Cytopathology

The Yale Cytopathology Program operates a comprehensive laboratory that offers state-of-the-art facilities and equipment and a wide variety of testing procedures. The Cytopathology Service is responsible for rendering consultative reports derived from the examination of cytological preparations. These include samples for the screening of cervical cancer and diagnostic specimens obtained from biological fluids, scrapings, or by Fine Needle Aspiration (FNA). We also use modern molecular technologies to detect and type human papillomaviruses and to reveal molecular alterations characteristic of tumor cells.

Guoping Cai, MD
Associate Professor of Pathology

Angelique W. Levi, MD
Associate Professor of Pathology
Director, Pathology Outreach

Isil Yildiz-Aktas, MD, MPH
Assistant Professor of Pathology

Rebecca Baldassarri, MD
Assistant Professor of Pathology

Abi Raad, Rita, MD
Assistant Professor of Pathology

Diane Kowalski, MD
Associate Professor of Pathology
Director, Pathology Residency Program

Amine Darbinyan, MD
Instructor in Pathology

Malini Harigopal, MD
Associate Professor of Pathology
Director, Breast Pathology

Peter Humphrey, MD, PhD
Professor of Pathology and Obstetrics, Gynecology and Reproductive Sciences
Director, Gynecologic Pathology
Clinical Director, Molecular Diagnostics Laboratory

Pei Hui, MD, PhD
Professor of Pathology and Obstetrics, Gynecology and Reproductive Sciences
Director, Gynecologic Pathology
Clinical Director, Molecular Diagnostics Laboratory

Natalie Besta, MD
Associate Professor of Pathology
Associate Director, Cytopathology Laboratory

Adeniran Adebowale, MD
Associate Professor of Pathology
Director, Cytopathology and Cytology Laboratory

Rita Abi Raad, MD
Assistant Professor of Pathology

Natalia Buza, MD
Associate Professor of Pathology
Associate Director, Gynecologic Pathology
Associate Director, Pathology Residency Program

Serena Wong, MD
Assistant Professor of Pathology

Gynecologic Pathology

The Yale Gynecologic Pathology Program offers world-renowned diagnostic and therapeutic services. Our Gynecologic Pathology team receives diagnostically challenging cases from around the world, and performs not only routine evaluation of gross and microscopic specimens, but can also carry out specialized electron microscopic, immunohistochemical, and sophisticated molecular studies.
