

## Allow Participants to Share Screen

Zoom has changed the Meeting defaults to prevent anyone but the host from sharing their screen to alleviate Zoom Bombing (<https://techcrunch.com/2020/03/17/zoombombing/>).

The Host can change this during a meeting as shown below.

To allow participants to share their screen click on ^ (A), then click on "All Participants" (B).

To prevent participants from sharing their screen set "Who can share" back to 'Only Host'.
