

Oral and Maxillofacial

Yale Medicine's Oral and Maxillofacial Pathology program provides comprehensive diagnostic services on oral biopsy specimens. The service is led by Jeffrey Eskendri, DMD, a board-certified oral and maxillofacial pathologist. Dr. Eskendri takes special interest in dental oncology, in which he is fellowship trained. The service offers a multidisciplinary approach, including a team of subspecialty pathologists from Yale Pathology. Our oral and maxillofacial service is part of our Head, Neck and Endocrine program, a highly regarded high-volume service with subspecialty expertise, affording our clients the best personal service, turnaround times, and expert diagnoses.

Laboratory Benefits

- Cytology
- Routine Histopathology
- Special Stains
- Immunohistochemistry
- Immunofluorescence
- Advanced Diagnostic Technology

Superior Customer Service

- Email and/or phone consultations with an oral pathologist
- Timely and accurate results
- Online ordering and access to results using RELAY web portal
