YSERE

Program Objectives

Yale Summer Enrichment Research Experience (YSERE) is a free 6-week summer research opportunity for college students who are interested in a career in biomedical research.

The program aims to:

- Increase the pipeline of students from underrepresented minorities or disadvantaged backgrounds to the biomedical research community.
- Prepare students to successfully apply to biomedical graduate programs.
- Introduce students to PhDs and MD/PhDs and the myriad of research goals in biomedical research.

For more information on YSERE, please email jaclyn.davis@yale.edu | sundae.black@yale.edu

To fill out an application, scan the QR code or visit https://bit.ly/YSEREapp

The YSERE 2022 is made possible by generous support from Yale Center for Clinical Investigation (YCCI) and Yale Cooperative Center for Excellence in Hematology (YCCEH). YSERE 2022 is co-organized by YCCI, YCCEH, Yale Department of Genetics and Yale Stem Cell Center.

To learn about past and current YCCI interns, scan the QR code or visit https://bit.ly/internsYCCI
Program Eligibility

College students who align with the program objectives are encouraged to apply. Applicants are required to be 18 years of age or above at the program start date.

Examples of eligible students include:

• From educationally or economically disadvantaged backgrounds
• Identify with a group that is racially/ethnically underrepresented in research (e.g. Black/African American, Hispanic/Latino, Native American, Alaska Native, Native Hawaiian, Pacific Islander)
• First in their family to attend college

Application Information

Required application materials include:

• Transcript
• Resume (including extracurricular activities)
• FAFSA – Estimated Family Contribution Sheet
• Two letters of recommendation (one from a science faculty member)
• Personal statement

APPLICATIONS DUE MAY 31, 2022

“I plan on going into research because of this program. There is so much information that is lacking in regards to preparation for this career path both in high school and college. Having the opportunity to talk with various Yale scientists, and hearing about their projects and labs gave me the opportunity to ask many questions, not just about how research is conducted, but what path they chose to get there. I have a better game plan now.”
