WEBVTT

- 1 00:00:16.400 --> 00:00:20.059 Over 90 percent of the world's population breathes toxic
- $2\ 00:00:20.259 --> 00:00:23.276$ air. But what are we talking about when we say toxic air?
- 3 00:00:23.930 --> 00:00:26.990 One of the most critical air pollutants is particulate matter
- $4\ 00:00:27.320 --> 00:00:30.560$ or PM. PM Is a complex mixture
- $5\ 00:00:30.890 \longrightarrow 00:00:31.850$ of solids.
- 6~00:00:34.190 --> 00:00:35.020 Gases.
- 7 00:00:37.290 --> 00:00:38.130 Liquids.
- $8\ 00:00:44.710 --> 00:00:48.070$ [blender] But where exactly does PM come from?
- 9 00:00:49.600 --> 00:00:53.109 Some PM is directly admitted from human activities like industrial
- $10\ 00{:}00{:}53.309 \dashrightarrow 00{:}00{:}55.720$ processes power plants and fossil fuel combustion.
- $11\ 00{:}00{:}56.500 \dashrightarrow 00{:}00{:}59.590$ Others formed from natural sources including wind blown dust
- $12\ 00:00:59.790 \longrightarrow 00:01:03.580$ and wildfires. PM2.5 can penetrate deep into the lungs,
- $13\ 00:01:03.820 \longrightarrow 00:01:05.900$ respiratory tract and bloodstream.
- $14\ 00{:}01{:}06.460 \dashrightarrow 00{:}01{:}10.269$ On a global scale the simple act of breathing is killing seven
- $15\ 00{:}01{:}10.469 {\:\hbox{--}{>}\:} 00{:}01{:}13.809$ million people a year and harming billions more due
- $16\ 00:01:14.009 --> 00:01:15.130$ to declining smoking rates.
- $17\ 00{:}01{:}15.490 \dashrightarrow 00{:}01{:}19.830$ Air pollution now causes more deaths annually than
