GERALD PORTMAN TO JOIN YALE UROLOGY AT GREENWICH HOSPITAL

Yale Urology looks forward to welcoming former Yale Urology resident and Assistant Professor of Urology, Gerald Portman, MD, back to Yale to practice urology at Greenwich Hospital.

Dr. Portman completed his residency with Yale Urology and a fellowship in Robotic Oncology and Minimally Invasive Surgery at Hackensack University Medical Center University. Most recently, he practiced as an attending physician at Englewood Hospital and Medical Center.

Dr. Portman will begin seeing patients at Greenwich Hospital on April 1.

VIRTUAL RESIDENCY INTERVIEWS A RESOUNDING SUCCESS

We are pleased to share that 68 top-notch applicants from across the country participated in our virtual residency interview process. The night before interviews began, we hosted a virtual 'meet & greet' with our applicants, and shared a video overview of the department.

The three days of Zoom interviews went off without a hitch, and we credit the amazing work by Christine Merenda and the administrative team of Alaine Nellis Savage, Jodi Canapp, John Simunek, Meggan Avery, Sheila Garcia, and Stephanie Monroe.

The applicants were incredibly strong and very impressive, and we look forward to announcing our newest resident class on February 1.
VACCINATIONS ARE HERE! PLEASE SCHEDULE YOURS TODAY!

We continue to make great progress on the vaccination front! Thank you to all of the faculty and providers from Yale Urology who have already scheduled or received their first dose of the COVID-19 vaccine. Many are ready for their second vaccination!

If you have received an invitation to schedule your vaccination from the Health System, and wish to schedule, please login to your MyChart account and select “Schedule an Appointment,” and then select “COVID Vaccine Dose 1,” to choose a date and time immediately.

A special thanks to Diana Glassman and Meghan Curran who have volunteered to staff the vaccination clinics for Yale New Haven Health! Their efforts, together with those of many more volunteers, are helping to ensure our providers will all soon be protected.

THANK YOU TO ALL DEPLOYED STAFF FOR COVID COVERAGE

We want to take this time to recognize several Urology staff members who worked inpatient service on both COVID and non-COVID floors of Yale New Haven Hospital, as well as in the ICU, since March 2020.

Ryan Artigliere  Lori Last
Rowena Barcial  Johanna Mahon
Charlotte Bell  Lillian Masters
Elizabeth Bernier  Melissa Matias
Monica Bevilacqua  Bridget Meadow
Christine Bueno  Lana Mellers
Cynthia Cardone  Amy Moschos
Joanne Dostie  Charmaign Pe
Cherrelle Eaton  Dayanna Peterson
Kenny Facey  Zoey Potter-Henderson
Arielle Foreman  Marilyn Quiles
Valeska French  Victor Quintanilla
Yale Urology continues to provide care for patients in our outpatient settings in Connecticut, Rhode Island, and New York as well as a full complement of surgical and inpatient care despite the latest surge in COVID-19 cases. Yale Urology, which embraced telemedicine several years ago, was very well positioned to greatly expand its use. We are able to provide patients with safe, remote access to their physicians and providers when an in-office exam is not required or can be postponed. Thank you to our entire Yale Urology clinical team for their help in ensuring our patients continue to have access to the care they need, and for your tireless dedication.

**EMORY UNIVERSITY HOSTED ANGELA ARLEN AS VISITING PROFESSOR**

*Angela Arlen, MD,* was the 23rd Annual Woodard & Parrott Visiting Professor in Pediatric Urology at Children’s Healthcare of Atlanta/Emory University on December 3.

At the Department of Urology Grand Rounds, Dr. Arlen presented “Transitional Urology: Pediatric Diagnoses with Implications for the Adult Patient (and Urologist).”

She also provided a second talk, “Navigating Clinical Research Lessons Learned.”

**STAN HONIG PRESENTATION NOW AVAILABLE**

*Stanton Honig, MD,* presented at the American Society for Reproductive Medicine (ASRM) Virtual Scientific Congress and Expo in October 2020.

His panel presentation, “State of the ART of Non-Ejaculated Sperm and the Reproductive Lab,” was recorded and is now available for viewing. Please click here to watch.
