Global Health Seminar (EPH 591 01)
Fall 2023

The Global Health Seminar is a weekly course for students in the health professional schools to be exposed to key issues upon which they may base future research, service, and clinical pursuits in the field of global health. The course features faculty from across the health professional schools and other global health experts from around the world. Its collaborative nature provides a rich environment for interdisciplinary dialogue. The Global Health Seminar is a requirement for students in the Global Health Concentration at the Yale School of Public Health (YSPH) and for students in the Certificate in Global Medicine at the Yale School of Medicine (YSM). Students from YSPH must take the course in their first year. The objectives of the course are for students to:

- gain exposure to a variety of perspectives on current challenges in global health;
- engage in meaningful discussions with health professionals working in medicine, nursing, and public health including Yale faculty and outside experts; and
- cultivate relationships with Yale faculty, outside experts, and students resulting in potential research/fellowship opportunities.

Class Participation and Reading

Before each session, 1 - 2 readings and discussion questions will be posted. Students are required to study the readings and come prepared with reactions to the discussion questions. Students are encouraged to articulate other questions and ideas for class discussion. The success of each session is dependent upon active participation.

- Thursdays, 12:00 – 12:50
- 60 College Street, Winslow Auditorium

Faculty Director
Michael Skonieczny, Lecturer in Public Health; Deputy Director, Yale Institute for Global Health (michael.skonieczny@yale.edu)

Program Manager
Anjuli Bodyk, Assistant Director, Global Health Concentration at YSPH (anjuli.bodyk@yale.edu)
