Clinical Investigation

Yale SCHOOL OF MEDICINE
*Office of Physician-Scientist
and Scientist Development*

Date: December 5, 2022

To: Deans, Chairs, and Yale Faculty

From: Brian Smith and John Krystal, Co-Directors of YCCI, and Keith Choate, Associate Dean for Physician-Scientist Development

Re: Nominations of junior faculty members for YCCI Scholar Awards and Yale Physician-Scientist Development Awards

2023 YCCI Scholar Awards and Yale Physician-Scientist Development Awards

We are pleased to announce a request for applications for the YCCI Scholar Awards and Yale Physician-Scientist Development Awards, which provide salary and/or research funds to a select number of junior faculty members who are strongly committed to research careers focused on improving human health. This includes basic, translational, clinical, and community-based research. Individuals must be nominated by a department chair, division head/section chief, or center/program director. The primary aim of these awards is to prepare the applicant for a successful independent research career, so career development and mentoring plans are very important. Awards will be for a total of two years. Funds may be requested to cover up to 75% of an individual's salary (with a maximum of \$120,000, including fringe benefits per year) and up to \$25,000 of research support per year. Applicants who already have a career development award or who are the Principal Investigator on an award that includes direct costs of \geq \$200,000/year for two or more years are not eligible for salary support but may apply for up to \$25,000 in research support per year (the specific aims of this additional research support must be different from the specific aims of the career development award, though they can be related). Applicants who have substantial start-up funds may not be eligible for salary support; this will be determined at the time of the award.

Areas of Special Emphasis

The YCCI Scholar program and YPSD Award will be open to all applicants training across the full span (T0-T4) of basic, clinical, translational, and community-based research focused on human health. All applications will be accepted and reviewed based on scientific merit. As we strongly support a diverse scientific workforce, we encourage applications from investigators who identify as being from a group underrepresented in health-related research, see special emphasis below for additional information.

Key Dates

Due date for letters of intent: **Friday, January 6, 2023, at 5:00 PM**

Due date for full applications: **Friday, February 10, 2023, at 5:00 PM**

Earliest anticipated start date: **Saturday, July 1, 2023**

Letter of Intent

A letter of intent is required. Letters of intent should be submitted by 5:00 PM on Friday, January 6, 2023. Please visit <https://medicine.yale.edu/ycci/education/jrfacscholars/scholars-rfa/> for information on how to submit a letter of intent. Please include an Other Support page that lists all start-up funds, current and past grants, and grant applications that are pending or that you expect to submit before July 1, 2023. Note that the purpose of the letter of intent is to confirm your eligibility and to plan for the review of the proposals and will have no effect on the scoring of the proposal.

Full Application

Complete applications must be submitted by 5:00 PM on Friday, February 10, 2023. Please refer to the application packet for detailed instructions. Copies of the application packet can be downloaded from <https://medicine.yale.edu/ycci/education/jrfacscholars/scholars-rfa/> and must be submitted online.

Special Emphasis: Promotion of Diversity in Translational Research

YCCI Scholar Program and YPSD Award are committed to attracting outstanding junior faculty members who are members of populations that are underrepresented in the biomedical research workforce and who want to pursue careers in any type of translational research. Such applicants will be a member of a population identified by NIH as under-represented in the U.S. biomedical, clinical, behavioral, and social sciences research enterprise (see [NIH NOT-OD-20-031](#)). Awardees will receive training in the use of state-of-the-art research tools; training to enhance their abilities to work collaboratively in complex multidisciplinary research teams; and outstanding mentoring (including concordant mentoring) by experienced and diverse faculty that will support the junior faculty member's long-term professional development, including connecting diverse individuals to support networks. We will also provide access to resources for retention and the elimination of barriers to career transition.

Scholar Opportunities

As a YCCI scholar and YPSD Awardee, you will join a cohort of multi-disciplinary scholars across the Yale Schools of Medicine, Public Health, and Nursing and engage in the following activities:

- Research Opportunities for Clinical And Translational Studies (ROCATS): this summer series serves as both an introduction to the breadth and depth of translational research opportunities at Yale and beyond and as the platform for forming peer mentoring teams leading to a year-long team science group project.
- *Research-in-Progress*: this series allows scholars to present their research progress to their colleagues at these semi-monthly meetings throughout the academic year.
- Interdisciplinary Teamwork in Translational Research: this series focuses on ways to lead and work effectively on teams and is hosted by Daryn David, PhD, Associate Research Scientist in the Child Study Center.
- Scholars will also participate in one or two CTSA meetings annually and attend local YCCI and YPSD educational events, including but not limited to scholar orientation, Robert Sherwin All Scholars Day, Yale-Rockefeller Day, and the Janeway Society Annual Retreat.

Requirements

- Applicants must have a full-time Yale faculty appointment at the level of Assistant Professor, Instructor, Associate Research Scientist, or Research Scientist at the time of the award. The appointment must not be contingent upon receipt of this award. Faculty who do not have an appointment as Assistant Professor must have a section of their Department Chair's letter that describes the Department's long-term commitment to the applicant and the applicant's trajectory for promotion while at Yale. The trajectory for promotion must not be contingent upon receipt of this award.

- The applicant must have been a **faculty member for fewer than five years by the earliest anticipated start date, Saturday, July 1, 2023**. This 5-year period is cumulative and includes all appointments as an assistant professor, associate research scientist, lecturer, or instructor at any institution (any part-time appointments and leaves of absence should be described and will be considered in calculating the total time at a faculty rank).
- Applicants cannot have previously received a YCCI Scholar Award, K-12 award, or YPSD Award.
- Applicants must have a clearly documented career path to becoming an independent investigator.
- Applicants cannot have been a principal investigator on any research grant that provides \$200,000 or more in direct costs per year except for non-NIH career development awards and NIH R03 grants.
- Foreign subcontracts are not allowable under this mechanism, and research at foreign sites will require approval by NCATS prior to an award.
- Department Chairs/Section Chiefs should provide evidence of a strong commitment to these applicants in their support letters.
- The NIH stipulates that **at the time of appointment** to a YCCI Scholar Award, scholars cannot have a pending application for any other PHS mentored career development award (e.g., K07, K08, K22, K23). The Other Support document needs to include all pending and planned grant applications.

Salary Support

- Applicants may request as much as 75% salary support up to a maximum of \$120,000 (including fringe benefits) per year.
- Applicants with a K career development award are not eligible for salary support from a YCCI Scholar Award or YPSD Award. Applicants with other types of career development awards may be eligible for salary support dependent on the size of the career award.
- Applicants who have substantial start-up funds may not be eligible for salary support; this will be determined at the time of the award.
- Recipients of this award may receive compensation on Federal awards as the Program Director/Principal Investigator or in another role (e.g., co-Investigator) as long the specific aims of the other supporting grant(s) differ from those of your YCCI Scholar award.
- Departments will need to provide 50% of the requested salary support, not to exceed \$60K annually, for applicants who are not U.S. citizens or non-citizen nationals or who have not lawfully been admitted to the U.S. for permanent residence at the time an award is made.
- Applicants who have already received an Individual K award or been supported on a KL2 or K12 award are not eligible to receive salary support.
- Applicants must commit 75% professional effort to their research and training regardless of the amount of salary support that they receive. Exceptions to this requirement are made for surgeons who can justify the need for extra time to maintain their surgical skills; surgeons must commit at least 50% professional effort to their research and training. This commitment should be outlined in the letter of support and must not be contingent upon receipt of this award.

Research Support

- Applicants may request up to \$25,000 of research support per year.
- Applicants with career development awards at the time of application are not eligible for salary support but may request up to \$25,000 in research support per year. If so, they must devote 75% professional effort to research and training, and the project must be distinct from (although possibly related to) the one supported by the career development award. Exceptions to this requirement are made for surgeons who can justify the

need for extra time to maintain their surgical skills; surgeons must commit at least 50% professional effort to their research and training.

- Applicants requesting only research support must have career awards that will remain active during the entire two years of their YCCI Scholar or YPSD Award.
- Departmental support will generally be expected for recipients with substantial start-up packages.

Additional Terms of the Award

- After an applicant is appointed as a YCCI Scholar or YPSD Awardee, they may apply for an individual K award. If such an application is successful, they will be required to give up salary support. In some instances, it may be possible to keep the research support, provided that funds are available and the project is distinct from that supported by the individual K award.
- Recipients must be prepared to start the award on time, so all required approvals (IRB, IACUC, etc.) must be submitted by the earliest anticipated start date. Projects that involve human subjects research or live vertebrate animals will also need to be approved by the NIH before we can release funds for the research component of the proposal.
- The second year of a YCCI Scholar or YPSD award is contingent upon satisfactory progress during the first year.
- Recipients will be required to complete training in the responsible conduct of research or to show documentation of completion of such training.
- Funds remaining at the end of the award year (for either research or salary support) CANNOT be rolled over to the following year per NIH rules.

Institutional Support

Departments, sections, or programs with available funds are encouraged to provide additional support to scholars. While not always required, this support may result in an overall increase in the number of funded scholars.

Departments may supplement YCCI Scholar's or YPSD Awardee's salary to a level consistent with the institution's salary scale. For effort directly committed to the YCCI Scholar or YPSD award, salary supplementation is allowable but must be from non-Federal sources (including institutional sources). Non-Federal or institutional supplementation of salary must not require extra duties or responsibilities that would interfere with the goals of the YCCI Scholar or YPSD Award. For effort not directly committed to the YCCI Scholar award or YPSD Award, recipients may devote effort, with compensation, on Federal or non-Federal sources as the Program Director/Principal Investigator (PD/PI) or in another role (e.g., co-Investigator), as long the specific aims of the other supporting grant(s) differ from those of the YCCI Scholar award or YPSD award.

Additional Information

Finally, please see the YCCI website at <http://ycci.yale.edu> for a full description of the requirements of this award. For questions about the application process and eligibility, please contact Christine Costantino (YCCI_Funding_Opportunities@yale.edu). For questions related to the science of the project, please contact Drs. Lloyd Cantley (Lloyd.Cantley@yale.edu), Eugene Shapiro (Eugene.Shapiro@yale.edu), or E. Jennifer Edelman (EJennifer.Edelman@yale.edu).
