Students will participate in a Palliative Care Interprofessional Workshop which will focus on spiritual and cultural aspects of palliative care and the interprofessional team. This workshop provides a unique opportunity for learners in many health-related disciplines to work together in an interprofessional learning environment.

All participants will complete an on-line module prior to their assigned workshop: https://medicine.yale.edu/palliative/online/

**Workshop Learning Objectives:**
1. Understand basic precepts & goals of Palliative Care.
2. Identify importance of addressing spiritual needs and cultural issues in the care of seriously ill patients.
3. Recognize contributions of all health care professionals and the importance of interdisciplinary team.
