NOTE recognizability:0.860

NOTE language:en-us

NOTE Confidence: 0.8537306

00:00:00.000 --> 00:00:02.005 Aye, several new things have

NOTE Confidence: 0.8537306

00:00:02.005 --> 00:00:03.609 gone live with navigation

NOTE Confidence: 0.8537306

00:00:03.610 --> 00:00:05.626 today, and I wanted to make a little

NOTE Confidence: 0.8537306

00:00:05.626 --> 00:00:07.480 video to show you how they work.

NOTE Confidence: 0.8537306

00:00:07.480 --> 00:00:09.290 So as you can see, I've landed

NOTE Confidence: 0.8537306

00:00:09.290 --> 00:00:11.089 here on the MD program home page.

NOTE Confidence: 0.8537306

00:00:11.090 --> 00:00:12.896 I want you to keep an eye

NOTE Confidence: 0.8537306

00:00:12.900 --> 00:00:15.700 on this Topper. As I scroll up

NOTE Confidence: 0.8537306

00:00:15.700 --> 00:00:18.060 the page to the top or disappears,

NOTE Confidence: 0.8537306

00:00:18.060 --> 00:00:21.469 scroll back down the top or reappears.

NOTE Confidence: 0.8537306

00:00:21.470 --> 00:00:24.977 If I get deep into your site,

NOTE Confidence: 0.87283725

00:00:24.980 --> 00:00:26.988 let's say I'm searching

NOTE Confidence: 0.87283725

00:00:26.988 --> 00:00:28.996 around in the curriculum.

NOTE Confidence: 0.87283725

00:00:29.000 --> 00:00:32.006 Actually, let's go into advanced training,
NOTE Confidence: 0.87283725

00:00:32.010 --> 00:00:34.520 clinical electives, elective sub internship
NOTE Confidence: 0.87283725

00:00:34.520 --> 00:00:38.198 listings. I'm pretty deep into this
NOTE Confidence: 0.87283725

00:00:38.198 --> 00:00:41.142 contextual navigation now. As default.
NOTE Confidence: 0.87283725

00:00:41.142 --> 00:00:44.448 I scroll up and both contextual
NOTE Confidence: 0.87283725

00:00:44.448 --> 00:00:46.726 navigation and Topper navigation
NOTE Confidence: 0.87283725

00:00:46.726 --> 00:00:50.492 scroll away but the full list of.
NOTE Confidence: 0.87283725

00:00:50.500 --> 00:00:52.130 Bread crumbs is here always.
NOTE Confidence: 0.87283725

00:00:52.130 --> 00:00:54.335 You can actually see the bread crumbs
NOTE Confidence: 0.87283725

00:00:54.335 --> 00:00:56.988 for the site itself and then the bread
NOTE Confidence: 0.87283725

00:00:56.988 --> 00:00:59.280 crumbs deep into the site. So you
NOTE Confidence: 0.8862915

00:00:59.280 --> 00:01:01.793 can navigate around that way if I
NOTE Confidence: 0.8862915

00:01:01.793 --> 00:01:04.070 turn on contextual navigation. It
NOTE Confidence: 0.89639515

00:01:04.070 --> 00:01:05.477 stays sticky forever.
NOTE Confidence: 0.89639515

00:01:05.477 --> 00:01:08.760 It's always on the page and that.
NOTE Confidence: 0.89639515

00:01:08.760 --> 00:01:09.930 Maintains that setting

NOTE Confidence: 0.7812309

00:01:09.930 --> 00:01:11.640 throughout your visit,

NOTE Confidence: 0.7812309

00:01:11.640 --> 00:01:15.030 so anywhere I go. That little plus

NOTE Confidence: 0.8186096

00:01:15.030 --> 00:01:17.878 minus has stayed on.

NOTE Confidence: 0.8186096

00:01:17.878 --> 00:01:20.948 And it stays sticky. Thanks.

NOTE Confidence: 0.8186096

00:01:20.948 --> 00:01:22.038 I hope that was helpful.
