Friday, January 18 was Match Day for Urology programs around the U.S. and we are pleased to announce the three physicians who will comprise our next class of residents: Stephanie Hanchuk, MD, Icahn School of Medicine at Mount Sinai; Amir Khan, MD, Emory University School of Medicine; and Benjamin Press, MD, Rutgers New Jersey Medical School.

We look forward to officially welcoming the new class this summer!
In October 2018, James Yu, MD and Preston Sprenkle, MD participated in the filming of a patient testimonial video for SpaceOAR Hydrogel, a biodegradable gel that serves as a spacer, protecting the rectum when a man is receiving radiation therapy to his prostate.

The video, which also features Henry, a patient who received SpaceOAR prior to his radiation therapy, was filmed in the East Rock neighborhood of New Haven as well as at Smilow Cancer Hospital. To watch the video, please click here.

DOXIMITY VOTING OPENS THIS MONTH

As a reminder, Doximity voting will open this month for U.S. News & World Report's annual Best Hospital's issue. Please take a moment to login and vote for Yale New Haven Hospital for urology and/or cancer. Once registered, you can vote in the specialty area in which you are board certified. Please support the exciting research and fantastic patient care we are offering our patients each day by voting. Watch your inboxes for a reminder to vote from Eliza Folsom.

RESIDENTS PARTICIPATE IN YOGA WELLNESS SESSION

On January 29, 11 residents participated in a one-hour yoga class held at Yale New Haven Hospital's livingwell Fitness Center. The class focused on helping participants connect breathing to their movements, while fluidly moving from one pose to the next, incorporating strength, flexibility and balance.

This yoga session was part of the Resident Wellness Program which launched last spring. The program is designed to equip residents with skills to develop healthy mental and physical habits and help them cope with the challenges of residency, future practice, and beyond. Learn more >>
CBIT HEALTHCARE HACKATHON TACKLES GENOMICS AND PERSONALIZED MEDICINE

The Yale University Center for Biomedical Innovation and Technology (CBIT) held its annual healthcare hackathon over the weekend of January 25-27. This year's topic was "Genomics: The Next Frontier of Personalized Medicine" and featured four suggested tracks: Data Privacy and Research, Early Disease Detection and Screening, Health Equity, and Treatment and Decision Support.

Peter G. Schulam, MD, PhD, co-founder of CBIT and Chair of Urology, served as a judge. Jodi Canapp was part of the organizing team and also served as a Mentor and Judges Lead.

Team Hypnos Tech was victorious, taking home the grand prize for their pitch: "Sleep Deprivation Amongst Emergency Services." They plan to build an earpod that measures EEG in your ear canal, combined with auditory data, to provide a real time physical measurement and provide performance optimization for special operations and emergency services.

KUDOS

Congratulations to the following Urology Technicians who were promoted to Urology Technician 2 (UT2):

- Nahomie Alexandre
- Crystal Batson-Jones
- Alyssa Casertano
- Rita Flores
- Tammy Mozell
- Amy Swiatlon
- Melissa Williams

We also extend our best wishes to Charmaign Pe, who passed the Society of Urologic Nurses and Associates (SUNA) Urology RN certification exam!
