GAVI

Public Policy Research and Analysis Fellow

LOCATION: Geneva, Switzerland/Remote TBD

- Produce in-depth research paper on the impact of COVID-19 on routine immunisation in conflict-affected and fragile settings, undertaking expert interviews and secondary literature review.
- Undertake desk research, as requested, on impact of COVID-19 on routine immunisation focusing on marginalised and vulnerable communities and contexts with a view to COVID-19 impact on access to primary health care, routine immunization and well-being of children.
- Regularly monitor, flag, and summarise latest research and analysis from think tanks, research institutes and scientific journals relating to health equity and access to vaccines.
- Screen and review publications, policy and position documents and agreements, from international organisations, non-governmental organisations, media outlets, the public and private sectors, and other information sources, relevant to Gavi public policy research and advocacy needs.
- Identify new data points, and digital resources on thematic and cross-cutting issues relevant for advocating Gavi priorities on equity and COVID-19 vaccines.
- Retrieve, collate and present institutional knowledge, from the PPE databases and from across departments, into succinct analyses as requested by line manager.
- Contribute to development of policy briefings in support of Gavi public policy research and advocacy priorities.
- Assist with the preparation, representation, and logistics of various meetings as needed.

Language Requirement: Fluency in English, and at least one other UN language is helpful but not required.

Eligible Students: Master/Bachelor’s degree focused on global health, international relations, international development, law or related experience; research and professional writing or publishing experience in international development, international relations or global health policies.

Required Skills: In-depth knowledge of public health issues in fragile and low-income contexts; good understanding of global health and multilateral architecture; strong analytical and critical reasoning skills, and ability to make logical or implied connections between policy issues, political agendas and global priorities; ability to pick up new knowledge and synthesize complex information across thematic topics into salient arguments; excellent writing skills and the ability to transform technical knowledge into policy-relevant content; keen interest in current global health, humanitarian affairs and international development; highly organised, diplomatic, and capacity to work independently, rapidly and with attention to detail in a fast-paced environment; strong interpersonal skills, and ability to work in multicultural environment.
Innovative Finance Fellow

LOCATION: Washington, DC; Geneva, Switzerland/Remote TBD

Purpose of the Position: Support project and product development including research, pitch development, presentations, and coordination.

Key Results Expected
- Timely and high-quality research, presentation and coordination support on IF product development and IFFIm strategic initiatives.
- High quality support for planning and preparation of IFFIm events/activities.
- Timely and high-quality support for the smooth operation of IF.
- Support in financial data analyses and presentations.
- Facilitate IF knowledge management through streamlined structuring and organisation of information/documents.

Main Duties/Responsibilities
- Support Innovative Finance’s broader product development activity through research, pitch development and coordination.
- Support IFFIm’s strategic initiatives, including research, presentation preparations, and coordination.
- Support and help with preparations for other IFFIm periodic events/activities, such as: IFFIm Board meetings; IFFIm Donor meetings; and IFFIm communications (website, brochure, resource guides, etc).
- Support IF team’s engagement with IFFIm stakeholders, including other teams across the Secretariat, current and prospective IFFIm donors, World Bank counterparts, etc.
- Support development and implementation of streamlined knowledge management system.
- Support IFFIm analytics including data organisation, modeling and presentation.
- Support to the COVAX Facility as needed.
- Provide general operational support to the IF team.
- Additional ad hoc research, writing, presentation support as needed.

Qualifications
- Graduate student or undergraduate student, preferably in junior or senior year.

Skills/Competencies
- Some familiarity with public health and/or immunization issues.
- Some familiarity with financial markets or corporate finance.
- Strong communication skills.
- Proficiency using Microsoft Office applications including Word, Excel and PowerPoint.

Languages
- Written and spoken fluency in English is required.
- Written and spoken fluency in French is an asset, another UN language particularly French.
SAVE THE CHILDREN

Emergency Health Fellow
LOCATION: Remote

Mobile clinics are frequently utilized in humanitarian settings. However, global standards are lacking in terms of service packages and operational details and, thus, many different forms and functions of mobile clinics exists. The type, frequency, and quality of services varies. These challenges hinder populations affected by humanitarian crisis from receiving quality essential services when mobile clinics are utilized as a service delivery platform. Save the Children received funding to conduct a landscape analysis to understand how different stakeholders are using and funding mobile clinics, what criteria are used to measure success, and what impact has been achieved via mobile clinics. The landscape analysis will also examine success and impact from the service utilization prospectively and identify markers of quality for the provision of health services through mobile clinics. The Emergency Health Fellow will be part of the research team and work closely with the Humanitarian Research Advisor to conduct data collection and data analysis.

The Fellow will be a part of the research team and work closely with researchers on data collection and data analysis to understand how different stakeholders are using and funding mobile clinics, what criteria are used to measure success, and what impact has been achieved via mobile clinics. Specific duties include, but not limited to:

- **Desk Review**: focus on reviewing available literature, project documents and data as per provided review guidance, and summaries findings.
- **Key Informant Interview (KII)**: assist the research team to coordinate with KIIs to set interview time, join the interviews to take notes and conduct KII when applicable. Translate (when applicable), transcribe KII notes and assist with coding and data analysis.
- **Focus Group Discussion**: assist the research team to translate data collection tools, transcribe FGD recordings, and data quality control.
- **Data Analysis**: assist the research team to review translation and transcription, coding and data analysis. Working with the team to write up findings.

Language Requirement: N/A

Eligible Students: Undergraduate or master’s level students.

Required Skills: Professional proficiency in Microsoft Office suite; demonstrated ability to communicate and collaborate with individuals and teams; demonstrated commitment to fostering an environment of diversity, inclusion, and belonging.

Preferred Qualifications: Coursework and/or experience in program planning, research design, data collection, data analysis; coursework and/or experience in qualitative data analysis; professional proficiency in an additional language such as French, Arabic, Amharic, Dari, Pashto, French, Somali or Spanish.
Maternal, Newborn, and Reproductive Health in Emergencies Fellow

LOCATION: Remote

This opportunity will expose the fellow to a variety of both qualitative and quantitative research methods in humanitarian settings. It will allow the intern to learn more about interesting humanitarian settings of Yemen, Syria and Somalia and also explore out of the box ideas on programming for maternal, newborn, and reproductive health that happens in these countries. This opportunity will allow the intern to support the writing of data that has been collected on capacity building approaches; localization within maternal, newborn, and reproductive health programming; sexual violence in humanitarian settings and MISP (minimal initial services package) in humanitarian settings.

- Research for information and secondary data for the research
- Assist in detailed analysis of existing service data and other program data to create briefs and learning documents
- Assist in the writing of research reports and other end project learning briefs and documents
- Review and organize data with the help of the Monitoring, Evaluation, Research, and Learning team
- Coordinate with TAs and country technical teams when needed

Language Requirement: N/A

Eligible Students: Undergraduate or master’s level students.

Required Skills: Professional proficiency in Microsoft Office suite; demonstrated ability to communicate and collaborate with individuals and teams; professional proficiency with Microsoft Office suite; demonstrated commitment to fostering an environment of diversity, inclusion, and belonging.

UN DEVELOPMENT PROGRAMME (UNDP)

Digital Fellow

LOCATION: New York City/Remote TBD

UNDP helps countries to mainstream attention to HIV and health into action on inequalities, poverty and broader efforts to achieve and sustain the Sustainable Development Goals and the Paris Agreement commitments. UNDP works with over 100 low- and middle-income countries to better understand the legal, social, economic and environmental factors that play a crucial role in driving disease and pandemics, and to respond to such dynamics with appropriate integrated, rights-based and multi-sectoral policies and programmes, together with UN, academic, civil society and private sector partners. This includes supporting COVID-19 responses, including in the area of vaccine equity.

Description of proposed work & key responsibilities

- Research and develop a policy paper and issue brief on UNDP’s digital health portfolio – drawing on work across countries, the Global Policy Network, UNDP’s Accelerator Lab initiative and key external UN and non-UN partnerships.
- Monitoring, reporting and technical engagement/support on digital health.
• Support UNDP’s COVID-19 work on vaccine equity supporting research, data analysis, technical assistance and advocacy on the digital and data elements.

Reporting or Deliverable Requirements
• Research paper, Issue Brief, and presentation at the end of the internship.

Required skills
• Some experience working in health, and/or development with extensive academic training in related areas.
• Experience in the development and conduct of research and writing assignments.
• Experience in data analysis and presentation.
• Experience in the usage of computers and relevant software packages.

Student preference
• Graduate students are eligible for this position.
• Key competencies include:
  ▪ Demonstrates integrity by modeling the UN’s values and ethical standards.
  ▪ Advocates and promotes the vision, mission and strategic goals of UNDP.
  ▪ Displays cultural, gender, religion, race, nationality and age sensitivity and adaptability.
  ▪ Treats all people fairly without favoritism.
  ▪ Able to communicate clearly verbally and through email.
  ▪ Computer literate with a working knowledge of data analysis and info-graphic tools and a willingness to learn new applications.
  ▪ Strong research and writing skills.
  ▪ Knowledge in HIV, health and development issues.

Language skills or other requirements
• Fluency in both written and spoken English.
• Knowledge of other UN language is an asset.

Climate and Health Fellow
LOCATION: New York City/Remote TBD

Project background
UNDP helps countries to mainstream attention to HIV and health into action on inequalities, poverty and broader efforts to achieve and sustain the Sustainable Development Goals and the Paris Agreement commitments. UNDP works with over 100 low- and middle-income countries to better understand the legal, social, economic and environmental factors that play a crucial role in driving disease and pandemics, and to respond to such dynamics with appropriate integrated, rights-based and multi-sectoral policies and programmes, together with UN, academic, civil society and private sector partners. This includes supporting COVID-19 responses, including in the area of vaccine equity.
Description of proposed work & key responsibilities

- Research and develop a policy paper and issue brief on UNDP’s climate and health portfolio – drawing on work across countries, the Global Policy Network, UNDP’s Accelerator Lab initiative and UN and non-UN partnerships.
- Monitoring, reporting and technical engagement/support on climate and health, including as part of the Global Action Plan For Healthy Lives and Well-being for All.
- Support and elaborate the planetary health work portfolio in terms of research, data analysis, technical assistance and advocacy.
- Support UNDP’s COVID-19 work on vaccine equity supporting research, data analysis, technical assistance and advocacy.

Reporting or Deliverable Requirements

- Research paper, Issue Brief, and presentation at the end of the internship.

Required skills

- Some experience working in health, and/or development with extensive academic training in related areas.
- Experience in the development and conduct of research and writing assignments.
- Experience in data analysis and presentation.
- Experience in the usage of computers and relevant software packages.

Student preference

- Graduates students are eligible for this position
- Key competencies include:
  - Demonstrates integrity by modeling the UN’s values and ethical standards.
  - Advocates and promotes the vision, mission and strategic goals of UNDP.
  - Displays cultural, gender, religion, race, nationality and age sensitivity and adaptability.
  - Treats all people fairly without favoritism.
  - Able to communicate clearly verbally and through email
  - Computer literate with a working knowledge of data analysis and info-graphic tools and a willingness to learn new applications.
  - Strong research and writing skills.
  - Knowledge in HIV, health and development issues.

Language skills or other requirements

- Fluency in both written and spoken English.
- Knowledge of other UN language is an asset.
UNICEF

Maternal Newborn Adolescent Health Fellow (2 Fellows)
LOCATION: New York City/Remote TBD

The internship will contribute to UNICEF’s work in the Maternal Newborn Adolescent Health unit of the Health section in Programme Division, New York headquarters, around quantitative and qualitative analysis, development of knowledge products, advocacy and policy briefs and review of annual and period reports in the relevant areas. The internship will also contribute to facilitating direct and internet-based conversations with internal and external stakeholders in the above areas of the UNICEF workplan.

Key responsibilities
1. Consolidate, update, and review country information/databases in relevant technical discipline of school health, mental health, and adolescent health.
2. Contribute to data analysis and research on key adolescent health issues; the products of these will result in drafting of draft position papers, investment cases, policy briefs to for internal and external audiences.
3. Support development of health communications content and social media messaging reaching young people through UNICEF platforms.

Language Requirement: Fluency in English is required. Knowledge of Spanish is an asset.
Eligible Students: Graduate Student.
Required Skills: Excellent research and writing skills as evidenced by sample work provided.

THE WORLD BANK

COVID-19 Response and Primary Health Care Strengthening Fellow (2 Fellows)
LOCATION: Washington, DC/Remote TBD

The fellow will work with the World Bank’s Health Security and System Redesign team within the Health, Nutrition and Population Global Practice to provide analytical and technical support in two main areas: 1) Provide just-in time knowledge products and synthesizing epidemiology updates for COVID-19 including vaccine implementation; and 2) Provide technical and analytical support to PHC redesign analytics, with a particular focus on patient pathway analytics and opportunities for digital health innovation. Patient pathway analytics allow the understanding of how patients navigate the health system and their experiences and preferences to guide patient-centered decision making on innovative service delivery models that can be implemented or scaled up and how services can be reorganized to deliver quality primary care services.

Key responsibilities
1. Tracking of COVID-19 epidemiology and vaccination efforts globally
2. Synthesizing clinical and epidemiological evidence and implementation lessons from the roll-out of COVID-19 vaccination
3. Conduct and synthesize literature review on patient pathway analytics and service delivery innovation to support PHC transformation
4. Produce knowledge products to showcase findings, including briefs and presentations

Reporting or Deliverable Requirements
• The intern will work with the supervisor to determine weekly deliverables depending on context and need and will include briefs and presentations.

Required skills
• Public health knowledge, research and analytical skills, ability to gather, organize and synthesize information from diverse sources, ability to work professionally and sensitively in multi-cultural environments, ability to collaborate within teams, English language skills.

Language Requirement: English required. Other languages including French would be an asset.

Eligible Students: Both undergraduate and graduate students are eligible for this position.
