NOTE duration:"00:02:36.7770000"

NOTE recognizability:0.903

NOTE language:en-us

NOTE Confidence: 0.90260917

00:00:10.100 --> 00:00:11.755 So we oftentimes get questions.

NOTE Confidence: 0.90260917

00:00:11.755 --> 00:00:13.813 What's the difference between the clinical

NOTE Confidence: 0.90260917

00:00:13.813 --> 00:00:15.907 track and the clinician educator track?

NOTE Confidence: 0.90260917

00:00:15.910 --> 00:00:17.968 And because they have many similarities,

NOTE Confidence: 0.90260917

00:00:17.970 --> 00:00:20.016 if you look on those metrics,

NOTE Confidence: 0.90260917

00:00:20.020 --> 00:00:22.605 the similarities are in terms

NOTE Confidence: 0.90260917

00:00:22.605 --> 00:00:24.673 of their important contribution.

NOTE Confidence: 0.90260917

00:00:24.680 --> 00:00:26.834 Provide the highest quality of clinical

NOTE Confidence: 0.90260917

00:00:26.834 --> 00:00:29.139 care they may have involvement with

NOTE Confidence: 0.90260917

00:00:29.139 --> 00:00:31.932 trainees if they have access to trainees.

NOTE Confidence: 0.90260917

00:00:31.940 --> 00:00:34.397 People who may be at sites outside

NOTE Confidence: 0.90260917

00:00:34.397 --> 00:00:37.159 of the New Haven area may not

NOTE Confidence: 0.90260917

00:00:37.159 --> 00:00:39.194 have trainees at their site,

NOTE Confidence: 0.90260917

00:00:39.200 --> 00:00:42.629 so that may be true for the clinical track.

NOTE Confidence: 0.90260917

00:00:42.630 --> 00:00:43.416 In particular.

NOTE Confidence: 0.90260917

00:00:43.416 --> 00:00:45.774 Oftentimes they may support or conduct

NOTE Confidence: 0.90260917

00:00:45.774 --> 00:00:47.600 clinical investigation of different types.

NOTE Confidence: 0.90260917

00:00:47.600 --> 00:00:49.892 This is often within the clinic

NOTE Confidence: 0.90260917

00:00:49.892 --> 00:00:51.420 context of their practice.

NOTE Confidence: 0.90260917

00:00:51.420 --> 00:00:53.410 Certainly we all expect exemplary

NOTE Confidence: 0.90260917

00:00:53.410 --> 00:00:56.210 professional conduct of all of our faculty.

NOTE Confidence: 0.90260917

00:00:56.210 --> 00:00:58.765 The differences are in terms of education,

NOTE Confidence: 0.90260917

00:00:58.770 --> 00:01:01.008 the clinical track faculty typically teach

NOTE Confidence: 0.90260917

00:01:01.008 --> 00:01:03.899 in a clinical setting that's not always true,

NOTE Confidence: 0.90260917

00:01:03.900 --> 00:01:04.290 really.

NOTE Confidence: 0.90260917

00:01:04.290 --> 00:01:07.020 It depends upon you may be involved

NOTE Confidence: 0.90260917

00:01:07.020 --> 00:01:09.362 with leadership of of a teaching of

NOTE Confidence: 0.90260917

00:01:09.362 --> 00:01:11.580 a fellowship program or a residency.

NOTE Confidence: 0.90260917

00:01:11.580 --> 00:01:13.776 Some aspect of a residency program.

NOTE Confidence: 0.90260917

00:01:13.780 --> 00:01:16.671 You can still be on the clinical

NOTE Confidence: 0.90260917

00:01:16.671 --> 00:01:18.470 track and do that.

NOTE Confidence: 0.90260917

00:01:18.470 --> 00:01:21.480 But the clinical track is now seems

NOTE Confidence: 0.90260917

00:01:21.480 --> 00:01:24.783 to be embracing our people who are

NOTE Confidence: 0.90260917

00:01:24.783 --> 00:01:27.188 doing clinical or teaching locally

NOTE Confidence: 0.90260917

00:01:27.188 --> 00:01:30.015 and not necessarily getting doing

NOTE Confidence: 0.90260917

00:01:30.015 --> 00:01:32.840 scholarship that might be giving

NOTE Confidence: 0.90260917

00:01:32.840 --> 00:01:36.374 them more of a regional or national

NOTE Confidence: 0.90260917

00:01:36.374 --> 00:01:39.389 reputation for their their their work.

NOTE Confidence: 0.90260917

00:01:39.390 --> 00:01:42.372 The CE track typically includes more

NOTE Confidence: 0.90260917

00:01:42.372 --> 00:01:44.654 didactic sessions, formal courses,

NOTE Confidence: 0.90260917

00:01:44.654 --> 00:01:47.864 and more leadership in general.

NOTE Confidence: 0.90260917

00:01:47.870 --> 00:01:48.468 And again,

NOTE Confidence: 0.90260917

00:01:48.468 --> 00:01:49.963 the main difference is scholarship

NOTE Confidence: 0.90260917

00:01:49.963 --> 00:01:51.961 is required on the clinical and

NOTE Confidence: 0.90260917

00:01:51.961 --> 00:01:53.008 clinician educator track.  
NOTE Confidence: 0.90260917

00:01:53.010 --> 00:01:55.250 And that's actually always been the case.  
NOTE Confidence: 0.90260917

00:01:55.250 --> 00:01:57.287 That was one of the reasons why  
NOTE Confidence: 0.90260917

00:01:57.287 --> 00:01:58.780 many of our faculty,  
NOTE Confidence: 0.90260917

00:01:58.780 --> 00:02:00.740 who you know many years ago were  
NOTE Confidence: 0.90260917

00:02:00.740 --> 00:02:02.675 on the clinician educator track for  
NOTE Confidence: 0.90260917

00:02:02.675 --> 00:02:04.733 extended periods of time was because  
NOTE Confidence: 0.90260917

00:02:04.733 --> 00:02:07.099 they were not developing a body of  
NOTE Confidence: 0.90260917

00:02:07.099 --> 00:02:08.731 scholarship where they were getting  
NOTE Confidence: 0.90260917

00:02:08.731 --> 00:02:10.336 recognized outside of the institution.  
NOTE Confidence: 0.90260917

00:02:10.340 --> 00:02:12.426 And that's just something that was written  
NOTE Confidence: 0.90260917

00:02:12.426 --> 00:02:14.508 into is written into our requirements,  
NOTE Confidence: 0.90260917

00:02:14.510 --> 00:02:17.282 and so I think with the creation of the  
NOTE Confidence: 0.90260917

00:02:17.282 --> 00:02:20.010 clinical track, and it's been the perception.  
NOTE Confidence: 0.90260917

00:02:20.010 --> 00:02:21.918 That suddenly we have changed the  
NOTE Confidence: 0.90260917

00:02:21.918 --> 00:02:23.589 requirements for scholarship on the on.

NOTE Confidence: 0.90260917

00:02:23.590 --> 00:02:25.222 The clinician educated track.

NOTE Confidence: 0.90260917

00:02:25.222 --> 00:02:27.262 But that's really not the

NOTE Confidence: 0.90260917

00:02:27.262 --> 00:02:29.107 case as I've always been.

NOTE Confidence: 0.90260917

00:02:29.110 --> 00:02:29.530 Fired.
