 the technologies that we have,

NOTE Confidence: 0.8034469811111111

00:22:09.050 --> 00:22:10.834 and how we might be able to combine

NOTE Confidence: 0.8034469811111111

00:22:10.834 --> 00:22:12.267 that for purposes of really

NOTE Confidence: 0.8034469811111111

00:22:12.267 --> 00:22:13.817 understanding the you know the

NOTE Confidence: 0.8034469811111111

00:22:13.817 --> 00:22:15.759 biology and the brain a little bit

NOTE Confidence: 0.8034469811111111

00:22:15.759 --> 00:22:17.584 better in that just looking to see

NOTE Confidence: 0.8034469811111111

00:22:17.584 --> 00:22:19.246 whether that's something safe to use.

NOTE Confidence: 0.9301437

00:22:21.250 --> 00:22:23.264 Excellent thank you for addressing

NOTE Confidence: 0.9301437

00:22:23.264 --> 00:22:24.930 my question, really appreciate it.

NOTE Confidence: 0.843465334090909
00:22:27.630 --> 00:22:28.962 That highlights as well the fact
NOTE Confidence: 0.843465334090909
00:22:28.962 --> 00:22:30.945 that like and I mentioned Scott and I
NOTE Confidence: 0.843465334090909
00:22:30.945 --> 00:22:32.829 particular 'cause we work on these a lot.
NOTE Confidence: 0.843465334090909
00:22:32.830 --> 00:22:34.062 We actually have different
NOTE Confidence: 0.843465334090909
00:22:34.062 --> 00:22:35.602 ways of looking at things.
NOTE Confidence: 0.843465334090909
00:22:35.610 --> 00:22:36.510 I value his opinion.
NOTE Confidence: 0.843465334090909
00:22:36.510 --> 00:22:38.451 A lot of this 'cause we we will
NOTE Confidence: 0.843465334090909
00:22:38.451 --> 00:22:40.047 attack a problem different ways and
NOTE Confidence: 0.843465334090909
00:22:40.047 --> 00:22:41.869 you will hear things differently.
NOTE Confidence: 0.843465334090909
00:22:41.870 --> 00:22:43.616 So that's the the benefit of
NOTE Confidence: 0.843465334090909
00:22:43.616 --> 00:22:45.615 calling you here and and having
NOTE Confidence: 0.843465334090909
00:22:45.615 --> 00:22:47.530 this discussion in different ways.
NOTE Confidence: 0.843465334090909
00:22:47.530 --> 00:22:49.636 Sort of thinking about research question
NOTE Confidence: 0.843465334090909
00:22:49.636 --> 00:22:52.029 and I think it's very important,
NOTE Confidence: 0.843465334090909
00:22:52.030 --> 00:22:54.074 and so that's something we can offer.
NOTE Confidence: 0.769666575

00:22:56.820 --> 00:22:57.741 Richard is got.
NOTE Confidence: 0.769666575

00:22:57.741 --> 00:22:59.019 It's it's Lawrence dancing.
NOTE Confidence: 0.769666575

00:22:59.020 --> 00:23:00.585 Hey, thanks so much for
NOTE Confidence: 0.769666575

00:23:00.585 --> 00:23:01.837 for talking with everyone
NOTE Confidence: 0.660970852

00:23:02.400 --> 00:23:03.100 and then I'll have it.
NOTE Confidence: 0.660970852

00:23:03.100 --> 00:23:04.606 Something that Kevin said earlier.
NOTE Confidence: 0.660970852

00:23:04.606 --> 00:23:06.770 Which is we have a range of people on my
NOTE Confidence: 0.660970852

00:23:06.770 --> 00:23:09.428 call from service fellows and stroking
NOTE Confidence: 0.784766995

00:23:09.440 --> 00:23:11.816 it fellows people who are writing
NOTE Confidence: 0.784766995

00:23:11.820 --> 00:23:13.788 caves and and have kids and are
NOTE Confidence: 0.843659463333333

00:23:13.800 --> 00:23:15.540 transitioning off of K
NOTE Confidence: 0.843659463333333

00:23:15.540 --> 00:23:17.232 since you larger grants.
NOTE Confidence: 0.843659463333333

00:23:17.232 --> 00:23:19.352 And I thought maybe it would
NOTE Confidence: 0.843659463333333

00:23:19.352 --> 00:23:21.008 be helpful if you could just
NOTE Confidence: 0.843659463333333

00:23:21.008 --> 00:23:22.374 comment a little bit on that.
NOTE Confidence: 0.843659463333333

00:23:22.374 --> 00:23:24.619 And I NDS initiatives for

NOTE Confidence: 0.8436594633333333
00:23:24.619 --> 00:23:27.634 those sort of early career.
NOTE Confidence: 0.8436594633333333
00:23:27.640 --> 00:23:30.000 Come and new investigator
NOTE Confidence: 0.8436594633333333
00:23:30.000 --> 00:23:31.500 statuses because those might
NOTE Confidence: 0.9583065577777778
00:23:31.510 --> 00:23:33.885 be pieces of information that
NOTE Confidence: 0.9583065577777778
00:23:33.885 --> 00:23:36.020 not everyone knows about and
NOTE Confidence: 0.923991727142857
00:23:36.030 --> 00:23:39.068 may help them in terms of planning
NOTE Confidence: 0.923991727142857
00:23:39.070 --> 00:23:40.738 that transition to independence as
NOTE Confidence: 0.923991727142857
00:23:40.738 --> 00:23:41.956 they're coming off their case and
NOTE Confidence: 0.923991727142857
00:23:41.956 --> 00:23:43.526 we're just being helpful to hear
NOTE Confidence: 0.923991727142857
00:23:43.526 --> 00:23:45.120 your perspectives on. Michael,
NOTE Confidence: 0.847511945
00:23:45.130 --> 00:23:46.606 make a couple comments in Richard.
NOTE Confidence: 0.847511945
00:23:46.610 --> 00:23:49.040 Please add on to what I probably don't know,
NOTE Confidence: 0.847511945
00:23:49.040 --> 00:23:51.340 but so there's you know we've been
NOTE Confidence: 0.847511945
00:23:51.340 --> 00:23:54.665 focusing a lot of discussion on these
NOTE Confidence: 0.847511945
00:23:54.665 --> 00:23:56.300 training opportunities, you know.
NOTE Confidence: 0.847511945

00:23:56.300 --> 00:23:57.924 And we talked, you know,
NOTE Confidence: 0.847511945

00:23:57.924 --> 00:23:59.736 probably more specific to this crowd.
NOTE Confidence: 0.847511945

00:23:59.740 --> 00:24:02.290 K20 threes, but there was other
NOTE Confidence: 0.847511945

00:24:02.290 --> 00:24:04.686 mechanisms as well and I would sort
NOTE Confidence: 0.847511945

00:24:04.686 --> 00:24:06.798 of emphasize that you know the way
NOTE Confidence: 0.847511945

00:24:06.798 --> 00:24:08.678 the training program was designed.
NOTE Confidence: 0.847511945

00:24:08.680 --> 00:24:11.550 This it's it's a way for us.
NOTE Confidence: 0.847511945

00:24:11.550 --> 00:24:15.600 You know the NIH two invest in an individual.
NOTE Confidence: 0.847511945

00:24:15.600 --> 00:24:17.004 He's interested in research,
NOTE Confidence: 0.847511945

00:24:17.004 --> 00:24:20.090 try and help you know through that mechanism.
NOTE Confidence: 0.847511945

00:24:20.090 --> 00:24:22.376 Provide them with the additional training
NOTE Confidence: 0.847511945

00:24:22.376 --> 00:24:25.109 around a project that doesn't have to be.
NOTE Confidence: 0.847511945

00:24:25.110 --> 00:24:26.650 You know, a Nobel project.
NOTE Confidence: 0.847511945

00:24:26.650 --> 00:24:27.990 I mean, it's it's really
NOTE Confidence: 0.847511945

00:24:27.990 --> 00:24:29.330 something that is of interest.
NOTE Confidence: 0.847511945

00:24:29.330 --> 00:24:30.320 That kind of gets started,

NOTE Confidence: 0.847511945

00:24:30.320 --> 00:24:32.752 but the focus really is on that training

NOTE Confidence: 0.847511945

00:24:32.752 --> 00:24:35.111 with an understanding that you know at

NOTE Confidence: 0.847511945

00:24:35.111 --> 00:24:37.940 the end of that that's training program.

NOTE Confidence: 0.847511945

00:24:37.940 --> 00:24:40.154 You know we have somebody who's

NOTE Confidence: 0.847511945

00:24:40.154 --> 00:24:42.488 really ready and capable of you know,

NOTE Confidence: 0.847511945

00:24:42.490 --> 00:24:44.346 supporting and being supported

NOTE Confidence: 0.847511945

00:24:44.346 --> 00:24:46.478 by RR R1 type markets, or are.

NOTE Confidence: 0.847511945

00:24:46.480 --> 00:24:47.545 Regular research grants,

NOTE Confidence: 0.847511945

00:24:47.545 --> 00:24:50.780 so it really is an investment in the person.

NOTE Confidence: 0.847511945

00:24:50.780 --> 00:24:51.740 That being said,

NOTE Confidence: 0.847511945

00:24:51.740 --> 00:24:54.437 moving past that 'cause there's a lot of

NOTE Confidence: 0.847511945

00:24:54.437 --> 00:24:56.777 different research mechanisms that we have,

NOTE Confidence: 0.847511945

00:24:56.780 --> 00:24:58.915 the new investigator status that

NOTE Confidence: 0.847511945

00:24:58.915 --> 00:25:01.831 you were talking about is just an

NOTE Confidence: 0.847511945

00:25:01.831 --> 00:25:03.949 effort that's been made NIH wide

NOTE Confidence: 0.847511945

00:25:03.949 --> 00:25:06.277 to help broaden a little bit.
NOTE Confidence: 0.847511945

00:25:06.280 --> 00:25:09.592 Some of those stringent paylin territories
NOTE Confidence: 0.847511945

00:25:09.592 --> 00:25:12.426 for investigators that are just
NOTE Confidence: 0.847511945

00:25:12.426 --> 00:25:15.156 walking into that competitive space.
NOTE Confidence: 0.847511945

00:25:15.160 --> 00:25:16.510 So basically what that means?
NOTE Confidence: 0.847511945

00:25:16.510 --> 00:25:18.635 Is that they're not really
NOTE Confidence: 0.847511945

00:25:18.635 --> 00:25:19.485 reviewed differently,
NOTE Confidence: 0.847511945

00:25:19.490 --> 00:25:21.310 although I mean study sections.
NOTE Confidence: 0.847511945

00:25:21.310 --> 00:25:23.776 Do they do distinguish between somebody
NOTE Confidence: 0.847511945

00:25:23.776 --> 00:25:26.565 who's a new investigator versus somebody
NOTE Confidence: 0.847511945

00:25:26.565 --> 00:25:28.709 who's an established investigator?
NOTE Confidence: 0.847511945

00:25:28.710 --> 00:25:30.120 They're still going to get
NOTE Confidence: 0.847511945

00:25:30.120 --> 00:25:31.248 evaluated on this science,
NOTE Confidence: 0.847511945

00:25:31.250 --> 00:25:33.248 but often what the institutes have
NOTE Confidence: 0.847511945

00:25:33.248 --> 00:25:35.210 done is they've extended pay lines,
NOTE Confidence: 0.847511945

00:25:35.210 --> 00:25:36.845 and there's certain situations to

NOTE Confidence: 0.847511945

00:25:36.845 --> 00:25:39.090 still be able to pay somebody.

NOTE Confidence: 0.847511945

00:25:39.090 --> 00:25:41.407 You know that may have been close,

NOTE Confidence: 0.847511945

00:25:41.410 --> 00:25:43.312 but maybe it's just rookie mistakes

NOTE Confidence: 0.847511945

00:25:43.312 --> 00:25:44.580 because they're still learning.

NOTE Confidence: 0.847511945

00:25:44.580 --> 00:25:46.518 You know, those aren't initiative guided.

NOTE Confidence: 0.847511945

00:25:46.520 --> 00:25:47.985 Things those are really sort

NOTE Confidence: 0.847511945

00:25:47.985 --> 00:25:49.450 of policy Dr driven things.

NOTE Confidence: 0.847511945

00:25:49.450 --> 00:25:50.812 It's just things that you know

NOTE Confidence: 0.847511945

00:25:50.812 --> 00:25:52.838 we try and do a broader space to

NOTE Confidence: 0.847511945

00:25:52.838 --> 00:25:53.898 help you know support,

NOTE Confidence: 0.847511945

00:25:53.900 --> 00:25:56.116 but I you know I always steer folks

NOTE Confidence: 0.847511945

00:25:56.116 --> 00:25:57.850 towards you know the opportunities

NOTE Confidence: 0.847511945

00:25:57.850 --> 00:25:59.710 of the training programs because

NOTE Confidence: 0.847511945

00:25:59.710 --> 00:26:01.339 I think they're great.

NOTE Confidence: 0.847511945

00:26:01.340 --> 00:26:01.912 You know,

NOTE Confidence: 0.847511945

00:26:01.912 --> 00:26:04.557 I think what happens is very often we get
NOTE Confidence: 0.847511945

00:26:04.557 --> 00:26:07.131 folks that will come to us and they'll say,
NOTE Confidence: 0.847511945

00:26:07.140 --> 00:26:07.540 you know,
NOTE Confidence: 0.847511945

00:26:07.540 --> 00:26:08.786 I want to do an R21
NOTE Confidence: 0.847511945

00:26:08.786 --> 00:26:10.016 because it's a small grant.
NOTE Confidence: 0.847511945

00:26:10.020 --> 00:26:11.658 It gets under the radar screen.
NOTE Confidence: 0.847511945

00:26:11.660 --> 00:26:13.382 It's perfect because I don't have
NOTE Confidence: 0.847511945

00:26:13.382 --> 00:26:14.980 preliminary data and all of that,
NOTE Confidence: 0.847511945

00:26:14.980 --> 00:26:17.284 and I don't know that that's necessarily the.
NOTE Confidence: 0.847511945

00:26:17.290 --> 00:26:18.108 This streamlined,
NOTE Confidence: 0.847511945

00:26:18.108 --> 00:26:20.971 easy way in because our 20 ones
NOTE Confidence: 0.847511945

00:26:20.971 --> 00:26:23.360 are a very unique specific type
NOTE Confidence: 0.847511945

00:26:23.360 --> 00:26:25.340 of mechanism that NIH uses,
NOTE Confidence: 0.847511945

00:26:25.340 --> 00:26:27.122 and it's not at all what
NOTE Confidence: 0.847511945

00:26:27.122 --> 00:26:28.310 investigators think it is.
NOTE Confidence: 0.847511945

00:26:28.310 --> 00:26:30.767 And so I think that you know

NOTE Confidence: 0.847511945

00:26:30.770 --> 00:26:32.820 the training route you know,

NOTE Confidence: 0.847511945

00:26:32.820 --> 00:26:34.398 particularly in the early stage career

NOTE Confidence: 0.847511945

00:26:34.398 --> 00:26:36.031 is is a really good opportunity

NOTE Confidence: 0.847511945

00:26:36.031 --> 00:26:37.597 to kind of get into that.

NOTE Confidence: 0.897664226666667

00:26:37.600 --> 00:26:39.688 The only other comment that I'll

NOTE Confidence: 0.897664226666667

00:26:39.688 --> 00:26:41.779 make on mechanisms because it's a

NOTE Confidence: 0.897664226666667

00:26:41.779 --> 00:26:44.005 convoluted sort of spaced for us 'cause

NOTE Confidence: 0.897664226666667

00:26:44.005 --> 00:26:46.162 there's so many is that I prefer that

NOTE Confidence: 0.897664226666667

00:26:46.162 --> 00:26:47.770 folks come to us, not necessarily.

NOTE Confidence: 0.897664226666667

00:26:47.770 --> 00:26:49.920 Thinking about what they want to apply to,

NOTE Confidence: 0.897664226666667

00:26:49.920 --> 00:26:51.495 but you know the interest in what

NOTE Confidence: 0.897664226666667

00:26:51.495 --> 00:26:53.060 they're trying to apply for a meeting

NOTE Confidence: 0.897664226666667

00:26:53.060 --> 00:26:54.785 that we focus on the project and then

NOTE Confidence: 0.897664226666667

00:26:54.785 --> 00:26:56.206 we can kind of maybe go backwards

NOTE Confidence: 0.897664226666667

00:26:56.206 --> 00:26:58.408 and find what best fits that space

NOTE Confidence: 0.897664226666667

00:26:58.408 --> 00:27:00.699 because you know there are different
NOTE Confidence: 0.897664226666667

00:27:00.699 --> 00:27:02.929 mechanisms intended across NIH to
NOTE Confidence: 0.897664226666667

00:27:02.929 --> 00:27:05.089 support different types of research.
NOTE Confidence: 0.897664226666667

00:27:05.090 --> 00:27:08.312 And you know if you were trying to write,
NOTE Confidence: 0.897664226666667

00:27:08.320 --> 00:27:10.296 you know a grant for a specific mechanism,
NOTE Confidence: 0.897664226666667

00:27:10.300 --> 00:27:11.600 thinking that your target is
NOTE Confidence: 0.897664226666667

00:27:11.600 --> 00:27:12.380 the mechanism first,
NOTE Confidence: 0.897664226666667

00:27:12.380 --> 00:27:14.354 you're probably going to fail before you
NOTE Confidence: 0.897664226666667

00:27:14.354 --> 00:27:16.300 succeed because it doesn't work that way.
NOTE Confidence: 0.897664226666667

00:27:16.300 --> 00:27:18.484 You know the mechanism is just literally.
NOTE Confidence: 0.897664226666667

00:27:18.490 --> 00:27:19.498 Something that facilitates
NOTE Confidence: 0.897664226666667

00:27:19.498 --> 00:27:21.850 our ability to to to fund it.
NOTE Confidence: 0.897664226666667

00:27:21.850 --> 00:27:24.266 So really the important part is the project,
NOTE Confidence: 0.897664226666667

00:27:24.270 --> 00:27:25.176 or in the case the training
NOTE Confidence: 0.897664226666667

00:27:25.176 --> 00:27:26.030 and that kind of thing.
NOTE Confidence: 0.897664226666667

00:27:26.030 --> 00:27:26.674 I don't know, Richard,

NOTE Confidence: 0.897664226666667
00:27:26.674 --> 00:27:27.830 do you have another thought on that?
NOTE Confidence: 0.897664226666667
00:27:27.830 --> 00:27:28.200 'cause I'm?
NOTE Confidence: 0.90596646625
00:27:29.310 --> 00:27:31.246 No, no, I I think that was great.
NOTE Confidence: 0.90596646625
00:27:31.250 --> 00:27:33.707 What you said I won't I just try to
NOTE Confidence: 0.90596646625
00:27:33.707 --> 00:27:35.973 attack the question from a different
NOTE Confidence: 0.90596646625
00:27:35.973 --> 00:27:38.202 perspective what what I would say
NOTE Confidence: 0.90596646625
00:27:38.202 --> 00:27:40.205 is that we actually have a training
NOTE Confidence: 0.90596646625
00:27:40.205 --> 00:27:42.470 office which is run by Steve Corn.
NOTE Confidence: 0.90596646625
00:27:42.470 --> 00:27:44.286 So I think that it would be important
NOTE Confidence: 0.90596646625
00:27:44.286 --> 00:27:46.028 if you have not to talk to him.
NOTE Confidence: 0.90596646625
00:27:46.030 --> 00:27:47.370 In addition to that,
NOTE Confidence: 0.90596646625
00:27:47.370 --> 00:27:49.380 we actually have a diversity training
NOTE Confidence: 0.90596646625
00:27:49.447 --> 00:27:51.297 office and I've referenced that.
NOTE Confidence: 0.90596646625
00:27:51.300 --> 00:27:53.640 So if you're an individual from
NOTE Confidence: 0.90596646625
00:27:53.640 --> 00:27:55.200 one of those underrepresented
NOTE Confidence: 0.90596646625

00:27:55.267 --> 00:27:57.182 categories that I talked about
NOTE Confidence: 0.90596646625

00:27:57.182 --> 00:27:59.490 earlier than you should speak with.
NOTE Confidence: 0.90596646625

00:27:59.490 --> 00:28:01.258 From Michelle zones London.
NOTE Confidence: 0.90596646625

00:28:01.258 --> 00:28:03.910 People from that office as well
NOTE Confidence: 0.90596646625

00:28:03.910 --> 00:28:05.494 because it's got mentioned, we do
NOTE Confidence: 0.90596646625

00:28:05.494 --> 00:28:08.079 have a lot of mechanisms that are there.
NOTE Confidence: 0.90596646625

00:28:08.080 --> 00:28:10.750 If you do have a K.
NOTE Confidence: 0.90596646625

00:28:10.750 --> 00:28:12.138 We as Scott mentioned,
NOTE Confidence: 0.90596646625

00:28:12.138 --> 00:28:14.220 that isn't investment and so having
NOTE Confidence: 0.90596646625

00:28:14.286 --> 00:28:16.169 a K does increase your chance of
NOTE Confidence: 0.90596646625

00:28:16.169 --> 00:28:18.012 going on and getting your your
NOTE Confidence: 0.90596646625

00:28:18.012 --> 00:28:20.273 first are even though people can get
NOTE Confidence: 0.90596646625

00:28:20.280 --> 00:28:22.758 ours without having case that that
NOTE Confidence: 0.90596646625

00:28:22.758 --> 00:28:25.000 there's definitely a benefit to that.
NOTE Confidence: 0.90596646625

00:28:25.000 --> 00:28:27.432 I guess the only other thing that I
NOTE Confidence: 0.90596646625

00:28:27.432 --> 00:28:30.050 would say if you're an early career.

NOTE Confidence: 0.90596646625

00:28:30.050 --> 00:28:32.045 A stage investigator and you don't have

NOTE Confidence: 0.90596646625

00:28:32.045 --> 00:28:34.850 a K and you haven't submitted in our I.

NOTE Confidence: 0.90596646625

00:28:34.850 --> 00:28:36.733 I think it's important to sort of

NOTE Confidence: 0.90596646625

00:28:36.733 --> 00:28:38.812 still sort of look at your career

NOTE Confidence: 0.90596646625

00:28:38.812 --> 00:28:40.910 trajectory and see you know where you

NOTE Confidence: 0.90596646625

00:28:40.910 --> 00:28:43.130 want to go and what it is that you are

NOTE Confidence: 0.90596646625

00:28:43.130 --> 00:28:44.690 interested in doing at Scott saying.

NOTE Confidence: 0.90596646625

00:28:44.690 --> 00:28:47.246 Do you want to develop a research area or

NOTE Confidence: 0.90596646625

00:28:47.246 --> 00:28:50.176 you continue to publish in a particular area?

NOTE Confidence: 0.90596646625

00:28:50.180 --> 00:28:51.938 Do you want to move in

NOTE Confidence: 0.90596646625

00:28:51.938 --> 00:28:53.110 the patient care space?

NOTE Confidence: 0.90596646625

00:28:53.110 --> 00:28:54.934 You know if you're having difficulty

NOTE Confidence: 0.90596646625

00:28:54.934 --> 00:28:57.312 coming up with a research project or

NOTE Confidence: 0.90596646625

00:28:57.312 --> 00:29:00.239 moving in that direction, do you need?

NOTE Confidence: 0.90596646625

00:29:00.239 --> 00:29:02.654 More training in that area.

NOTE Confidence: 0.90596646625

00:29:02.660 --> 00:29:04.510 There is a a program.
NOTE Confidence: 0.90596646625

00:29:04.510 --> 00:29:06.082 It's for, UM,
NOTE Confidence: 0.90596646625

00:29:06.082 --> 00:29:07.130 diverse individuals,
NOTE Confidence: 0.90596646625

00:29:07.130 --> 00:29:09.176 but it's called to transcend program
NOTE Confidence: 0.90596646625

00:29:09.176 --> 00:29:11.891 and it's for early career stage and
NOTE Confidence: 0.90596646625

00:29:11.891 --> 00:29:13.603 investigators from diverse backgrounds
NOTE Confidence: 0.90596646625

00:29:13.603 --> 00:29:16.465 where you can get masters in clinical
NOTE Confidence: 0.90596646625

00:29:16.465 --> 00:29:18.733 research and help to develop specific
NOTE Confidence: 0.90596646625

00:29:18.740 --> 00:29:22.191 games for project so it just sort
NOTE Confidence: 0.90596646625

00:29:22.191 --> 00:29:25.627 of consider is that what sort of?
NOTE Confidence: 0.90596646625

00:29:25.630 --> 00:29:27.690 Uhm?
NOTE Confidence: 0.90596646625

00:29:27.690 --> 00:29:29.972 Slowing you down if that's if that's
NOTE Confidence: 0.90596646625

00:29:29.972 --> 00:29:31.932 if you're interested in a career
NOTE Confidence: 0.90596646625

00:29:31.932 --> 00:29:33.762 and continuing a career in research,
NOTE Confidence: 0.90596646625

00:29:33.770 --> 00:29:35.548 so you really have to have that
NOTE Confidence: 0.90596646625

00:29:35.550 --> 00:29:37.506 that conversation with yourself,

NOTE Confidence: 0.90596646625
00:29:37.506 --> 00:29:39.951 because ultimately it is you
NOTE Confidence: 0.90596646625
00:29:39.951 --> 00:29:41.400 being comfortable.
NOTE Confidence: 0.90596646625
00:29:41.400 --> 00:29:43.240 Being able to get up and go to
NOTE Confidence: 0.90596646625
00:29:43.240 --> 00:29:44.645 work everyday and and feeling
NOTE Confidence: 0.90596646625
00:29:44.645 --> 00:29:46.120 good about what you're doing.
NOTE Confidence: 0.90596646625
00:29:46.120 --> 00:29:47.776 It's going to be a lot of work,
NOTE Confidence: 0.90596646625
00:29:47.780 --> 00:29:49.178 but if you are doing something
NOTE Confidence: 0.90596646625
00:29:49.178 --> 00:29:50.836 that you really like, then it it?
NOTE Confidence: 0.90596646625
00:29:50.836 --> 00:29:52.530 It doesn't seem as much as work,
NOTE Confidence: 0.90596646625
00:29:52.530 --> 00:29:54.826 so you really have to have that
NOTE Confidence: 0.90596646625
00:29:54.826 --> 00:29:56.227 conversation with yourself to
NOTE Confidence: 0.90596646625
00:29:56.227 --> 00:29:58.017 balance all those factors together.
NOTE Confidence: 0.90596646625
00:29:58.020 --> 00:30:00.876 Uhm, so I think that that's important.
NOTE Confidence: 0.90596646625
00:30:00.880 --> 00:30:02.818 Uh we we talked about I.
NOTE Confidence: 0.90596646625
00:30:02.820 --> 00:30:05.340 I mentioned the the first program,
NOTE Confidence: 0.90596646625

00:30:05.340 --> 00:30:08.420 which was a program to try to retain
NOTE Confidence: 0.90596646625

00:30:08.420 --> 00:30:11.989 cohorts of diverse individuals and academia.
NOTE Confidence: 0.90596646625

00:30:11.990 --> 00:30:13.814 So that's important because
NOTE Confidence: 0.90596646625

00:30:13.814 --> 00:30:15.638 it's a vulnerable state.
NOTE Confidence: 0.90596646625

00:30:15.640 --> 00:30:18.450 Being an early stage investigator,
NOTE Confidence: 0.90596646625

00:30:18.450 --> 00:30:20.222 you're sort of developing
NOTE Confidence: 0.90596646625

00:30:20.222 --> 00:30:21.994 your own research area,
NOTE Confidence: 0.90596646625

00:30:22.000 --> 00:30:24.056 developing your self as
NOTE Confidence: 0.90596646625

00:30:24.056 --> 00:30:25.598 a practicing clinician,
NOTE Confidence: 0.90371852

00:30:25.600 --> 00:30:28.456 and also a person, an academic department.
NOTE Confidence: 0.90371852

00:30:28.460 --> 00:30:29.780 And so there are a lot of things
NOTE Confidence: 0.90371852

00:30:29.780 --> 00:30:31.155 that may be going on in your mind.
NOTE Confidence: 0.90371852

00:30:31.160 --> 00:30:33.714 You can't talk to people about or
NOTE Confidence: 0.90371852

00:30:33.714 --> 00:30:36.351 you feel sort of singled out, or,
NOTE Confidence: 0.90371852

00:30:36.351 --> 00:30:38.697 you know, can't address those things.
NOTE Confidence: 0.90371852

00:30:38.700 --> 00:30:40.972 So again, you have to find the right

NOTE Confidence: 0.90371852

00:30:40.972 --> 00:30:42.850 people to talk to, to do those.

NOTE Confidence: 0.90371852

00:30:42.850 --> 00:30:44.100 And there are people that

NOTE Confidence: 0.90371852

00:30:44.100 --> 00:30:45.437 are there to to help you.

NOTE Confidence: 0.90371852

00:30:45.440 --> 00:30:48.592 And if we can help at the NIH, then sort of.

NOTE Confidence: 0.90371852

00:30:48.592 --> 00:30:50.735 You know, let us know.

NOTE Confidence: 0.90371852

00:30:50.735 --> 00:30:52.960 I have my email there.

NOTE Confidence: 0.90371852

00:30:52.960 --> 00:30:54.705 That again, was a roundabout

NOTE Confidence: 0.90371852

00:30:54.705 --> 00:30:56.450 way to answering the question,

NOTE Confidence: 0.90371852

00:30:56.450 --> 00:30:57.695 but wanted to say something

NOTE Confidence: 0.90371852

00:30:57.695 --> 00:30:58.940 different from what God said.

NOTE Confidence: 0.90371852

00:30:58.940 --> 00:31:02.048 So just think just think about that.

NOTE Confidence: 0.90371852

00:31:02.050 --> 00:31:02.360 Yeah,

NOTE Confidence: 0.845131424

00:31:02.370 --> 00:31:03.714 I'm gonna have to jump off of

NOTE Confidence: 0.845131424

00:31:03.714 --> 00:31:05.190 that DSMB and I think you got it.

NOTE Confidence: 0.845131424

00:31:05.190 --> 00:31:06.588 Your session is going to continue,

NOTE Confidence: 0.845131424

00:31:06.590 --> 00:31:08.648 but the only thing that I would
NOTE Confidence: 0.845131424

00:31:08.648 --> 00:31:11.272 sort of part with is patience and
NOTE Confidence: 0.845131424

00:31:11.272 --> 00:31:14.277 persistence are are really important
NOTE Confidence: 0.845131424

00:31:14.277 --> 00:31:17.580 attributes to success as well as
NOTE Confidence: 0.845131424

00:31:17.580 --> 00:31:19.580 acknowledging that frustration and
NOTE Confidence: 0.845131424

00:31:19.580 --> 00:31:22.399 failure is part of the process.
NOTE Confidence: 0.845131424

00:31:22.400 --> 00:31:23.580 You know it, it doesn't.
NOTE Confidence: 0.845131424

00:31:23.580 --> 00:31:24.723 You know nothing.
NOTE Confidence: 0.845131424

00:31:24.723 --> 00:31:26.247 Nothing become successful overnight.
NOTE Confidence: 0.845131424

00:31:26.250 --> 00:31:27.336 I mean, I think it's it.
NOTE Confidence: 0.845131424

00:31:27.340 --> 00:31:29.940 It takes time, but if you do invest
NOTE Confidence: 0.845131424

00:31:29.940 --> 00:31:32.760 that that patients in that persistence.
NOTE Confidence: 0.845131424

00:31:32.760 --> 00:31:34.716 It it's, you know, we've seen,
NOTE Confidence: 0.845131424

00:31:34.720 --> 00:31:37.110 I think more rewards than than
NOTE Confidence: 0.845131424

00:31:37.110 --> 00:31:39.810 in failures in the long run.
NOTE Confidence: 0.89166426375

00:31:42.700 --> 00:31:44.080 Good thanks, thanks God.

NOTE Confidence: 0.89166426375
00:31:44.080 --> 00:31:45.460 Thanks for hanging around.
NOTE Confidence: 0.89166426375
00:31:45.460 --> 00:31:48.187 I see a question from Mike in the chat.
NOTE Confidence: 0.89166426375
00:31:48.190 --> 00:31:51.540 I mean I, I think yeah if you want
NOTE Confidence: 0.89166426375
00:31:51.540 --> 00:31:53.619 to email me we can talk about that.
NOTE Confidence: 0.89166426375
00:31:53.620 --> 00:31:54.634 We do have.
NOTE Confidence: 0.89166426375
00:31:54.634 --> 00:31:57.000 We have a separate line of funding
NOTE Confidence: 0.89166426375
00:31:57.081 --> 00:31:59.176 for projects in the 80RD space,
NOTE Confidence: 0.89166426375
00:31:59.176 --> 00:32:01.960 but you know that you have to think
NOTE Confidence: 0.89166426375
00:32:02.039 --> 00:32:05.930 which between delirium versus.
NOTE Confidence: 0.89166426375
00:32:05.930 --> 00:32:08.857 You know mild cognitive impairment going
NOTE Confidence: 0.89166426375
00:32:08.857 --> 00:32:11.216 along the trajectory of sort of that
NOTE Confidence: 0.89166426375
00:32:11.216 --> 00:32:14.143 ADR BSP versus delirium from one of the
NOTE Confidence: 0.89166426375
00:32:14.143 --> 00:32:16.680 other factors that can cause delirium.
NOTE Confidence: 0.89166426375
00:32:16.680 --> 00:32:19.928 So, but I I think it's an
NOTE Confidence: 0.89166426375
00:32:19.928 --> 00:32:22.022 interesting topic and we can talk
NOTE Confidence: 0.89166426375

00:32:22.022 --> 00:32:23.660 about that more if you want to.

NOTE Confidence: 0.89166426375

00:32:23.660 --> 00:32:25.080 I don't know if you,

NOTE Confidence: 0.89166426375

00:32:25.080 --> 00:32:28.090 I know you're have a tight timeline, so.

NOTE Confidence: 0.89166426375

00:32:28.090 --> 00:32:29.700 Uh, I think we're gonna have to

NOTE Confidence: 0.89166426375

00:32:29.700 --> 00:32:31.340 stop the next minute so it may

NOTE Confidence: 0.89166426375

00:32:31.340 --> 00:32:32.971 be better if you just email me

NOTE Confidence: 0.89166426375

00:32:32.971 --> 00:32:34.553 and we can talk about it more.

NOTE Confidence: 0.857886265

00:32:37.760 --> 00:32:40.280 Thank you so much, Richard and

NOTE Confidence: 0.857886265

00:32:40.280 --> 00:32:42.989 Scott and everyone for attending a.

NOTE Confidence: 0.857886265

00:32:42.990 --> 00:32:44.998 I think we will go ahead and move.
