

WEBVTT

NOTE duration:"00:58:28"

NOTE recognizability:0.870

NOTE language:en-us

NOTE Confidence: 0.909498882666666

00:00:00.000 --> 00:00:02.675 All right. Well, welcome, everyone.

NOTE Confidence: 0.909498882666666

00:00:02.675 --> 00:00:05.350 I'm just going to go

NOTE Confidence: 0.909498882666666

00:00:05.446 --> 00:00:07.926 ahead and share my screen.

NOTE Confidence: 0.909498882666666

00:00:07.930 --> 00:00:14.080 Welcome to our. Just make sure I.

NOTE Confidence: 0.909498882666666

00:00:14.080 --> 00:00:15.220 For the panelists,

NOTE Confidence: 0.909498882666666

00:00:15.220 --> 00:00:16.940 is everyone seeing one screen?

NOTE Confidence: 0.909498882666666

00:00:16.940 --> 00:00:19.408 Hopefully, yes. So thank you.

NOTE Confidence: 0.909498882666666

00:00:19.408 --> 00:00:20.972 All right. Welcome, everyone,

NOTE Confidence: 0.909498882666666

00:00:20.972 --> 00:00:25.746 to our Smilo Cancer Hospital town hall.

NOTE Confidence: 0.909498882666666

00:00:25.750 --> 00:00:27.052 I'm Kim Slessor,

NOTE Confidence: 0.909498882666666

00:00:27.052 --> 00:00:29.656 vice president of patient services for

NOTE Confidence: 0.909498882666666

00:00:29.656 --> 00:00:33.018 Smilo and joined by my dyad partner,

NOTE Confidence: 0.909498882666666

00:00:33.020 --> 00:00:34.388 Doctor Kevin Billingsley.

NOTE Confidence: 0.909498882666666

00:00:34.388 --> 00:00:37.124 We have a few announcements to
NOTE Confidence: 0.909498882666666

00:00:37.124 --> 00:00:39.670 go over and a few highlights,
NOTE Confidence: 0.909498882666666

00:00:39.670 --> 00:00:42.494 but the majority of our town hall today
NOTE Confidence: 0.909498882666666

00:00:42.494 --> 00:00:45.389 will be our agenda as you see below.
NOTE Confidence: 0.909498882666666

00:00:45.390 --> 00:00:47.805 So we have with us Doctor Jensen
NOTE Confidence: 0.909498882666666

00:00:47.805 --> 00:00:50.635 Morris to go over some updates on
NOTE Confidence: 0.909498882666666

00:00:50.635 --> 00:00:53.209 code policies for the health system
NOTE Confidence: 0.909498882666666

00:00:53.292 --> 00:00:55.667 and then our program highlight.
NOTE Confidence: 0.909498882666666

00:00:55.670 --> 00:00:58.575 This evening is our Center for GI
NOTE Confidence: 0.909498882666666

00:00:58.575 --> 00:01:01.875 cancers and we are very fortunate to
NOTE Confidence: 0.909498882666666

00:01:01.875 --> 00:01:05.768 have doctors Pamela Kuntz and Manju
NOTE Confidence: 0.909498882666666

00:01:05.768 --> 00:01:09.716 and Chavier Lord with us this evening.
NOTE Confidence: 0.909498882666666

00:01:09.720 --> 00:01:12.674 So very excited for them to present.
NOTE Confidence: 0.909498882666666

00:01:12.680 --> 00:01:15.025 And then hopefully this month we will
NOTE Confidence: 0.909498882666666

00:01:15.025 --> 00:01:17.548 have time for questions and answers.
NOTE Confidence: 0.909498882666666

00:01:17.550 --> 00:01:19.344 So start to think about those

NOTE Confidence: 0.909498882666666
00:01:19.344 --> 00:01:21.270 questions that you might want to ask.
NOTE Confidence: 0.909498882666666
00:01:21.270 --> 00:01:23.566 We we have been trying to make
NOTE Confidence: 0.909498882666666
00:01:23.566 --> 00:01:25.770 the agenda a little lighter.
NOTE Confidence: 0.909498882666666
00:01:25.770 --> 00:01:27.800 So that we have more time for Q&A.
NOTE Confidence: 0.909498882666666
00:01:27.800 --> 00:01:30.040 So there should be plenty of time to
NOTE Confidence: 0.909498882666666
00:01:30.040 --> 00:01:32.190 answer any questions that anybody has.
NOTE Confidence: 0.928415394
00:01:35.610 --> 00:01:36.680 So we always like to
NOTE Confidence: 0.836933485789474
00:01:36.690 --> 00:01:39.406 start out with making sure that we're
NOTE Confidence: 0.836933485789474
00:01:39.406 --> 00:01:41.390 highlighting things to celebrate and
NOTE Confidence: 0.836933485789474
00:01:41.390 --> 00:01:44.008 smile and then the Yale Cancer Center.
NOTE Confidence: 0.836933485789474
00:01:44.010 --> 00:01:46.738 And so on March 19th of every year
NOTE Confidence: 0.836933485789474
00:01:46.738 --> 00:01:49.849 that is our day that we celebrate
NOTE Confidence: 0.836933485789474
00:01:49.849 --> 00:01:51.725 in the nursing profession,
NOTE Confidence: 0.836933485789474
00:01:51.730 --> 00:01:52.693 Certified Nurses Day.
NOTE Confidence: 0.836933485789474
00:01:52.693 --> 00:01:55.544 So this is a day where we really
NOTE Confidence: 0.836933485789474

00:01:55.544 --> 00:01:58.199 recognize our nurses who have
NOTE Confidence: 0.836933485789474

00:01:58.199 --> 00:01:59.792 achieved specialty certification.
NOTE Confidence: 0.836933485789474

00:01:59.800 --> 00:02:01.468 So in order to do that,
NOTE Confidence: 0.836933485789474

00:02:01.470 --> 00:02:04.080 a nurses generally have to work.
NOTE Confidence: 0.836933485789474

00:02:04.080 --> 00:02:06.201 At least two years in that specialty
NOTE Confidence: 0.836933485789474

00:02:06.201 --> 00:02:08.259 and then they have to study and
NOTE Confidence: 0.836933485789474

00:02:08.259 --> 00:02:09.891 sit for an exam that really
NOTE Confidence: 0.836933485789474

00:02:09.960 --> 00:02:11.960 demonstrates their competence and
NOTE Confidence: 0.836933485789474

00:02:11.960 --> 00:02:13.960 expertise within that specialty.
NOTE Confidence: 0.836933485789474

00:02:13.960 --> 00:02:17.792 So 35% of all of our smilo nurses
NOTE Confidence: 0.836933485789474

00:02:17.792 --> 00:02:20.378 are certified in a specialty.
NOTE Confidence: 0.836933485789474

00:02:20.380 --> 00:02:23.108 And again, we do have a, you know,
NOTE Confidence: 0.836933485789474

00:02:23.108 --> 00:02:25.196 a number of new graduate nurses.
NOTE Confidence: 0.836933485789474

00:02:25.200 --> 00:02:27.769 So our our rate of eligible nurses
NOTE Confidence: 0.836933485789474

00:02:27.769 --> 00:02:29.908 is even higher than that 35%.
NOTE Confidence: 0.836933485789474

00:02:29.908 --> 00:02:32.212 But we want to make sure that we

NOTE Confidence: 0.836933485789474

00:02:32.212 --> 00:02:34.289 recognize all of our certified nurses.

NOTE Confidence: 0.836933485789474

00:02:34.290 --> 00:02:35.994 Today during this town hall and

NOTE Confidence: 0.836933485789474

00:02:35.994 --> 00:02:37.644 we're proud of their commitment

NOTE Confidence: 0.836933485789474

00:02:37.644 --> 00:02:38.997 to nursing excellence.

NOTE Confidence: 0.836933485789474

00:02:39.000 --> 00:02:40.981 So this was the picture of some

NOTE Confidence: 0.836933485789474

00:02:40.981 --> 00:02:42.798 of our certified nurses that was

NOTE Confidence: 0.836933485789474

00:02:42.798 --> 00:02:44.604 on social media over the weekend

NOTE Confidence: 0.836933485789474

00:02:44.604 --> 00:02:46.150 to celebrate the event.

NOTE Confidence: 0.836933485789474

00:02:46.150 --> 00:02:51.370 So thank you to all of our certified nurses.

NOTE Confidence: 0.836933485789474

00:02:51.370 --> 00:02:55.105 And before I go on to the next slide,

NOTE Confidence: 0.836933485789474

00:02:55.110 --> 00:02:57.046 we don't really have a slide for this,

NOTE Confidence: 0.836933485789474

00:02:57.050 --> 00:02:59.332 but it just so happened that today

NOTE Confidence: 0.836933485789474

00:02:59.332 --> 00:03:02.474 was also a day that there was a change

NOTE Confidence: 0.836933485789474

00:03:02.474 --> 00:03:05.737 in the health system mask use here.

NOTE Confidence: 0.836933485789474

00:03:05.737 --> 00:03:07.713 So we thought we would just take a

NOTE Confidence: 0.836933485789474

00:03:07.713 --> 00:03:09.390 minute and go over those changes.
NOTE Confidence: 0.836933485789474

00:03:09.390 --> 00:03:12.799 So there really are no changes to
NOTE Confidence: 0.836933485789474

00:03:12.799 --> 00:03:15.434 patients or employees wearing masks
NOTE Confidence: 0.836933485789474

00:03:15.434 --> 00:03:18.686 and clinical or patient care areas.
NOTE Confidence: 0.836933485789474

00:03:18.690 --> 00:03:21.210 So we wanted to make sure that everybody.
NOTE Confidence: 0.836933485789474

00:03:21.210 --> 00:03:23.508 Knew about the the minor changes
NOTE Confidence: 0.836933485789474

00:03:23.508 --> 00:03:25.040 across the health system.
NOTE Confidence: 0.836933485789474

00:03:25.040 --> 00:03:27.378 So mass art remain a requirement in
NOTE Confidence: 0.836933485789474

00:03:27.378 --> 00:03:29.706 all clinical and patient care areas
NOTE Confidence: 0.836933485789474

00:03:29.706 --> 00:03:32.214 and that are accessible to visitors
NOTE Confidence: 0.836933485789474

00:03:32.214 --> 00:03:33.859 throughout the health system.
NOTE Confidence: 0.836933485789474

00:03:33.860 --> 00:03:37.268 So this obviously includes our lobbies,
NOTE Confidence: 0.836933485789474

00:03:37.270 --> 00:03:39.436 our reception areas and waiting rooms,
NOTE Confidence: 0.836933485789474

00:03:39.440 --> 00:03:42.665 our hallways and elevators and
NOTE Confidence: 0.836933485789474

00:03:42.665 --> 00:03:43.955 charting areas.
NOTE Confidence: 0.836933485789474

00:03:43.960 --> 00:03:46.540 Located in the hallways are cafes

NOTE Confidence: 0.836933485789474
00:03:46.540 --> 00:03:48.780 and obviously our patient rooms,
NOTE Confidence: 0.836933485789474
00:03:48.780 --> 00:03:50.820 exam rooms and treatment rooms.
NOTE Confidence: 0.836933485789474
00:03:50.820 --> 00:03:52.688 So masks are still.
NOTE Confidence: 0.836933485789474
00:03:52.688 --> 00:03:55.023 Required during all of those
NOTE Confidence: 0.836933485789474
00:03:55.023 --> 00:03:56.919 activities and environments,
NOTE Confidence: 0.836933485789474
00:03:56.920 --> 00:03:58.840 but masks are optional now when
NOTE Confidence: 0.836933485789474
00:03:58.840 --> 00:04:01.448 you are in an area not designated
NOTE Confidence: 0.836933485789474
00:04:01.448 --> 00:04:03.538 for patient or visitor use.
NOTE Confidence: 0.836933485789474
00:04:03.540 --> 00:04:05.826 And so in general this can
NOTE Confidence: 0.836933485789474
00:04:05.826 --> 00:04:06.969 include our auditoriums,
NOTE Confidence: 0.836933485789474
00:04:06.970 --> 00:04:08.994 our conference rooms and
NOTE Confidence: 0.836933485789474
00:04:08.994 --> 00:04:11.018 closed door charting rooms.
NOTE Confidence: 0.836933485789474
00:04:11.020 --> 00:04:14.440 It can also include our lunch or break rooms,
NOTE Confidence: 0.836933485789474
00:04:14.440 --> 00:04:15.340 office spaces,
NOTE Confidence: 0.836933485789474
00:04:15.340 --> 00:04:17.884 administrative offices and hospital
NOTE Confidence: 0.836933485789474

00:04:17.884 --> 00:04:21.064 inter campus and parking shuttles.
NOTE Confidence: 0.836933485789474

00:04:21.070 --> 00:04:22.680 This was really a change.
NOTE Confidence: 0.836933485789474

00:04:22.680 --> 00:04:25.760 By the health system due to the decreasing
NOTE Confidence: 0.836933485789474

00:04:25.760 --> 00:04:28.577 level of COVID-19 transmission in the
NOTE Confidence: 0.836933485789474

00:04:28.577 --> 00:04:31.032 Community and an increasing level
NOTE Confidence: 0.836933485789474

00:04:31.032 --> 00:04:33.949 of immunity across the population,
NOTE Confidence: 0.836933485789474

00:04:33.950 --> 00:04:36.062 we've had mandatory masking
NOTE Confidence: 0.836933485789474

00:04:36.062 --> 00:04:39.230 with no change since early 2020.
NOTE Confidence: 0.836933485789474

00:04:39.230 --> 00:04:42.548 And again just these minor changes in
NOTE Confidence: 0.836933485789474

00:04:42.548 --> 00:04:45.730 non clinical areas and our infection
NOTE Confidence: 0.836933485789474

00:04:45.730 --> 00:04:48.119 prevention team and infectious disease
NOTE Confidence: 0.836933485789474

00:04:48.120 --> 00:04:50.214 teams will continue to monitor rates
NOTE Confidence: 0.836933485789474

00:04:50.214 --> 00:04:53.069 of COVID-19 and if there are significant.
NOTE Confidence: 0.836933485789474

00:04:53.070 --> 00:04:55.875 Increases then mass may be
NOTE Confidence: 0.836933485789474

00:04:55.875 --> 00:04:57.529 reinstated in all areas.
NOTE Confidence: 0.836933485789474

00:04:57.530 --> 00:04:59.936 So we're happy to take any

NOTE Confidence: 0.836933485789474

00:04:59.936 --> 00:05:01.540 questions later about that.

NOTE Confidence: 0.93651318

00:05:01.540 --> 00:05:06.670 There are some nice FAQ's that are

NOTE Confidence: 0.93651318

00:05:06.670 --> 00:05:09.748 available on the COVID-19 intranet site

NOTE Confidence: 0.93651318

00:05:09.748 --> 00:05:12.995 for anybody that would that needs it

NOTE Confidence: 0.93651318

00:05:12.995 --> 00:05:16.940 for their staff or for their own use.

NOTE Confidence: 0.93651318

00:05:16.940 --> 00:05:20.320 And now I'm going to turn it over to Kevin.

NOTE Confidence: 0.891922728

00:05:22.560 --> 00:05:24.128 Thanks, Kim. You know,

NOTE Confidence: 0.891922728

00:05:24.128 --> 00:05:26.480 as many of you are aware,

NOTE Confidence: 0.891922728

00:05:26.480 --> 00:05:28.775 last week was national Patient

NOTE Confidence: 0.891922728

00:05:28.775 --> 00:05:31.994 Safety Week and I think we would

NOTE Confidence: 0.891922728

00:05:31.994 --> 00:05:34.913 be remiss if we had this gathering

NOTE Confidence: 0.891922728

00:05:34.913 --> 00:05:37.795 today and did not under score

NOTE Confidence: 0.891922728

00:05:37.795 --> 00:05:40.175 the importance of our collective

NOTE Confidence: 0.891922728

00:05:40.180 --> 00:05:43.696 commitment to safety for our patients,

NOTE Confidence: 0.891922728

00:05:43.700 --> 00:05:45.620 not only in our hospital environment,

NOTE Confidence: 0.891922728

00:05:45.620 --> 00:05:47.825 but in all of our care environments.
NOTE Confidence: 0.8732257365

00:05:50.150 --> 00:05:52.138 And I just wanted to kind of
NOTE Confidence: 0.8732257365

00:05:52.138 --> 00:05:54.468 take a moment to under score the
NOTE Confidence: 0.8732257365

00:05:54.468 --> 00:05:56.580 importance of the work that many,
NOTE Confidence: 0.8732257365

00:05:56.580 --> 00:05:59.401 many people are doing around the organization
NOTE Confidence: 0.8732257365

00:05:59.401 --> 00:06:03.060 to help us make our patients safe every day.
NOTE Confidence: 0.8732257365

00:06:03.060 --> 00:06:08.235 First off, I want to just give a really
NOTE Confidence: 0.8732257365

00:06:08.235 --> 00:06:11.346 enthusiastic hats off and cheers for
NOTE Confidence: 0.8732257365

00:06:11.346 --> 00:06:14.399 our team on NP11 hematologic oncology.
NOTE Confidence: 0.8732257365

00:06:14.399 --> 00:06:18.130 As many of you know they have
NOTE Confidence: 0.8732257365

00:06:18.226 --> 00:06:20.510 joined the thousand day.
NOTE Confidence: 0.8732257365

00:06:20.510 --> 00:06:26.290 Bob, 1000 days without a caudy, so.
NOTE Confidence: 0.8732257365

00:06:26.290 --> 00:06:28.714 Incredible work, you know,
NOTE Confidence: 0.8732257365

00:06:28.714 --> 00:06:32.350 that's physicians, nurses.
NOTE Confidence: 0.8732257365

00:06:32.350 --> 00:06:34.078 ACA's environmental services
NOTE Confidence: 0.8732257365

00:06:34.078 --> 00:06:35.806 truly A-Team effort,

NOTE Confidence: 0.8732257365

00:06:35.810 --> 00:06:38.770 so thank you very much.

NOTE Confidence: 0.8732257365

00:06:38.770 --> 00:06:41.818 I also just want to give a quick shout out to

NOTE Confidence: 0.8732257365

00:06:41.818 --> 00:06:44.402 our quality and safety team here in smilow.

NOTE Confidence: 0.8732257365

00:06:44.410 --> 00:06:46.810 They work with all of us.

NOTE Confidence: 0.8732257365

00:06:46.810 --> 00:06:48.670 They're part of the system,

NOTE Confidence: 0.8732257365

00:06:48.670 --> 00:06:51.806 but they are an incredible group of

NOTE Confidence: 0.8732257365

00:06:51.806 --> 00:06:53.798 professionals under the leadership

NOTE Confidence: 0.8732257365

00:06:53.798 --> 00:06:56.050 of Michelle Kelvey Albert.

NOTE Confidence: 0.8732257365

00:06:56.050 --> 00:06:57.922 I don't want to leave anyone off the list,

NOTE Confidence: 0.8732257365

00:06:57.930 --> 00:07:00.290 but I do want to say a special

NOTE Confidence: 0.8732257365

00:07:00.290 --> 00:07:01.989 thanks to Chloe Shevlin.

NOTE Confidence: 0.8732257365

00:07:01.990 --> 00:07:02.768 Tom Collins,

NOTE Confidence: 0.8732257365

00:07:02.768 --> 00:07:05.880 Maria Mora and I know there are others,

NOTE Confidence: 0.8732257365

00:07:05.880 --> 00:07:06.265 but.

NOTE Confidence: 0.8732257365

00:07:06.265 --> 00:07:08.960 I I just want to recognize the

NOTE Confidence: 0.8732257365

00:07:08.960 --> 00:07:11.757 work that all of you do week in
NOTE Confidence: 0.8732257365

00:07:11.757 --> 00:07:14.070 and week out with all of our teams
NOTE Confidence: 0.8732257365

00:07:14.070 --> 00:07:16.140 to help us make our care safe.
NOTE Confidence: 0.900698513913044

00:07:18.620 --> 00:07:22.001 I think this slide is an important
NOTE Confidence: 0.900698513913044

00:07:22.001 --> 00:07:25.160 reminder because really being a high
NOTE Confidence: 0.900698513913044

00:07:25.160 --> 00:07:27.324 reliability organization is about
NOTE Confidence: 0.900698513913044

00:07:27.324 --> 00:07:30.618 creating a culture that supports that.
NOTE Confidence: 0.900698513913044

00:07:30.620 --> 00:07:33.994 And all of us continuing to learn,
NOTE Confidence: 0.900698513913044

00:07:34.000 --> 00:07:36.330 continuing to learn and our
NOTE Confidence: 0.900698513913044

00:07:36.330 --> 00:07:37.728 processes and operations,
NOTE Confidence: 0.900698513913044

00:07:37.730 --> 00:07:39.270 continuously examining,
NOTE Confidence: 0.900698513913044

00:07:39.270 --> 00:07:41.580 testing and refining,
NOTE Confidence: 0.900698513913044

00:07:41.580 --> 00:07:44.630 asking questions and then equally
NOTE Confidence: 0.900698513913044

00:07:44.630 --> 00:07:47.001 important is creating, sustaining.
NOTE Confidence: 0.900698513913044

00:07:47.001 --> 00:07:50.788 And nurturing a culture of high reliability.
NOTE Confidence: 0.900698513913044

00:07:50.790 --> 00:07:54.838 And I think this slide from that IHI

NOTE Confidence: 0.900698513913044

00:07:54.838 --> 00:07:58.172 really highlights the number of the key

NOTE Confidence: 0.900698513913044

00:07:58.172 --> 00:08:00.598 elements of what HRO culture is about.

NOTE Confidence: 0.900698513913044

00:08:00.598 --> 00:08:03.390 And I'm going to call out the 1st that I see,

NOTE Confidence: 0.900698513913044

00:08:03.390 --> 00:08:05.362 which is psychological safety.

NOTE Confidence: 0.900698513913044

00:08:05.362 --> 00:08:08.788 And that really is about creating an

NOTE Confidence: 0.900698513913044

00:08:08.788 --> 00:08:11.483 environment where any or all of us

NOTE Confidence: 0.900698513913044

00:08:11.483 --> 00:08:14.302 feels really good about speaking up or

NOTE Confidence: 0.900698513913044

00:08:14.302 --> 00:08:17.533 stopping the line when we see or feel

NOTE Confidence: 0.900698513913044

00:08:17.533 --> 00:08:19.638 something that we're concerned about.

NOTE Confidence: 0.900698513913044

00:08:19.640 --> 00:08:21.968 And I would encourage all of

NOTE Confidence: 0.900698513913044

00:08:21.968 --> 00:08:24.600 us to support that environment,

NOTE Confidence: 0.900698513913044

00:08:24.600 --> 00:08:25.888 whether you're a nurse,

NOTE Confidence: 0.900698513913044

00:08:25.888 --> 00:08:27.982 a nursing student, Med student,

NOTE Confidence: 0.900698513913044

00:08:27.982 --> 00:08:31.348 your opinion and your concerns are

NOTE Confidence: 0.900698513913044

00:08:31.348 --> 00:08:35.300 important and valuable. And please.

NOTE Confidence: 0.900698513913044

00:08:35.300 --> 00:08:39.506 Help us keep our patients safe.
NOTE Confidence: 0.900698513913044

00:08:39.510 --> 00:08:40.284 You know,
NOTE Confidence: 0.900698513913044

00:08:40.284 --> 00:08:43.902 it's a good time just to refresh all of
NOTE Confidence: 0.900698513913044

00:08:43.902 --> 00:08:47.342 our memory on what our champ behaviors are.
NOTE Confidence: 0.900698513913044

00:08:47.350 --> 00:08:50.038 You know, our importance,
NOTE Confidence: 0.900698513913044

00:08:50.038 --> 00:08:52.726 our emphasis on communication.
NOTE Confidence: 0.900698513913044

00:08:52.730 --> 00:08:54.326 Accurate, clear communication.
NOTE Confidence: 0.900698513913044

00:08:54.326 --> 00:08:57.518 Usually supported by an S bar.
NOTE Confidence: 0.900698513913044

00:08:57.520 --> 00:08:58.850 Effective handoffs.
NOTE Confidence: 0.900698513913044

00:08:58.850 --> 00:09:02.175 Meticulous attention to detail using
NOTE Confidence: 0.900698513913044

00:09:02.175 --> 00:09:05.540 star moments and star behavior.
NOTE Confidence: 0.900698513913044

00:09:05.540 --> 00:09:06.080 Mentoring,
NOTE Confidence: 0.900698513913044

00:09:06.080 --> 00:09:09.540 supporting each other to 200% accountability
NOTE Confidence: 0.900698513913044

00:09:09.540 --> 00:09:13.440 and that's certainly part of teamwork,
NOTE Confidence: 0.900698513913044

00:09:13.440 --> 00:09:14.060 communication,
NOTE Confidence: 0.900698513913044

00:09:14.060 --> 00:09:18.400 psychological safety and last but not least,

NOTE Confidence: 0.900698513913044
00:09:18.400 --> 00:09:20.875 practicing and accepting a questioning
NOTE Confidence: 0.900698513913044
00:09:20.875 --> 00:09:23.866 attitude against tying back to a
NOTE Confidence: 0.900698513913044
00:09:23.866 --> 00:09:26.076 sense of safety and accountability.
NOTE Confidence: 0.900698513913044
00:09:26.080 --> 00:09:28.370 So again,
NOTE Confidence: 0.900698513913044
00:09:28.370 --> 00:09:32.600 just a big note of thanks from Kim myself,
NOTE Confidence: 0.900698513913044
00:09:32.600 --> 00:09:35.642 the other Cancer Center in Smilo leaders.
NOTE Confidence: 0.900698513913044
00:09:35.642 --> 00:09:39.001 For the work that everyone does to
NOTE Confidence: 0.900698513913044
00:09:39.001 --> 00:09:42.187 support the safety of our patients.
NOTE Confidence: 0.900698513913044
00:09:42.190 --> 00:09:42.750 Next slide.
NOTE Confidence: 0.921680232307692
00:09:44.950 --> 00:09:47.491 So one of the things that I
NOTE Confidence: 0.921680232307692
00:09:47.491 --> 00:09:49.769 wanted to spend a few moments
NOTE Confidence: 0.921680232307692
00:09:49.770 --> 00:09:54.198 updating our community on is that.
NOTE Confidence: 0.921680232307692
00:09:54.200 --> 00:09:56.820 Our system is undergoing growth,
NOTE Confidence: 0.921680232307692
00:09:56.820 --> 00:09:59.975 change and development and as
NOTE Confidence: 0.921680232307692
00:09:59.975 --> 00:10:03.004 we adapt towards a specialty
NOTE Confidence: 0.921680232307692

00:10:03.004 --> 00:10:05.356 driven cancer care enterprise,
NOTE Confidence: 0.921680232307692

00:10:05.360 --> 00:10:07.957 we're going to have changes in our
NOTE Confidence: 0.921680232307692

00:10:07.957 --> 00:10:10.796 operations and the way we deploy our
NOTE Confidence: 0.921680232307692

00:10:10.796 --> 00:10:13.274 providers and our clinicians at different
NOTE Confidence: 0.921680232307692

00:10:13.348 --> 00:10:15.938 clinical sites around the enterprise.
NOTE Confidence: 0.921680232307692

00:10:15.940 --> 00:10:18.411 And one of the things that we're
NOTE Confidence: 0.921680232307692

00:10:18.411 --> 00:10:21.830 trying to do is to make high level
NOTE Confidence: 0.921680232307692

00:10:21.830 --> 00:10:24.105 expertise accessible to patients and
NOTE Confidence: 0.921680232307692

00:10:24.191 --> 00:10:28.268 families in a way that is close to home,
NOTE Confidence: 0.921680232307692

00:10:28.270 --> 00:10:31.665 yet also aggregates the key
NOTE Confidence: 0.921680232307692

00:10:31.665 --> 00:10:35.060 elements of specialty driven care.
NOTE Confidence: 0.921680232307692

00:10:35.060 --> 00:10:38.420 And to that end we have,
NOTE Confidence: 0.921680232307692

00:10:38.420 --> 00:10:41.283 we are we are going to be
NOTE Confidence: 0.921680232307692

00:10:41.283 --> 00:10:43.715 reconfiguring our smilo center in
NOTE Confidence: 0.921680232307692

00:10:43.715 --> 00:10:46.515 Orange to provide comprehensive care.
NOTE Confidence: 0.921680232307692

00:10:46.520 --> 00:10:48.832 For patients with benign

NOTE Confidence: 0.921680232307692
00:10:48.832 --> 00:10:50.748 hematology needs and diagnosis,
NOTE Confidence: 0.921680232307692
00:10:50.748 --> 00:10:54.411 this is a complex and growing group of
NOTE Confidence: 0.921680232307692
00:10:54.411 --> 00:10:57.589 patients and we have found that there
NOTE Confidence: 0.921680232307692
00:10:57.589 --> 00:11:00.431 are efficiencies as well as benefits
NOTE Confidence: 0.921680232307692
00:11:00.431 --> 00:11:02.741 and care coordination and expertise
NOTE Confidence: 0.921680232307692
00:11:02.741 --> 00:11:05.490 in clustering some of those things
NOTE Confidence: 0.921680232307692
00:11:05.490 --> 00:11:08.210 together in a centrally located site.
NOTE Confidence: 0.921680232307692
00:11:08.210 --> 00:11:10.310 Doctor Joe Lasala has practiced
NOTE Confidence: 0.921680232307692
00:11:10.310 --> 00:11:13.499 at this site and done broad based
NOTE Confidence: 0.921680232307692
00:11:13.499 --> 00:11:16.529 hematology and oncology for many years.
NOTE Confidence: 0.921680232307692
00:11:16.530 --> 00:11:18.538 We're transition will practice
NOTE Confidence: 0.921680232307692
00:11:18.538 --> 00:11:21.048 to Guildford on June 12th.
NOTE Confidence: 0.921680232307692
00:11:21.050 --> 00:11:24.116 Her hematology patients will either stay in
NOTE Confidence: 0.921680232307692
00:11:24.116 --> 00:11:27.409 orange or follow doctor Lasala to Guilford.
NOTE Confidence: 0.921680232307692
00:11:27.410 --> 00:11:31.330 Doctor Kelsey Martin will remain in Orange,
NOTE Confidence: 0.921680232307692

00:11:31.330 --> 00:11:35.110 where she has a predominantly benign
NOTE Confidence: 0.921680232307692

00:11:35.110 --> 00:11:37.630 or classical hematology practice.
NOTE Confidence: 0.921680232307692

00:11:37.630 --> 00:11:39.667 And we'll see some of her patients,
NOTE Confidence: 0.921680232307692

00:11:39.670 --> 00:11:41.383 particularly malignant hematology
NOTE Confidence: 0.921680232307692

00:11:41.383 --> 00:11:45.380 patients at our site in North Haven.
NOTE Confidence: 0.921680232307692

00:11:45.380 --> 00:11:47.356 Classical hematology that has
NOTE Confidence: 0.921680232307692

00:11:47.356 --> 00:11:49.826 previously been in North Haven
NOTE Confidence: 0.921680232307692

00:11:49.826 --> 00:11:51.998 will transition to orange.
NOTE Confidence: 0.921680232307692

00:11:52.000 --> 00:11:54.032 So like all change,
NOTE Confidence: 0.921680232307692

00:11:54.032 --> 00:11:57.549 there is some anxiety and concern.
NOTE Confidence: 0.921680232307692

00:11:57.549 --> 00:11:59.538 Associated with that,
NOTE Confidence: 0.921680232307692

00:11:59.540 --> 00:12:02.005 it does mean long established
NOTE Confidence: 0.921680232307692

00:12:02.005 --> 00:12:03.977 practices will be moving,
NOTE Confidence: 0.921680232307692

00:12:03.980 --> 00:12:06.560 but this is an enormous opportunity
NOTE Confidence: 0.921680232307692

00:12:06.560 --> 00:12:08.727 to leverage the collective expertise
NOTE Confidence: 0.921680232307692

00:12:08.727 --> 00:12:11.719 of our system and our collection of of

NOTE Confidence: 0.921680232307692
00:12:11.719 --> 00:12:14.415 sites and assets really to deliver the
NOTE Confidence: 0.921680232307692
00:12:14.415 --> 00:12:16.460 best possible care to our patients.
NOTE Confidence: 0.921680232307692
00:12:16.460 --> 00:12:18.620 So I would just ask for people to
NOTE Confidence: 0.921680232307692
00:12:18.678 --> 00:12:20.054 be supportive and understanding
NOTE Confidence: 0.921680232307692
00:12:20.054 --> 00:12:21.774 as we go through this,
NOTE Confidence: 0.921680232307692
00:12:21.780 --> 00:12:23.978 which will be probably one of many
NOTE Confidence: 0.921680232307692
00:12:23.978 --> 00:12:26.599 changes as we evolve to a more
NOTE Confidence: 0.921680232307692
00:12:26.599 --> 00:12:28.203 specialty driven and integrated.
NOTE Confidence: 0.921680232307692
00:12:28.210 --> 00:12:28.920 Organization.
NOTE Confidence: 0.8249509533333333
00:12:31.220 --> 00:12:36.379 So a big, big round of enthusiastic
NOTE Confidence: 0.8249509533333333
00:12:36.379 --> 00:12:40.169 congratulations to Doctor Pat Lorusso.
NOTE Confidence: 0.8249509533333333
00:12:40.170 --> 00:12:41.450 As most of you know,
NOTE Confidence: 0.8249509533333333
00:12:41.450 --> 00:12:44.635 Pat is our fearless leader of our
NOTE Confidence: 0.8249509533333333
00:12:44.635 --> 00:12:47.140 phase one clinical trials unit.
NOTE Confidence: 0.8249509533333333
00:12:47.140 --> 00:12:50.416 This is truly one of the resources that makes
NOTE Confidence: 0.8249509533333333

00:12:50.416 --> 00:12:53.590 Smilo and the Yale Cancer Center a leader.

NOTE Confidence: 0.8249509533333333

00:12:53.590 --> 00:12:55.765 This is the center where

NOTE Confidence: 0.8249509533333333

00:12:55.765 --> 00:12:58.140 we bring truly innovative,

NOTE Confidence: 0.8249509533333333

00:12:58.140 --> 00:13:01.416 cutting edge therapies into the clinic.

NOTE Confidence: 0.8249509533333333

00:13:01.420 --> 00:13:04.705 And Pat has been elected to the Presidency of

NOTE Confidence: 0.8249509533333333

00:13:04.705 --> 00:13:08.200 the American Association for Cancer Research.

NOTE Confidence: 0.8249509533333333

00:13:08.200 --> 00:13:12.191 She's the president-elect for 2023 to 2024.

NOTE Confidence: 0.8249509533333333

00:13:12.191 --> 00:13:14.715 The American Association for

NOTE Confidence: 0.8249509533333333

00:13:14.715 --> 00:13:17.239 Cancer Research is probably.

NOTE Confidence: 0.8249509533333333

00:13:17.240 --> 00:13:21.050 One of the most highly regarded international

NOTE Confidence: 0.8249509533333333

00:13:21.050 --> 00:13:24.650 organizations for the oversight and

NOTE Confidence: 0.8249509533333333

00:13:24.650 --> 00:13:28.530 support of cancer care research,

NOTE Confidence: 0.8249509533333333

00:13:28.530 --> 00:13:31.896 it largely focuses on the translation

NOTE Confidence: 0.8249509533333333

00:13:31.896 --> 00:13:34.957 of basic scientific discoveries into

NOTE Confidence: 0.8249509533333333

00:13:34.957 --> 00:13:37.520 therapeutics, an area of which doctor

NOTE Confidence: 0.8249509533333333

00:13:37.520 --> 00:13:39.350 Lorusso is clearly an expert.

NOTE Confidence: 0.8249509533333333
00:13:39.350 --> 00:13:42.838 So it's a big.
NOTE Confidence: 0.8249509533333333
00:13:42.840 --> 00:13:44.320 Endorsement for Pat's leadership
NOTE Confidence: 0.8249509533333333
00:13:44.320 --> 00:13:46.970 in this space and a great feather
NOTE Confidence: 0.8249509533333333
00:13:46.970 --> 00:13:49.154 in the cap for our organization.
NOTE Confidence: 0.8249509533333333
00:13:49.160 --> 00:13:50.248 So well done, Pat.
NOTE Confidence: 0.88267688
00:13:53.680 --> 00:13:57.536 So with those updates out of the way.
NOTE Confidence: 0.88267688
00:13:57.540 --> 00:13:59.969 It gives me great pleasure to kick
NOTE Confidence: 0.88267688
00:13:59.969 --> 00:14:03.210 over to my friend and colleague, Dr.
NOTE Confidence: 0.88267688
00:14:03.210 --> 00:14:07.130 Pam Kunz and her team of GI Oncologists,
NOTE Confidence: 0.88267688
00:14:07.130 --> 00:14:09.470 who will be giving us a program update on
NOTE Confidence: 0.88267688
00:14:09.470 --> 00:14:11.879 the Center for Gastrointestinal cancers.
NOTE Confidence: 0.88267688
00:14:11.880 --> 00:14:14.380 So Pam and team, take it away. Thank you.
NOTE Confidence: 0.879549932857143
00:14:19.770 --> 00:14:20.712 Thank you, Kevin.
NOTE Confidence: 0.879549932857143
00:14:20.712 --> 00:14:22.596 And I hope everyone can see
NOTE Confidence: 0.879549932857143
00:14:22.596 --> 00:14:24.230 this slide to start with.
NOTE Confidence: 0.879549932857143

00:14:24.230 --> 00:14:26.102 So it's really my pleasure to
NOTE Confidence: 0.879549932857143

00:14:26.102 --> 00:14:27.969 represent the Center for GI cancers
NOTE Confidence: 0.879549932857143

00:14:27.969 --> 00:14:29.908 and we're going to focus a little
NOTE Confidence: 0.879549932857143

00:14:29.908 --> 00:14:32.210 bit on colorectal cancer tonight.
NOTE Confidence: 0.879549932857143

00:14:32.210 --> 00:14:34.514 But I hope this slide just really shows
NOTE Confidence: 0.879549932857143

00:14:34.514 --> 00:14:36.528 how the breadth of multidisciplinary
NOTE Confidence: 0.879549932857143

00:14:36.528 --> 00:14:39.270 care really across across our network.
NOTE Confidence: 0.879549932857143

00:14:39.270 --> 00:14:40.526 And it's really been,
NOTE Confidence: 0.879549932857143

00:14:40.526 --> 00:14:43.438 I've been here now about 2 1/2 years and
NOTE Confidence: 0.879549932857143

00:14:43.438 --> 00:14:46.210 it's been a pleasure to direct this center.
NOTE Confidence: 0.879549932857143

00:14:46.210 --> 00:14:48.408 So our Center for GI cancers is
NOTE Confidence: 0.879549932857143

00:14:48.408 --> 00:14:50.720 organized in a leadership cabinet.
NOTE Confidence: 0.879549932857143

00:14:50.720 --> 00:14:53.231 I serve as the director and we've had some
NOTE Confidence: 0.879549932857143

00:14:53.231 --> 00:14:55.176 evolution over the last couple of years.
NOTE Confidence: 0.879549932857143

00:14:55.180 --> 00:14:57.581 And again I just want to demonstrate
NOTE Confidence: 0.879549932857143

00:14:57.581 --> 00:15:00.521 how this really has brought together

NOTE Confidence: 0.879549932857143
00:15:00.521 --> 00:15:02.363 stakeholders throughout multiple
NOTE Confidence: 0.879549932857143
00:15:02.363 --> 00:15:04.819 disciplines including medical oncology,
NOTE Confidence: 0.879549932857143
00:15:04.820 --> 00:15:06.788 surgical oncology,
NOTE Confidence: 0.879549932857143
00:15:06.788 --> 00:15:09.740 radiation oncology path,
NOTE Confidence: 0.879549932857143
00:15:09.740 --> 00:15:10.654 digestive diseases,
NOTE Confidence: 0.879549932857143
00:15:10.654 --> 00:15:13.853 cancer imaging and and you can see
NOTE Confidence: 0.879549932857143
00:15:13.853 --> 00:15:16.327 some other examples we have a.
NOTE Confidence: 0.879549932857143
00:15:16.330 --> 00:15:18.385 Mini cabinet that has recently
NOTE Confidence: 0.879549932857143
00:15:18.385 --> 00:15:20.440 formed that includes myself as
NOTE Confidence: 0.879549932857143
00:15:20.515 --> 00:15:22.810 the Director of Clinical Research,
NOTE Confidence: 0.879549932857143
00:15:22.810 --> 00:15:25.750 Mansky as the Director of clinical
NOTE Confidence: 0.879549932857143
00:15:25.750 --> 00:15:27.710 director for medical oncology,
NOTE Confidence: 0.879549932857143
00:15:27.710 --> 00:15:29.638 Mandar Muzumdar is our
NOTE Confidence: 0.879549932857143
00:15:29.638 --> 00:15:31.084 Translational Science director.
NOTE Confidence: 0.879549932857143
00:15:31.090 --> 00:15:33.440 In current Shiraga is the
NOTE Confidence: 0.879549932857143

00:15:33.440 --> 00:15:34.850 surgical oncology director.

NOTE Confidence: 0.879549932857143

00:15:34.850 --> 00:15:36.682 I won't go through all of the names

NOTE Confidence: 0.879549932857143

00:15:36.682 --> 00:15:38.447 of our ad hoc cabinet members,

NOTE Confidence: 0.879549932857143

00:15:38.450 --> 00:15:41.735 but really it's a fantastic

NOTE Confidence: 0.879549932857143

00:15:41.735 --> 00:15:43.706 group of individuals.

NOTE Confidence: 0.879549932857143

00:15:43.710 --> 00:15:44.760 Since my arrival,

NOTE Confidence: 0.879549932857143

00:15:44.760 --> 00:15:46.860 we have launched 4 key disease

NOTE Confidence: 0.879549932857143

00:15:46.860 --> 00:15:49.127 based programs that themselves have

NOTE Confidence: 0.879549932857143

00:15:49.127 --> 00:15:51.432 steering committees and these were

NOTE Confidence: 0.879549932857143

00:15:51.432 --> 00:15:53.777 really based on existing expertise.

NOTE Confidence: 0.879549932857143

00:15:53.780 --> 00:15:56.388 And we are going to focus tonight on

NOTE Confidence: 0.879549932857143

00:15:56.388 --> 00:15:58.226 the colorectal anal cancer program

NOTE Confidence: 0.879549932857143

00:15:58.226 --> 00:16:00.823 that is led by doctors Michael Cikini,

NOTE Confidence: 0.879549932857143

00:16:00.830 --> 00:16:03.086 Chavier your and Anne Manju has

NOTE Confidence: 0.879549932857143

00:16:03.086 --> 00:16:06.022 newly joined as a Co director

NOTE Confidence: 0.879549932857143

00:16:06.022 --> 00:16:08.050 representing colorectal surgery.

NOTE Confidence: 0.879549932857143
00:16:08.050 --> 00:16:10.030 Doctor Chikuni cannot be on tonight,
NOTE Confidence: 0.879549932857143
00:16:10.030 --> 00:16:14.146 so I am representing medical oncology.
NOTE Confidence: 0.879549932857143
00:16:14.150 --> 00:16:16.232 So I'll remind everybody that March
NOTE Confidence: 0.879549932857143
00:16:16.232 --> 00:16:17.990 is colorectal Cancer Awareness Month.
NOTE Confidence: 0.879549932857143
00:16:17.990 --> 00:16:19.630 These are some pictures from
NOTE Confidence: 0.879549932857143
00:16:19.630 --> 00:16:21.959 across our network and I think Joe
NOTE Confidence: 0.879549932857143
00:16:21.959 --> 00:16:24.129 Mendez for a few of these pictures.
NOTE Confidence: 0.879549932857143
00:16:24.130 --> 00:16:26.902 Dress in Blue Day was March 3rd
NOTE Confidence: 0.879549932857143
00:16:26.902 --> 00:16:30.052 and this was again a really cross
NOTE Confidence: 0.879549932857143
00:16:30.052 --> 00:16:33.418 health system effort led by Joe and
NOTE Confidence: 0.879549932857143
00:16:33.418 --> 00:16:36.226 the folks in digestive diseases and
NOTE Confidence: 0.879549932857143
00:16:36.226 --> 00:16:40.498 a really fun way to both increase
NOTE Confidence: 0.879549932857143
00:16:40.498 --> 00:16:44.083 awareness around colorectal cancer screening.
NOTE Confidence: 0.879549932857143
00:16:44.090 --> 00:16:46.148 I'm going to pass now to Doctor
NOTE Confidence: 0.879549932857143
00:16:46.148 --> 00:16:48.688 Ann Monjeau to talk a little bit
NOTE Confidence: 0.879549932857143

00:16:48.688 --> 00:16:50.276 about the national accreditation
NOTE Confidence: 0.879549932857143

00:16:50.276 --> 00:16:52.030 program for rectal cancer.
NOTE Confidence: 0.879549932857143

00:16:52.030 --> 00:16:52.290 Hi,
NOTE Confidence: 0.879549932857143

00:16:52.290 --> 00:16:53.790 thanks Pam.
NOTE Confidence: 0.879549932857143

00:16:53.790 --> 00:16:54.500 So
NOTE Confidence: 0.83245492

00:16:54.550 --> 00:16:55.850 as part of the ACS,
NOTE Confidence: 0.83245492

00:16:55.850 --> 00:16:57.690 we now have a pathway towards
NOTE Confidence: 0.83245492

00:16:57.690 --> 00:16:59.848 ex seeking excellence in rectal
NOTE Confidence: 0.83245492

00:16:59.850 --> 00:17:03.084 cancer care and that's the NPRC or
NOTE Confidence: 0.83245492

00:17:03.084 --> 00:17:04.470 National accreditation program.
NOTE Confidence: 0.83245492

00:17:04.470 --> 00:17:06.342 What we know is that cancer outcomes
NOTE Confidence: 0.83245492

00:17:06.342 --> 00:17:08.160 are better when patients are managed
NOTE Confidence: 0.83245492

00:17:08.160 --> 00:17:10.450 according to multidisciplinary team care.
NOTE Confidence: 0.83245492

00:17:10.450 --> 00:17:13.280 And in Europe, in fact when they've
NOTE Confidence: 0.83245492

00:17:13.280 --> 00:17:14.300 implemented similar programs,
NOTE Confidence: 0.83245492

00:17:14.300 --> 00:17:16.105 they have seen decreases in

NOTE Confidence: 0.83245492

00:17:16.105 --> 00:17:17.910 the rate of permanent stomas,

NOTE Confidence: 0.83245492

00:17:17.910 --> 00:17:20.136 reduce rates of local recurrence and

NOTE Confidence: 0.83245492

00:17:20.136 --> 00:17:22.190 basically greater delivery of evidence.

NOTE Confidence: 0.83245492

00:17:22.190 --> 00:17:24.225 Face care on the appropriate

NOTE Confidence: 0.83245492

00:17:24.225 --> 00:17:26.305 time scale and so that's sort of

NOTE Confidence: 0.83245492

00:17:26.305 --> 00:17:28.100 the goals of the NPRC program.

NOTE Confidence: 0.83245492

00:17:28.100 --> 00:17:28.370 They

NOTE Confidence: 0.927823965

00:17:28.380 --> 00:17:30.390 have sort of three elements that

NOTE Confidence: 0.868228507777777

00:17:30.400 --> 00:17:32.308 they look for and that's program

NOTE Confidence: 0.868228507777777

00:17:32.308 --> 00:17:33.580 management ensuring that you

NOTE Confidence: 0.868228507777777

00:17:33.634 --> 00:17:35.274 have an appropriately qualified

NOTE Confidence: 0.868228507777777

00:17:35.274 --> 00:17:36.914 rectal cancer program director.

NOTE Confidence: 0.868228507777777

00:17:36.920 --> 00:17:38.306 And we have a wonderful director

NOTE Confidence: 0.868228507777777

00:17:38.306 --> 00:17:40.040 in the our division Chief of Colon

NOTE Confidence: 0.868228507777777

00:17:40.040 --> 00:17:41.508 and rectal surgery, Doctor Reddy.

NOTE Confidence: 0.868228507777777

00:17:41.508 --> 00:17:43.632 They look at clinical services to
NOTE Confidence: 0.868228507777777

00:17:43.632 --> 00:17:45.778 make sure that patients receive,
NOTE Confidence: 0.868228507777777

00:17:45.780 --> 00:17:47.256 are presented appropriately at
NOTE Confidence: 0.868228507777777

00:17:47.256 --> 00:17:49.101 multidisciplinary care and also receive
NOTE Confidence: 0.868228507777777

00:17:49.101 --> 00:17:51.097 their treatments in a timely fashion
NOTE Confidence: 0.868228507777777

00:17:51.097 --> 00:17:52.672 according to the latest standards.
NOTE Confidence: 0.868228507777777

00:17:52.680 --> 00:17:54.690 Old standards of treatment for rectal
NOTE Confidence: 0.868228507777777

00:17:54.690 --> 00:17:56.457 cancer and finally quality improvement
NOTE Confidence: 0.868228507777777

00:17:56.457 --> 00:17:58.659 using data to improve our efficiency,
NOTE Confidence: 0.868228507777777

00:17:58.660 --> 00:18:00.644 looking at how we do and continuing to
NOTE Confidence: 0.868228507777777

00:18:00.644 --> 00:18:02.104 standardize our care and improve our
NOTE Confidence: 0.868228507777777

00:18:02.104 --> 00:18:03.900 outcomes as we go through the process.
NOTE Confidence: 0.868228507777777

00:18:03.900 --> 00:18:05.902 We are in the process of applying
NOTE Confidence: 0.868228507777777

00:18:05.902 --> 00:18:08.022 for any PRC accreditation and that
NOTE Confidence: 0.868228507777777

00:18:08.022 --> 00:18:09.629 is basically a multidisciplinary
NOTE Confidence: 0.868228507777777

00:18:09.629 --> 00:18:12.450 team that comes together to do this.

NOTE Confidence: 0.868228507777777
00:18:12.450 --> 00:18:14.400 And that's not only just surgery
NOTE Confidence: 0.868228507777777
00:18:14.400 --> 00:18:15.375 or surgical oncology,
NOTE Confidence: 0.868228507777777
00:18:15.380 --> 00:18:17.365 but that involves our colleagues
NOTE Confidence: 0.868228507777777
00:18:17.365 --> 00:18:19.486 in pathology, radiation oncology,
NOTE Confidence: 0.868228507777777
00:18:19.486 --> 00:18:22.138 radiology and medical oncology.
NOTE Confidence: 0.868228507777777
00:18:22.140 --> 00:18:23.484 It's a pretty large.
NOTE Confidence: 0.868228507777777
00:18:23.484 --> 00:18:25.500 Commitment and we all work together
NOTE Confidence: 0.868228507777777
00:18:25.567 --> 00:18:27.979 to create a program where patients
NOTE Confidence: 0.868228507777777
00:18:27.979 --> 00:18:30.025 have true multidisciplinary care and
NOTE Confidence: 0.868228507777777
00:18:30.025 --> 00:18:31.875 can progress smoothly through it.
NOTE Confidence: 0.868228507777777
00:18:31.880 --> 00:18:32.200 So that's
NOTE Confidence: 0.919330301428572
00:18:32.210 --> 00:18:35.318 just a little bit about the program.
NOTE Confidence: 0.844836713333333
00:18:33.760 --> 00:18:34.378 I'm going to
NOTE Confidence: 0.94740515
00:18:34.390 --> 00:18:35.310 pass it off now
NOTE Confidence: 0.853262896666667
00:18:35.320 --> 00:18:36.238 to Doctor Lord.
NOTE Confidence: 0.923565952727273

00:18:46.550 --> 00:18:47.666 Thank you very much and thank
NOTE Confidence: 0.923565952727273

00:18:47.666 --> 00:18:48.770 you for having me tonight.
NOTE Confidence: 0.923565952727273

00:18:48.770 --> 00:18:51.194 So we're going to talk a little bit
NOTE Confidence: 0.923565952727273

00:18:51.194 --> 00:18:53.081 about the colorectal cancer screening
NOTE Confidence: 0.923565952727273

00:18:53.081 --> 00:18:56.316 pathway as one of the tools that that
NOTE Confidence: 0.923565952727273

00:18:56.316 --> 00:18:59.955 that we've helped develop to really ramp
NOTE Confidence: 0.923565952727273

00:18:59.955 --> 00:19:03.829 up our screening efforts here at Yale.
NOTE Confidence: 0.923565952727273

00:19:03.830 --> 00:19:05.042 The first thing I wanted to
NOTE Confidence: 0.923565952727273

00:19:05.042 --> 00:19:06.724 show you is this, we've been,
NOTE Confidence: 0.923565952727273

00:19:06.724 --> 00:19:09.346 we've become accustomed to seeing this.
NOTE Confidence: 0.923565952727273

00:19:09.350 --> 00:19:10.958 Graph, that's always been
NOTE Confidence: 0.923565952727273

00:19:10.958 --> 00:19:12.566 so encouraging since then,
NOTE Confidence: 0.923565952727273

00:19:12.570 --> 00:19:14.034 um, 1980s, mid 1980s,
NOTE Confidence: 0.923565952727273

00:19:14.034 --> 00:19:16.825 where we've been seeing this a progressive
NOTE Confidence: 0.923565952727273

00:19:16.825 --> 00:19:19.430 decrease in both incidents and
NOTE Confidence: 0.923565952727273

00:19:19.430 --> 00:19:22.080 mortality related to colorectal cancer.

NOTE Confidence: 0.923565952727273
00:19:22.080 --> 00:19:24.896 So we've been always very happy about that.
NOTE Confidence: 0.923565952727273
00:19:24.900 --> 00:19:26.628 But the reality is that over
NOTE Confidence: 0.923565952727273
00:19:26.628 --> 00:19:27.780 the last few years,
NOTE Confidence: 0.923565952727273
00:19:27.780 --> 00:19:30.925 things have changed a little bit and
NOTE Confidence: 0.923565952727273
00:19:30.925 --> 00:19:34.375 now the declining incidence rates have
NOTE Confidence: 0.923565952727273
00:19:34.375 --> 00:19:36.780 become confined to the individuals
NOTE Confidence: 0.923565952727273
00:19:36.852 --> 00:19:39.548 who are 64 years old and older since.
NOTE Confidence: 0.923565952727273
00:19:39.550 --> 00:19:45.350 Rematch 2011 and when we look at individuals?
NOTE Confidence: 0.923565952727273
00:19:45.350 --> 00:19:48.727 Who are aged 50 to 64,
NOTE Confidence: 0.923565952727273
00:19:48.727 --> 00:19:50.562 these incidence rates have kind
NOTE Confidence: 0.923565952727273
00:19:50.562 --> 00:19:51.296 of stabilized,
NOTE Confidence: 0.923565952727273
00:19:51.300 --> 00:19:54.252 but looking at the 50 to 54 year olds,
NOTE Confidence: 0.923565952727273
00:19:54.260 --> 00:19:56.942 these incidents has started going up
NOTE Confidence: 0.923565952727273
00:19:56.942 --> 00:20:00.259 and and the more consistent level,
NOTE Confidence: 0.923565952727273
00:20:00.260 --> 00:20:02.270 the individuals that are younger
NOTE Confidence: 0.923565952727273

00:20:02.270 --> 00:20:04.756 than 50 have seen an increase
NOTE Confidence: 0.923565952727273

00:20:04.756 --> 00:20:07.474 of about an average 2% per year.
NOTE Confidence: 0.923565952727273

00:20:07.474 --> 00:20:09.736 So really worrisome trends here and
NOTE Confidence: 0.923565952727273

00:20:09.736 --> 00:20:12.451 in fact the diagnosis of people under
NOTE Confidence: 0.923565952727273

00:20:12.451 --> 00:20:15.786 age of people under age 55 have doubled.
NOTE Confidence: 0.923565952727273

00:20:15.786 --> 00:20:20.313 From 11% in 1995 to 20% in in 2019
NOTE Confidence: 0.923565952727273

00:20:20.313 --> 00:20:22.491 and this is very nicely visualized
NOTE Confidence: 0.923565952727273

00:20:22.491 --> 00:20:24.909 here in this slide from the uh,
NOTE Confidence: 0.923565952727273

00:20:24.910 --> 00:20:27.496 this uh recent publication from the
NOTE Confidence: 0.923565952727273

00:20:27.496 --> 00:20:30.849 ACS that looks at individuals by age,
NOTE Confidence: 0.923565952727273

00:20:30.850 --> 00:20:34.175 cancer diagnosis by age by per per
NOTE Confidence: 0.923565952727273

00:20:34.180 --> 00:20:36.886 100,000 population and in red the
NOTE Confidence: 0.923565952727273

00:20:36.886 --> 00:20:39.741 red bars is population between ages
NOTE Confidence: 0.923565952727273

00:20:39.741 --> 00:20:43.098 between the 1975 and 79 and the green
NOTE Confidence: 0.923565952727273

00:20:43.098 --> 00:20:46.486 ones between 2015 and 2019 the more recent.
NOTE Confidence: 0.923565952727273

00:20:46.490 --> 00:20:49.353 As you'll see there's a big difference

NOTE Confidence: 0.923565952727273
00:20:49.353 --> 00:20:52.572 in in the earlier years we would
NOTE Confidence: 0.923565952727273
00:20:52.572 --> 00:20:54.742 see this progressive increase in
NOTE Confidence: 0.923565952727273
00:20:54.742 --> 00:20:57.209 incidence as we are getting older.
NOTE Confidence: 0.923565952727273
00:20:57.210 --> 00:20:59.142 Yet when we're looking at the
NOTE Confidence: 0.923565952727273
00:20:59.142 --> 00:21:00.108 more recent studies,
NOTE Confidence: 0.923565952727273
00:21:00.110 --> 00:21:02.114 more recent population we see is
NOTE Confidence: 0.923565952727273
00:21:02.114 --> 00:21:04.349 that this is pretty much similar,
NOTE Confidence: 0.923565952727273
00:21:04.350 --> 00:21:05.490 all these bars are similar.
NOTE Confidence: 0.923565952727273
00:21:05.490 --> 00:21:07.908 So really seeing this this disproportionate
NOTE Confidence: 0.923565952727273
00:21:07.908 --> 00:21:10.270 increase among the younger individuals.
NOTE Confidence: 0.923565952727273
00:21:10.270 --> 00:21:12.235 So definitely that's been that
NOTE Confidence: 0.923565952727273
00:21:12.235 --> 00:21:15.197 is being a concern and that again
NOTE Confidence: 0.923565952727273
00:21:15.197 --> 00:21:17.029 has changed the narrative.
NOTE Confidence: 0.923565952727273
00:21:17.030 --> 00:21:18.866 That we the the very optimistic
NOTE Confidence: 0.923565952727273
00:21:18.866 --> 00:21:20.677 narrative that we had been seeing
NOTE Confidence: 0.923565952727273

00:21:20.677 --> 00:21:22.518 over the last 30 years or so.
NOTE Confidence: 0.923565952727273

00:21:22.520 --> 00:21:25.985 And on top of that we've also seen an
NOTE Confidence: 0.923565952727273

00:21:25.985 --> 00:21:28.846 increase on the percentage of cancers
NOTE Confidence: 0.923565952727273

00:21:28.846 --> 00:21:32.336 that are regional or distant we've come.
NOTE Confidence: 0.923565952727273

00:21:32.336 --> 00:21:35.420 We've moved from 52% in the mid
NOTE Confidence: 0.923565952727273

00:21:35.420 --> 00:21:39.485 2000s to a 60% in 2019 and that's
NOTE Confidence: 0.923565952727273

00:21:39.485 --> 00:21:42.849 mostly due to these in individuals
NOTE Confidence: 0.923565952727273

00:21:42.849 --> 00:21:47.243 ages 20 to 49 and the 50 to 64.
NOTE Confidence: 0.923565952727273

00:21:47.243 --> 00:21:48.009 So again,
NOTE Confidence: 0.923565952727273

00:21:48.009 --> 00:21:49.924 more on that worrisome trend
NOTE Confidence: 0.923565952727273

00:21:49.924 --> 00:21:52.313 of younger individuals and more
NOTE Confidence: 0.923565952727273

00:21:52.313 --> 00:21:54.377 advanced stages at diagnosis.
NOTE Confidence: 0.923565952727273

00:21:54.380 --> 00:21:57.084 So with some of these data that we've
NOTE Confidence: 0.923565952727273

00:21:57.084 --> 00:21:59.217 been seeing for a while already,
NOTE Confidence: 0.923565952727273

00:21:59.220 --> 00:22:02.150 the the American Cancer Society
NOTE Confidence: 0.923565952727273

00:22:02.150 --> 00:22:05.080 Commission Modeling Group to really

NOTE Confidence: 0.923565952727273
00:22:05.170 --> 00:22:08.315 try to figure out if that would warrant
NOTE Confidence: 0.923565952727273
00:22:08.315 --> 00:22:10.596 to increase to start colorectal
NOTE Confidence: 0.923565952727273
00:22:10.596 --> 00:22:13.092 cancer screening at an earlier age
NOTE Confidence: 0.923565952727273
00:22:13.092 --> 00:22:15.788 and the through the modeling they
NOTE Confidence: 0.923565952727273
00:22:15.788 --> 00:22:18.088 really have concluded that actually.
NOTE Confidence: 0.812025439090909
00:22:18.090 --> 00:22:20.226 Screening or average risk persons between
NOTE Confidence: 0.812025439090909
00:22:20.226 --> 00:22:23.173 the ages of 45 and 75 would reduce
NOTE Confidence: 0.812025439090909
00:22:23.173 --> 00:22:25.278 mortality from colorectal cancer with
NOTE Confidence: 0.812025439090909
00:22:25.278 --> 00:22:28.003 an acceptable risk as measured by number
NOTE Confidence: 0.812025439090909
00:22:28.003 --> 00:22:30.330 of colonoscopies for life years gained.
NOTE Confidence: 0.812025439090909
00:22:30.330 --> 00:22:33.066 So that kind of like that was the
NOTE Confidence: 0.812025439090909
00:22:33.066 --> 00:22:35.330 first group that really positioned
NOTE Confidence: 0.812025439090909
00:22:35.330 --> 00:22:38.336 themselves to really move the screening
NOTE Confidence: 0.812025439090909
00:22:38.336 --> 00:22:41.429 for average risk individuals to a 45,
NOTE Confidence: 0.812025439090909
00:22:41.430 --> 00:22:43.464 the USPSTF Commission that pretty much
NOTE Confidence: 0.812025439090909

00:22:43.464 --> 00:22:46.072 the same modeling and again it's it's the
NOTE Confidence: 0.812025439090909

00:22:46.072 --> 00:22:48.210 modeling that they've used in the past.
NOTE Confidence: 0.812025439090909

00:22:48.210 --> 00:22:50.578 But what they did is they updated the
NOTE Confidence: 0.812025439090909

00:22:50.578 --> 00:22:52.935 information on the recent trends of the
NOTE Confidence: 0.812025439090909

00:22:52.935 --> 00:22:54.640 earlier onset colorectal cancer and
NOTE Confidence: 0.812025439090909

00:22:54.705 --> 00:22:56.868 they came up with the same conclusion.
NOTE Confidence: 0.812025439090909

00:22:56.870 --> 00:22:59.624 And in 2021, May 2021,
NOTE Confidence: 0.812025439090909

00:22:59.624 --> 00:23:02.340 they came up with this great B
NOTE Confidence: 0.812025439090909

00:23:02.434 --> 00:23:05.206 recommendation of starting screening
NOTE Confidence: 0.812025439090909

00:23:05.206 --> 00:23:08.000 rate screening for average average
NOTE Confidence: 0.812025439090909

00:23:08.000 --> 00:23:10.100 risk individuals at 45.
NOTE Confidence: 0.812025439090909

00:23:10.100 --> 00:23:12.625 And all other societies have
NOTE Confidence: 0.812025439090909

00:23:12.625 --> 00:23:14.140 really endorsed these.
NOTE Confidence: 0.812025439090909

00:23:14.140 --> 00:23:15.946 And I think that we're all pretty
NOTE Confidence: 0.812025439090909

00:23:15.946 --> 00:23:18.219 much on the same page regarding this.
NOTE Confidence: 0.812025439090909

00:23:18.220 --> 00:23:22.070 Move to a earlier screening age.

NOTE Confidence: 0.812025439090909
00:23:22.070 --> 00:23:23.860 So where are we standing in terms
NOTE Confidence: 0.812025439090909
00:23:23.860 --> 00:23:24.389 of screening?
NOTE Confidence: 0.812025439090909
00:23:24.389 --> 00:23:26.543 This is national data and I'm
NOTE Confidence: 0.812025439090909
00:23:26.543 --> 00:23:29.524 going to show our own data here and
NOTE Confidence: 0.812025439090909
00:23:29.524 --> 00:23:31.354 basically looking at the national
NOTE Confidence: 0.812025439090909
00:23:31.424 --> 00:23:34.020 data by 2021 what we had is.
NOTE Confidence: 0.812025439090909
00:23:34.020 --> 00:23:34.510 That.
NOTE Confidence: 0.934385731428572
00:23:37.260 --> 00:23:41.542 58% of the population ages 45 to 75 are
NOTE Confidence: 0.934385731428572
00:23:41.542 --> 00:23:45.047 up-to-date with colorectal cancer screening.
NOTE Confidence: 0.934385731428572
00:23:45.050 --> 00:23:47.594 Only 20% are up to date on the
NOTE Confidence: 0.934385731428572
00:23:47.594 --> 00:23:50.466 45 to 49 age group, which is not
NOTE Confidence: 0.934385731428572
00:23:50.466 --> 00:23:52.126 surprising provided that we basically,
NOTE Confidence: 0.934385731428572
00:23:52.130 --> 00:23:55.026 it's been only a couple of years since
NOTE Confidence: 0.934385731428572
00:23:55.026 --> 00:23:57.688 this has been widely recommended.
NOTE Confidence: 0.934385731428572
00:23:57.690 --> 00:24:00.778 But what's really should be a little bit
NOTE Confidence: 0.934385731428572

00:24:00.778 --> 00:24:03.497 more surprising and not so nice to say is
NOTE Confidence: 0.934385731428572

00:24:03.497 --> 00:24:06.110 that only 50% and that's pretty consistent.
NOTE Confidence: 0.934385731428572

00:24:06.110 --> 00:24:08.962 Only 50% of the 50 to 54 are up to
NOTE Confidence: 0.934385731428572

00:24:08.962 --> 00:24:11.902 date with screening and this has been a
NOTE Confidence: 0.934385731428572

00:24:11.902 --> 00:24:14.521 recommendation for the last 30 years, so.
NOTE Confidence: 0.934385731428572

00:24:14.521 --> 00:24:16.176 That for 30 years we've
NOTE Confidence: 0.934385731428572

00:24:16.176 --> 00:24:17.760 recommended to start at 50,
NOTE Confidence: 0.934385731428572

00:24:17.760 --> 00:24:20.919 but we are not able to to really get
NOTE Confidence: 0.934385731428572

00:24:20.919 --> 00:24:23.642 to those levels in this population.
NOTE Confidence: 0.934385731428572

00:24:23.642 --> 00:24:27.016 And probably there's been a lot of
NOTE Confidence: 0.934385731428572

00:24:27.020 --> 00:24:28.640 wondering about what the fact is.
NOTE Confidence: 0.934385731428572

00:24:28.640 --> 00:24:31.132 But there's this described like if effect
NOTE Confidence: 0.934385731428572

00:24:31.132 --> 00:24:33.659 which is that we start talking to people
NOTE Confidence: 0.934385731428572

00:24:33.659 --> 00:24:36.373 at age 50 and by the time they really
NOTE Confidence: 0.934385731428572

00:24:36.373 --> 00:24:39.120 make the the decision getting screened,
NOTE Confidence: 0.934385731428572

00:24:39.120 --> 00:24:41.240 we're getting already too

NOTE Confidence: 0.934385731428572
00:24:41.240 --> 00:24:44.312 old and older than 50 to 54.
NOTE Confidence: 0.934385731428572
00:24:44.312 --> 00:24:46.860 And as we've seen by that time,
NOTE Confidence: 0.934385731428572
00:24:46.860 --> 00:24:49.541 many of those patients may have already
NOTE Confidence: 0.934385731428572
00:24:49.541 --> 00:24:51.170 have developed colorectal cancer.
NOTE Confidence: 0.934385731428572
00:24:51.170 --> 00:24:53.069 So we really have to make a push here.
NOTE Confidence: 0.934385731428572
00:24:53.070 --> 00:24:54.589 When we look at our own data,
NOTE Confidence: 0.934385731428572
00:24:54.590 --> 00:24:55.874 not extremely different.
NOTE Confidence: 0.934385731428572
00:24:55.874 --> 00:24:58.442 This is data from February 28th,
NOTE Confidence: 0.934385731428572
00:24:58.450 --> 00:25:01.230 3 day, several days ago.
NOTE Confidence: 0.934385731428572
00:25:01.230 --> 00:25:03.018 58.4 of our patients are up
NOTE Confidence: 0.934385731428572
00:25:03.018 --> 00:25:04.210 to date with screening.
NOTE Confidence: 0.934385731428572
00:25:04.210 --> 00:25:08.190 And among the youngest individuals,
NOTE Confidence: 0.934385731428572
00:25:08.190 --> 00:25:12.215 33% among among the 45 to 49
NOTE Confidence: 0.934385731428572
00:25:12.215 --> 00:25:15.340 and 51.8% among the 50 to 54.
NOTE Confidence: 0.934385731428572
00:25:15.340 --> 00:25:17.678 So certainly a lot of work to
NOTE Confidence: 0.934385731428572

00:25:17.678 --> 00:25:19.454 be done particularly with this
NOTE Confidence: 0.934385731428572

00:25:19.454 --> 00:25:21.578 worrisome trend and and our very
NOTE Confidence: 0.934385731428572

00:25:21.578 --> 00:25:24.153 still very low levels of screening
NOTE Confidence: 0.934385731428572

00:25:24.153 --> 00:25:25.953 among the younger individuals.
NOTE Confidence: 0.934385731428572

00:25:25.960 --> 00:25:29.700 And beyond these younger individuals
NOTE Confidence: 0.934385731428572

00:25:29.700 --> 00:25:31.716 there are other groups that are have
NOTE Confidence: 0.934385731428572

00:25:31.716 --> 00:25:33.900 screening rates that are less than 50%,
NOTE Confidence: 0.934385731428572

00:25:33.900 --> 00:25:35.968 particularly Asians and Hispanics,
NOTE Confidence: 0.934385731428572

00:25:35.968 --> 00:25:39.070 people with less than high school
NOTE Confidence: 0.934385731428572

00:25:39.147 --> 00:25:41.625 diploma education levels are very
NOTE Confidence: 0.934385731428572

00:25:41.625 --> 00:25:43.600 well related to screening rates,
NOTE Confidence: 0.934385731428572

00:25:43.600 --> 00:25:45.204 Medicaid and uninsured patients.
NOTE Confidence: 0.934385731428572

00:25:45.204 --> 00:25:47.610 Have the lowest levels of screening
NOTE Confidence: 0.934385731428572

00:25:47.672 --> 00:25:49.737 to individuals who migrated to the US
NOTE Confidence: 0.934385731428572

00:25:49.737 --> 00:25:52.141 less than 10 years ago and individuals
NOTE Confidence: 0.934385731428572

00:25:52.141 --> 00:25:54.331 with lower income levels in general.

NOTE Confidence: 0.934385731428572
00:25:54.340 --> 00:25:57.014 Those all have levels that are below
NOTE Confidence: 0.934385731428572
00:25:57.014 --> 00:26:01.450 50% and those will really require our.
NOTE Confidence: 0.934385731428572
00:26:01.450 --> 00:26:03.556 Special efforts to really try to
NOTE Confidence: 0.934385731428572
00:26:03.556 --> 00:26:06.639 get them to a more palatable level.
NOTE Confidence: 0.934385731428572
00:26:06.640 --> 00:26:10.544 And as we've seen with with the need,
NOTE Confidence: 0.934385731428572
00:26:10.550 --> 00:26:13.688 the growing need for more colorectal
NOTE Confidence: 0.934385731428572
00:26:13.688 --> 00:26:14.734 cancer screening,
NOTE Confidence: 0.934385731428572
00:26:14.740 --> 00:26:17.785 here I'm just showing up the newly
NOTE Confidence: 0.934385731428572
00:26:17.785 --> 00:26:19.842 eligible population 45 to 4049 and
NOTE Confidence: 0.934385731428572
00:26:19.842 --> 00:26:21.669 what that would represent if we were
NOTE Confidence: 0.934385731428572
00:26:21.669 --> 00:26:23.779 to do colonoscopies for all of them,
NOTE Confidence: 0.934385731428572
00:26:23.780 --> 00:26:26.126 that would increase that to close
NOTE Confidence: 0.934385731428572
00:26:26.126 --> 00:26:28.800 to 18 million extra colonoscopies.
NOTE Confidence: 0.934385731428572
00:26:28.800 --> 00:26:31.470 So certainly it's extremely doubtful.
NOTE Confidence: 0.934385731428572
00:26:31.470 --> 00:26:34.577 The US is prepared to handle screening
NOTE Confidence: 0.934385731428572

00:26:34.577 --> 00:26:36.726 in the way that we've been handling
NOTE Confidence: 0.934385731428572

00:26:36.726 --> 00:26:39.048 it which which is through colonoscopy.
NOTE Confidence: 0.934385731428572

00:26:39.050 --> 00:26:41.586 And so I think we all realize about
NOTE Confidence: 0.934385731428572

00:26:41.586 --> 00:26:44.674 that and on top of that data is strong
NOTE Confidence: 0.934385731428572

00:26:44.674 --> 00:26:46.939 enough that there are other options
NOTE Confidence: 0.934385731428572

00:26:46.939 --> 00:26:50.216 that are being endorsed that do have a
NOTE Confidence: 0.934385731428572

00:26:50.216 --> 00:26:52.946 good data regarding their effectiveness.
NOTE Confidence: 0.934385731428572

00:26:52.950 --> 00:26:54.830 And beyond colonoscopy we have
NOTE Confidence: 0.934385731428572

00:26:54.830 --> 00:26:56.710 CT colonography we and we
NOTE Confidence: 0.759998935

00:26:56.783 --> 00:26:59.687 have stool based test speed and and multi
NOTE Confidence: 0.759998935

00:26:59.687 --> 00:27:02.228 target stool DNA and we also know that.
NOTE Confidence: 0.759998935

00:27:02.230 --> 00:27:03.733 Multiple screening options,
NOTE Confidence: 0.759998935

00:27:03.733 --> 00:27:06.739 having the possibility to have more
NOTE Confidence: 0.759998935

00:27:06.739 --> 00:27:09.718 options does increase the screening rates,
NOTE Confidence: 0.759998935

00:27:09.720 --> 00:27:12.150 but at the end of the day we'll really
NOTE Confidence: 0.759998935

00:27:12.150 --> 00:27:14.430 what we really have to learn is to

NOTE Confidence: 0.759998935

00:27:14.430 --> 00:27:16.984 figure out how we manage all these

NOTE Confidence: 0.759998935

00:27:16.984 --> 00:27:19.059 possibilities with these options for

NOTE Confidence: 0.759998935

00:27:19.059 --> 00:27:21.300 screening and how we better utilize

NOTE Confidence: 0.759998935

00:27:21.300 --> 00:27:24.090 our resources and so how do we

NOTE Confidence: 0.759998935

00:27:24.090 --> 00:27:26.325 choose among these different options.

NOTE Confidence: 0.759998935

00:27:26.330 --> 00:27:29.345 And and how do we make those shared decision,

NOTE Confidence: 0.759998935

00:27:29.350 --> 00:27:32.530 shared decision making with our patients.

NOTE Confidence: 0.759998935

00:27:32.530 --> 00:27:34.763 I think that's going to be critical

NOTE Confidence: 0.759998935

00:27:34.763 --> 00:27:37.318 and and part of that will rely

NOTE Confidence: 0.759998935

00:27:37.318 --> 00:27:38.846 also on risk stratification.

NOTE Confidence: 0.759998935

00:27:38.850 --> 00:27:40.778 And I think we are all in agreement

NOTE Confidence: 0.759998935

00:27:40.778 --> 00:27:42.730 that we would really make sure

NOTE Confidence: 0.759998935

00:27:42.730 --> 00:27:44.495 that screening happens among the

NOTE Confidence: 0.759998935

00:27:44.495 --> 00:27:46.309 highest risk through colonoscopy.

NOTE Confidence: 0.759998935

00:27:46.310 --> 00:27:48.578 But then we do have options for

NOTE Confidence: 0.759998935

00:27:48.578 --> 00:27:50.956 the other tests that have also been
NOTE Confidence: 0.759998935

00:27:50.956 --> 00:27:53.462 shown to be a very useful test.
NOTE Confidence: 0.759998935

00:27:53.470 --> 00:27:55.244 So I'm going to stop here and and.
NOTE Confidence: 0.759998935

00:27:55.244 --> 00:27:55.578 Yeah.
NOTE Confidence: 0.759998935

00:27:55.578 --> 00:27:57.916 We'll run the short 2 minute video
NOTE Confidence: 0.759998935

00:27:57.916 --> 00:28:00.652 that kind of summarizes the colorectal
NOTE Confidence: 0.759998935

00:28:00.652 --> 00:28:02.987 cancer screening pathway that's been
NOTE Confidence: 0.759998935

00:28:03.060 --> 00:28:05.184 built along with primary care providers
NOTE Confidence: 0.759998935

00:28:05.184 --> 00:28:07.758 and and a lot of different people.
NOTE Confidence: 0.759998935

00:28:07.758 --> 00:28:09.688 The basically what he's trying
NOTE Confidence: 0.759998935

00:28:09.688 --> 00:28:12.380 to do is really help people walk
NOTE Confidence: 0.759998935

00:28:12.380 --> 00:28:14.188 through the process on who,
NOTE Confidence: 0.759998935

00:28:14.188 --> 00:28:15.828 who better qualifies for the
NOTE Confidence: 0.759998935

00:28:15.828 --> 00:28:17.140 different tests and what,
NOTE Confidence: 0.759998935

00:28:17.140 --> 00:28:19.060 who's better suited for everyone.
NOTE Confidence: 0.759998935

00:28:19.060 --> 00:28:21.532 And also from there the capability to

NOTE Confidence: 0.759998935

00:28:21.532 --> 00:28:24.173 really place the orders and have all

NOTE Confidence: 0.759998935

00:28:24.173 --> 00:28:26.699 the information from the pathway directly.

NOTE Confidence: 0.759998935

00:28:26.700 --> 00:28:28.416 Without having to go to anything,

NOTE Confidence: 0.759998935

00:28:28.420 --> 00:28:30.232 any other places to really go

NOTE Confidence: 0.759998935

00:28:30.232 --> 00:28:31.440 through that whole process.

NOTE Confidence: 0.759998935

00:28:31.440 --> 00:28:32.875 So it will show you the video

NOTE Confidence: 0.759998935

00:28:32.875 --> 00:28:34.320 and then we can talk about it.

NOTE Confidence: 0.863604019

00:28:40.940 --> 00:28:43.000 The care signature colorectal cancer

NOTE Confidence: 0.863604019

00:28:43.000 --> 00:28:45.060 screening pathways were created by

NOTE Confidence: 0.863604019

00:28:45.123 --> 00:28:47.139 Yale New Haven Health system experts

NOTE Confidence: 0.863604019

00:28:47.139 --> 00:28:49.340 in alignment with the most recently

NOTE Confidence: 0.863604019

00:28:49.340 --> 00:28:50.920 released guidelines and evidence

NOTE Confidence: 0.863604019

00:28:50.920 --> 00:28:53.534 to provide a resource tool for

NOTE Confidence: 0.863604019

00:28:53.534 --> 00:28:56.119 providing best practice care while

NOTE Confidence: 0.863604019

00:28:56.119 --> 00:28:58.420 discussing screening with patients.

NOTE Confidence: 0.863604019

00:28:58.420 --> 00:29:00.796 You can find the care signature
NOTE Confidence: 0.863604019

00:29:00.796 --> 00:29:03.948 pathways by going to the pathways tab
NOTE Confidence: 0.863604019

00:29:03.948 --> 00:29:06.423 while within a patient's encounter.
NOTE Confidence: 0.863604019

00:29:06.430 --> 00:29:08.548 To get to the colorectal cancer
NOTE Confidence: 0.863604019

00:29:08.548 --> 00:29:09.254 screening pathways,
NOTE Confidence: 0.863604019

00:29:09.260 --> 00:29:11.591 you can scroll or simply type in
NOTE Confidence: 0.863604019

00:29:11.591 --> 00:29:14.453 a ski search term including CRC or
NOTE Confidence: 0.863604019

00:29:14.453 --> 00:29:16.678 colorectal to find the pathways.
NOTE Confidence: 0.890860963478261

00:29:23.000 --> 00:29:24.732 The initial screening pathway
NOTE Confidence: 0.890860963478261

00:29:24.732 --> 00:29:27.330 is for patients who have not
NOTE Confidence: 0.890860963478261

00:29:27.406 --> 00:29:29.706 had colorectal cancer screening
NOTE Confidence: 0.890860963478261

00:29:29.706 --> 00:29:32.006 previously and identifies patients
NOTE Confidence: 0.890860963478261

00:29:32.006 --> 00:29:34.798 who should be offered screening.
NOTE Confidence: 0.890860963478261

00:29:34.800 --> 00:29:37.125 And those who should not
NOTE Confidence: 0.890860963478261

00:29:37.125 --> 00:29:38.520 be offered screening,
NOTE Confidence: 0.890860963478261

00:29:38.520 --> 00:29:40.420 and also populations where screening

NOTE Confidence: 0.890860963478261
00:29:40.420 --> 00:29:41.940 should include a discussion
NOTE Confidence: 0.890860963478261
00:29:41.940 --> 00:29:43.687 of the risks and benefits.
NOTE Confidence: 0.902623944117647
00:29:46.540 --> 00:29:48.934 Patients who are at high risk for
NOTE Confidence: 0.902623944117647
00:29:48.934 --> 00:29:51.004 colorectal cancer are identified and
NOTE Confidence: 0.902623944117647
00:29:51.004 --> 00:29:53.449 specific screening guidance is provided.
NOTE Confidence: 0.864507016428571
00:30:01.340 --> 00:30:02.576 For average risk patients,
NOTE Confidence: 0.864507016428571
00:30:02.576 --> 00:30:04.856 the focus is on a shared decision
NOTE Confidence: 0.864507016428571
00:30:04.856 --> 00:30:06.671 making model where the best
NOTE Confidence: 0.864507016428571
00:30:06.671 --> 00:30:08.844 screening test for that patient is
NOTE Confidence: 0.864507016428571
00:30:08.844 --> 00:30:10.800 the one that they will complete.
NOTE Confidence: 0.864507016428571
00:30:10.800 --> 00:30:13.490 Advantages and disadvantages are noted.
NOTE Confidence: 0.931146228
00:30:17.790 --> 00:30:19.675 As well as sensitivity and
NOTE Confidence: 0.931146228
00:30:19.675 --> 00:30:21.560 specificity of the available tests.
NOTE Confidence: 0.865443592777778
00:30:24.950 --> 00:30:27.113 A smart phrase has also been created
NOTE Confidence: 0.865443592777778
00:30:27.113 --> 00:30:29.978 that can be used to document your
NOTE Confidence: 0.865443592777778

00:30:29.978 --> 00:30:31.846 shared decision making conversation.
NOTE Confidence: 0.865443592777778

00:30:31.850 --> 00:30:34.076 There are also some various educational
NOTE Confidence: 0.865443592777778

00:30:34.076 --> 00:30:36.190 tools available to provide to patients
NOTE Confidence: 0.865443592777778

00:30:36.190 --> 00:30:37.906 which may aid in your discussion
NOTE Confidence: 0.865443592777778

00:30:37.906 --> 00:30:39.779 and in their decision making.
NOTE Confidence: 0.81385136

00:30:45.500 --> 00:30:49.427 Once a shared decision has been made.
NOTE Confidence: 0.81385136

00:30:49.430 --> 00:30:51.302 Simply click on the link for
NOTE Confidence: 0.81385136

00:30:51.302 --> 00:30:53.216 the preferred test to place the
NOTE Confidence: 0.81385136

00:30:53.216 --> 00:30:54.998 order for that test in Epic.
NOTE Confidence: 0.87303633875

00:31:00.080 --> 00:31:02.408 You'll notice that some of the
NOTE Confidence: 0.87303633875

00:31:02.408 --> 00:31:04.449 information has been prefilled to
NOTE Confidence: 0.87303633875

00:31:04.449 --> 00:31:06.569 aid and efficiency whenever possible.
NOTE Confidence: 0.898390672608696

00:31:14.870 --> 00:31:17.243 We have also created pathways to help
NOTE Confidence: 0.898390672608696

00:31:17.243 --> 00:31:18.976 with clinical decision making for
NOTE Confidence: 0.898390672608696

00:31:18.976 --> 00:31:21.272 patients who had who have had previous
NOTE Confidence: 0.898390672608696

00:31:21.272 --> 00:31:23.240 negative colorectal cancer screening.

NOTE Confidence: 0.892972396

00:31:31.280 --> 00:31:34.624 And also a pathway to help guide and

NOTE Confidence: 0.892972396

00:31:34.624 --> 00:31:37.435 set expectations and next steps for

NOTE Confidence: 0.892972396

00:31:37.435 --> 00:31:40.273 patients who have had abnormal screening.

NOTE Confidence: 0.925029091428571

00:31:51.500 --> 00:31:53.740 If you have feedback about these pathways,

NOTE Confidence: 0.925029091428571

00:31:53.740 --> 00:31:56.519 including suggestions on how to improve them,

NOTE Confidence: 0.925029091428571

00:31:56.520 --> 00:31:58.070 click the feedback button and

NOTE Confidence: 0.925029091428571

00:31:58.070 --> 00:32:00.098 send you to send your suggestions

NOTE Confidence: 0.925029091428571

00:32:00.098 --> 00:32:02.594 directly to the care signature team.

NOTE Confidence: 0.925029091428571

00:32:02.600 --> 00:32:04.980 All feedback is appreciated.

NOTE Confidence: 0.889374908421053

00:32:17.010 --> 00:32:20.954 So Pam and team, thank you for this

NOTE Confidence: 0.889374908421053

00:32:20.954 --> 00:32:25.537 overview of what is really one of our

NOTE Confidence: 0.889374908421053

00:32:25.537 --> 00:32:28.460 our outstanding programs and it is,

NOTE Confidence: 0.889374908421053

00:32:28.460 --> 00:32:30.800 it's terrific to see the disciplines

NOTE Confidence: 0.889374908421053

00:32:30.800 --> 00:32:33.250 coming together to deliver these services

NOTE Confidence: 0.889374908421053

00:32:33.250 --> 00:32:35.879 and I know that this presentation

NOTE Confidence: 0.889374908421053

00:32:35.879 --> 00:32:38.709 just barely scratched the surface.
NOTE Confidence: 0.889374908421053

00:32:38.710 --> 00:32:42.967 I think we will see if there are any
NOTE Confidence: 0.889374908421053

00:32:42.967 --> 00:32:45.800 questions from from our our virtual
NOTE Confidence: 0.889374908421053

00:32:45.800 --> 00:32:48.985 audience before we go on to doctor
NOTE Confidence: 0.889374908421053

00:32:48.985 --> 00:32:51.761 Morris's update on code status and
NOTE Confidence: 0.889374908421053

00:32:51.761 --> 00:32:54.988 while we're waiting for some to come in.
NOTE Confidence: 0.889374908421053

00:32:54.990 --> 00:32:57.934 I'm going to take a little bit of
NOTE Confidence: 0.889374908421053

00:32:57.934 --> 00:32:59.885 moderators privilege and kind of kind
NOTE Confidence: 0.889374908421053

00:32:59.885 --> 00:33:02.650 of ask this question and and it's
NOTE Confidence: 0.889374908421053

00:33:02.650 --> 00:33:06.232 it's not an easy question so I I don't
NOTE Confidence: 0.889374908421053

00:33:06.232 --> 00:33:09.287 expect a straightforward answer but.
NOTE Confidence: 0.889374908421053

00:33:09.290 --> 00:33:10.946 And maybe I'm Javier.
NOTE Confidence: 0.889374908421053

00:33:10.946 --> 00:33:13.430 This is probably mainly for you,
NOTE Confidence: 0.889374908421053

00:33:13.430 --> 00:33:17.494 but I I'm struck by the fact that.
NOTE Confidence: 0.889374908421053

00:33:17.500 --> 00:33:20.896 Colonoscopy remains a uniquely
NOTE Confidence: 0.889374908421053

00:33:20.896 --> 00:33:25.141 effective and significant tool because

NOTE Confidence: 0.889374908421053
00:33:25.141 --> 00:33:29.420 it is not only early detection,
NOTE Confidence: 0.889374908421053
00:33:29.420 --> 00:33:34.250 but it is a powerful prevention modality.
NOTE Confidence: 0.889374908421053
00:33:34.250 --> 00:33:38.030 And as much as I would love to see deeper
NOTE Confidence: 0.889374908421053
00:33:38.122 --> 00:33:41.192 penetration of the other screening
NOTE Confidence: 0.889374908421053
00:33:41.192 --> 00:33:44.276 tools because I think they will be
NOTE Confidence: 0.889374908421053
00:33:44.276 --> 00:33:46.871 more accessible and they are probably
NOTE Confidence: 0.889374908421053
00:33:46.871 --> 00:33:49.487 our pathway forward in terms of.
NOTE Confidence: 0.889374908421053
00:33:49.490 --> 00:33:53.168 Broadening the access for early detection,
NOTE Confidence: 0.889374908421053
00:33:53.170 --> 00:33:54.283 how do we,
NOTE Confidence: 0.889374908421053
00:33:54.283 --> 00:33:56.509 how do we as clinicians reconcile
NOTE Confidence: 0.889374908421053
00:33:56.509 --> 00:33:59.151 what I think is a is a as is a bit
NOTE Confidence: 0.889374908421053
00:33:59.236 --> 00:34:02.365 of a disparity in the benefit that
NOTE Confidence: 0.889374908421053
00:34:02.365 --> 00:34:04.243 patients get colonoscopy versus
NOTE Confidence: 0.889374908421053
00:34:04.243 --> 00:34:05.842 other screening modalities.
NOTE Confidence: 0.889374908421053
00:34:05.842 --> 00:34:07.974 Does that make sense?
NOTE Confidence: 0.784150204

00:34:08.190 --> 00:34:10.674 Yeah, yeah, I think we all
NOTE Confidence: 0.784150204

00:34:10.674 --> 00:34:12.330 struggle with this concept.
NOTE Confidence: 0.784150204

00:34:12.330 --> 00:34:14.800 I think that at the end of the day where
NOTE Confidence: 0.784150204

00:34:14.865 --> 00:34:17.387 we have to go to back to is the data and
NOTE Confidence: 0.784150204

00:34:17.387 --> 00:34:19.466 the data has been very consistent that.
NOTE Confidence: 0.784150204

00:34:19.470 --> 00:34:21.330 We've decreased mortality with all
NOTE Confidence: 0.784150204

00:34:21.330 --> 00:34:23.190 these other options and that's
NOTE Confidence: 0.784150204

00:34:23.254 --> 00:34:24.859 why they are being endorsed.
NOTE Confidence: 0.784150204

00:34:24.860 --> 00:34:28.574 So and and there are a lot, a lot of aspects.
NOTE Confidence: 0.784150204

00:34:28.574 --> 00:34:30.842 Some people just don't want to go
NOTE Confidence: 0.784150204

00:34:30.842 --> 00:34:32.828 for a colonoscopy and we've been
NOTE Confidence: 0.784150204

00:34:32.828 --> 00:34:35.120 for the longest time ignoring them.
NOTE Confidence: 0.784150204

00:34:35.120 --> 00:34:36.476 It's like you're due for colonoscopy,
NOTE Confidence: 0.784150204

00:34:36.480 --> 00:34:38.836 boom ordered and then they don't show
NOTE Confidence: 0.784150204

00:34:38.836 --> 00:34:40.640 up because some people have fear,
NOTE Confidence: 0.784150204

00:34:40.640 --> 00:34:42.315 some people think this is

NOTE Confidence: 0.784150204

00:34:42.315 --> 00:34:43.320 way too overwhelming.

NOTE Confidence: 0.784150204

00:34:43.320 --> 00:34:46.458 So having none.

NOTE Confidence: 0.784150204

00:34:46.460 --> 00:34:48.310 Says that are not colonoscopy

NOTE Confidence: 0.784150204

00:34:48.310 --> 00:34:50.718 based is really able to just get

NOTE Confidence: 0.784150204

00:34:50.718 --> 00:34:53.291 a population to to to really get

NOTE Confidence: 0.784150204

00:34:53.291 --> 00:34:55.121 tested otherwise they would not

NOTE Confidence: 0.784150204

00:34:55.121 --> 00:34:57.568 be getting getting that tested.

NOTE Confidence: 0.784150204

00:34:57.570 --> 00:35:00.214 It's no small thing also to identify

NOTE Confidence: 0.784150204

00:35:00.214 --> 00:35:02.454 early lesions versus more advanced

NOTE Confidence: 0.784150204

00:35:02.454 --> 00:35:05.020 lesions and stool based tests and

NOTE Confidence: 0.784150204

00:35:05.020 --> 00:35:07.408 and cynical and ography have shown

NOTE Confidence: 0.784150204

00:35:07.488 --> 00:35:10.242 capacity to the to do that to again I

NOTE Confidence: 0.784150204

00:35:10.242 --> 00:35:13.532 think that it's when we take things

NOTE Confidence: 0.784150204

00:35:13.532 --> 00:35:15.894 to a population level that's when

NOTE Confidence: 0.784150204

00:35:15.894 --> 00:35:18.330 you really see the role of all these.

NOTE Confidence: 0.784150204

00:35:18.330 --> 00:35:18.842 Things,
NOTE Confidence: 0.784150204

00:35:18.842 --> 00:35:21.938 but I think it's also honest to say
NOTE Confidence: 0.784150204

00:35:21.938 --> 00:35:24.346 that we have to look at resources
NOTE Confidence: 0.784150204

00:35:24.346 --> 00:35:27.341 and colonoscopy is not an infinite
NOTE Confidence: 0.784150204

00:35:27.341 --> 00:35:29.393 resource in our environment.
NOTE Confidence: 0.784150204

00:35:29.400 --> 00:35:31.495 And with this new huge amount
NOTE Confidence: 0.784150204

00:35:31.495 --> 00:35:34.164 of new patients who are going to
NOTE Confidence: 0.784150204

00:35:34.164 --> 00:35:35.836 be eligible for screening,
NOTE Confidence: 0.784150204

00:35:35.840 --> 00:35:37.926 there's been no way that with our
NOTE Confidence: 0.784150204

00:35:37.926 --> 00:35:39.908 current environment will be able to
NOTE Confidence: 0.784150204

00:35:39.908 --> 00:35:41.288 screen everyone through colonoscopy,
NOTE Confidence: 0.784150204

00:35:41.290 --> 00:35:43.560 even if they were enthusiastic,
NOTE Confidence: 0.784150204

00:35:43.560 --> 00:35:45.315 all of them enthusiastic about
NOTE Confidence: 0.784150204

00:35:45.315 --> 00:35:46.017 having colonoscopies.
NOTE Confidence: 0.784150204

00:35:46.020 --> 00:35:48.190 So I think it's just looking at
NOTE Confidence: 0.784150204

00:35:48.190 --> 00:35:49.900 reality having a population.

NOTE Confidence: 0.784150204

00:35:49.900 --> 00:35:51.435 Have that level based approach

NOTE Confidence: 0.784150204

00:35:51.435 --> 00:35:53.977 and we really have to like try to

NOTE Confidence: 0.784150204

00:35:53.977 --> 00:35:55.542 reconcile all these thoughts that

NOTE Confidence: 0.784150204

00:35:55.542 --> 00:35:57.299 I think we're all sharing.

NOTE Confidence: 0.815304656875

00:36:00.210 --> 00:36:02.266 Kevin, can I add just one thing that

NOTE Confidence: 0.815304656875

00:36:02.266 --> 00:36:04.590 sort of ties if some of this together.

NOTE Confidence: 0.815304656875

00:36:04.590 --> 00:36:07.362 I'll just mention that there are broad

NOTE Confidence: 0.815304656875

00:36:07.362 --> 00:36:10.526 coordinated efforts to try to educate both

NOTE Confidence: 0.815304656875

00:36:10.526 --> 00:36:13.477 our physician community and our patients.

NOTE Confidence: 0.815304656875

00:36:13.480 --> 00:36:16.231 And we've done a number of those

NOTE Confidence: 0.815304656875

00:36:16.231 --> 00:36:18.118 this month through CME one,

NOTE Confidence: 0.815304656875

00:36:18.118 --> 00:36:20.596 I know CHAVIER has been participating in

NOTE Confidence: 0.815304656875

00:36:20.596 --> 00:36:22.948 many of them, but through partnership

NOTE Confidence: 0.815304656875

00:36:22.948 --> 00:36:25.278 with our primary care physicians,

NOTE Confidence: 0.815304656875

00:36:25.280 --> 00:36:28.115 I participated in one of those and

NOTE Confidence: 0.815304656875

00:36:28.115 --> 00:36:30.566 in addition with kind of a patient.
NOTE Confidence: 0.815304656875

00:36:30.566 --> 00:36:32.788 Related SMILO shares so I think some
NOTE Confidence: 0.815304656875

00:36:32.788 --> 00:36:34.909 of this is getting the message out
NOTE Confidence: 0.815304656875

00:36:34.909 --> 00:36:37.506 about all of these different screening
NOTE Confidence: 0.815304656875

00:36:37.506 --> 00:36:39.940 modalities and my a disclosure my
NOTE Confidence: 0.815304656875

00:36:39.940 --> 00:36:41.890 husband's a gastroenterologist so I
NOTE Confidence: 0.815304656875

00:36:41.958 --> 00:36:44.430 sort of drink the kool-aid and and he
NOTE Confidence: 0.815304656875

00:36:44.430 --> 00:36:46.934 says you know any screening is better
NOTE Confidence: 0.815304656875

00:36:46.934 --> 00:36:49.360 than no screening and and I think
NOTE Confidence: 0.815304656875

00:36:49.360 --> 00:36:51.476 that that's really the take away as
NOTE Confidence: 0.815304656875

00:36:51.476 --> 00:36:53.478 we try to really advocate for them.
NOTE Confidence: 0.744867515

00:36:57.630 --> 00:36:59.616 So Doctor Manju,
NOTE Confidence: 0.744867515

00:36:59.616 --> 00:37:02.926 you were a gifted communicator.
NOTE Confidence: 0.744867515

00:37:02.930 --> 00:37:06.210 Do you have any tips for this audience,
NOTE Confidence: 0.744867515

00:37:06.210 --> 00:37:09.270 who all have families, friends,
NOTE Confidence: 0.744867515

00:37:09.270 --> 00:37:12.690 loved ones and community contacts?

NOTE Confidence: 0.744867515

00:37:12.690 --> 00:37:14.760 Any talking points to help

NOTE Confidence: 0.744867515

00:37:14.760 --> 00:37:16.830 get people in for screening,

NOTE Confidence: 0.744867515

00:37:16.830 --> 00:37:18.690 particularly as we know younger

NOTE Confidence: 0.744867515

00:37:18.690 --> 00:37:20.901 people are at more risk than

NOTE Confidence: 0.744867515

00:37:20.901 --> 00:37:22.563 we ever think and that can

NOTE Confidence: 0.744867515

00:37:22.563 --> 00:37:24.688 be a hard audience to reach.

NOTE Confidence: 0.744867515

00:37:24.690 --> 00:37:26.274 How do we get over the ick factor?

NOTE Confidence: 0.77017598

00:37:28.790 --> 00:37:29.408 And your and

NOTE Confidence: 0.823713058181818

00:37:29.420 --> 00:37:30.860 you're asking the colorectal surgeon

NOTE Confidence: 0.823713058181818

00:37:30.860 --> 00:37:32.920 who chose this as a profession?

NOTE Confidence: 0.79438645

00:37:36.500 --> 00:37:38.980 I mean I think one of the things I I talked

NOTE Confidence: 0.79438645

00:37:39.044 --> 00:37:41.528 to my own patients about is that I have

NOTE Confidence: 0.79438645

00:37:41.528 --> 00:37:43.544 done a colonoscopy and it's not awful.

NOTE Confidence: 0.79438645

00:37:43.544 --> 00:37:45.764 And you know I think one of the things

NOTE Confidence: 0.79438645

00:37:45.764 --> 00:37:47.570 that we do need to highlight before

NOTE Confidence: 0.79438645

00:37:47.623 --> 00:37:49.646 people in their head think about their
NOTE Confidence: 0.79438645

00:37:49.646 --> 00:37:51.699 parents and that four leader thing
NOTE Confidence: 0.79438645

00:37:51.699 --> 00:37:54.450 of go lightly which is horrible and
NOTE Confidence: 0.941912436

00:37:54.460 --> 00:37:57.640 we have so many alternatives to prep now,
NOTE Confidence: 0.941912436

00:37:57.640 --> 00:37:59.756 some that are tablets, some that are
NOTE Confidence: 0.941912436

00:37:59.756 --> 00:38:01.730 so much better than anything we had
NOTE Confidence: 0.941912436

00:38:01.730 --> 00:38:03.248 before and I think actually telling
NOTE Confidence: 0.941912436

00:38:03.250 --> 00:38:05.769 them that you know. Helps a lot,
NOTE Confidence: 0.90718645

00:38:05.780 --> 00:38:08.324 but also saying we lead by example as
NOTE Confidence: 0.90718645

00:38:08.330 --> 00:38:11.104 physicians ourselves that we have gotten
NOTE Confidence: 0.90718645

00:38:11.104 --> 00:38:12.909 age appropriate screening and that
NOTE Confidence: 0.90718645

00:38:12.910 --> 00:38:15.139 you know we have information for them
NOTE Confidence: 0.7968045675

00:38:15.150 --> 00:38:17.578 about alternatives to colonoscopy.
NOTE Confidence: 0.85271437

00:38:17.630 --> 00:38:19.247 Just so again any screening and I
NOTE Confidence: 0.85271437

00:38:19.247 --> 00:38:20.968 think that's the most important thing.
NOTE Confidence: 0.85271437

00:38:20.970 --> 00:38:22.524 If that's the foot in the door

NOTE Confidence: 0.85271437

00:38:22.524 --> 00:38:24.046 that they are scared and we know

NOTE Confidence: 0.85271437

00:38:24.046 --> 00:38:25.592 that we have a lot of patients

NOTE Confidence: 0.85271437

00:38:25.592 --> 00:38:27.278 who are scared and they don't,

NOTE Confidence: 0.85271437

00:38:27.280 --> 00:38:28.594 they'd rather look the other way

NOTE Confidence: 0.85271437

00:38:28.594 --> 00:38:29.726 because they're worried about something

NOTE Confidence: 0.85271437

00:38:29.726 --> 00:38:30.998 rather than get invasive tests while

NOTE Confidence: 0.85271437

00:38:30.998 --> 00:38:32.346 this might be a foot in the door.

NOTE Confidence: 0.85271437

00:38:32.350 --> 00:38:33.862 And so I always say try to get

NOTE Confidence: 0.85271437

00:38:33.862 --> 00:38:34.939 them to do something.

NOTE Confidence: 0.85271437

00:38:34.940 --> 00:38:36.480 If we start with fit or Cologuard

NOTE Confidence: 0.85271437

00:38:36.480 --> 00:38:38.472 just to get them tested so we can

NOTE Confidence: 0.85271437

00:38:38.472 --> 00:38:39.747 maybe catch something that was

NOTE Confidence: 0.85271437

00:38:39.797 --> 00:38:41.512 already quite large in a young patient

NOTE Confidence: 0.85271437

00:38:41.512 --> 00:38:43.003 that no one would have screened.

NOTE Confidence: 0.85271437

00:38:43.003 --> 00:38:45.751 You know that 37 year old or 27 year old

NOTE Confidence: 0.85271437

00:38:45.751 --> 00:38:47.629 medical student who's having some bleeding,
NOTE Confidence: 0.85271437

00:38:47.630 --> 00:38:48.068 you know,
NOTE Confidence: 0.85271437

00:38:48.068 --> 00:38:49.601 we might be able to catch something
NOTE Confidence: 0.85271437

00:38:49.601 --> 00:38:51.127 there when no one would be looking
NOTE Confidence: 0.85271437

00:38:51.127 --> 00:38:52.503 for something and we have all
NOTE Confidence: 0.85271437

00:38:52.503 --> 00:38:53.475 seen that patient before.
NOTE Confidence: 0.7888522375

00:38:57.090 --> 00:38:58.270 Thank you, doctor Manchu.
NOTE Confidence: 0.902579435

00:39:01.250 --> 00:39:03.152 I think why don't I,
NOTE Confidence: 0.902579435

00:39:03.152 --> 00:39:06.010 I think I'm going to have us go on
NOTE Confidence: 0.902579435

00:39:06.010 --> 00:39:08.140 to doctor Morris's presentation and
NOTE Confidence: 0.902579435

00:39:08.222 --> 00:39:10.949 then we'll have a bit of a Q&A at
NOTE Confidence: 0.902579435

00:39:10.949 --> 00:39:13.710 the end that will be broad based.
NOTE Confidence: 0.902579435

00:39:13.710 --> 00:39:16.020 Doctor Morris needs no further introduction.
NOTE Confidence: 0.902579435

00:39:16.020 --> 00:39:18.580 She's our esteemed director of
NOTE Confidence: 0.902579435

00:39:18.580 --> 00:39:21.140 our Smilo hospitalist service and
NOTE Confidence: 0.902579435

00:39:21.225 --> 00:39:24.193 our go to person for all updates

NOTE Confidence: 0.902579435

00:39:24.193 --> 00:39:26.110 related to inpatient policy,

NOTE Confidence: 0.902579435

00:39:26.110 --> 00:39:27.918 procedure and clinical management.

NOTE Confidence: 0.902579435

00:39:27.918 --> 00:39:29.990 So thank you, Doctor Morris.

NOTE Confidence: 0.877284698

00:39:31.170 --> 00:39:33.788 Thanks, Kevin. You guys can hear me

NOTE Confidence: 0.877284698

00:39:33.788 --> 00:39:36.402 and see slides, OK, getting the nod.

NOTE Confidence: 0.877284698

00:39:36.402 --> 00:39:37.894 That was such impressive

NOTE Confidence: 0.877284698

00:39:37.894 --> 00:39:39.590 work from the GI Group.

NOTE Confidence: 0.877284698

00:39:39.590 --> 00:39:41.886 I learned a lot in that short presentation.

NOTE Confidence: 0.877284698

00:39:41.890 --> 00:39:45.466 Thank you. I am going to speak briefly

NOTE Confidence: 0.877284698

00:39:45.466 --> 00:39:48.877 about the new code status order set.

NOTE Confidence: 0.877284698

00:39:48.880 --> 00:39:52.640 This all went live yesterday.

NOTE Confidence: 0.877284698

00:39:52.640 --> 00:39:54.392 This is critically important,

NOTE Confidence: 0.877284698

00:39:54.392 --> 00:39:57.020 not just for our inpatient clinicians,

NOTE Confidence: 0.877284698

00:39:57.020 --> 00:39:59.396 but our outpatient staff as well,

NOTE Confidence: 0.877284698

00:39:59.400 --> 00:40:02.496 because we know that a lot of advanced

NOTE Confidence: 0.877284698

00:40:02.496 --> 00:40:04.775 care planning happens on the outpatient
NOTE Confidence: 0.877284698

00:40:04.775 --> 00:40:07.857 side and we do need it to translate
NOTE Confidence: 0.877284698

00:40:07.857 --> 00:40:10.867 into the inpatient side and vice versa.
NOTE Confidence: 0.877284698

00:40:10.870 --> 00:40:15.086 The reason we are we changed code status
NOTE Confidence: 0.877284698

00:40:15.086 --> 00:40:18.945 orders is that every hospital in the Yale
NOTE Confidence: 0.877284698

00:40:18.945 --> 00:40:22.208 New Haven system until yesterday had a
NOTE Confidence: 0.877284698

00:40:22.208 --> 00:40:24.926 different way of documenting code status.
NOTE Confidence: 0.877284698

00:40:24.930 --> 00:40:26.586 And as all of you know,
NOTE Confidence: 0.877284698

00:40:26.590 --> 00:40:28.826 we frequently accept transfers
NOTE Confidence: 0.877284698

00:40:28.826 --> 00:40:31.621 from other hospitals within our
NOTE Confidence: 0.877284698

00:40:31.621 --> 00:40:34.447 system and there can be confusion.
NOTE Confidence: 0.877284698

00:40:34.450 --> 00:40:36.910 And unfortunately, there have been
NOTE Confidence: 0.877284698

00:40:36.910 --> 00:40:40.125 errors in providing the wrong code.
NOTE Confidence: 0.877284698

00:40:40.125 --> 00:40:41.240 Treatment ACLS,
NOTE Confidence: 0.877284698

00:40:41.240 --> 00:40:43.400 treatment for patients based on some
NOTE Confidence: 0.877284698

00:40:43.400 --> 00:40:45.659 of the differences in how we document.

NOTE Confidence: 0.877284698

00:40:45.660 --> 00:40:49.020 So this is a standardization.

NOTE Confidence: 0.877284698

00:40:49.020 --> 00:40:51.200 Now, there are essentially

NOTE Confidence: 0.877284698

00:40:51.200 --> 00:40:53.380 2 important code statuses.

NOTE Confidence: 0.877284698

00:40:53.380 --> 00:40:55.780 There is no longer a menu of choices.

NOTE Confidence: 0.877284698

00:40:55.780 --> 00:41:00.800 You can be full code or you can be no code.

NOTE Confidence: 0.877284698

00:41:00.800 --> 00:41:02.618 You may remember if you've worked

NOTE Confidence: 0.877284698

00:41:02.618 --> 00:41:04.250 on the inpatient service before,

NOTE Confidence: 0.877284698

00:41:04.250 --> 00:41:06.599 that it used to come up with a menu.

NOTE Confidence: 0.877284698

00:41:06.600 --> 00:41:08.000 You could have pressors,

NOTE Confidence: 0.877284698

00:41:08.000 --> 00:41:10.820 you could be intubated or not intubated.

NOTE Confidence: 0.877284698

00:41:10.820 --> 00:41:12.476 You could go to the ICU or not.

NOTE Confidence: 0.877284698

00:41:12.480 --> 00:41:15.776 You could have Bipap or CPAP or not.

NOTE Confidence: 0.877284698

00:41:15.780 --> 00:41:19.236 And it was not only confusing.

NOTE Confidence: 0.877284698

00:41:19.240 --> 00:41:21.180 But impractical and unsafe,

NOTE Confidence: 0.877284698

00:41:21.180 --> 00:41:25.218 you can now be full code or no code.

NOTE Confidence: 0.877284698

00:41:25.220 --> 00:41:26.680 Now this is really important.
NOTE Confidence: 0.877284698

00:41:26.680 --> 00:41:28.400 When you go into the code status order,
NOTE Confidence: 0.877284698

00:41:28.400 --> 00:41:30.704 there is a code status that
NOTE Confidence: 0.877284698

00:41:30.704 --> 00:41:31.856 says Defibrillation only.
NOTE Confidence: 0.877284698

00:41:31.860 --> 00:41:34.512 This only applies to the Cath
NOTE Confidence: 0.877284698

00:41:34.512 --> 00:41:36.740 lab and the cardiac ICU.
NOTE Confidence: 0.877284698

00:41:36.740 --> 00:41:38.936 These are for patients who have
NOTE Confidence: 0.877284698

00:41:38.936 --> 00:41:41.653 essentially frequent runs of Vt and they
NOTE Confidence: 0.877284698

00:41:41.653 --> 00:41:43.633 actually are getting shocked frequently.
NOTE Confidence: 0.877284698

00:41:43.640 --> 00:41:45.950 And they might choose to be Defibrillation
NOTE Confidence: 0.877284698

00:41:45.950 --> 00:41:48.260 only for the rest of the hospital,
NOTE Confidence: 0.877284698

00:41:48.260 --> 00:41:50.130 which means all of us.
NOTE Confidence: 0.877284698

00:41:50.130 --> 00:41:52.698 It's full code or no code.
NOTE Confidence: 0.877284698

00:41:52.700 --> 00:41:55.708 And this code status comes into effect the
NOTE Confidence: 0.877284698

00:41:55.708 --> 00:41:58.726 moment you are in cardio pulmonary arrest.
NOTE Confidence: 0.877284698

00:41:58.730 --> 00:42:02.335 So the moment your patient is pulseless,

NOTE Confidence: 0.877284698

00:42:02.340 --> 00:42:06.255 this code status is either full or no code.

NOTE Confidence: 0.877284698

00:42:06.260 --> 00:42:09.437 So this is what the order now looks like.

NOTE Confidence: 0.877284698

00:42:09.440 --> 00:42:12.020 You you can choose full code,

NOTE Confidence: 0.877284698

00:42:12.020 --> 00:42:13.768 discussed with the patient,

NOTE Confidence: 0.877284698

00:42:13.768 --> 00:42:15.516 verified with the attending,

NOTE Confidence: 0.877284698

00:42:15.520 --> 00:42:18.300 and you would accept that.

NOTE Confidence: 0.877284698

00:42:18.300 --> 00:42:22.316 You'll see there's no menu, simply full code.

NOTE Confidence: 0.877284698

00:42:22.316 --> 00:42:23.820 No code.

NOTE Confidence: 0.877284698

00:42:23.820 --> 00:42:24.854 Same thing.

NOTE Confidence: 0.877284698

00:42:24.854 --> 00:42:27.439 With whom was this discussed?

NOTE Confidence: 0.877284698

00:42:27.440 --> 00:42:29.572 Umm, code, status verified,

NOTE Confidence: 0.877284698

00:42:29.572 --> 00:42:32.237 full documentation and medical record.

NOTE Confidence: 0.877284698

00:42:32.240 --> 00:42:33.923 Again, no choices.

NOTE Confidence: 0.877284698

00:42:33.923 --> 00:42:37.790 Full code or no code except enter.

NOTE Confidence: 0.877284698

00:42:37.790 --> 00:42:40.690 Defibrillation only as I mentioned,

NOTE Confidence: 0.877284698

00:42:40.690 --> 00:42:43.600 only in bright red you will
NOTE Confidence: 0.877284698

00:42:43.600 --> 00:42:46.119 see Cath lab or cardiac ICU.
NOTE Confidence: 0.877284698

00:42:46.119 --> 00:42:49.988 In fact there if you are a resident at Yale,
NOTE Confidence: 0.877284698

00:42:49.990 --> 00:42:52.786 New Haven Hospital or when other
NOTE Confidence: 0.877284698

00:42:52.790 --> 00:42:54.006 hospitals within our system,
NOTE Confidence: 0.877284698

00:42:54.006 --> 00:42:55.830 you cannot even enter this order.
NOTE Confidence: 0.877284698

00:42:55.830 --> 00:42:58.784 This can only be ordered by an
NOTE Confidence: 0.877284698

00:42:58.784 --> 00:43:00.520 attending or designated APRN.
NOTE Confidence: 0.877284698

00:43:00.520 --> 00:43:03.012 So truly I bring this to your
NOTE Confidence: 0.877284698

00:43:03.012 --> 00:43:04.080 attention for awareness.
NOTE Confidence: 0.932109376

00:43:04.080 --> 00:43:06.690 You will never use it.
NOTE Confidence: 0.932109376

00:43:06.690 --> 00:43:09.070 Here are code status indicators.
NOTE Confidence: 0.932109376

00:43:09.070 --> 00:43:10.970 This is a change.
NOTE Confidence: 0.932109376

00:43:10.970 --> 00:43:14.354 So as of yesterday on the patient storyboard,
NOTE Confidence: 0.932109376

00:43:14.354 --> 00:43:17.460 that's the left side of your epic screen.
NOTE Confidence: 0.932109376

00:43:17.460 --> 00:43:21.186 Green bar, full code purple bar,

NOTE Confidence: 0.932109376

00:43:21.190 --> 00:43:25.270 no code pink bar, defib only.

NOTE Confidence: 0.932109376

00:43:25.270 --> 00:43:28.618 No bracelet. Full code.

NOTE Confidence: 0.932109376

00:43:28.620 --> 00:43:31.124 Purple bracelet, no code.

NOTE Confidence: 0.932109376

00:43:31.124 --> 00:43:32.376 Striped bracelet.

NOTE Confidence: 0.932109376

00:43:32.380 --> 00:43:33.880 That's sort of stripe that think

NOTE Confidence: 0.932109376

00:43:33.880 --> 00:43:35.860 of all the Vt that's happening.

NOTE Confidence: 0.932109376

00:43:35.860 --> 00:43:37.165 That's defib only.

NOTE Confidence: 0.932109376

00:43:37.165 --> 00:43:39.340 We will never see that.

NOTE Confidence: 0.932109376

00:43:39.340 --> 00:43:42.294 So it's either no bracelet or purple

NOTE Confidence: 0.932109376

00:43:42.294 --> 00:43:45.438 bracelet for your code status indicators.

NOTE Confidence: 0.932109376

00:43:45.440 --> 00:43:47.280 Alright, now you say,

NOTE Confidence: 0.932109376

00:43:47.280 --> 00:43:50.120 but what about the patient who

NOTE Confidence: 0.932109376

00:43:50.120 --> 00:43:52.280 does have some preferences?

NOTE Confidence: 0.932109376

00:43:52.280 --> 00:43:56.228 So this is so important for

NOTE Confidence: 0.932109376

00:43:56.228 --> 00:43:58.202 everyone to understand.

NOTE Confidence: 0.932109376

00:43:58.210 --> 00:44:00.738 You can be full code or no code
NOTE Confidence: 0.932109376

00:44:00.738 --> 00:44:03.428 and that is when your heart stops.
NOTE Confidence: 0.932109376

00:44:03.430 --> 00:44:06.130 You can have a CLS or no ACL S we
NOTE Confidence: 0.932109376

00:44:06.214 --> 00:44:09.350 know that if you have any version of
NOTE Confidence: 0.932109376

00:44:09.350 --> 00:44:12.190 modified AC LS you will not survive.
NOTE Confidence: 0.932109376

00:44:12.190 --> 00:44:14.006 You need to have full ACL S for
NOTE Confidence: 0.932109376

00:44:14.006 --> 00:44:15.570 your best chance of survival.
NOTE Confidence: 0.932109376

00:44:15.570 --> 00:44:17.775 So that is all we are offering
NOTE Confidence: 0.932109376

00:44:17.775 --> 00:44:19.330 full ACL or no ACS.
NOTE Confidence: 0.932109376

00:44:19.330 --> 00:44:22.055 However we know that there
NOTE Confidence: 0.932109376

00:44:22.055 --> 00:44:23.690 are critical conditions,
NOTE Confidence: 0.932109376

00:44:23.690 --> 00:44:26.140 urgent non cardiac arrest conditions.
NOTE Confidence: 0.932109376

00:44:26.140 --> 00:44:29.248 This is your typical RT situation.
NOTE Confidence: 0.932109376

00:44:29.250 --> 00:44:31.896 Where there are actually some advanced
NOTE Confidence: 0.932109376

00:44:31.896 --> 00:44:33.660 care planning decisions patients
NOTE Confidence: 0.932109376

00:44:33.731 --> 00:44:35.908 might want to have on their record.

NOTE Confidence: 0.932109376

00:44:35.910 --> 00:44:36.514 For example,

NOTE Confidence: 0.932109376

00:44:36.514 --> 00:44:38.628 if they have been intubated and they

NOTE Confidence: 0.932109376

00:44:38.628 --> 00:44:40.464 would like to say no I would not,

NOTE Confidence: 0.932109376

00:44:40.470 --> 00:44:44.206 I do not want to be re intubated or I

NOTE Confidence: 0.932109376

00:44:44.206 --> 00:44:47.622 do not want to be intubated primarily.

NOTE Confidence: 0.932109376

00:44:47.630 --> 00:44:49.958 I will accept cardioversion,

NOTE Confidence: 0.932109376

00:44:49.958 --> 00:44:51.704 but not Defibrillation,

NOTE Confidence: 0.932109376

00:44:51.710 --> 00:44:53.734 vasoactive medications, IV fluids,

NOTE Confidence: 0.932109376

00:44:53.734 --> 00:44:55.250 blood products, etcetera.

NOTE Confidence: 0.932109376

00:44:55.250 --> 00:44:58.250 Please note that if a patient

NOTE Confidence: 0.932109376

00:44:58.250 --> 00:45:00.670 agrees to blood products,

NOTE Confidence: 0.932109376

00:45:00.670 --> 00:45:02.506 they still need a formal consent

NOTE Confidence: 0.932109376

00:45:02.506 --> 00:45:04.080 even though they've already agreed

NOTE Confidence: 0.932109376

00:45:04.080 --> 00:45:05.525 in their code status order,

NOTE Confidence: 0.932109376

00:45:05.530 --> 00:45:08.977 we still consent them just as always now.

NOTE Confidence: 0.932109376

00:45:08.977 --> 00:45:12.073 If a patient says I do not want
NOTE Confidence: 0.932109376

00:45:12.073 --> 00:45:13.850 to be intubated,
NOTE Confidence: 0.932109376

00:45:13.850 --> 00:45:17.405 they cannot on their record have a full code.
NOTE Confidence: 0.932109376

00:45:17.410 --> 00:45:20.290 It will not allow you to make this
NOTE Confidence: 0.932109376

00:45:20.290 --> 00:45:22.464 person full code if they've have
NOTE Confidence: 0.932109376

00:45:22.464 --> 00:45:24.770 a ACL S if they have an urgent
NOTE Confidence: 0.932109376

00:45:24.770 --> 00:45:26.169 non cardiac arrest treatment
NOTE Confidence: 0.932109376

00:45:26.169 --> 00:45:28.129 preferences says no intubation,
NOTE Confidence: 0.932109376

00:45:28.130 --> 00:45:30.811 so epic will not allow a full
NOTE Confidence: 0.932109376

00:45:30.811 --> 00:45:32.970 code in that situation.
NOTE Confidence: 0.932109376

00:45:32.970 --> 00:45:35.940 Note that the code status order.
NOTE Confidence: 0.932109376

00:45:35.940 --> 00:45:38.334 Is a unique order in and of
NOTE Confidence: 0.932109376

00:45:38.334 --> 00:45:40.688 itself the urgent non cardiac
NOTE Confidence: 0.932109376

00:45:40.688 --> 00:45:42.560 arrest treatment preferences.
NOTE Confidence: 0.932109376

00:45:42.560 --> 00:45:44.877 Is a separate order and you would
NOTE Confidence: 0.932109376

00:45:44.877 --> 00:45:47.645 just type in urgent or non cardiac

NOTE Confidence: 0.932109376

00:45:47.645 --> 00:45:49.765 arrest and that would populate.

NOTE Confidence: 0.932109376

00:45:49.770 --> 00:45:51.890 Umm.

NOTE Confidence: 0.932109376

00:45:51.890 --> 00:45:53.990 And so here in your epic storyboard,

NOTE Confidence: 0.932109376

00:45:53.990 --> 00:45:55.802 you're here on the left of

NOTE Confidence: 0.932109376

00:45:55.802 --> 00:45:56.708 your patients chart.

NOTE Confidence: 0.932109376

00:45:56.710 --> 00:45:57.886 You're hovering over,

NOTE Confidence: 0.932109376

00:45:57.886 --> 00:45:59.454 you see full code,

NOTE Confidence: 0.932109376

00:45:59.460 --> 00:46:01.444 but then you also see this yellow banner

NOTE Confidence: 0.932109376

00:46:01.444 --> 00:46:03.726 that says that there's an advanced care plan.

NOTE Confidence: 0.932109376

00:46:03.730 --> 00:46:06.010 You hover over it and you can see what the

NOTE Confidence: 0.932109376

00:46:06.073 --> 00:46:08.465 patient has put in their advanced care plan.

NOTE Confidence: 0.932109376

00:46:08.470 --> 00:46:10.591 Patients do not need to have an

NOTE Confidence: 0.932109376

00:46:10.591 --> 00:46:11.500 advanced care plan.

NOTE Confidence: 0.932109376

00:46:11.500 --> 00:46:14.153 They need to have a code status

NOTE Confidence: 0.932109376

00:46:14.153 --> 00:46:15.290 if they're hospitalized.

NOTE Confidence: 0.932109376

00:46:15.290 --> 00:46:17.432 If my colleagues in the outpatient
NOTE Confidence: 0.932109376

00:46:17.432 --> 00:46:19.550 setting do an advanced care plan,
NOTE Confidence: 0.932109376

00:46:19.550 --> 00:46:21.202 they enter it into Epic and they
NOTE Confidence: 0.932109376

00:46:21.202 --> 00:46:22.669 put in a code status,
NOTE Confidence: 0.932109376

00:46:22.670 --> 00:46:24.450 what will populate when the
NOTE Confidence: 0.932109376

00:46:24.450 --> 00:46:26.230 patient arrives in the Ed
NOTE Confidence: 0.857355202

00:46:26.304 --> 00:46:27.649 is it will say code,
NOTE Confidence: 0.857355202

00:46:27.650 --> 00:46:29.218 it'll say review prior,
NOTE Confidence: 0.857355202

00:46:29.218 --> 00:46:31.178 which will tell me that
NOTE Confidence: 0.857355202

00:46:31.178 --> 00:46:33.248 somebody has already entered it.
NOTE Confidence: 0.857355202

00:46:33.250 --> 00:46:35.759 I need to review it, review it with
NOTE Confidence: 0.857355202

00:46:35.759 --> 00:46:38.351 the patient and agree to it and it'll
NOTE Confidence: 0.857355202

00:46:38.351 --> 00:46:40.727 then populate on the inpatient side.
NOTE Confidence: 0.857355202

00:46:40.730 --> 00:46:42.510 If it says no prior,
NOTE Confidence: 0.857355202

00:46:42.510 --> 00:46:45.471 then I need to establish a code status de
NOTE Confidence: 0.857355202

00:46:45.471 --> 00:46:48.600 Novo when they arrive here in the hospital.

NOTE Confidence: 0.857355202

00:46:48.600 --> 00:46:51.066 This has been done with really

NOTE Confidence: 0.857355202

00:46:51.066 --> 00:46:53.116 careful thought with multidisciplinary

NOTE Confidence: 0.857355202

00:46:53.116 --> 00:46:56.380 committee led by ethics.

NOTE Confidence: 0.857355202

00:46:56.380 --> 00:46:58.935 I am really pleased to see that

NOTE Confidence: 0.857355202

00:46:58.935 --> 00:47:01.159 we have simplified this and in

NOTE Confidence: 0.857355202

00:47:01.159 --> 00:47:03.259 all my conversations as I walked

NOTE Confidence: 0.857355202

00:47:03.259 --> 00:47:05.079 the hospital yesterday,

NOTE Confidence: 0.857355202

00:47:05.080 --> 00:47:07.340 sort of helping people to

NOTE Confidence: 0.857355202

00:47:07.340 --> 00:47:09.148 understand the new process.

NOTE Confidence: 0.857355202

00:47:09.150 --> 00:47:09.517 Universally,

NOTE Confidence: 0.857355202

00:47:09.517 --> 00:47:11.719 people are thrilled to see the

NOTE Confidence: 0.857355202

00:47:11.719 --> 00:47:13.807 menu go away and to see it.

NOTE Confidence: 0.857355202

00:47:13.810 --> 00:47:16.670 Very simple, full code or no code,

NOTE Confidence: 0.857355202

00:47:16.670 --> 00:47:18.553 and I'm happy to answer questions because

NOTE Confidence: 0.857355202

00:47:18.553 --> 00:47:20.789 it I know this could be complicated,

NOTE Confidence: 0.857355202

00:47:20.790 --> 00:47:22.220 I'm going to stop sharing.
NOTE Confidence: 0.84006955625

00:47:32.920 --> 00:47:35.867 So, John, so thank you very much
NOTE Confidence: 0.84006955625

00:47:35.867 --> 00:47:38.890 for this really important overview.
NOTE Confidence: 0.943636475

00:47:42.790 --> 00:47:45.762 Can you give us any?
NOTE Confidence: 0.943636475

00:47:45.762 --> 00:47:49.430 Early feedback on and maybe it's too,
NOTE Confidence: 0.943636475

00:47:49.430 --> 00:47:53.740 too early for these conversations, but.
NOTE Confidence: 0.943636475

00:47:53.740 --> 00:47:57.370 Um, how have patients and
NOTE Confidence: 0.943636475

00:47:57.370 --> 00:48:01.000 families been responding to this?
NOTE Confidence: 0.943636475

00:48:01.000 --> 00:48:04.090 Do do do we have any early read on this?
NOTE Confidence: 0.885042681052632

00:48:05.180 --> 00:48:07.952 So it is too early the the first step
NOTE Confidence: 0.885042681052632

00:48:07.952 --> 00:48:10.474 yesterday morning was all the code statuses
NOTE Confidence: 0.885042681052632

00:48:10.474 --> 00:48:12.976 in the hospital had to be re entered so
NOTE Confidence: 0.885042681052632

00:48:12.976 --> 00:48:15.040 all the old code statuses disappeared.
NOTE Confidence: 0.885042681052632

00:48:15.040 --> 00:48:17.050 We had to re enter all of the code statuses.
NOTE Confidence: 0.916323816470588

00:48:20.570 --> 00:48:23.570 I do not think it will change the
NOTE Confidence: 0.916323816470588

00:48:23.570 --> 00:48:25.511 discussions that are experienced

NOTE Confidence: 0.916323816470588
00:48:25.511 --> 00:48:28.296 clinicians are having with patients,
NOTE Confidence: 0.916323816470588
00:48:28.300 --> 00:48:31.370 are experienced clinicians talk about
NOTE Confidence: 0.916323816470588
00:48:31.370 --> 00:48:35.798 goals of care in a much more global way.
NOTE Confidence: 0.916323816470588
00:48:35.800 --> 00:48:37.480 Let's talk about your disease,
NOTE Confidence: 0.916323816470588
00:48:37.480 --> 00:48:40.948 your prognosis. How do you see?
NOTE Confidence: 0.916323816470588
00:48:40.950 --> 00:48:42.294 How would you best?
NOTE Confidence: 0.916323816470588
00:48:42.294 --> 00:48:43.974 See your life going forward
NOTE Confidence: 0.916323816470588
00:48:43.974 --> 00:48:45.927 in a much more global way.
NOTE Confidence: 0.916323816470588
00:48:45.930 --> 00:48:48.282 Our very junior providers had a
NOTE Confidence: 0.916323816470588
00:48:48.282 --> 00:48:50.700 habit of walking into the room
NOTE Confidence: 0.916323816470588
00:48:50.700 --> 00:48:53.028 and saying when your heart stops,
NOTE Confidence: 0.916323816470588
00:48:53.030 --> 00:48:55.690 Missus Jones, what would you like done?
NOTE Confidence: 0.916323816470588
00:48:55.690 --> 00:48:57.587 Which clearly is not the right approach,
NOTE Confidence: 0.916323816470588
00:48:57.590 --> 00:49:00.545 but many of our trainees approach
NOTE Confidence: 0.916323816470588
00:49:00.545 --> 00:49:03.220 code status in that way.
NOTE Confidence: 0.916323816470588

00:49:03.220 --> 00:49:05.495 And I'm sure you've all witnessed it.

NOTE Confidence: 0.916323816470588

00:49:05.500 --> 00:49:08.069 What would happen is our trainees would

NOTE Confidence: 0.916323816470588

00:49:08.069 --> 00:49:10.438 get bogged down in the details of,

NOTE Confidence: 0.916323816470588

00:49:10.440 --> 00:49:12.953 well, we have CPAP and we have

NOTE Confidence: 0.916323816470588

00:49:12.953 --> 00:49:15.289 Bipap and we have pressers.

NOTE Confidence: 0.916323816470588

00:49:15.290 --> 00:49:17.222 And it's lovely to remove all

NOTE Confidence: 0.916323816470588

00:49:17.222 --> 00:49:19.010 of that from the conversation

NOTE Confidence: 0.916323816470588

00:49:19.010 --> 00:49:21.002 because it was never an appropriate

NOTE Confidence: 0.916323816470588

00:49:21.002 --> 00:49:22.330 conversation to start with.

NOTE Confidence: 0.916323816470588

00:49:22.330 --> 00:49:24.542 And I think those who have these

NOTE Confidence: 0.916323816470588

00:49:24.542 --> 00:49:26.295 conversations in a skillful manner

NOTE Confidence: 0.916323816470588

00:49:26.295 --> 00:49:28.150 probably address code status at

NOTE Confidence: 0.916323816470588

00:49:28.150 --> 00:49:30.428 the very end of the conversation

NOTE Confidence: 0.916323816470588

00:49:30.428 --> 00:49:32.253 almost as an afterthought after

NOTE Confidence: 0.916323816470588

00:49:32.253 --> 00:49:34.182 we have established patients,

NOTE Confidence: 0.916323816470588

00:49:34.182 --> 00:49:37.758 true goals, what they really want.

NOTE Confidence: 0.974409085

00:49:42.370 --> 00:49:42.930 Thank you.

NOTE Confidence: 0.933681501666666

00:49:50.530 --> 00:49:52.378 We just want to remind people

NOTE Confidence: 0.933681501666666

00:49:52.378 --> 00:49:54.549 that if you have any questions

NOTE Confidence: 0.933681501666666

00:49:54.550 --> 00:49:57.504 about the code order changes or

NOTE Confidence: 0.933681501666666

00:49:57.504 --> 00:49:59.730 any of the topics that we brought

NOTE Confidence: 0.933681501666666

00:49:59.799 --> 00:50:01.707 up today during the town hall,

NOTE Confidence: 0.933681501666666

00:50:01.710 --> 00:50:03.334 please put it in the chat so

NOTE Confidence: 0.8627619925

00:50:03.350 --> 00:50:04.878 we can answer them.

NOTE Confidence: 0.80551761

00:50:14.120 --> 00:50:15.836 Well, we're waiting.

NOTE Confidence: 0.80551761

00:50:15.836 --> 00:50:19.440 I'll just make make the comment

NOTE Confidence: 0.80551761

00:50:19.440 --> 00:50:23.538 that and and amplify a bit on

NOTE Confidence: 0.80551761

00:50:23.538 --> 00:50:26.268 your point chansa which is.

NOTE Confidence: 0.80551761

00:50:26.270 --> 00:50:27.566 Well, there are really two points.

NOTE Confidence: 0.80551761

00:50:27.570 --> 00:50:31.504 One is that I think this underscores

NOTE Confidence: 0.80551761

00:50:31.504 --> 00:50:34.339 the importance of all of us.

NOTE Confidence: 0.80551761

00:50:34.340 --> 00:50:36.428 Who are caring for patients throughout
NOTE Confidence: 0.80551761

00:50:36.428 --> 00:50:38.360 the spectrum of the disease?
NOTE Confidence: 0.80551761

00:50:38.360 --> 00:50:42.025 Including surgeons such as myself
NOTE Confidence: 0.80551761

00:50:42.025 --> 00:50:45.690 to begin to have conversations
NOTE Confidence: 0.80551761

00:50:45.811 --> 00:50:49.246 early and often about framing.
NOTE Confidence: 0.80551761

00:50:49.250 --> 00:50:52.198 Goals of care choices.
NOTE Confidence: 0.80551761

00:50:52.198 --> 00:50:56.620 Options and helping patients and families
NOTE Confidence: 0.80551761

00:50:56.744 --> 00:51:00.544 identify the limitations of these
NOTE Confidence: 0.80551761

00:51:00.544 --> 00:51:05.390 heroic end of life interventions and the.
NOTE Confidence: 0.80551761

00:51:05.390 --> 00:51:08.612 Are limited abilities to return people
NOTE Confidence: 0.80551761

00:51:08.612 --> 00:51:13.198 to a good quality of life if they
NOTE Confidence: 0.80551761

00:51:13.198 --> 00:51:15.538 have a significant cardiorespiratory
NOTE Confidence: 0.80551761

00:51:15.538 --> 00:51:18.818 event in the hospital setting.
NOTE Confidence: 0.80551761

00:51:18.820 --> 00:51:25.924 So lots of ongoing work to do and a lot of
NOTE Confidence: 0.80551761

00:51:25.924 --> 00:51:30.720 need for us as professionals to continue to.
NOTE Confidence: 0.80551761

00:51:30.720 --> 00:51:32.288 Develop our own skills,

NOTE Confidence: 0.80551761

00:51:32.288 --> 00:51:35.120 and I think you alluded to this,

NOTE Confidence: 0.80551761

00:51:35.120 --> 00:51:37.140 is something that requires

NOTE Confidence: 0.80551761

00:51:37.140 --> 00:51:38.655 learning and coaching.

NOTE Confidence: 0.80551761

00:51:38.660 --> 00:51:42.490 These are not straightforward conversations

NOTE Confidence: 0.80551761

00:51:42.490 --> 00:51:45.626 and I think those of us who have.

NOTE Confidence: 0.80551761

00:51:45.630 --> 00:51:47.160 Have.

NOTE Confidence: 0.80551761

00:51:47.160 --> 00:51:50.808 Some years of experience in this arena do

NOTE Confidence: 0.80551761

00:51:50.808 --> 00:51:54.710 have an obligation to mentor and share.

NOTE Confidence: 0.80551761

00:51:54.710 --> 00:51:58.110 Some of our lived experience in this regard.

NOTE Confidence: 0.75248719

00:52:01.890 --> 00:52:02.760 There's a question.

NOTE Confidence: 0.885432258571429

00:52:04.870 --> 00:52:07.264 Thank you, bill. And the question is,

NOTE Confidence: 0.885432258571429

00:52:07.270 --> 00:52:09.058 is there any concern that the

NOTE Confidence: 0.885432258571429

00:52:09.058 --> 00:52:10.870 language no code sounds like the

NOTE Confidence: 0.885432258571429

00:52:10.870 --> 00:52:12.837 patient does not have a code status?

NOTE Confidence: 0.57435256

00:52:15.640 --> 00:52:17.690 Folks on there? Yeah.

NOTE Confidence: 0.841393528571429

00:52:20.820 --> 00:52:23.704 I I suppose it could be misinterpreted.
NOTE Confidence: 0.8055045333333333

00:52:27.830 --> 00:52:32.060 Yeah, so full code means we do full ACL S
NOTE Confidence: 0.8055045333333333

00:52:32.165 --> 00:52:35.810 and no code means no ACL SI suppose that
NOTE Confidence: 0.8055045333333333

00:52:35.810 --> 00:52:39.919 is why we need to get this message out.
NOTE Confidence: 0.895904371428571

00:52:42.490 --> 00:52:44.905 I think it is a great point.
NOTE Confidence: 0.895904371428571

00:52:44.910 --> 00:52:47.256 Maybe it's even something we could
NOTE Confidence: 0.895904371428571

00:52:47.256 --> 00:52:49.788 bring back to that to our code.
NOTE Confidence: 0.895904371428571

00:52:49.790 --> 00:52:51.460 You know that that multidisciplinary
NOTE Confidence: 0.895904371428571

00:52:51.460 --> 00:52:53.525 code team just to because they
NOTE Confidence: 0.895904371428571

00:52:53.525 --> 00:52:55.190 might have discussed this jensa,
NOTE Confidence: 0.895904371428571

00:52:55.190 --> 00:52:58.190 right and there might be.
NOTE Confidence: 0.895904371428571

00:52:58.190 --> 00:52:59.536 This might have been something.
NOTE Confidence: 0.895904371428571

00:52:59.536 --> 00:53:01.513 So I think we could bring that back
NOTE Confidence: 0.895904371428571

00:53:01.513 --> 00:53:03.350 to them just for feedback to see.
NOTE Confidence: 0.895904371428571

00:53:03.350 --> 00:53:04.655 I know sometimes we'll make
NOTE Confidence: 0.895904371428571

00:53:04.655 --> 00:53:06.230 when something new comes out in

NOTE Confidence: 0.895904371428571
00:53:06.230 --> 00:53:07.550 Epic and we get some feedback,
NOTE Confidence: 0.895904371428571
00:53:07.550 --> 00:53:09.490 sometimes we'll change some of
NOTE Confidence: 0.895904371428571
00:53:09.490 --> 00:53:11.430 the language based on feedback.
NOTE Confidence: 0.895904371428571
00:53:11.430 --> 00:53:12.165 It's very interesting.
NOTE Confidence: 0.895904371428571
00:53:12.165 --> 00:53:14.990 I mean it's so new, it just yesterday,
NOTE Confidence: 0.895904371428571
00:53:14.990 --> 00:53:17.228 right, just like the master today,
NOTE Confidence: 0.895904371428571
00:53:17.230 --> 00:53:18.979 so very new.
NOTE Confidence: 0.850552578333333
00:53:19.130 --> 00:53:22.540 So I think I can tell you the reason why
NOTE Confidence: 0.850552578333333
00:53:22.632 --> 00:53:25.042 is that different patient populations
NOTE Confidence: 0.850552578333333
00:53:25.042 --> 00:53:27.458 have different code protocols,
NOTE Confidence: 0.850552578333333
00:53:27.460 --> 00:53:29.206 so we couldn't simply say no.
NOTE Confidence: 0.850552578333333
00:53:29.210 --> 00:53:32.640 ACS because it turns out that Pediatrics
NOTE Confidence: 0.850552578333333
00:53:32.640 --> 00:53:35.791 does something called pals and then
NOTE Confidence: 0.850552578333333
00:53:35.791 --> 00:53:37.915 neonatal has something different.
NOTE Confidence: 0.850552578333333
00:53:37.920 --> 00:53:40.989 And so I think that is why they instead
NOTE Confidence: 0.850552578333333

00:53:40.989 --> 00:53:43.832 of saying no ALS, they simply said
NOTE Confidence: 0.8505525783333333

00:53:43.832 --> 00:53:46.376 no code to simplify that language.
NOTE Confidence: 0.8505525783333333

00:53:46.380 --> 00:53:49.600 But. Yes, I will let our director,
NOTE Confidence: 0.8505525783333333

00:53:49.600 --> 00:53:52.300 Ben Tulchin know that this was brought up.
NOTE Confidence: 0.8505525783333333

00:53:52.300 --> 00:53:53.440 Thank you.
NOTE Confidence: 0.6945547433333333

00:53:57.120 --> 00:54:00.996 Evan, can I ask Jensa question?
NOTE Confidence: 0.6945547433333333

00:54:01.000 --> 00:54:04.108 So, umm, jensa, you mentioned trainees.
NOTE Confidence: 0.6945547433333333

00:54:04.110 --> 00:54:06.312 I'm wondering if you can speak
NOTE Confidence: 0.6945547433333333

00:54:06.312 --> 00:54:08.769 to kind of efforts around kind
NOTE Confidence: 0.6945547433333333

00:54:08.769 --> 00:54:11.054 of educating our trainees across
NOTE Confidence: 0.6945547433333333

00:54:11.054 --> 00:54:13.601 the system about this and perhaps
NOTE Confidence: 0.6945547433333333

00:54:13.601 --> 00:54:16.170 using it as an opportunity to do
NOTE Confidence: 0.6945547433333333

00:54:16.170 --> 00:54:17.354 some additional teaching around
NOTE Confidence: 0.6945547433333333

00:54:17.354 --> 00:54:19.130 how to talk about code status?
NOTE Confidence: 0.871265035

00:54:22.650 --> 00:54:25.610 Such a great question.
NOTE Confidence: 0.871265035

00:54:25.610 --> 00:54:29.600 So yes, the trainees have been presented

NOTE Confidence: 0.871265035

00:54:29.600 --> 00:54:34.250 with the new code status changes.

NOTE Confidence: 0.871265035

00:54:34.250 --> 00:54:38.485 Umm, I am meeting with Mark Siegel,

NOTE Confidence: 0.871265035

00:54:38.490 --> 00:54:41.410 who you know only has a small oversight.

NOTE Confidence: 0.871265035

00:54:41.410 --> 00:54:44.030 He has just internal medicine,

NOTE Confidence: 0.871265035

00:54:44.030 --> 00:54:46.278 but I think I could bring that up

NOTE Confidence: 0.871265035

00:54:46.278 --> 00:54:48.617 with him just to ask about what

NOTE Confidence: 0.871265035

00:54:48.617 --> 00:54:50.670 their training is, because I'm not.

NOTE Confidence: 0.871265035

00:54:50.670 --> 00:54:53.670 I don't know what process they go through.

NOTE Confidence: 0.871265035

00:54:53.670 --> 00:54:55.512 Most of the feedback we get

NOTE Confidence: 0.871265035

00:54:55.512 --> 00:54:57.515 is that on oncology is where

NOTE Confidence: 0.871265035

00:54:57.515 --> 00:54:59.285 they learn that they haven't.

NOTE Confidence: 0.871265035

00:54:59.290 --> 00:55:01.684 It isn't something they learn on geriatrics.

NOTE Confidence: 0.871265035

00:55:01.690 --> 00:55:02.778 It isn't something that

NOTE Confidence: 0.871265035

00:55:02.778 --> 00:55:04.138 you learn on the other.

NOTE Confidence: 0.871265035

00:55:04.140 --> 00:55:04.730 Rotations.

NOTE Confidence: 0.871265035

00:55:04.730 --> 00:55:08.860 It's really on oncology that that is.
NOTE Confidence: 0.871265035

00:55:08.860 --> 00:55:10.069 When they learn
NOTE Confidence: 0.924015244

00:55:10.080 --> 00:55:12.130 about goals of care conversations.
NOTE Confidence: 0.7948275

00:55:13.740 --> 00:55:15.120 What are your thoughts, Pam,
NOTE Confidence: 0.7948275

00:55:15.120 --> 00:55:17.350 in terms of how we can do a better job
NOTE Confidence: 0.7948275

00:55:17.411 --> 00:55:19.756 when we're on service with the trainees?
NOTE Confidence: 0.7948275

00:55:19.760 --> 00:55:21.902 Because if, if the primary place
NOTE Confidence: 0.7948275

00:55:21.902 --> 00:55:23.980 they're learning is on oncology,
NOTE Confidence: 0.7948275

00:55:23.980 --> 00:55:28.020 then how can we do a better job?
NOTE Confidence: 0.7948275

00:55:28.020 --> 00:55:29.616 I mean it's, it's a great question
NOTE Confidence: 0.7948275

00:55:29.616 --> 00:55:31.646 and I think they're really trainees
NOTE Confidence: 0.7948275

00:55:31.646 --> 00:55:32.936 across multiple specialties.
NOTE Confidence: 0.7948275

00:55:32.940 --> 00:55:36.689 I think as Kevin was alluding to earlier,
NOTE Confidence: 0.7948275

00:55:36.689 --> 00:55:38.438 really surgical oncology,
NOTE Confidence: 0.7948275

00:55:38.440 --> 00:55:39.466 radiation oncology,
NOTE Confidence: 0.7948275

00:55:39.466 --> 00:55:43.057 madong internal medicine that I think could,

NOTE Confidence: 0.7948275

00:55:43.060 --> 00:55:44.836 I think this is a really great opportunity.

NOTE Confidence: 0.7948275

00:55:44.840 --> 00:55:46.076 Anytime you change something,

NOTE Confidence: 0.7948275

00:55:46.076 --> 00:55:48.394 I think it's a nice time to

NOTE Confidence: 0.7948275

00:55:48.394 --> 00:55:49.998 really highlight best practices.

NOTE Confidence: 0.7948275

00:55:50.000 --> 00:55:52.534 I think partnering with our palliative care

NOTE Confidence: 0.7948275

00:55:52.534 --> 00:55:55.179 teams and Tara Sanft and Communication,

NOTE Confidence: 0.7948275

00:55:55.180 --> 00:55:57.770 I think this is like a really

NOTE Confidence: 0.7948275

00:55:57.770 --> 00:55:58.510 great opportunity.

NOTE Confidence: 0.7948275

00:55:58.510 --> 00:56:00.974 So I I don't the the logistics in

NOTE Confidence: 0.7948275

00:56:00.974 --> 00:56:03.341 terms of speaking to leaders across

NOTE Confidence: 0.7948275

00:56:03.341 --> 00:56:06.606 some of these programs I think is a

NOTE Confidence: 0.7948275

00:56:06.606 --> 00:56:08.972 step but then taking advantage of we

NOTE Confidence: 0.7948275

00:56:08.972 --> 00:56:11.410 have great expertise in the Cancer

NOTE Confidence: 0.7948275

00:56:11.410 --> 00:56:13.950 Center and and in palliative care.

NOTE Confidence: 0.7948275

00:56:13.950 --> 00:56:15.567 I'm going to follow up on that.

NOTE Confidence: 0.7948275

00:56:15.570 --> 00:56:18.146 I I like this is a great opportunity.
NOTE Confidence: 0.7948275

00:56:18.150 --> 00:56:19.930 Change is a great opportunity.
NOTE Confidence: 0.7948275

00:56:19.930 --> 00:56:21.136 I'm going to write that down.
NOTE Confidence: 0.84509861375

00:56:26.730 --> 00:56:28.906 Right. Well, I don't see any other questions.
NOTE Confidence: 0.84509861375

00:56:28.910 --> 00:56:31.950 And it's 2 minutes to the top of the hour.
NOTE Confidence: 0.84509861375

00:56:31.950 --> 00:56:34.170 So I think we could close
NOTE Confidence: 0.84509861375

00:56:34.170 --> 00:56:35.938 for the evening unless Kevin,
NOTE Confidence: 0.84509861375

00:56:35.938 --> 00:56:37.666 do you have any other words?
NOTE Confidence: 0.84509861375

00:56:37.670 --> 00:56:39.974 I, I do want to remind before I turn
NOTE Confidence: 0.84509861375

00:56:39.974 --> 00:56:42.611 it over to you for final words that if
NOTE Confidence: 0.84509861375

00:56:42.611 --> 00:56:45.281 you have topics that you want to see in
NOTE Confidence: 0.84509861375

00:56:45.281 --> 00:56:48.230 town halls or if you have questions that
NOTE Confidence: 0.84509861375

00:56:48.230 --> 00:56:52.008 you want us to discuss during a town hall,
NOTE Confidence: 0.84509861375

00:56:52.010 --> 00:56:53.506 please send your questions
NOTE Confidence: 0.84509861375

00:56:53.506 --> 00:56:55.376 to cancer answers at Yale.
NOTE Confidence: 0.84509861375

00:56:55.380 --> 00:56:57.048 Edu whether it's a topic you

NOTE Confidence: 0.84509861375

00:56:57.048 --> 00:56:58.540 want to see come here,

NOTE Confidence: 0.84509861375

00:56:58.540 --> 00:57:00.430 whether it's a question you want

NOTE Confidence: 0.84509861375

00:57:00.430 --> 00:57:02.978 addressed in a town hall, please do so.

NOTE Confidence: 0.84509861375

00:57:02.978 --> 00:57:05.625 And I also want to remind people that

NOTE Confidence: 0.84509861375

00:57:05.625 --> 00:57:07.790 our distribution lists are always,

NOTE Confidence: 0.84509861375

00:57:07.790 --> 00:57:08.396 ever changing.

NOTE Confidence: 0.84509861375

00:57:08.396 --> 00:57:11.217 So if you get an invitation to a town

NOTE Confidence: 0.84509861375

00:57:11.217 --> 00:57:13.520 hall and you know your colleague or

NOTE Confidence: 0.84509861375

00:57:13.520 --> 00:57:15.597 your staff have not gotten that,

NOTE Confidence: 0.84509861375

00:57:15.600 --> 00:57:18.666 please feel free to forward those

NOTE Confidence: 0.84509861375

00:57:18.666 --> 00:57:21.396 on it is it is so difficult to make

NOTE Confidence: 0.84509861375

00:57:21.396 --> 00:57:23.259 sure that we're reaching everyone

NOTE Confidence: 0.84509861375

00:57:23.259 --> 00:57:25.411 about our town hall, so.

NOTE Confidence: 0.84509861375

00:57:25.411 --> 00:57:28.357 Please ask your ask your colleague

NOTE Confidence: 0.84509861375

00:57:28.357 --> 00:57:31.674 that you that you talked to every

NOTE Confidence: 0.84509861375

00:57:31.674 --> 00:57:33.126 day talk to your staff,
NOTE Confidence: 0.84509861375

00:57:33.126 --> 00:57:35.412 make sure that if they are not getting
NOTE Confidence: 0.84509861375

00:57:35.412 --> 00:57:37.157 these communications about our town
NOTE Confidence: 0.84509861375

00:57:37.157 --> 00:57:39.590 hall like Kevin or myself or Renee know,
NOTE Confidence: 0.84509861375

00:57:39.590 --> 00:57:41.354 we can make sure they get added
NOTE Confidence: 0.84509861375

00:57:41.354 --> 00:57:43.397 to the list and then always feel
NOTE Confidence: 0.84509861375

00:57:43.397 --> 00:57:44.625 free to forward them.
NOTE Confidence: 0.84509861375

00:57:44.630 --> 00:57:45.066 So Kevin,
NOTE Confidence: 0.84509861375

00:57:45.066 --> 00:57:47.080 I'll turn it over to you for any last
NOTE Confidence: 0.86806295

00:57:47.090 --> 00:57:48.998 words. Thank you.
NOTE Confidence: 0.855457851666667

00:57:49.430 --> 00:57:51.866 Thanks to all of our presenters.
NOTE Confidence: 0.855457851666667

00:57:51.870 --> 00:57:53.705 Really appreciate the work that
NOTE Confidence: 0.855457851666667

00:57:53.705 --> 00:57:55.960 Pam and her team have done.
NOTE Confidence: 0.855457851666667

00:57:55.960 --> 00:58:00.000 I know that this was just a narrow.
NOTE Confidence: 0.855457851666667

00:58:00.000 --> 00:58:02.952 Tidbit of the very impressive work
NOTE Confidence: 0.855457851666667

00:58:02.952 --> 00:58:06.203 that you're doing when all of across

NOTE Confidence: 0.855457851666667

00:58:06.203 --> 00:58:10.640 all of our missions and I I I can't

NOTE Confidence: 0.855457851666667

00:58:10.640 --> 00:58:14.068 emphasize enough, as I said early,

NOTE Confidence: 0.855457851666667

00:58:14.068 --> 00:58:16.276 the importance of bringing.

NOTE Confidence: 0.855457851666667

00:58:16.280 --> 00:58:18.620 All of ourselves to our patient

NOTE Confidence: 0.855457851666667

00:58:18.620 --> 00:58:20.944 safety work and thank you to

NOTE Confidence: 0.855457851666667

00:58:20.944 --> 00:58:22.736 our leaders there and Jensen,

NOTE Confidence: 0.855457851666667

00:58:22.736 --> 00:58:24.400 really appreciate your update.

NOTE Confidence: 0.855457851666667

00:58:24.400 --> 00:58:25.888 So everyone have a great evening.
