WEBVTT

NOTE duration:"00:34:23.4240000"

NOTE language:en-us

NOTE Confidence: 0.900383

00:00:04.030 --> 00:00:06.221 Alright, well I think most of the

NOTE Confidence: 0.900383

00:00:06.221 --> 00:00:08.699 people that are going to join our here.

NOTE Confidence: 0.900383

00:00:08.700 --> 00:00:11.830 Thank you all for joining.

NOTE Confidence: 0.900383

00:00:11.830 --> 00:00:14.707 Eric Grenier is our head of Endpoint

NOTE Confidence: 0.900383

00:00:14.707 --> 00:00:17.347 Eric Grenier who helps set up the my

NOTE Confidence: 0.900383

00:00:17.347 --> 00:00:19.731 apps at Yale application and he's going

NOTE Confidence: 0.900383

00:00:19.731 --> 00:00:22.539 to sort of walk us through the app and

NOTE Confidence: 0.900383

00:00:22.540 --> 00:00:25.744 how to install it and how to use it,

NOTE Confidence: 0.900383

00:00:25.750 --> 00:00:29.218 and hopefully this will be helpful

NOTE Confidence: 0.900383

00:00:29.218 --> 00:00:31.720 for everybody. Take it away Eric.

NOTE Confidence: 0.80146

00:00:31.720 --> 00:00:33.390 Good morning everybody. Thanks Dan.

NOTE Confidence: 0.80146

00:00:33.390 --> 00:00:35.679 So what we've done is we've basically

NOTE Confidence: 0.80146

00:00:35.679 --> 00:00:38.400 built a new my apps at Yale platform.

NOTE Confidence: 0.80146

00:00:38.400 --> 00:00:42.210 For those of you who have the

NOTE Confidence: 0.80146

00:00:42.210 --> 00:00:44.800 Platform you will notice quite a few

NOTE Confidence: 0.80146

00:00:44.800 --> 00:00:48.099 changes and a lot of our changes have

NOTE Confidence: 0.80146

00:00:48.099 --> 00:00:50.709 focused around in user experience and

NOTE Confidence: 0.80146

00:00:50.709 --> 00:00:54.085 making it easier for people to access the

NOTE Confidence: 0.80146

00:00:54.085 --> 00:00:56.150 environment and making the environment

NOTE Confidence: 0.80146

00:00:56.150 --> 00:00:58.610 more recognizable than in the past.

NOTE Confidence: 0.80146

00:00:58.610 --> 00:01:01.277 So I have two my engineers on

NOTE Confidence: 0.80146

00:01:01.277 --> 00:01:03.801 this call Steve Watkins and Lou

NOTE Confidence: 0.80146

00:01:03.801 --> 00:01:06.393 Fabiano and Steve is going to.

NOTE Confidence: 0.80146

00:01:06.400 --> 00:01:10.120 I'm going to give him allow him to

NOTE Confidence: 0.80146

00:01:10.120 --> 00:01:13.908 share his screen and he is going to.

NOTE Confidence: 0.80146

00:01:13.910 --> 00:01:15.134 Walk us through basically

NOTE Confidence: 0.80146

00:01:15.134 --> 00:01:16.358 how students access it.

NOTE Confidence: 0.80146

00:01:16.360 --> 00:01:18.880 One of the nice things about this is

NOTE Confidence: 0.80146

00:01:18.880 --> 00:01:21.710 if you remember from the old system.

NOTE Confidence: 0.80146

00:01:21.710 --> 00:01:24.740 You would have to use VPN if you were off

NOTE Confidence: 0.80146

00:01:24.820 --> 00:01:27.557 campus in order to access the system.

NOTE Confidence: 0.80146

00:01:27.560 --> 00:01:29.275 We've removed the VPN requirement

NOTE Confidence: 0.80146

00:01:29.275 --> 00:01:30.304 and it's no,

NOTE Confidence: 0.80146

00:01:30.310 --> 00:01:32.718 so it works the same way that dual

NOTE Confidence: 0.80146

00:01:32.718 --> 00:01:34.733 works with duo everywhere where it

NOTE Confidence: 0.80146

00:01:34.733 --> 00:01:37.574 90 days and then you don't have to

NOTE Confidence: 0.80146

00:01:37.574 --> 00:01:39.866 worry about putting in your duo

NOTE Confidence: 0.80146

00:01:39.866 --> 00:01:41.316 credentials every single time.

NOTE Confidence: 0.80146

00:01:41.316 --> 00:01:43.374 So the experience should be better.

NOTE Confidence: 0.80146

00:01:43.380 --> 00:01:45.868 We've also loaded up with a ton of

NOTE Confidence: 0.80146

00:01:45.868 --> 00:01:47.674 software point and we're actually

NOTE Confidence: 0.80146

00:01:47.674 --> 00:01:49.912 still loading it up with software,

NOTE Confidence: 0.80146

00:01:49.920 --> 00:01:52.328 so if there's ever a need for a

NOTE Confidence: 0.80146

00:01:52.328 --> 00:01:54.255 software title right now we're

NOTE Confidence: 0.80146

00:01:54.255 --> 00:01:55.935 completely focused on making.

NOTE Confidence: 0.80146

00:01:55.940 --> 00:01:57.280 Students have what they need,

NOTE Confidence: 0.80146

00:01:57.280 --> 00:02:00.031 so please let us know if there's

NOTE Confidence: 0.80146

00:02:00.031 --> 00:02:01.798 something that's missing and we

NOTE Confidence: 0.80146

00:02:01.798 --> 00:02:04.232 will work as hard as we can to get

NOTE Confidence: 0.80146

00:02:04.232 --> 00:02:06.465 it up there and in timely manner.

NOTE Confidence: 0.80146

00:02:06.470 --> 00:02:07.470 So with that said,

NOTE Confidence: 0.80146

00:02:07.470 --> 00:02:09.294 I'll kick it over to Steve and

NOTE Confidence: 0.80146

00:02:09.294 --> 00:02:11.121 even feel free to share your screen

NOTE Confidence: 0.80146

00:02:11.121 --> 00:02:12.319 and get us rolling.

NOTE Confidence: 0.76749915

00:02:23.440 --> 00:02:25.180 Can everybody see the screen OK?

NOTE Confidence: 0.8910317

00:02:27.780 --> 00:02:28.270 Yes.

NOTE Confidence: 0.8583407

00:02:29.680 --> 00:02:31.908 So I apologize, my neighbors

NOTE Confidence: 0.8583407

00:02:31.908 --> 00:02:34.710 decided to start mowing the lawn

NOTE Confidence: 0.8583407

00:02:34.796 --> 00:02:36.568 right when this began.

NOTE Confidence: 0.8583407

00:02:36.570 --> 00:02:38.892 Is a couple of ways to

NOTE Confidence: 0.8583407

4

00:02:38.892 --> 00:02:40.053 access the environment.

NOTE Confidence: 0.8583407

00:02:40.060 --> 00:02:42.000 There's a remote desktop client.

NOTE Confidence: 0.8583407

00:02:42.000 --> 00:02:44.328 It can be downloaded and installed,

NOTE Confidence: 0.8583407

00:02:44.330 --> 00:02:47.046 and there's also a web web client,

NOTE Confidence: 0.8583407

00:02:47.050 --> 00:02:49.366 so any browser that supports HTML5,

NOTE Confidence: 0.8583407

00:02:49.370 --> 00:02:50.146 basically Chrome,

NOTE Confidence: 0.8583407

00:02:50.146 --> 00:02:52.862 edge fire Fox can access the environment.

NOTE Confidence: 0.8583407

00:02:52.870 --> 00:02:55.742 We have a page in the software library

NOTE Confidence: 0.8583407

00:02:55.742 --> 00:02:58.686 for East of grabbing the full client.

NOTE Confidence: 0.8583407

00:02:58.690 --> 00:03:00.610 It is our recommended method to

NOTE Confidence: 0.8583407

00:03:00.610 --> 00:03:02.904 use the full remote desktop client

NOTE Confidence: 0.8583407

00:03:02.904 --> 00:03:05.279 because it supports multiple monitors.

NOTE Confidence: 0.8583407

00:03:05.280 --> 00:03:06.464 We find the response.

NOTE Confidence: 0.8583407

00:03:06.464 --> 00:03:09.252 Time to be a lot better and then if

NOTE Confidence: 0.8583407

00:03:09.252 --> 00:03:11.457 you're a big user of windows hotkeys

NOTE Confidence: 0.8583407

00:03:11.532 --> 00:03:14.223 they work a lot nicer in the full client.

NOTE Confidence: 0.8583407

00:03:14.230 --> 00:03:16.060 It's it's like a full desktop

NOTE Confidence: 0.8583407

00:03:16.060 --> 00:03:17.639 experience where when you're in

NOTE Confidence: 0.8583407

00:03:17.639 --> 00:03:19.164 the browser it's basically the

NOTE Confidence: 0.8583407

00:03:19.164 --> 00:03:20.689 functionality of the web browser

NOTE Confidence: 0.8583407

00:03:20.689 --> 00:03:22.697 and will go over that a little bit.

NOTE Confidence: 0.8583407

00:03:22.700 --> 00:03:24.160 So I've installed the remote

NOTE Confidence: 0.8583407

00:03:24.160 --> 00:03:25.620 desktop client on my machine.

NOTE Confidence: 0.8583407

00:03:25.620 --> 00:03:26.592 When you launch it,

NOTE Confidence: 0.8583407

00:03:26.592 --> 00:03:28.800 you get you get an option to subscribe

NOTE Confidence: 0.8583407

00:03:28.800 --> 00:03:30.870 here and we have details instructions.

NOTE Confidence: 0.8583407

00:03:30.870 --> 00:03:33.790 I'm not sure if Dan is sent you all yet,

NOTE Confidence: 0.8583407

00:03:33.790 --> 00:03:36.326 but we can provide the link it takes

NOTE Confidence: 0.8583407

00:03:36.326 --> 00:03:39.427 you step by step through the setup process.

NOTE Confidence: 0.8583407

00:03:39.430 --> 00:03:40.262 Bear with me here,

NOTE Confidence: 0.8583407

00:03:40.262 --> 00:03:42.270 I'm just going to drag my windows around.

NOTE Confidence: 0.8064783

00:03:48.950 --> 00:03:51.380 In the setup instructions for PC.

NOTE Confidence: 0.69840664

00:03:53.110 --> 00:03:54.436 Go in the yard with Thomas.

NOTE Confidence: 0.8401598

00:03:56.330 --> 00:03:56.730 Thank you.

NOTE Confidence: 0.8514233

00:04:00.030 --> 00:04:01.920 So you put the subscription URL in.

NOTE Confidence: 0.8514233

00:04:01.920 --> 00:04:03.768 You'll be asked to log in and it's

NOTE Confidence: 0.8514233

00:04:03.768 --> 00:04:05.699 your Yale email address and password.

NOTE Confidence: 0.8514233

00:04:05.700 --> 00:04:07.320 The first time you log in,

NOTE Confidence: 0.8514233

00:04:07.320 --> 00:04:09.210 you're going to get prompted for duo.

NOTE Confidence: 0.8514233

00:04:09.210 --> 00:04:11.667 I use this daily so it kind

NOTE Confidence: 0.8514233

00:04:11.667 --> 00:04:13.440 of already knows it's me.

NOTE Confidence: 0.8514233

00:04:13.440 --> 00:04:15.616 It takes a couple of seconds to see

NOTE Confidence: 0.8514233

00:04:15.616 --> 00:04:17.248 what resources you have access to,

NOTE Confidence: 0.8514233

00:04:17.250 --> 00:04:19.147 and this is a one time setup.

NOTE Confidence: 0.8514233

00:04:19.150 --> 00:04:20.560 After you after you've logged

NOTE Confidence: 0.8514233

00:04:20.560 --> 00:04:21.970 in connected to the environment

NOTE Confidence: 0.8514233

00:04:22.025 --> 00:04:23.230 you just launched the app,

NOTE Confidence: 0.8514233

00:04:23.230 --> 00:04:24.318 the application and it'll

NOTE Confidence: 0.8514233

00:04:24.318 --> 00:04:25.678 show you what you have.

NOTE Confidence: 0.8514233

00:04:25.680 --> 00:04:27.458 So when you when you folks login

NOTE Confidence: 0.8514233

00:04:27.458 --> 00:04:29.219 you won't see all these things.

NOTE Confidence: 0.8514233

00:04:29.220 --> 00:04:30.666 We have a bunch of different

NOTE Confidence: 0.8514233

00:04:30.666 --> 00:04:31.970 environments in a test environment

NOTE Confidence: 0.8514233

00:04:31.970 --> 00:04:33.698 setup with the students will actually

NOTE Confidence: 0.8514233

00:04:33.698 --> 00:04:35.470 see is just this Yale desktop.

NOTE Confidence: 0.8514233

00:04:35.470 --> 00:04:36.772 That's right here.

NOTE Confidence: 0.8514233

00:04:36.772 --> 00:04:40.390 To access it you just double click on it.

NOTE Confidence: 0.8514233

00:04:40.390 --> 00:04:40.996 It'll come,

NOTE Confidence: 0.8514233

00:04:40.996 --> 00:04:42.814 it'll connect to the desktop again.

NOTE Confidence: 0.8514233

00:04:42.820 --> 00:04:44.644 You log in with your email

NOTE Confidence: 0.8514233

00:04:44.644 --> 00:04:45.556 address and password.

NOTE Confidence: 0.8640356

00:04:52.860 --> 00:04:54.964 The first time you when you log in,

NOTE Confidence: 0.8640356

8

00:04:54.970 --> 00:04:56.622 you get the disclaimer that we have

NOTE Confidence: 0.8640356

00:04:56.622 --> 00:04:58.311 in all the public cluster machines

NOTE Confidence: 0.8640356

00:04:58.311 --> 00:05:00.159 about not saving your data locali

NOTE Confidence: 0.8640356

00:05:00.159 --> 00:05:01.940 to the machine and will go over

NOTE Confidence: 0.8640356

00:05:01.940 --> 00:05:03.679 that in detail in a little bit.

NOTE Confidence: 0.847022

00:05:13.640 --> 00:05:15.284 OK, so you'll see it's loaded

NOTE Confidence: 0.847022

00:05:15.284 --> 00:05:16.910 a full Windows 10 desktop.

NOTE Confidence: 0.847022

00:05:16.910 --> 00:05:18.098 It's what it's called.

NOTE Confidence: 0.847022

00:05:18.098 --> 00:05:19.880 What it's called is Windows 10.

NOTE Confidence: 0.847022

00:05:19.880 --> 00:05:21.245 Multi session means that multiple

NOTE Confidence: 0.847022

00:05:21.245 --> 00:05:22.994 people can connect to the same

NOTE Confidence: 0.847022

00:05:22.994 --> 00:05:24.326 machine at this simultaneously,

NOTE Confidence: 0.847022

00:05:24.330 --> 00:05:26.409 but I think most folks are familiar

NOTE Confidence: 0.847022

00:05:26.409 --> 00:05:28.191 with Windows 10, so it's a.

NOTE Confidence: 0.847022

00:05:28.191 --> 00:05:30.270 It's a look that they've seen before.

NOTE Confidence: 0.847022

00:05:30.270 --> 00:05:33.762 Of note, I want to show you real quick.

NOTE Confidence: 0.847022

00:05:33.770 --> 00:05:36.178 How could probably flashed away too fast,

NOTE Confidence: 0.847022

00:05:36.180 --> 00:05:39.267 but when we when we talk about one drive,

NOTE Confidence: 0.847022

00:05:39.270 --> 00:05:41.334 one drive is our preferred cloud

NOTE Confidence: 0.847022

00:05:41.334 --> 00:05:42.710 solution for the environment.

NOTE Confidence: 0.847022

00:05:42.710 --> 00:05:45.118 You can certainly use Google Drive Box.

NOTE Confidence: 0.847022

00:05:45.120 --> 00:05:47.190 Whatever your favorite cloud provider is.

NOTE Confidence: 0.847022

00:05:47.190 --> 00:05:50.590 The nice thing about one drive is that.

NOTE Confidence: 0.847022

00:05:50.590 --> 00:05:52.020 It's there's a native sync

NOTE Confidence: 0.847022

00:05:52.020 --> 00:05:53.450 app app on the machine,

NOTE Confidence: 0.847022

00:05:53.450 --> 00:05:55.166 and if you can see closely,

NOTE Confidence: 0.847022

00:05:55.170 --> 00:05:57.450 I don't know how small it looks remotely,

NOTE Confidence: 0.847022

00:05:57.450 --> 00:05:59.674 but if you see the icons they have

NOTE Confidence: 0.847022

00:05:59.674 --> 00:06:01.755 a little cloud icon in the bottom

NOTE Confidence: 0.847022

00:06:01.755 --> 00:06:04.019 left of 'em and that means the

NOTE Confidence: 0.847022

00:06:04.019 --> 00:06:05.869 files are syncing to OneDrive.

NOTE Confidence: 0.847022

00:06:05.870 --> 00:06:07.520 There's a little application here in

NOTE Confidence: 0.847022

00:06:07.520 --> 00:06:09.352 the bottom that looks like a cloud

NOTE Confidence: 0.847022

00:06:09.352 --> 00:06:10.941 in the bottom right near the Clock.

NOTE Confidence: 0.847022

00:06:10.950 --> 00:06:12.220 If you hover over it,

NOTE Confidence: 0.847022

00:06:12.220 --> 00:06:13.998 it says OneDrive is up to date.

NOTE Confidence: 0.847022

00:06:14.000 --> 00:06:15.778 What happens if one drives not connected?

NOTE Confidence: 0.847022

00:06:15.780 --> 00:06:17.256 You would actually see like a

NOTE Confidence: 0.847022

00:06:17.256 --> 00:06:19.062 little grey XI was hoping to show

NOTE Confidence: 0.847022

00:06:19.062 --> 00:06:20.854 you when I logged into the machine.

NOTE Confidence: 0.847022

00:06:20.860 --> 00:06:22.270 Usually it takes like 30 seconds

NOTE Confidence: 0.847022

00:06:22.270 --> 00:06:23.650 for one drive to connect.

NOTE Confidence: 0.847022

00:06:23.650 --> 00:06:24.915 If you're not connected properly

NOTE Confidence: 0.847022

00:06:24.915 --> 00:06:25.674 to one drive,

NOTE Confidence: 0.847022

00:06:25.680 --> 00:06:28.368 you'll have a little great X in the.

NOTE Confidence: 0.847022

00:06:28.370 --> 00:06:29.860 Under icons on your machine,

NOTE Confidence: 0.847022

00:06:29.860 --> 00:06:31.345 so you'll know it's not

NOTE Confidence: 0.847022

00:06:31.345 --> 00:06:32.533 connected and syncing properly.

NOTE Confidence: 0.847022

00:06:32.540 --> 00:06:34.030 If it doesn't connect properly,

NOTE Confidence: 0.847022

00:06:34.030 --> 00:06:36.074 you just click on the icon here

NOTE Confidence: 0.847022

00:06:36.074 --> 00:06:37.908 and instead of a sync status,

NOTE Confidence: 0.847022

00:06:37.910 --> 00:06:39.395 you would actually have a

NOTE Confidence: 0.847022

00:06:39.395 --> 00:06:40.583 sign in button here.

NOTE Confidence: 0.85072505

00:06:42.670 --> 00:06:44.222 What one drive? What?

NOTE Confidence: 0.85072505

00:06:44.222 --> 00:06:47.179 We've configured OneDrive to do is to sync.

NOTE Confidence: 0.85072505

00:06:47.180 --> 00:06:49.240 It syncs your desktop,

NOTE Confidence: 0.85072505

00:06:49.240 --> 00:06:51.815 your documents in your pictures.

NOTE Confidence: 0.85072505

00:06:51.820 --> 00:06:52.932 To the actual cloud.

NOTE Confidence: 0.85072505

00:06:52.932 --> 00:06:55.692 So if you go to I'm not sure if

NOTE Confidence: 0.85072505

00:06:55.692 --> 00:06:58.072 anyone here is used one drive before,

NOTE Confidence: 0.85072505

00:06:58.080 --> 00:07:00.897 but if you go there's a one drive folder.

NOTE Confidence: 0.85072505

00:07:00.900 --> 00:07:02.811 If you go to one drive here

NOTE Confidence: 0.85072505

00:07:02.811 --> 00:07:04.970 you can see there's a desktop,

NOTE Confidence: 0.85072505

00:07:04.970 --> 00:07:06.222 documents and pictures folder,

NOTE Confidence: 0.85072505

00:07:06.222 --> 00:07:08.100 among other things that I've saved.

NOTE Confidence: 0.85072505

00:07:08.100 --> 00:07:09.834 But if you actually put files

NOTE Confidence: 0.85072505

00:07:09.834 --> 00:07:11.540 and folders in OneDrive directly,

NOTE Confidence: 0.85072505

00:07:11.540 --> 00:07:12.584 it will appear.

NOTE Confidence: 0.85072505

00:07:12.584 --> 00:07:14.672 It will appear on your desktop,

NOTE Confidence: 0.85072505

00:07:14.680 --> 00:07:18.590 so if I make a new folder and call it test.

NOTE Confidence: 0.85072505

00:07:18.590 --> 00:07:19.436 You'll see it.

NOTE Confidence: 0.85072505

00:07:19.436 --> 00:07:21.410 It syncs automatically to my desktop here,

NOTE Confidence: 0.85072505

00:07:21.410 --> 00:07:23.290 so you can use the one drive on

NOTE Confidence: 0.85072505

00:07:23.290 --> 00:07:25.359 your own personal machines as well.

NOTE Confidence: 0.85072505

00:07:25.360 --> 00:07:27.646 I have this sync app on all my machines

NOTE Confidence: 0.85072505

00:07:27.646 --> 00:07:30.267 so my desktop looks identical everywhere.

NOTE Confidence: 0.85072505

00:07:30.270 --> 00:07:32.810 There's also a web client.

NOTE Confidence: 0.85072505

00:07:32.810 --> 00:07:33.845 For one drive,

NOTE Confidence: 0.85072505

00:07:33.845 --> 00:07:35.225 so if you launch,

NOTE Confidence: 0.85072505

00:07:35.230 --> 00:07:36.259 let's say edge.

NOTE Confidence: 0.89939576

00:07:43.810 --> 00:07:45.936 If you sign into one drive and this is

NOTE Confidence: 0.89939576

00:07:45.936 --> 00:07:48.177 if you signed into one drive anywhere,

NOTE Confidence: 0.89939576

00:07:48.180 --> 00:07:50.756 any machine, even outside of the environment.

NOTE Confidence: 0.89939576

00:07:50.760 --> 00:07:53.210 Just bear with me a second while I sign in.

NOTE Confidence: 0.8894711

00:08:01.230 --> 00:08:02.706 You'll see I have the same

NOTE Confidence: 0.8894711

00:08:02.706 --> 00:08:04.289 setup of files from one drive,

NOTE Confidence: 0.8894711

00:08:04.290 --> 00:08:05.935 so if you're on your own personal

NOTE Confidence: 0.8894711

00:08:05.935 --> 00:08:07.240 machine outside of the environment

NOTE Confidence: 0.8894711

00:08:07.240 --> 00:08:08.625 you're working out of file,

NOTE Confidence: 0.8894711

00:08:08.630 --> 00:08:10.718 you can save it in the desktop or documents

NOTE Confidence: 0.8894711

00:08:10.718 --> 00:08:12.756 and pictures folder and you'll see it when

NOTE Confidence: 0.8894711

00:08:12.756 --> 00:08:14.749 you log into the my apps environment.

NOTE Confidence: 0.8894711

00:08:14.750 --> 00:08:16.758 So say I was working on a random

NOTE Confidence: 0.8894711

00:08:16.758 --> 00:08:18.590 machine and I wanted to finish up on

NOTE Confidence: 0.8894711

00:08:18.590 --> 00:08:20.869 it in the in the my apps environment.

NOTE Confidence: 0.8894711

00:08:20.870 --> 00:08:23.788 If you copy the file, I'm just going to

NOTE Confidence: 0.8894711

00:08:23.788 --> 00:08:26.919 make a folder 'cause it's easier to see.

NOTE Confidence: 0.8894711

00:08:26.920 --> 00:08:28.438 If you create a folder here,

NOTE Confidence: 0.8894711

00:08:28.440 --> 00:08:30.456 the next time you log into my apps,

NOTE Confidence: 0.8894711

00:08:30.460 --> 00:08:32.224 you'll actually see it on your desktop.

NOTE Confidence: 0.8894711

00:08:32.230 --> 00:08:33.994 See how the folder was created here,

NOTE Confidence: 0.8894711

00:08:34.000 --> 00:08:36.556 so it's A kind of nice way to have

NOTE Confidence: 0.8894711

00:08:36.556 --> 00:08:38.997 access to your files from everywhere.

NOTE Confidence: 0.8894711

00:08:39.000 --> 00:08:40.988 I think I forgot to mention the

NOTE Confidence: 0.8894711

00:08:40.988 --> 00:08:43.118 first time you connect to one drive

NOTE Confidence: 0.8894711

00:08:43.118 --> 00:08:45.298 it's going to prompt you for duo

NOTE Confidence: 0.8894711

00:08:45.298 --> 00:08:47.098 in your password and all that,

NOTE Confidence: 0.8894711

00:08:47.100 --> 00:08:49.200 but it does save for 90 days.

NOTE Confidence: 0.8894711

00:08:49.200 --> 00:08:50.400 Like Eric mentioned before,

NOTE Confidence: 0.8894711

00:08:50.400 --> 00:08:52.200 so OneDrive is our recommended method.

NOTE Confidence: 0.8894711

00:08:52.200 --> 00:08:54.656 Just because the app is native to the

NOTE Confidence: 0.8894711

00:08:54.656 --> 00:08:56.700 environment and it's nice to have the

NOTE Confidence: 0.8894711

00:08:56.700 --> 00:08:59.044 syncing issue if you're a box or Google

NOTE Confidence: 0.8894711

00:08:59.044 --> 00:09:01.193 drive or any other cloud provider user,

NOTE Confidence: 0.8894711

00:09:01.200 --> 00:09:04.800 you can certainly access your files.

NOTE Confidence: 0.8894711

00:09:04.800 --> 00:09:06.486 Via web and open and use

NOTE Confidence: 0.8894711

00:09:06.486 --> 00:09:07.610 them within the environment.

NOTE Confidence: 0.8894711

00:09:07.610 --> 00:09:09.549 That way the caveat to that obviously

NOTE Confidence: 0.8894711

00:09:09.549 --> 00:09:11.963 is you know with one drive you can save

NOTE Confidence: 0.8894711

00:09:11.963 --> 00:09:13.938 your stuff on the desktop 'cause it's

NOTE Confidence: 0.8894711

00:09:13.938 --> 00:09:16.310 syncing to the cloud if you start save.

NOTE Confidence: 0.8894711

00:09:16.310 --> 00:09:18.470 If you're not using one drive and you're

NOTE Confidence: 0.8894711

00:09:18.470 --> 00:09:20.539 just saving your stuff on the desktop,

NOTE Confidence: 0.8894711

00:09:20.540 --> 00:09:21.708 it's not syncing anywhere,

NOTE Confidence: 0.8894711

00:09:21.708 --> 00:09:24.288 so it's only on the VM and and we

NOTE Confidence: 0.8894711

00:09:24.288 --> 00:09:26.440 want we want to have folks avoid that.

NOTE Confidence: 0.8894711

00:09:26.440 --> 00:09:28.379 So we're trying to really push folks

NOTE Confidence: 0.8894711

00:09:28.379 --> 00:09:30.089 towards one drive as the solution,

NOTE Confidence: 0.8894711

00:09:30.090 --> 00:09:32.619 so that way they don't have to worry about,

NOTE Confidence: 0.8894711

00:09:32.620 --> 00:09:34.948 oh, where's my? Where's my data?

NOTE Confidence: 0.8894711

00:09:34.950 --> 00:09:36.936 In terms of the actual VM,

NOTE Confidence: 0.8894711

00:09:36.940 --> 00:09:39.019 we've tried to mirror what's on the

NOTE Confidence: 0.8894711

00:09:39.019 --> 00:09:40.910 machines in the public clusters,

NOTE Confidence: 0.8894711

00:09:40.910 --> 00:09:43.259 so if you click on the start menu you

NOTE Confidence: 0.8894711

00:09:43.259 --> 00:09:45.698 get the full list of applications that

NOTE Confidence: 0.8894711

00:09:45.698 --> 00:09:48.190 are available in the public clusters.

NOTE Confidence: 0.8894711

00:09:48.190 --> 00:09:51.780 There's, you know, I know, I know.

NOTE Confidence: 0.8894711

00:09:51.780 --> 00:09:53.915 But health is a big SAS user,

NOTE Confidence: 0.8894711

00:09:53.920 --> 00:09:55.750 so sass is on the machine.

NOTE Confidence: 0.8894711

00:09:55.750 --> 00:09:56.418 There's SPSS.

NOTE Confidence: 0.8894711

00:09:56.418 --> 00:09:58.756 I'm not going to pretend to know

NOTE Confidence: 0.8894711

00:09:58.756 --> 00:10:00.369 how to use these soft.

NOTE Confidence: 0.8894711

00:10:00.370 --> 00:10:01.434 This is this software,

NOTE Confidence: 0.8894711

00:10:01.434 --> 00:10:03.505 but it's all here for your consumption

NOTE Confidence: 0.8894711

00:10:03.505 --> 00:10:05.977 with your files integrated with OneDrive,

NOTE Confidence: 0.8894711

00:10:05.980 --> 00:10:07.960 you can open and close them.

NOTE Confidence: 0.8894711

00:10:07.960 --> 00:10:10.930 I want to show you a little nuanced too.

NOTE Confidence: 0.815458

00:10:13.440 --> 00:10:15.526 To the one drive app as well.

NOTE Confidence: 0.815458

00:10:15.530 --> 00:10:17.246 There's sorry, the first time the

NOTE Confidence: 0.815458

00:10:17.246 --> 00:10:19.099 very first time you launch SPSS,

NOTE Confidence: 0.815458

00:10:19.100 --> 00:10:22.607 it takes a couple seconds to load.

NOTE Confidence: 0.815458

00:10:22.610 --> 00:10:25.139 So let me let me let that finish opening,

NOTE Confidence: 0.815458

00:10:25.140 --> 00:10:26.595 and then I'll actually show

NOTE Confidence: 0.815458

00:10:26.595 --> 00:10:28.366 you show you some nuances to

NOTE Confidence: 0.815458

00:10:28.366 --> 00:10:29.920 the actual files in one drive.

NOTE Confidence: 0.8132404

00:10:32.660 --> 00:10:34.470 Get rid of those disclaimers.

NOTE Confidence: 0.8759129

00:10:37.040 --> 00:10:38.648 So you'll see you'll see some

NOTE Confidence: 0.8759129

00:10:38.648 --> 00:10:40.344 of these files have check marks

NOTE Confidence: 0.8759129

00:10:40.344 --> 00:10:42.030 in some of these files don't.

NOTE Confidence: 0.8759129

00:10:42.030 --> 00:10:44.238 If the file doesn't have a check mark,

NOTE Confidence: 0.8759129

00:10:44.240 --> 00:10:46.456 it means it's actually resided in one drive.

NOTE Confidence: 0.8759129

00:10:46.460 --> 00:10:48.668 So when you go to open the file,

NOTE Confidence: 0.8759129

00:10:48.670 --> 00:10:50.040 it's gotta basically copy it

NOTE Confidence: 0.8759129

00:10:50.040 --> 00:10:51.720 locali and then open the file.

NOTE Confidence: 0.8759129

00:10:51.720 --> 00:10:54.231 So you'll make you may notice if it doesn't

NOTE Confidence: 0.8759129

00:10:54.231 --> 00:10:56.424 have a if it doesn't have a checkbox,

NOTE Confidence: 0.8759129

00:10:56.430 --> 00:10:58.122 it'll take a second to download

NOTE Confidence: 0.8759129

00:10:58.122 --> 00:10:59.480 and then it opens up.

NOTE Confidence: 0.8759129

00:10:59.480 --> 00:11:01.293 So if you have larger files that

NOTE Confidence: 0.8759129

00:11:01.293 --> 00:11:03.658 might take a second or two to open

NOTE Confidence: 0.8759129

00:11:03.658 --> 00:11:05.183 'cause it's gotta actually grab

NOTE Confidence: 0.8759129

00:11:05.247 --> 00:11:07.144 the file from one from the cloud.

NOTE Confidence: 0.8759129

00:11:07.150 --> 00:11:08.990 And you'll notice now that I've opened it.

NOTE Confidence: 0.8759129

00:11:08.990 --> 00:11:10.370 It's got the check box here,

NOTE Confidence: 0.8759129

00:11:10.370 --> 00:11:11.980 so it's already downloaded in cash locally,

NOTE Confidence: 0.8759129

00:11:11.980 --> 00:11:13.360 so the second time it would

NOTE Confidence: 0.8759129

00:11:13.360 --> 00:11:14.280 open a little faster.

NOTE Confidence: 0.8759129

00:11:14.280 --> 00:11:16.120 I mean, this is probably a bad example,

NOTE Confidence: 0.8759129

00:11:16.120 --> 00:11:17.730 'cause it's a small world word file,

NOTE Confidence: 0.8759129

00:11:17.730 --> 00:11:19.800 but you know it was a very large file.

NOTE Confidence: 0.8759129

00:11:19.800 --> 00:11:21.340 You might see a couple of seconds

NOTE Confidence: 0.8759129

00:11:21.340 --> 00:11:22.758 where it's just got to retrieve

NOTE Confidence: 0.8759129

00:11:22.758 --> 00:11:23.938 the files off of OneDrive.

NOTE Confidence: 0.83093274

00:11:26.400 --> 00:11:28.680 That's, let's see have a little

NOTE Confidence: 0.83093274

00:11:28.680 --> 00:11:31.280 checklist of things I want to cover,

NOTE Confidence: 0.83093274

00:11:31.280 --> 00:11:33.150 so bear with me here.

NOTE Confidence: 0.83093274

00:11:33.150 --> 00:11:36.370 Another, yeah, I think I said that

NOTE Confidence: 0.83093274

00:11:36.370 --> 00:11:39.378 the thick client allows access to.

NOTE Confidence: 0.83093274

00:11:39.380 --> 00:11:39.890 Multiple monitors,

NOTE Confidence: 0.83093274

00:11:39.890 --> 00:11:41.420 there's a way to customize settings.

NOTE Confidence: 0.83093274

00:11:41.420 --> 00:11:42.440 It probably should have

NOTE Confidence: 0.83093274

00:11:42.440 --> 00:11:43.715 showed this at the beginning,

NOTE Confidence: 0.83093274

00:11:43.720 --> 00:11:45.250 so when you see Yale desktop,

NOTE Confidence: 0.83093274

00:11:45.250 --> 00:11:46.525 if you actually right click

NOTE Confidence: 0.83093274

00:11:46.525 --> 00:11:47.800 it and go to settings.

NOTE Confidence: 0.83093274

00:11:47.800 --> 00:11:49.840 If you see up in the top right,

NOTE Confidence: 0.83093274

00:11:49.840 --> 00:11:51.618 there's a use default settings option here.

NOTE Confidence: 0.83093274

00:11:51.620 --> 00:11:53.412 You can tell it to use multiple monitors

NOTE Confidence: 0.83093274

00:11:53.412 --> 00:11:54.940 or single monitor single display.

NOTE Confidence: 0.83093274

00:11:54.940 --> 00:11:56.718 I use multiple monitors for the environment,

NOTE Confidence: 0.83093274

00:11:56.720 --> 00:11:58.400 but I don't like it to take over

NOTE Confidence: 0.83093274

00:11:58.400 --> 00:12:00.161 both of my monitors and by default

NOTE Confidence: 0.83093274

00:12:00.161 --> 00:12:01.806 and wants to use every monitor

NOTE Confidence: 0.83093274

00:12:01.806 --> 00:12:03.606 you have attached to the system,

NOTE Confidence: 0.83093274

00:12:03.610 --> 00:12:05.346 so I usually come in here and change

NOTE Confidence: 0.83093274

00:12:05.346 --> 00:12:07.351 it to say Oh just use a single

NOTE Confidence: 0.83093274

00:12:07.351 --> 00:12:08.985 display 'cause I'll have the virtual

NOTE Confidence: 0.83093274

00:12:08.985 --> 00:12:10.689 environment setup on one screen and

NOTE Confidence: 0.83093274

00:12:10.689 --> 00:12:13.100 then my regular computer on the other.

NOTE Confidence: 0.83093274

00:12:13.100 --> 00:12:14.360 So that's where you come

NOTE Confidence: 0.83093274

00:12:14.360 --> 00:12:15.368 to change that setting.

NOTE Confidence: 0.9178821

00:12:18.880 --> 00:12:22.240 When you want to log off the environment.

NOTE Confidence: 0.9178821

00:12:22.240 --> 00:12:24.664 You can just click here and say sign

NOTE Confidence: 0.9178821

00:12:24.664 --> 00:12:27.540 out if you actually just XX out of it.

NOTE Confidence: 0.9178821

00:12:27.540 --> 00:12:28.788 It's basically almost like

NOTE Confidence: 0.9178821

00:12:28.788 --> 00:12:30.036 shutting your laptop lid.

NOTE Confidence: 0.9178821

00:12:30.040 --> 00:12:32.115 The programs that you had

NOTE Confidence: 0.9178821

00:12:32.115 --> 00:12:33.775 open will stay running.

NOTE Confidence: 0.9178821

00:12:33.780 --> 00:12:36.165 We do have a policy set for two hours,

NOTE Confidence: 0.9178821

00:12:36.170 --> 00:12:37.948 so if you're idle or disconnected for

NOTE Confidence: 0.9178821

00:12:37.948 --> 00:12:40.039 two hours it will sign you off your

NOTE Confidence: 0.9178821

00:12:40.039 --> 00:12:42.030 session and that's the free up resources,

NOTE Confidence: 0.9178821

00:12:42.030 --> 00:12:43.620 especially if you're in a browser.

NOTE Confidence: 0.9178821

00:12:43.620 --> 00:12:45.000 If folks access the environment

NOTE Confidence: 0.9178821

00:12:45.000 --> 00:12:46.676 from a browser and they just

NOTE Confidence: 0.9178821

00:12:46.676 --> 00:12:48.140 close fire Fox and walk away,

NOTE Confidence: 0.9178821

00:12:48.140 --> 00:12:50.268 it doesn't actually log you off the computer,

NOTE Confidence: 0.9178821

00:12:50.270 --> 00:12:51.530 it's it's just going to

NOTE Confidence: 0.9178821

00:12:51.530 --> 00:12:53.200 keep it in that idle state,

NOTE Confidence: 0.9178821

00:12:53.200 --> 00:12:55.048 so we have to have some sort

NOTE Confidence: 0.9178821

00:12:55.048 --> 00:12:56.390 of mechanism to say hey,

NOTE Confidence: 0.9178821

00:12:56.390 --> 00:12:57.720 no ones really using this.

NOTE Confidence: 0.9178821

00:12:57.720 --> 00:12:59.316 Let's sign him off real quickly.

NOTE Confidence: 0.9178821

00:12:59.320 --> 00:13:01.440 I'll show you the Web app as well.

NOTE Confidence: 0.9178821

00:13:01.440 --> 00:13:02.922 We've made a custom URL to

NOTE Confidence: 0.9178821

00:13:02.922 --> 00:13:04.799 make it easy to remember it's.

NOTE Confidence: 0.9178821

00:13:04.800 --> 00:13:06.606 The same as the old environment,

NOTE Confidence: 0.9178821

00:13:06.610 --> 00:13:08.954 it's just my apps that yale.edu and it'll

NOTE Confidence: 0.9178821

00:13:08.954 --> 00:13:11.119 redirect you to the Microsoft Web client.

NOTE Confidence: 0.9178821

00:13:11.120 --> 00:13:14.200 But you can tell the Microsoft URLs not.

NOTE Confidence: 0.9178821

00:13:14.200 --> 00:13:16.258 Not so user friendly to remember.

NOTE Confidence: 0.877974910909091

00:13:24.100 --> 00:13:25.156 Sorry I'm like.

NOTE Confidence: 0.877974910909091

00:13:25.156 --> 00:13:28.190 On Wi-Fi in the corner of my house,

NOTE Confidence: 0.877974910909091

00:13:28.190 --> 00:13:29.540 hiding from the family South,

NOTE Confidence: 0.877974910909091

00:13:29.540 --> 00:13:31.166 the surface signals not as great.

NOTE Confidence: 0.877974910909091

00:13:31.170 --> 00:13:32.796 I'm already logged into the browser

NOTE Confidence: 0.877974910909091

00:13:32.796 --> 00:13:34.419 'cause I logged into one drive,

NOTE Confidence: 0.877974910909091

00:13:34.420 --> 00:13:35.775 but normally you would get

NOTE Confidence: 0.877974910909091

00:13:35.775 --> 00:13:36.859 the normal login window.

NOTE Confidence: 0.877974910909091

00:13:36.860 --> 00:13:37.868 Your email and password.

NOTE Confidence: 0.877974910909091

00:13:37.868 --> 00:13:39.380 You can see you can see

NOTE Confidence: 0.877974910909091

00:13:39.439 --> 00:13:40.647 all the resources here.

NOTE Confidence: 0.877974910909091

00:13:40.650 --> 00:13:42.491 So if I wanted to launch yell

NOTE Confidence: 0.877974910909091

00:13:42.491 --> 00:13:44.447 desktop I would just click it here.

NOTE Confidence: 0.877974910909091

00:13:44.450 --> 00:13:45.866 I'm not going to actually do

NOTE Confidence: 0.877974910909091

00:13:45.866 --> 00:13:47.719 it for the purposes of the demo

NOTE Confidence: 0.877974910909091

00:13:47.719 --> 00:13:49.429 'cause I'm already logged into the

NOTE Confidence: 0.877974910909091

00:13:49.429 --> 00:13:51.451 environment that you can run the full

NOTE Confidence: 0.877974910909091

00:13:51.451 --> 00:13:52.851 functionality through fire Fox, Chrome.

NOTE Confidence: 0.877974910909091

00:13:52.851 --> 00:13:55.019 You know any any of your major browsers?

NOTE Confidence: 0.877974910909091

00:13:55.020 --> 00:13:55.852 Safari fail.

NOTE Confidence: 0.877974910909091

00:13:55.852 --> 00:13:58.348 They all seem to work OK.

NOTE Confidence: 0.877974910909091

00:13:58.350 --> 00:14:00.734 If you have any issues with the environment,

NOTE Confidence: 0.877974910909091

00:14:00.740 --> 00:14:02.156 we recommend like usual.

NOTE Confidence: 0.877974910909091

00:14:02.156 --> 00:14:04.578 Contacting our help desk or helpdesk and

NOTE Confidence: 0.877974910909091

00:14:04.578 --> 00:14:06.720 solve a lot of the issues on the fly.

NOTE Confidence: 0.877974910909091

00:14:06.720 --> 00:14:07.560 If they can't,

NOTE Confidence: 0.877974910909091

00:14:07.560 --> 00:14:09.898 they can always escalate it to Dan or

NOTE Confidence: 0.877974910909091

00:14:09.898 --> 00:14:11.806 someone in our group is appropriate.

NOTE Confidence: 0.877974910909091

00:14:11.810 --> 00:14:13.987 I would say 'cause I think there's

NOTE Confidence: 0.877974910909091

00:14:13.987 --> 00:14:15.567 there's some you know professors

NOTE Confidence: 0.877974910909091

00:14:15.567 --> 00:14:17.903 and TAS on the phone that if you

NOTE Confidence: 0.877974910909091

00:14:17.973 --> 00:14:19.933 have a class that you know is

NOTE Confidence: 0.877974910909091

00:14:19.933 --> 00:14:21.674 going to utilize the service and

NOTE Confidence: 0.877974910909091

00:14:21.674 --> 00:14:23.462 there's going to be heavy usage,

NOTE Confidence: 0.877974910909091

00:14:23.470 --> 00:14:25.430 we ask that you get us the

NOTE Confidence: 0.877974910909091

00:14:25.430 --> 00:14:27.570 schedules just so we can have

NOTE Confidence: 0.877974910909091

00:14:27.570 --> 00:14:29.210 the adequate resources available.

NOTE Confidence: 0.877974910909091

00:14:29.210 --> 00:14:30.860 We have some logic built-in where

NOTE Confidence: 0.877974910909091

00:14:30.860 --> 00:14:32.453 every couple of minutes it checks

NOTE Confidence: 0.877974910909091

00:14:32.453 --> 00:14:34.007 the number of sessions an if it

NOTE Confidence: 0.877974910909091

00:14:34.007 --> 00:14:35.617 hits his threshold it turns more

NOTE Confidence: 0.877974910909091

00:14:35.617 --> 00:14:36.689 and more computers on,

NOTE Confidence: 0.877974910909091

00:14:36.690 --> 00:14:38.482 but if you know you have a class

NOTE Confidence: 0.877974910909091

00:14:38.482 --> 00:14:40.124 at say 9:00 AM where there's

NOTE Confidence: 0.877974910909091

00:14:40.124 --> 00:14:42.110 going to be 80 people using SAS,

NOTE Confidence: 0.877974910909091

00:14:42.110 --> 00:14:44.690 we can kind of get ahead of that and say,

NOTE Confidence: 0.877974910909091

00:14:44.690 --> 00:14:46.238 Oh, let's have enough capacity started.

NOTE Confidence: 0.877974910909091

00:14:46.240 --> 00:14:47.788 So when the class gets in,

NOTE Confidence: 0.877974910909091

00:14:47.790 --> 00:14:49.470 there's enough machines up and running

NOTE Confidence: 0.877974910909091

00:14:49.470 --> 00:14:51.820 so you don't have to wait for it to

NOTE Confidence: 0.877974910909091

00:14:51.820 --> 00:14:53.200 check and turn these machines on.

NOTE Confidence: 0.877974910909091

00:14:53.200 --> 00:14:54.852 'cause it does take a minute or

NOTE Confidence: 0.877974910909091

00:14:54.852 --> 00:14:56.560 two to turn on new computers.

NOTE Confidence: 0.877974910909091

00:14:56.560 --> 00:14:59.280 So if we can kind of get ahead of that.

NOTE Confidence: 0.877974910909091

00:14:59.280 --> 00:15:02.270 That would be a big help to us and to you.

NOTE Confidence: 0.877974910909091

00:15:02.270 --> 00:15:03.630 Teaching the class you know.

NOTE Confidence: 0.877974910909091

00:15:03.630 --> 00:15:04.714 You know we don't.

NOTE Confidence: 0.877974910909091

00:15:04.714 --> 00:15:06.952 We don't want 100 people logging on at

NOTE Confidence: 0.877974910909091

00:15:06.952 --> 00:15:08.884 the same second trying to access his

NOTE Confidence: 0.877974910909091

00:15:08.884 --> 00:15:10.979 resources while it tries to spin up enough.

NOTE Confidence: 0.877974910909091

00:15:10.980 --> 00:15:12.064 You know enough machines

NOTE Confidence: 0.877974910909091

00:15:12.064 --> 00:15:13.148 to handle the capacity,

NOTE Confidence: 0.877974910909091

00:15:13.150 --> 00:15:14.794 so we can definitely get ahead

NOTE Confidence: 0.877974910909091

00:15:14.794 --> 00:15:16.690 of that if you let us know.

NOTE Confidence: 0.877974910909091

00:15:16.690 --> 00:15:18.316 Hey, I have sass classes Tuesday,

NOTE Confidence: 0.877974910909091

00:15:18.320 --> 00:15:20.217 Thursday at this time, or you know,

NOTE Confidence: 0.877974910909091

00:15:20.220 --> 00:15:21.858 we expect the high volume here.

NOTE Confidence: 0.877974910909091

00:15:21.860 --> 00:15:24.320 We can make sure everything is

NOTE Confidence: 0.877974910909091

00:15:24.320 --> 00:15:27.048 weighted so there's no time lag and.

NOTE Confidence: 0.877974910909091

00:15:27.050 --> 00:15:29.170 You know and get in getting everything up.

NOTE Confidence: 0.877974910909091

00:15:29.170 --> 00:15:30.495 I think that's basically the

NOTE Confidence: 0.877974910909091

00:15:30.495 --> 00:15:31.820 gist of my speech here.

NOTE Confidence: 0.877974910909091

00:15:31.820 --> 00:15:32.880 It's it's, you know,

NOTE Confidence: 0.877974910909091

00:15:32.880 --> 00:15:34.205 it's a Windows 10 machine.

NOTE Confidence: 0.877974910909091

00:15:34.210 --> 00:15:35.530 I think folks are pretty

NOTE Confidence: 0.877974910909091

00:15:35.530 --> 00:15:36.586 pretty familiar with it.

NOTE Confidence: 0.877974910909091

00:15:36.590 --> 00:15:38.389 I know I talked awhile about one

NOTE Confidence: 0.877974910909091

00:15:38.389 --> 00:15:40.073 drive are really trying to push

NOTE Confidence: 0.877974910909091

00:15:40.073 --> 00:15:41.777 it because we think the user

NOTE Confidence: 0.877974910909091

00:15:41.777 --> 00:15:43.220 experience is just a lot better.

NOTE Confidence: 0.877974910909091

00:15:43.220 --> 00:15:43.485 Obviously,

NOTE Confidence: 0.877974910909091

00:15:43.485 --> 00:15:44.810 date is what's important at

NOTE Confidence: 0.877974910909091

00:15:44.810 --> 00:15:45.870 the end of the

NOTE Confidence: 0.8651871

00:15:45.929 --> 00:15:48.250 day, so we want to have this stuff sinking.

NOTE Confidence: 0.8651871

00:15:48.250 --> 00:15:49.822 You know, I can't stress enough

29

NOTE Confidence: 0.8651871

00:15:49.822 --> 00:15:51.429 that if you're using one drive,

NOTE Confidence: 0.8651871

00:15:51.430 --> 00:15:53.285 make sure it looks like a cloud.

NOTE Confidence: 0.8651871

00:15:53.290 --> 00:15:54.865 Hear it, you'll see a big Gray

NOTE Confidence: 0.8651871

00:15:54.865 --> 00:15:56.575 X if it's not connected properly

NOTE Confidence: 0.8651871

00:15:56.575 --> 00:15:58.525 'cause you want to have your.

NOTE Confidence: 0.8651871

00:15:58.530 --> 00:16:00.290 You want to have your

NOTE Confidence: 0.8651871

00:16:00.290 --> 00:16:02.050 files syncing to the cloud.

NOTE Confidence: 0.8651871

00:16:02.050 --> 00:16:03.484 I think that's about all I

NOTE Confidence: 0.8651871

00:16:03.484 --> 00:16:05.200 have for the main presentation.

NOTE Confidence: 0.8651871

00:16:05.200 --> 00:16:07.755 I'm not sure if anyone has any

NOTE Confidence: 0.8651871

00:16:07.755 --> 00:16:09.839 questions that we can address.

NOTE Confidence: 0.8651871

00:16:09.840 --> 00:16:11.220 Or issues like Eric said.

NOTE Confidence: 0.8651871

00:16:11.220 --> 00:16:12.590 If there's enhancements or if

NOTE Confidence: 0.8651871

00:16:12.590 --> 00:16:13.686 you need additional software,

NOTE Confidence: 0.8651871

00:16:13.690 --> 00:16:15.052 we ask the provide the software

NOTE Confidence: 0.8651871

00:16:15.052 --> 00:16:16.720 to us and the configuration.

NOTE Confidence: 0.8651871

00:16:16.720 --> 00:16:18.330 If there's specific licensing we

NOTE Confidence: 0.8651871

00:16:18.330 --> 00:16:20.478 would need that detail and we can

NOTE Confidence: 0.8651871

00:16:20.478 --> 00:16:22.158 set it up in the test environment

NOTE Confidence: 0.8651871

00:16:22.158 --> 00:16:23.963 and have you kind of run through

NOTE Confidence: 0.8651871

00:16:23.963 --> 00:16:25.978 and test and make sure it works to

NOTE Confidence: 0.8651871

00:16:25.978 --> 00:16:27.850 your liking before we push it out

NOTE Confidence: 0.8651871

00:16:27.850 --> 00:16:29.638 to all the machines in production.

NOTE Confidence: 0.8662202

00:16:31.690 --> 00:16:32.854 So that that's that's

NOTE Confidence: 0.8662202

00:16:32.854 --> 00:16:34.018 basically in a nutshell.

NOTE Confidence: 0.9163866

00:16:40.110 --> 00:16:41.775 Does anybody have any questions

NOTE Confidence: 0.9163866

00:16:41.775 --> 00:16:43.770 that we could answer? Any concerns?

NOTE Confidence: 0.74617535

00:16:46.760 --> 00:16:52.570 Hi this is. Hi this is my you are.

NOTE Confidence: 0.74617535

00:16:52.570 --> 00:16:54.652 Uh, one of the faculty member

NOTE Confidence: 0.74617535

00:16:54.652 --> 00:16:56.411 members in chronic disease at

NOTE Confidence: 0.74617535

00:16:56.411 --> 00:16:58.265 the at the school public health,

NOTE Confidence: 0.74617535

00:16:58.270 --> 00:17:00.835 and I was wondering about

NOTE Confidence: 0.74617535

00:17:00.835 --> 00:17:02.887 sass in particular and.

NOTE Confidence: 0.74617535

00:17:02.890 --> 00:17:04.680 It doesn't run on Macs,

NOTE Confidence: 0.74617535

00:17:04.680 --> 00:17:07.536 and so this is a solution for that.

NOTE Confidence: 0.74617535

00:17:07.540 --> 00:17:10.046 So would people be able to then,

NOTE Confidence: 0.74617535

00:17:10.050 --> 00:17:12.396 if you're using a Mac that

NOTE Confidence: 0.74617535

00:17:12.396 --> 00:17:15.420 you'd be able to run SAS either.

NOTE Confidence: 0.74617535

00:17:15.420 --> 00:17:17.464 Accessing this my apps through the Web,

NOTE Confidence: 0.74617535

00:17:17.470 --> 00:17:19.521 or even if you have it locali

NOTE Confidence: 0.74617535

00:17:19.521 --> 00:17:20.984 downloaded on your Mac without

NOTE Confidence: 0.74617535

00:17:20.984 --> 00:17:22.955 having to do any sort of partitioning

NOTE Confidence: 0.74617535

00:17:22.955 --> 00:17:25.215 or any sort of boot camp or any

NOTE Confidence: 0.74617535

00:17:25.215 --> 00:17:26.841 of those sort of things that

NOTE Confidence: 0.74617535

00:17:26.841 --> 00:17:28.446 we're creating lots of problems

NOTE Confidence: 0.74617535

00:17:28.446 --> 00:17:30.660 when they were trying to use sass

NOTE Confidence: 0.8653587

00:17:30.660 --> 00:17:31.479 through Citrix, correct?

NOTE Confidence: 0.8653587

00:17:31.479 --> 00:17:33.390 So you won't have to create any

NOTE Confidence: 0.8653587

00:17:33.442 --> 00:17:34.758 partition or anything else.

NOTE Confidence: 0.8653587

00:17:34.760 --> 00:17:37.176 You will be able to just either download

NOTE Confidence: 0.8653587

00:17:37.176 --> 00:17:39.150 the client or use the web client.

NOTE Confidence: 0.8653587

00:17:39.150 --> 00:17:40.908 I highly recommend the full client,

NOTE Confidence: 0.8653587

00:17:40.910 --> 00:17:42.560 so there's a Mac client available

NOTE Confidence: 0.8653587

00:17:42.560 --> 00:17:44.594 for it and they will be able

NOTE Confidence: 0.8653587

00:17:44.594 --> 00:17:46.346 to launch the full desktop and

NOTE Confidence: 0.8653587

00:17:46.346 --> 00:17:47.649 utilized sat through that.

NOTE Confidence: 0.830435

00:17:48.330 --> 00:17:50.643 Oh great. OK, so that and then and then

NOTE Confidence: 0.830435

00:17:50.643 --> 00:17:52.938 you mentioned you know if we had say,

NOTE Confidence: 0.830435

00:17:52.940 --> 00:17:54.290 wanted to have 20 users,

NOTE Confidence: 0.830435

00:17:54.290 --> 00:17:56.341 40 users for a class or something

NOTE Confidence: 0.830435

00:17:56.341 --> 00:17:57.517 simultaneously then we could

NOTE Confidence: 0.830435

00:17:57.517 --> 00:17:59.169 they would be able to do that.

NOTE Confidence: 0.830435

00:17:59.170 --> 00:18:01.402 Somebody on PC SM would be on Max as

NOTE Confidence: 0.830435

00:18:01.402 --> 00:18:03.320 long as we arranged with you ahead

NOTE Confidence: 0.830435

00:18:03.320 --> 00:18:05.588 of time to let you know that you

NOTE Confidence: 0.830435

00:18:05.588 --> 00:18:07.570 know these are one hour times or

NOTE Confidence: 0.830435

00:18:07.570 --> 00:18:08.930 wow. OK completely device agnostic.

NOTE Confidence: 0.830435

00:18:08.930 --> 00:18:11.369 I mean the other day I have an Android.

NOTE Confidence: 0.830435

00:18:11.370 --> 00:18:13.458 I have an Android phone and I have

NOTE Confidence: 0.830435

00:18:13.458 --> 00:18:15.089 the client installed on there and

NOTE Confidence: 0.830435

00:18:15.089 --> 00:18:17.274 I was able to launch a desktop on

NOTE Confidence: 0.830435

00:18:17.274 --> 00:18:19.213 my phone hooked up to a monitor,

NOTE Confidence: 0.830435

00:18:19.220 --> 00:18:20.294 mouse and keyboard.

NOTE Confidence: 0.830435

00:18:20.294 --> 00:18:21.726 And it worked great.

NOTE Confidence: 0.830435

00:18:21.730 --> 00:18:24.168 So it did we the only device that

NOTE Confidence: 0.830435

00:18:24.168 --> 00:18:26.112 there's no native client for right

NOTE Confidence: 0.830435

00:18:26.112 --> 00:18:28.008 now that we know of is Linux,

NOTE Confidence: 0.830435

00:18:28.010 --> 00:18:30.054 but they can use a web browser

NOTE Confidence: 0.830435

00:18:30.054 --> 00:18:31.600 and access it that way.

NOTE Confidence: 0.82167333

00:18:33.970 --> 00:18:36.098 Hey my air it's Elizabeth here at 11.

NOTE Confidence: 0.82167333

00:18:36.100 --> 00:18:37.690 We're going to have a little

NOTE Confidence: 0.82167333

00:18:37.690 --> 00:18:39.559 session with the TAS on using sass.

NOTE Confidence: 0.82167333

00:18:39.560 --> 00:18:41.275 If you want to join us I

NOTE Confidence: 0.82167333

00:18:41.275 --> 00:18:43.008 can send you the zoom link.

NOTE Confidence: 0.82167333

00:18:43.010 --> 00:18:44.725 Yeah please if you wouldn't mind that

NOTE Confidence: 0.82167333

00:18:44.725 --> 00:18:46.469 be great yeah thank you Elizabeth.

NOTE Confidence: 0.8421437

00:18:47.130 --> 00:18:49.237 How is how is rules experience man?

NOTE Confidence: 0.8421437

00:18:49.240 --> 00:18:51.221 I know he was a big user

NOTE Confidence: 0.8421437

00:18:51.221 --> 00:18:52.570 on the previous that's

NOTE Confidence: 0.8421437

00:18:52.570 --> 00:18:54.980 going to join us at 11. I've seen

NOTE Confidence: 0.8421437

00:18:54.980 --> 00:18:57.094 him on line using it, so we're,

NOTE Confidence: 0.8421437

00:18:57.094 --> 00:18:58.906 you know, we're interested in feedback,

NOTE Confidence: 0.8421437

00:18:58.910 --> 00:19:01.060 you know? Obviously this is.

NOTE Confidence: 0.8421437

00:19:01.060 --> 00:19:02.536 A face lip for the product.

NOTE Confidence: 0.8421437

00:19:02.540 --> 00:19:04.262 I think it's nicer that folks get

NOTE Confidence: 0.8421437

00:19:04.262 --> 00:19:05.735 a full desktop, so any feedback

NOTE Confidence: 0.8421437

00:19:05.735 --> 00:19:06.960 you have is greatly appreciated.

NOTE Confidence: 0.8421437

00:19:06.960 --> 00:19:08.484 There's only you know so much

NOTE Confidence: 0.8421437

00:19:08.484 --> 00:19:10.160 testing we can do on our end,

NOTE Confidence: 0.8421437

00:19:10.160 --> 00:19:11.558 and we're by no means SAS

NOTE Confidence: 0.8421437

00:19:11.558 --> 00:19:12.870 experts on one of those.

NOTE Confidence: 0.8421437

00:19:12.870 --> 00:19:13.605 Oh, it opens.

NOTE Confidence: 0.8421437

00:19:13.605 --> 00:19:14.997 It looks OK, but you know,

NOTE Confidence: 0.8421437

00:19:14.997 --> 00:19:17.608 at the end of the day of the I'm not one

NOTE Confidence: 0.8421437

00:19:17.608 --> 00:19:19.998 of the power users like like you folks are,

NOTE Confidence: 0.8421437

00:19:20.000 --> 00:19:20.651 so any feedback,

NOTE Confidence: 0.8421437

00:19:20.651 --> 00:19:22.767 good or bad or suggestions for how to improve

NOTE Confidence: 0.8421437

00:19:22.767 --> 00:19:24.423 the service would be greatly appreciated.

NOTE Confidence: 0.8421437

00:19:24.430 --> 00:19:26.481 You know at the end of the

NOTE Confidence: 0.8421437

00:19:26.481 --> 00:19:28.318 day we're trying to make this.

NOTE Confidence: 0.8421437

00:19:28.320 --> 00:19:30.354 Make life a little easier for

NOTE Confidence: 0.8421437

00:19:30.354 --> 00:19:31.710 the students and professors,

NOTE Confidence: 0.8421437

00:19:31.710 --> 00:19:32.048 obviously,

NOTE Confidence: 0.8421437

00:19:32.048 --> 00:19:33.738 especially in this current environment,

NOTE Confidence: 0.8421437

00:19:33.740 --> 00:19:36.800 so you know anything we can do to help.

NOTE Confidence: 0.8421437

00:19:36.800 --> 00:19:38.220 We're happy too.

NOTE Confidence: 0.8421437

00:19:38.220 --> 00:19:38.970 And

NOTE Confidence: 0.85861933

00:19:38.970 --> 00:19:41.830 I don't know for al is on the line right now,

NOTE Confidence: 0.85861933

00:19:41.830 --> 00:19:43.245 but he mentioned something about

NOTE Confidence: 0.85861933

00:19:43.245 --> 00:19:45.162 you couldn't use files from box or

NOTE Confidence: 0.85861933

00:19:45.162 --> 00:19:46.506 other sources to pull into SAS.

NOTE Confidence: 0.85861933

00:19:46.510 --> 00:19:47.550 Have you heard that?

NOTE Confidence: 0.90174687

00:19:48.540 --> 00:19:49.530 But I have

NOTE Confidence: 0.90174687

00:19:49.530 --> 00:19:50.850 not heard that but.

37

NOTE Confidence: 0.9053709

00:19:51.610 --> 00:19:54.330 So you can you can pull him through.

NOTE Confidence: 0.9053709

00:19:54.330 --> 00:19:57.506 I don't know that you can directly linked

NOTE Confidence: 0.9053709

00:19:57.506 --> 00:20:00.700 to him like you can with one drive.

NOTE Confidence: 0.9053709

00:20:00.700 --> 00:20:03.904 So I I think it sort of goes back to the

NOTE Confidence: 0.9053709

00:20:03.904 --> 00:20:06.748 messaging of the preferred cloud storage,

NOTE Confidence: 0.9053709

00:20:06.750 --> 00:20:09.333 and we've gotten feedback in the old

NOTE Confidence: 0.9053709

00:20:09.333 --> 00:20:11.714 environment that we were allowing too

NOTE Confidence: 0.9053709

00:20:11.714 --> 00:20:14.126 many cloud storage providers and they

NOTE Confidence: 0.9053709

00:20:14.126 --> 00:20:16.859 asked us to direct people to one and one

NOTE Confidence: 0.9053709

00:20:16.859 --> 00:20:19.210 drive is just native to windows anyways,

NOTE Confidence: 0.9053709

00:20:19.210 --> 00:20:21.937 so sort of if we have them using one

NOTE Confidence: 0.9053709

00:20:21.937 --> 00:20:24.200 drive and downloading the stuff,

NOTE Confidence: 0.9053709

00:20:24.200 --> 00:20:26.336 pulling it from box and putting

NOTE Confidence: 0.9053709

00:20:26.336 --> 00:20:27.760 it on their desktop.

NOTE Confidence: 0.9053709

00:20:27.760 --> 00:20:30.322 One drive then sinks it and it

NOTE Confidence: 0.9053709

00:20:30.322 --> 00:20:32.458 can be utilized that way or.

NOTE Confidence: 0.9053709

00:20:32.460 --> 00:20:34.420 Uploading it into one drive

NOTE Confidence: 0.9053709

00:20:34.420 --> 00:20:35.988 from their personal device,

NOTE Confidence: 0.9053709

00:20:35.990 --> 00:20:37.202 then it's available.

NOTE Confidence: 0.9053709

00:20:37.202 --> 00:20:40.475 There's alot of things behind it and without

NOTE Confidence: 0.9053709

00:20:40.475 --> 00:20:43.435 getting too far into the weeds with it,

NOTE Confidence: 0.9053709

00:20:43.440 --> 00:20:45.265 speed is speed and ease

NOTE Confidence: 0.9053709

00:20:45.265 --> 00:20:47.750 of use is a big issue.

NOTE Confidence: 0.9053709

00:20:47.750 --> 00:20:50.798 So if you're trying to upload a 3

NOTE Confidence: 0.9053709

00:20:50.798 --> 00:20:53.920 gig data file for CES analyzation.

NOTE Confidence: 0.9053709

00:20:53.920 --> 00:20:56.020 It's going to take awhile if it's

NOTE Confidence: 0.9053709

00:20:56.020 --> 00:20:57.950 coming from your personal device,

NOTE Confidence: 0.9053709

00:20:57.950 --> 00:21:00.638 but if it's up and one drive already,

NOTE Confidence: 0.9053709

00:21:00.640 --> 00:21:03.013 the speeds at which this lives it

NOTE Confidence: 0.9053709

00:21:03.013 --> 00:21:05.009 this total environment lives in Azure,

NOTE Confidence: 0.9053709

00:21:05.010 --> 00:21:06.936 the speeds at which those go

NOTE Confidence: 0.9053709

00:21:06.936 --> 00:21:09.039 is usually 25 gigs per second,

NOTE Confidence: 0.9053709

00:21:09.040 --> 00:21:10.292 so it moves faster.

NOTE Confidence: 0.9053709

00:21:10.292 --> 00:21:12.170 An were able to analyze more

NOTE Confidence: 0.9053709

00:21:12.236 --> 00:21:13.409 data more quickly.

NOTE Confidence: 0.9053709

00:21:13.410 --> 00:21:14.750 Is there any connection

NOTE Confidence: 0.8514666

00:21:14.750 --> 00:21:16.370 between the files that we

NOTE Confidence: 0.8514666

00:21:16.370 --> 00:21:18.450 locate in canvas and one drive?

NOTE Confidence: 0.8514666

00:21:18.450 --> 00:21:21.098 Or do we have to take them front

NOTE Confidence: 0.8514666

00:21:21.098 --> 00:21:23.148 canvas and put them into one

NOTE Confidence: 0.8514666

00:21:23.150 --> 00:21:26.110 drive? That's a pretty good question. I

NOTE Confidence: 0.9126092

00:21:26.110 --> 00:21:27.330 only get pretty good.

NOTE Confidence: 0.8216777

00:21:30.090 --> 00:21:32.666 I do know the whole I will.

NOTE Confidence: 0.8216777

00:21:32.670 --> 00:21:34.866 I will find out that answer.

NOTE Confidence: 0.8216777

00:21:34.870 --> 00:21:37.173 I do know that the whole initiative

NOTE Confidence: 0.8216777

00:21:37.173 --> 00:21:39.876 behind or one of the big initiatives

NOTE Confidence: 0.8216777

00:21:39.876 --> 00:21:41.926 behind OneDrive was that it

NOTE Confidence: 0.8216777

00:21:41.926 --> 00:21:43.810 integrated with canvas and that's

NOTE Confidence: 0.8216777

00:21:43.810 --> 00:21:46.668 why they were making the push for it.

NOTE Confidence: 0.8216777

00:21:46.668 --> 00:21:48.563 Whereas some of the other

NOTE Confidence: 0.8216777

00:21:48.563 --> 00:21:50.329 ones didn't integrate as well.

NOTE Confidence: 0.8216777

00:21:50.330 --> 00:21:53.740 So I will look into.

NOTE Confidence: 0.8216777

00:21:53.740 --> 00:21:54.469 Look into that.

NOTE Confidence: 0.88575447

00:21:55.360 --> 00:21:56.248 OK, thank you

NOTE Confidence: 0.88575447

00:21:56.250 --> 00:21:58.049 will follow up on one drive is

NOTE Confidence: 0.88575447

00:21:58.049 --> 00:21:59.546 all the students and everyones

NOTE Confidence: 0.88575447

00:21:59.546 --> 00:22:01.550 licensed for one drive so there

NOTE Confidence: 0.88575447

00:22:01.550 --> 00:22:03.430 shouldn't be any issues on that.

NOTE Confidence: 0.88575447

00:22:03.430 --> 00:22:05.670 And I believe the default font space

NOTE Confidence: 0.88575447

00:22:05.670 --> 00:22:08.129 limit is a TB but you can request more.

NOTE Confidence: 0.88575447

00:22:08.130 --> 00:22:10.014 I don't necessarily expect too many

NOTE Confidence: 0.88575447

00:22:10.014 --> 00:22:11.699 people running over the TB cap,

NOTE Confidence: 0.88575447

00:22:11.700 --> 00:22:14.068 but if that does happen I think there's

NOTE Confidence: 0.88575447

00:22:14.068 --> 00:22:16.146 a requests or request to help test.

NOTE Confidence: 0.88575447

00:22:16.150 --> 00:22:18.480 There may be a form.

NOTE Confidence: 0.88575447

00:22:18.480 --> 00:22:20.160 It's kind of a separate service stars,

NOTE Confidence: 0.88575447

00:22:20.160 --> 00:22:22.380 but obviously we consume it.

NOTE Confidence: 0.88575447

00:22:22.380 --> 00:22:24.067 So space should not be an issue.

NOTE Confidence: 0.85881066

00:22:26.820 --> 00:22:28.540 And who specifically what should

NOTE Confidence: 0.85881066

00:22:28.540 --> 00:22:30.863 we email with the courses that are

NOTE Confidence: 0.85881066

00:22:30.863 --> 00:22:32.750 going to be heavy time use? Why

NOTE Confidence: 0.70893073

00:22:32.750 --> 00:22:34.752 don't you all send them to me

NOTE Confidence: 0.70893073

00:22:34.752 --> 00:22:36.104 and I'll coordinate 'em all

NOTE Confidence: 0.70893073

00:22:36.104 --> 00:22:39.370 and then get him to Eric say.

NOTE Confidence: 0.70893073

00:22:39.370 --> 00:22:41.490 By next Wednesday or Thursday.

NOTE Confidence: 0.89743185

00:22:44.340 --> 00:22:47.730 And then just touching back on.

NOTE Confidence: 0.89743185

00:22:47.730 --> 00:22:49.238 Box or Google Drive?

NOTE Confidence: 0.89743185

00:22:49.238 --> 00:22:52.358 I just want to confirm if they use

NOTE Confidence: 0.89743185

00:22:52.358 --> 00:22:55.053 those and they they can save the

NOTE Confidence: 0.89743185

00:22:55.053 --> 00:22:57.940 files to their desktop too then import

NOTE Confidence: 0.89743185

00:22:57.940 --> 00:23:00.732 them into SAS or something and then

NOTE Confidence: 0.89743185

00:23:00.732 --> 00:23:03.096 save them back to their desktop.

NOTE Confidence: 0.89743185

00:23:03.100 --> 00:23:05.416 But if they then don't save

NOTE Confidence: 0.89743185

00:23:05.416 --> 00:23:08.219 them back up to box or Google

NOTE Confidence: 0.81933725

00:23:08.220 --> 00:23:09.788 Drive, they're gone when

NOTE Confidence: 0.81933725

00:23:09.790 --> 00:23:11.366 they disconnect, correct and

NOTE Confidence: 0.81933725

00:23:11.366 --> 00:23:13.336 less there logged into OneDrive,

NOTE Confidence: 0.81933725

00:23:13.340 --> 00:23:16.224 right DEA is if they're logged into

NOTE Confidence: 0.81933725

00:23:16.224 --> 00:23:19.108 one drive then they won't be gold.

NOTE Confidence: 0.81933725

00:23:19.110 --> 00:23:20.958 They will be. They will be synced

NOTE Confidence: 0.81933725

00:23:20.958 --> 00:23:23.090 up on one drive and truth. Truth

NOTE Confidence: 0.8431036

00:23:23.090 --> 00:23:23.939 be told, it

NOTE Confidence: 0.8431036

00:23:23.940 --> 00:23:25.360 will stay in their profile,

00:23:25.360 --> 00:23:27.112 but we don't want folks storing

00:23:27.112 --> 00:23:28.769 stuff on their desktop and WED.

00:23:28.770 --> 00:23:31.040 So if you didn't connect to one drive

00:23:31.040 --> 00:23:33.304 and you save your file on the desktop,

00:23:33.310 --> 00:23:35.574 it would be there in the next time.

00:23:35.580 --> 00:23:37.701 But we don't want folks saving files

00:23:37.701 --> 00:23:39.270 in this environment on the VMS,

00:23:39.270 --> 00:23:40.412 so we're telling him,

00:23:40.412 --> 00:23:42.396 you know, it's gotta go in the

00:23:42.396 --> 00:23:44.100 cloud if you do one drive.

00:23:44.100 --> 00:23:45.430 It doesn't automatically for you

00:23:45.430 --> 00:23:47.509 if you use box or Google drive,

00:23:47.510 --> 00:23:51.030 it's more of a move the files back and forth.

00:23:51.030 --> 00:23:52.794 Not enough for my personal experience

00:23:52.794 --> 00:23:55.206 is just it's too much moving around and

00:23:55.206 --> 00:23:57.510 stuff to worry about when there is a

NOTE Confidence: 0.8431036

00:23:57.510 --> 00:23:59.430 there is a solution that kind of works.

NOTE Confidence: 0.8431036

00:23:59.430 --> 00:24:01.950 I know it's a change for a lot of

NOTE Confidence: 0.8431036

00:24:01.950 --> 00:24:03.630 folks who weren't using one drive.

NOTE Confidence: 0.8431036

00:24:03.630 --> 00:24:04.750 I mean me personally,

NOTE Confidence: 0.8431036

00:24:04.750 --> 00:24:06.214 once I started once we started

NOTE Confidence: 0.8431036

00:24:06.214 --> 00:24:07.830 setting up this new environment.

NOTE Confidence: 0.8431036

00:24:07.830 --> 00:24:09.230 I installed that OneDrive app

NOTE Confidence: 0.8431036

00:24:09.230 --> 00:24:10.350 on all my machines.

NOTE Confidence: 0.8431036

00:24:10.350 --> 00:24:10.844 My desktop,

NOTE Confidence: 0.8431036

00:24:10.844 --> 00:24:13.209 you know in WBB is the same as my

NOTE Confidence: 0.8431036

00:24:13.209 --> 00:24:14.829 desktop on my personal laptop,

NOTE Confidence: 0.8431036

00:24:14.830 --> 00:24:15.926 'cause everything just syncs.

NOTE Confidence: 0.8431036

00:24:15.926 --> 00:24:18.750 So if I make a file I see it everywhere.

NOTE Confidence: 0.8431036

00:24:18.750 --> 00:24:19.934 It's it's really nice.

NOTE Confidence: 0.8431036

00:24:19.934 --> 00:24:21.118 I encourage everyone to.

NOTE Confidence: 0.8431036

00:24:21.120 --> 00:24:22.960 Play around and take a look at it.

NOTE Confidence: 0.8431036

00:24:22.960 --> 00:24:23.800 Even if you're even.

NOTE Confidence: 0.8431036

00:24:23.800 --> 00:24:25.060 If you're not a consumer than

NOTE Confidence: 0.8431036

00:24:25.108 --> 00:24:25.948 my apps environment,

NOTE Confidence: 0.8431036

00:24:25.950 --> 00:24:27.100 it's really a nice tool.

NOTE Confidence: 0.87971634

00:24:31.240 --> 00:24:33.110 That's my sales pitch from one drive.

NOTE Confidence: 0.84298366

00:24:43.510 --> 00:24:45.060 If anybody else has any questions,

NOTE Confidence: 0.84298366

00:24:45.060 --> 00:24:46.880 you can always forward him through Dan.

NOTE Confidence: 0.84298366

00:24:46.880 --> 00:24:50.448 Any issues you can ring the help desk.

NOTE Confidence: 0.84298366

00:24:50.450 --> 00:24:52.002 Then those were at his disposal

NOTE Confidence: 0.84298366

00:24:52.002 --> 00:24:53.800 so he can get ahold of us.

NOTE Confidence: 0.84298366

00:24:53.800 --> 00:24:55.348 And this is, like Eric said,

NOTE Confidence: 0.84298366

00:24:55.350 --> 00:24:56.382 this is our priority.

NOTE Confidence: 0.84298366

00:24:56.382 --> 00:24:57.796 You know, making sure things work

NOTE Confidence: 0.84298366

00:24:57.796 --> 00:25:00.074 as well as well as we can for the

NOTE Confidence: 0.84298366

00:25:00.074 --> 00:25:01.800 students with the upcoming semester so.

NOTE Confidence: 0.84537834

00:25:05.400 --> 00:25:06.656 I encourage everybody to

NOTE Confidence: 0.84537834

00:25:06.656 --> 00:25:08.770 load it up and look at all

NOTE Confidence: 0.84537834

00:25:08.831 --> 00:25:10.679 the software that's available.

NOTE Confidence: 0.84537834

00:25:10.680 --> 00:25:13.080 There's a ton of it in there,

NOTE Confidence: 0.84537834

00:25:13.080 --> 00:25:15.060 and through this it's free as

NOTE Confidence: 0.84537834

00:25:15.060 --> 00:25:17.366 opposed to purchasing it another way.

NOTE Confidence: 0.7400363

00:25:21.050 --> 00:25:24.069 I have another question really

NOTE Confidence: 0.7400363

00:25:24.070 --> 00:25:29.232 quickly I'm gonna be at EA this

NOTE Confidence: 0.7400363

00:25:29.232 --> 00:25:33.064 fall and my. Where is that?

NOTE Confidence: 0.7400363

00:25:33.064 --> 00:25:35.250 For example, some students for.

NOTE Confidence: 0.86640984

00:25:37.140 --> 00:25:39.230 Final projects use data from

NOTE Confidence: 0.86640984

00:25:39.230 --> 00:25:41.310 faculty that maybe not allowed

NOTE Confidence: 0.86640984

00:25:41.310 --> 00:25:43.816 to be saved in the cloud.

NOTE Confidence: 0.86640984

00:25:43.816 --> 00:25:46.732 Are there options for this or alternatives

NOTE Confidence: 0.86640984

00:25:46.732 --> 00:25:49.230 work around so we currently map

NOTE Confidence: 0.86640984

00:25:49.230 --> 00:25:50.858 storage at Yale home,

NOTE Confidence: 0.86640984

00:25:50.858 --> 00:25:53.820 so if its storage at Yale share

NOTE Confidence: 0.86640984

00:25:53.820 --> 00:25:55.902 then they will have access

NOTE Confidence: 0.86640984

00:25:55.902 --> 00:25:58.814 to if they have access to it,

NOTE Confidence: 0.86640984

00:25:58.820 --> 00:26:01.571 it will be mapped in just as

NOTE Confidence: 0.86640984

00:26:01.571 --> 00:26:03.410 a regular map drive.

NOTE Confidence: 0.86640984

00:26:03.410 --> 00:26:05.545 If there's data that needs

NOTE Confidence: 0.86640984

00:26:05.545 --> 00:26:07.253 to be used outside.

NOTE Confidence: 0.86640984

00:26:07.260 --> 00:26:09.216 I would encourage you to contact

NOTE Confidence: 0.86640984

00:26:09.216 --> 00:26:12.263 us and we will try and set up an

NOTE Confidence: 0.86640984

00:26:12.263 --> 00:26:14.699 environment for those types of use cases.

NOTE Confidence: 0.86640984

00:26:14.700 --> 00:26:15.708 OK, thank you

NOTE Confidence: 0.8648928

00:26:15.710 --> 00:26:18.076 Yeah, but you do have the functionality

NOTE Confidence: 0.8648928

00:26:18.076 --> 00:26:21.116 to map any file shares that you may have.

NOTE Confidence: 0.8648928

00:26:21.120 --> 00:26:22.568 We automatically map storage,

NOTE Confidence: 0.8648928

00:26:22.568 --> 00:26:24.740 but I know there's some other

NOTE Confidence: 0.8648928

00:26:24.804 --> 00:26:26.646 file servers on campus that have

NOTE Confidence: 0.8648928

00:26:26.646 --> 00:26:28.550 been around for a long time.

NOTE Confidence: 0.8648928

00:26:28.550 --> 00:26:31.254 You can certainly map those drives as well.

NOTE Confidence: 0.76032937

00:26:33.050 --> 00:26:35.440 One drive is HIPAA compliant though, right?

NOTE Confidence: 0.9136292

00:26:36.450 --> 00:26:36.950 Yes.

NOTE Confidence: 0.91097265

00:26:38.190 --> 00:26:40.277 So if it's just that type of data,

NOTE Confidence: 0.91097265

00:26:40.280 --> 00:26:42.110 it is OK to use one drive.

NOTE Confidence: 0.83397555

00:26:45.250 --> 00:26:47.070 And can I just ask another quick

NOTE Confidence: 0.83397555

00:26:47.070 --> 00:26:48.974 question about the fast that so once

NOTE Confidence: 0.83397555

00:26:48.974 --> 00:26:50.570 you're in the my apps environment,

NOTE Confidence: 0.83397555

00:26:50.570 --> 00:26:51.900 so a student would either

NOTE Confidence: 0.83397555

00:26:51.900 --> 00:26:53.230 access that through the Web,

NOTE Confidence: 0.83397555

00:26:53.230 --> 00:26:55.092 or if they just download the client

NOTE Confidence: 0.83397555

00:26:55.092 --> 00:26:56.947 and you know like just have it,

NOTE Confidence: 0.83397555

00:26:56.950 --> 00:26:58.498 but once they enter that environment

49

NOTE Confidence: 0.83397555

00:26:58.498 --> 00:27:00.408 then they'll see an icon for assassin,

NOTE Confidence: 0.83397555

00:27:00.410 --> 00:27:02.642 then they can just double click it as if

NOTE Confidence: 0.83397555

00:27:02.642 --> 00:27:04.927 they were even sitting in a computer lab,

NOTE Confidence: 0.83397555

00:27:04.930 --> 00:27:06.914 but they don't have to do any special

NOTE Confidence: 0.83397555

00:27:06.914 --> 00:27:08.919 setup to get sass on their computer.

NOTE Confidence: 0.83397555

00:27:08.920 --> 00:27:10.516 Locali in any sort of way,

NOTE Confidence: 0.83397555

00:27:10.520 --> 00:27:12.905 it's just it's going to be an icon there,

NOTE Confidence: 0.83397555

00:27:12.910 --> 00:27:14.506 they can just click on it,

NOTE Confidence: 0.83397555

00:27:14.510 --> 00:27:16.519 whether they are accessed my apps through.

NOTE Confidence: 0.83397555

00:27:16.520 --> 00:27:18.550 A Mac or a PC, correct?

NOTE Confidence: 0.81051075

00:27:18.550 --> 00:27:20.440 Yeah, the desktop is the Yale

NOTE Confidence: 0.81051075

00:27:20.440 --> 00:27:22.280 Desktop is the Yale desktop,

NOTE Confidence: 0.81051075

00:27:22.280 --> 00:27:25.008 so they'll launch the desktop and then it

NOTE Confidence: 0.81051075

00:27:25.008 --> 00:27:27.708 acts as a full blown Windows 10 machine.

NOTE Confidence: 0.81051075

00:27:27.708 --> 00:27:29.740 OK, great thank you to answer

NOTE Confidence: 0.81051075

00:27:29.740 --> 00:27:31.440 the question that's in chat.

NOTE Confidence: 0.81051075

00:27:31.440 --> 00:27:33.806 If students do not use one drive,

NOTE Confidence: 0.81051075

00:27:33.810 --> 00:27:36.470 do you know how long are files

NOTE Confidence: 0.81051075

00:27:36.470 --> 00:27:38.539 saved in temporary folders so?

NOTE Confidence: 0.81051075

00:27:38.540 --> 00:27:39.623 Temporary and documents

NOTE Confidence: 0.81051075

00:27:39.623 --> 00:27:41.067 before they get deleted.

NOTE Confidence: 0.81051075

00:27:41.070 --> 00:27:42.720 So documents those kind of

NOTE Confidence: 0.81051075

00:27:42.720 --> 00:27:44.798 folders it won't be deleted or

NOTE Confidence: 0.81051075

00:27:44.798 --> 00:27:46.628 encouraging people not to save

NOTE Confidence: 0.81051075

00:27:46.628 --> 00:27:48.650 their because profiles get bloated.

NOTE Confidence: 0.81051075

00:27:48.650 --> 00:27:51.554 It affects login times and it costs more

NOTE Confidence: 0.81051075

00:27:51.554 --> 00:27:55.148 for us to store that stuff on the back end.

NOTE Confidence: 0.81051075

00:27:55.150 --> 00:27:57.310 Yeah, in the backup is not

NOTE Confidence: 0.8645315

00:27:57.310 --> 00:27:58.650 on the fly right?

NOTE Confidence: 0.8645315

00:27:58.650 --> 00:28:00.660 So we have a backup running

NOTE Confidence: 0.8645315

00:28:00.744 --> 00:28:02.723 nightly too, so there's there's

NOTE Confidence: 0.8645315

00:28:02.723 --> 00:28:03.806 obviously potential there.

NOTE Confidence: 0.8645315

00:28:03.810 --> 00:28:05.976 So we want to get everybody

NOTE Confidence: 0.8645315

00:28:05.976 --> 00:28:07.420 saving in the cloud.

NOTE Confidence: 0.8645315

00:28:07.420 --> 00:28:08.864 That's like that's recommended

NOTE Confidence: 0.8645315

00:28:08.864 --> 00:28:10.310 best practice, you know.

NOTE Confidence: 0.8875971

00:28:10.560 --> 00:28:12.210 But if things get saved

NOTE Confidence: 0.8875971

00:28:12.210 --> 00:28:13.530 in a temporary folder,

NOTE Confidence: 0.8875971

00:28:13.530 --> 00:28:16.170 as soon as the session is logged off,

NOTE Confidence: 0.8875971

00:28:16.170 --> 00:28:18.000 then it'll be going.

NOTE Confidence: 0.8875971

00:28:18.000 --> 00:28:20.760 So it's sort of two different

NOTE Confidence: 0.8875971

00:28:20.760 --> 00:28:21.528 questions there.

NOTE Confidence: 0.8875971

00:28:21.530 --> 00:28:23.460 Documents known folders like documents,

NOTE Confidence: 0.8875971

00:28:23.460 --> 00:28:25.866 desktop, those kind of things they

NOTE Confidence: 0.8875971

00:28:25.866 --> 00:28:28.369 will be there temporary folders 'cause

NOTE Confidence: 0.8875971

00:28:28.369 --> 00:28:30.853 there's a ton of temporary folders

NOTE Confidence: 0.8875971

00:28:30.853 --> 00:28:33.384 at Windows likes to save slash open

NOTE Confidence: 0.8875971

00:28:33.384 --> 00:28:35.780 things in when you end the session.

NOTE Confidence: 0.8875971

00:28:35.780 --> 00:28:37.320 Those things are going,

NOTE Confidence: 0.8875971

00:28:37.320 --> 00:28:39.240 it's it's almost the same.

NOTE Confidence: 0.8875971

00:28:39.240 --> 00:28:41.550 Consider it at the same as

NOTE Confidence: 0.8875971

00:28:41.550 --> 00:28:43.090 shutting down your computer.

NOTE Confidence: 0.90690875

00:28:44.890 --> 00:28:46.577 And this is probably an obvious statement,

NOTE Confidence: 0.90690875

00:28:46.580 --> 00:28:48.580 but it does require that you have Internet

NOTE Confidence: 0.90690875

00:28:48.580 --> 00:28:51.960 access to be doing all this. Brian,

NOTE Confidence: 0.8499762

00:28:51.960 --> 00:28:53.774 is there any issues with

NOTE Confidence: 0.8499762

00:28:53.774 --> 00:28:55.589 overseas students who are going

NOTE Confidence: 0.8499762

00:28:55.590 --> 00:28:56.679 to be so?

NOTE Confidence: 0.8499762

00:28:56.680 --> 00:28:58.500 So there probably will be.

NOTE Confidence: 0.8499762

00:28:58.500 --> 00:29:01.398 I'm not going to say that I'm not going

NOTE Confidence: 0.8499762

00:29:01.398 --> 00:29:04.157 to say that it's going to be awful

NOTE Confidence: 0.8499762

00:29:04.157 --> 00:29:07.319 during so we had students able to test

NOTE Confidence: 0.8499762

00:29:07.319 --> 00:29:10.114 this when the pandemic first broke out.

NOTE Confidence: 0.8499762

00:29:10.114 --> 00:29:11.924 An students were leaving campus.

NOTE Confidence: 0.8499762

00:29:11.930 --> 00:29:13.964 We don't know exactly where one

NOTE Confidence: 0.8499762

00:29:13.964 --> 00:29:15.920 of the students was located,

NOTE Confidence: 0.8499762

00:29:15.920 --> 00:29:18.050 but they did indicate in their

NOTE Confidence: 0.8499762

00:29:18.050 --> 00:29:20.705 feedback that they were an ocean away

NOTE Confidence: 0.8499762

00:29:20.705 --> 00:29:22.640 and they experience some latency.

NOTE Confidence: 0.8499762

00:29:22.640 --> 00:29:25.153 Right now we are only set up

NOTE Confidence: 0.8499762

00:29:25.153 --> 00:29:27.579 in one data center region,

NOTE Confidence: 0.8499762

00:29:27.580 --> 00:29:30.464 which is US 2 which is located

NOTE Confidence: 0.8499762

00:29:30.464 --> 00:29:31.700 in Northern Virginia.

NOTE Confidence: 0.8499762

00:29:31.700 --> 00:29:34.088 So that's not to say that

NOTE Confidence: 0.8499762

00:29:34.088 --> 00:29:36.240 it won't work for them,

NOTE Confidence: 0.8499762

00:29:36.240 --> 00:29:38.712 but it's highly likely that they

NOTE Confidence: 0.8499762

00:29:38.712 --> 00:29:40.360 will experience some slowness.

NOTE Confidence: 0.86435264

00:29:43.230 --> 00:29:44.790 'cause we probably have a

NOTE Confidence: 0.86435264

00:29:44.790 --> 00:29:46.656 large number of students that are

NOTE Confidence: 0.86435264

00:29:46.660 --> 00:29:48.844 going to be logging in from China.

NOTE Confidence: 0.86435264

00:29:48.850 --> 00:29:51.006 Yeah, so were the China one probably

NOTE Confidence: 0.86435264

00:29:51.006 --> 00:29:52.899 presents a bigger issue than just.

NOTE Confidence: 0.69152796

00:29:55.530 --> 00:29:59.558 Speed, but. Maybe they should

NOTE Confidence: 0.842248075

00:29:59.560 --> 00:30:01.666 be able. To connect with the

NOTE Confidence: 0.842248075

00:30:01.666 --> 00:30:03.780 speed will be like for them.

NOTE Confidence: 0.842248075

00:30:03.780 --> 00:30:04.833 It'll be intermittent.

NOTE Confidence: 0.842248075

00:30:04.833 --> 00:30:06.237 I would assume some.

NOTE Confidence: 0.842248075

00:30:06.240 --> 00:30:08.704 Some people may have an OK experience,

NOTE Confidence: 0.842248075

00:30:08.710 --> 00:30:11.070 some other people may not

NOTE Confidence: 0.842248075

00:30:11.070 --> 00:30:13.430 have a great experience so.

NOTE Confidence: 0.842248075

00:30:13.430 --> 00:30:16.027 We're trying to do is gather data on

NOTE Confidence: 0.842248075

00:30:16.027 --> 00:30:18.204 where people are accessing from so

NOTE Confidence: 0.842248075

00:30:18.204 --> 00:30:20.496 that we can start putting resources

NOTE Confidence: 0.842248075

00:30:20.496 --> 00:30:23.197 in areas that we need to put resources

NOTE Confidence: 0.842248075

00:30:23.197 --> 00:30:25.895 and we need to make a whole use

NOTE Confidence: 0.842248075

00:30:25.895 --> 00:30:28.310 case for the University to say Hey,

NOTE Confidence: 0.842248075

00:30:28.310 --> 00:30:30.947 we need to be set up in other regions

NOTE Confidence: 0.842248075

00:30:30.947 --> 00:30:32.877 besides just Northern Virginia that

NOTE Confidence: 0.842248075

00:30:32.877 --> 00:30:35.223 we may need something in Europe.

NOTE Confidence: 0.842248075

00:30:35.230 --> 00:30:37.342 We may need something Asian in

NOTE Confidence: 0.842248075

00:30:37.342 --> 00:30:39.546 those type of places that students

NOTE Confidence: 0.842248075

00:30:39.546 --> 00:30:42.059 who are remote can still do their

NOTE Confidence: 0.842248075

00:30:42.059 --> 00:30:43.876 work as if they are here.

NOTE Confidence: 0.86803013

00:30:45.970 --> 00:30:47.626 And any feedback you get

NOTE Confidence: 0.86803013

00:30:47.626 --> 00:30:49.280 from those students, we would

NOTE Confidence: 0.86803013

00:30:49.280 --> 00:30:50.940 appreciate you know as well.

NOTE Confidence: 0.86803013

00:30:50.940 --> 00:30:53.390 Let us know that. Students

NOTE Confidence: 0.86331713

00:30:53.390 --> 00:30:54.101 from particular areas

NOTE Confidence: 0.86331713

00:30:54.101 --> 00:30:55.049 are struggling or there.

NOTE Confidence: 0.86331713

00:30:55.050 --> 00:30:56.716 You know, even if they are OK,

NOTE Confidence: 0.86331713

00:30:56.720 --> 00:30:58.148 that would be nice to hear

NOTE Confidence: 0.86331713

00:30:58.150 --> 00:30:59.098 as well, you know.

NOTE Confidence: 0.8506815

00:31:03.230 --> 00:31:04.392 In terms of data saving,

NOTE Confidence: 0.8506815

00:31:04.392 --> 00:31:05.760 I know there's a lot of

NOTE Confidence: 0.8506815

00:31:05.820 --> 00:31:07.548 talk about not using the OneDrive.

NOTE Confidence: 0.8506815

00:31:07.550 --> 00:31:09.390 What what I like to kind of say

NOTE Confidence: 0.8506815

00:31:09.390 --> 00:31:11.272 to folks is if you sat down

NOTE Confidence: 0.8506815

00:31:11.272 --> 00:31:12.627 in a public cluster machine,

NOTE Confidence: 0.8506815

00:31:12.630 --> 00:31:14.387 you're not going to leave your files

NOTE Confidence: 0.8506815

00:31:14.387 --> 00:31:16.178 on the desktop there and walk away.

NOTE Confidence: 0.8506815

00:31:16.180 --> 00:31:17.680 'cause then you have to find

NOTE Confidence: 0.8506815

00:31:17.680 --> 00:31:18.980 that machine the next time,

NOTE Confidence: 0.8506815

00:31:18.980 --> 00:31:20.770 just as a best practice, you know,

NOTE Confidence: 0.8506815

00:31:20.770 --> 00:31:22.850 like store your stuff in the cloud where

57

NOTE Confidence: 0.8506815

00:31:22.904 --> 00:31:25.810 you can get at it from anywhere. Um?

NOTE Confidence: 0.8225992

00:31:30.860 --> 00:31:33.270 I think Steve's hammer home 2.

NOTE Confidence: 0.8225992

00:31:33.270 --> 00:31:35.783 Two thoughts for today. Use one drive

NOTE Confidence: 0.8225992

00:31:35.783 --> 00:31:38.879 in and any feedback is good feedback.

NOTE Confidence: 0.93596435

00:31:40.290 --> 00:31:40.740 Thank you.

NOTE Confidence: 0.8372271

00:31:46.670 --> 00:31:47.741 Yeah, hopefully we

NOTE Confidence: 0.8372271

00:31:47.741 --> 00:31:49.526 answered all your you know,

NOTE Confidence: 0.8372271

00:31:49.530 --> 00:31:50.978 most of your questions.

NOTE Confidence: 0.8372271

00:31:50.978 --> 00:31:53.450 Feel free to reach out to us.

NOTE Confidence: 0.8372271

00:31:53.450 --> 00:31:54.878 You know we're here.

NOTE Confidence: 0.8372271

00:31:54.880 --> 00:31:56.308 We're focused on the

NOTE Confidence: 0.8372271

00:31:56.310 --> 00:31:57.738 product and students come

NOTE Confidence: 0.8372271

00:31:57.740 --> 00:32:00.588 back so high. It's my you are again.

NOTE Confidence: 0.8372271

00:32:00.590 --> 00:32:02.732 I was wondering if I could

NOTE Confidence: 0.8372271

00:32:02.732 --> 00:32:04.160 just another quick question.

NOTE Confidence: 0.8372271

00:32:04.160 --> 00:32:05.188 So if we're so.

NOTE Confidence: 0.8372271

00:32:05.188 --> 00:32:07.653 I think some of us may be involved

NOTE Confidence: 0.8372271

00:32:07.653 --> 00:32:09.783 in various global health training

NOTE Confidence: 0.8372271

00:32:09.783 --> 00:32:12.638 kinds of programs and other ways of

NOTE Confidence: 0.8372271

00:32:12.638 --> 00:32:14.518 getting access to outside users.

NOTE Confidence: 0.8372271

00:32:14.520 --> 00:32:17.446 So sort of have temporary access to.

NOTE Confidence: 0.8372271

00:32:17.450 --> 00:32:19.770 SAS or through for another type of program

NOTE Confidence: 0.8372271

00:32:19.770 --> 00:32:22.442 that we might be doing as part of a

NOTE Confidence: 0.8372271

00:32:22.442 --> 00:32:24.419 global health training where they're not.

NOTE Confidence: 0.8372271

00:32:24.420 --> 00:32:26.258 Typically haven't yet nail Yale.

NOTE Confidence: 0.8372271

00:32:26.258 --> 00:32:27.726 Net ID's were not

NOTE Confidence: 0.85153294

00:32:27.730 --> 00:32:30.674 currently set up for that at this point.

NOTE Confidence: 0.85153294

00:32:30.680 --> 00:32:33.218 I don't know that this particular

NOTE Confidence: 0.85153294

00:32:33.218 --> 00:32:35.294 environment will ever be able

NOTE Confidence: 0.85153294

00:32:35.294 --> 00:32:37.436 to be set up that way because

NOTE Confidence: 0.85153294

00:32:37.436 --> 00:32:39.878 it uses a lot of Yale usernames,

NOTE Confidence: 0.85153294

00:32:39.880 --> 00:32:41.720 passwords, its tide to the

NOTE Confidence: 0.85153294

00:32:41.720 --> 00:32:43.560 Active Directory and the Azure,

NOTE Confidence: 0.85153294

00:32:43.560 --> 00:32:46.080 but it is something that we can

NOTE Confidence: 0.85153294

00:32:46.080 --> 00:32:48.712 question on and see if there's a

NOTE Confidence: 0.85153294

00:32:48.712 --> 00:32:50.920 way to get something like that.

NOTE Confidence: 0.85153294

00:32:50.920 --> 00:32:53.464 I mean, there's a way to get what

NOTE Confidence: 0.85153294

00:32:53.464 --> 00:32:55.660 they called sponsored identities.

NOTE Confidence: 0.85153294

00:32:55.660 --> 00:32:57.766 And we can give sponsored identities

NOTE Confidence: 0.85153294

00:32:57.766 --> 00:32:59.867 access to the environment because then

NOTE Confidence: 0.85153294

00:32:59.867 --> 00:33:02.086 they have a yelled username and password

NOTE Confidence: 0.85153294

00:33:02.086 --> 00:33:04.445 as far as outside of Yale affiliation,

NOTE Confidence: 0.85153294

00:33:04.450 --> 00:33:06.732 it'll probably be a little bit tough

NOTE Confidence: 0.85153294

00:33:06.732 --> 00:33:09.171 to get all parties that would need

NOTE Confidence: 0.85153294

00:33:09.171 --> 00:33:11.880 to be involved to sign off on that.

NOTE Confidence: 0.8371232

00:33:12.710 --> 00:33:14.046 Thanks, that's really helpful.

NOTE Confidence: 0.8371232

00:33:14.046 --> 00:33:16.852 So so if it's a very short term

NOTE Confidence: 0.8371232

00:33:16.852 --> 00:33:18.687 training where somebody where we

NOTE Confidence: 0.8371232

00:33:18.687 --> 00:33:21.100 were able to get that sponsored.

NOTE Confidence: 0.8371232

00:33:21.100 --> 00:33:23.200 Test, then then it would be possible,

NOTE Confidence: 0.8371232

00:33:23.200 --> 00:33:25.716 but it sounds like otherwise not right.

NOTE Confidence: 0.8371232

00:33:25.716 --> 00:33:27.600 OK, thank you. Eric,

NOTE Confidence: 0.8773692

00:33:27.600 --> 00:33:29.410 if there are sponsored identity,

NOTE Confidence: 0.8773692

00:33:29.410 --> 00:33:32.290 they need to also have an email account,

NOTE Confidence: 0.8773692

00:33:32.290 --> 00:33:33.379 correct? That's correct.

NOTE Confidence: 0.8213032

00:33:35.140 --> 00:33:36.388 Thank you, yeah

NOTE Confidence: 0.8213032

00:33:36.390 --> 00:33:38.480 that's an additional thing on

NOTE Confidence: 0.8213032

00:33:38.480 --> 00:33:41.410 the form. I think is that the

NOTE Confidence: 0.8213032

00:33:41.410 --> 00:33:43.500 Yale email account? Yes, yes.

NOTE Confidence: 0.8914278

00:33:51.640 --> 00:33:53.720 OK, if nobody has any other

NOTE Confidence: 0.8914278

00:33:53.720 --> 00:33:54.758 questions or concerns,

NOTE Confidence: 0.8914278

00:33:54.760 --> 00:33:57.538 and even if you do, if you remember

NOTE Confidence: 0.8914278

00:33:57.538 --> 00:33:59.268 something later in the day,

NOTE Confidence: 0.8914278

00:33:59.270 --> 00:34:01.358 please feel free to reach out.

NOTE Confidence: 0.8914278

00:34:01.360 --> 00:34:02.960 Otherwise we'll give you guys

NOTE Confidence: 0.8914278

00:34:02.960 --> 00:34:04.969 24 minutes of your day back

NOTE Confidence: 0.8914278

00:34:04.969 --> 00:34:06.325 and hopefully everybody stays

NOTE Confidence: 0.8914278

00:34:06.325 --> 00:34:08.640 safe and have a good semester.

NOTE Confidence: 0.8782144

00:34:10.470 --> 00:34:12.198 Thank you very much. Thank

NOTE Confidence: 0.8782144

00:34:12.200 --> 00:34:13.920 you everybody. Thank you everybody.

NOTE Confidence: 0.75134

00:34:14.970 --> 00:34:15.840 Thank you Dan.
